QUALIFIERS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

1d	Neither matrix spike nor matrix precision data could be provided for this analytical batch due to insufficient sample volume.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.
ED	Due to the extract's physical characteristics, the analysis was performed at dilution.
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
M0	Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
M3	Matrix spike recovery was outside laboratory control limits due to matrix interferences.
N2	The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.
R1	RPD value was outside control limits.
S0	Surrogate recovery outside laboratory control limits.
pH	Post-analysis pH measurement indicates insufficient VOA sample preservation.

RE: Phase I Environmental Site Assessment for: Hough Senior Independent Living Property
Hough Avenue between East 89th Street and East 90th Street
Cleveland, Cuyahoga County, Ohio
Project Number: 640.16A

Dear Project Administration Manager:

Please find enclosed the Phase I Environmental Site Assessment for the Subject Property dated March 31, 2025, and addressed to the Ohio Housing Finance Agency (OHFA) and Ohio Development Services Agency (ODSA).

It is Partners' understanding that the information contained in the Environmental Site Assessment will be used by OHFA in considering proposed financing of residential development of the property and, furthermore, that OHFA and ODSA may rely upon the Environmental Site Assessment as if it were issued to OHFA and ODSA.

Partners certifies that the attached is a true, correct and complete copy of the Environmental Site Assessment and that the report represents Partners' professional opinion of the site as of this date. Partners also confirms the evaluation, recommendations and conclusions contained in the Environmental Site Assessment as of this date and that the Environmental Site Assessment has been performed in conformance with the scope and limitations of both the ASTM Practice E1527-21, and OHFA'S Environmental Review Requirements.

Sincerely,
Partners Environmental Consulting, Inc.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 01/24/2025

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

With respect to coverage afforded by this endorsement, the provisions of the policy apply unless modified by the endorsement.

A. NON-OWNED AIRCRAFT

Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** exclusion **g. Aircraft, Auto Or Watercraft** does not apply to an aircraft provided:

1. It is not owned by any insured;

2. It is hired, chartered or loaned with a trained paid crew;

3. The pilot in command holds a currently effective certificate, issued by the duly constituted authority of the United States of America or Canada, designating her or him a commercial or airline pilot; and

4. It is not being used to carry persons or property for a charge.

However, the insurance afforded by this provision does not apply if there is available to the insured other valid and collectible insurance, whether primary, excess (other than insurance written to apply specifically in excess of this policy), contingent or on any other basis, that would also apply to the loss covered under this provision.

B. NON-OWNED WATERCRAFT

Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** Subparagraph **(2)** of exclusion **g. Aircraft, Auto Or Watercraft** is replaced by the following:

This exclusion does not apply to:

(2) A watercraft you do not own that is:

(a) Less than 52 feet long; and

(b) Not being used to carry persons or property for a charge.

C. PROPERTY DAMAGE LIABILITY - ELEVATORS

1. Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** Subparagraphs **(3), (4)** and **(6)** of exclusion **j. Damage To Property** do not apply if such "property damage" results from the use of elevators. For the purpose of this provision, elevators do not include vehicle lifts. Vehicle lifts are lifts or hoists used in automobile service or repair operations.

2. The following is added to **Section IV - Commercial General Liability Conditions,** Condition **4. Other Insurance,** Paragraph **b. Excess Insurance:**

The insurance afforded by this provision of this endorsement is excess over any property insurance, whether primary, excess, contingent or on any other basis.

D. EXTENDED DAMAGE TO PROPERTY RENTED TO YOU (Tenant's Property Damage)

If Damage To Premises Rented To You is not otherwise excluded from this Coverage Part:

1. Under Paragraph **2. Exclusions of Section I - Coverage A - Bodily Injury and Property Damage Liability:**

a. The fourth from the last paragraph of exclusion **j. Damage To Property** is replaced by the following:

Paragraphs **(1), (3)** and **(4)** of this exclusion do not apply to "property damage" (other than damage by fire, lightning, explosion, smoke, or leakage from an automatic fire protection system) to:

(i) Premises rented to you for a period of 7 or fewer consecutive days; or

(ii) Contents that you rent or lease as part of a premises rental or lease agreement for a period of more than 7 days.

Paragraphs **(1), (3)** and **(4)** of this exclusion do not apply to "property damage" to contents of premises rented to you for a period of 7 or fewer consecutive days.

A separate limit of insurance applies to this coverage as described in **Section III - Limits of Insurance.**

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

112 of 316

b. The last paragraph of subsection **2. Exclusions** is replaced by the following:

Exclusions **c.** through **n.** do not apply to damage by fire, lightning, explosion, smoke or leakage from automatic fire protection systems to premises while rented to you or temporarily occupied by you with permission of the owner. A separate limit of insurance applies to Damage To Premises Rented To You as described in **Section III - Limits Of Insurance.**

2. Paragraph **6.** under **Section III - Limits Of Insurance** is replaced by the following:

6. Subject to Paragraph **5.** above, the Damage To Premises Rented To You Limit is the most we will pay under Coverage **A** for damages because of "property damage" to:

a. Any one premise:

(1) While rented to you; or

(2) While rented to you or temporarily occupied by you with permission of the owner for damage by fire, lightning, explosion, smoke or leakage from automatic protection systems; or

b. Contents that you rent or lease as part of a premises rental or lease agreement.

3. As regards coverage provided by this provision **D. EXTENDED DAMAGE TO PROPERTY RENTED TO YOU (Tenant's Property Damage) -** Paragraph **9.a.** of **Definitions** is replaced with the following:

9.a. A contract for a lease of premises. However, that portion of the contract for a lease of premises that indemnifies any person or organization for damage by fire, lightning, explosion, smoke, or leakage from automatic fire protection systems to premises while rented to you or temporarily occupied by you with the permission of the owner, or for damage to contents of such premises that are included in your premises rental or lease agreement, is not an "insured contract".

E. MEDICAL PAYMENTS EXTENSION

If **Coverage C Medical Payments** is not otherwise excluded, the Medical Payments provided by this policy are amended as follows:

Under Paragraph **1. Insuring Agreement** of **Section I - Coverage C - Medical Payments,** Subparagraph **(b)** of Paragraph **a.** is replaced by the following:

(b) The expenses are incurred and reported within three years of the date of the accident; and

F. EXTENSION OF SUPPLEMENTARY PAYMENTS - COVERAGES A AND B

1. Under **Supplementary Payments - Coverages A** and **B**, Paragraph **1.b.** is replaced by the following:

b. Up to **$3,000** for cost of bail bonds required because of accidents or traffic law violations arising out of the use of any vehicle to which the Bodily Injury Liability Coverage applies. We do not have to furnish these bonds.

2. Paragraph **1.d.** is replaced by the following:

d. All reasonable expenses incurred by the insured at our request to assist us in the investigation or defense of the claim or "suit", including actual loss of earnings up to **$500** a day because of time off from work.

G. ADDITIONAL INSUREDS - BY CONTRACT, AGREEMENT OR PERMIT

1. Paragraph **2.** under **Section II - Who Is An Insured** is amended to include as an insured any person or organization whom you have agreed to add as an additional insured in a written contract, written agreement or permit. Such person or organization is an additional insured but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused in whole or in part by:

a. Your acts or omissions, or the acts or omissions of those acting on your behalf, in the performance of your on going operations for the additional insured that are the subject of the written contract or written agreement provided that the "bodily injury" or "property damage" occurs, or the "personal and advertising injury" is committed, subsequent to the signing of such written contract or written agreement; or

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

b. Premises or facilities rented by you or used by you; or

c. The maintenance, operation or use by you of equipment rented or leased to you by such person or organization; or

d. Operations performed by you or on your behalf for which the state or political subdivision has issued a permit subject to the following additional provisions:

(1) This insurance does not apply to "bodily injury", "property damage", or "personal and advertising injury" arising out of the operations performed for the state or political subdivision;

(2) This insurance does not apply to "bodily injury" or "property damage" included within the "completed operations hazard".

(3) Insurance applies to premises you own, rent, or control but only with respect to the following hazards:

(a) The existence, maintenance, repair, construction, erection, or removal of advertising signs, awnings, canopies, cellar entrances, coal holes, driveways, manholes, marquees, hoist away openings, sidewalk vaults, street banners, or decorations and similar exposures; or

(b) The construction, erection, or removal of elevators; or

(c) The ownership, maintenance, or use of any elevators covered by this insurance.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and

2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

With respect to Paragraph **1.a.** above, a person's or organization's status as an additional insured under this endorsement ends when:

(1) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

(2) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

With respect to Paragraph **1.b.** above, a person's or organization's status as an additional insured under this endorsement ends when their written contract or written agreement with you for such premises or facilities ends.

With respects to Paragraph **1.c.** above, this insurance does not apply to any "occurrence" which takes place after the equipment rental or lease agreement has expired or you have returned such equipment to the lessor.

The insurance provided by this endorsement applies only if the written contract or written agreement is signed prior to the "bodily injury" or "property damage".

We have no duty to defend an additional insured under this endorsement until we receive written notice of a "suit" by the additional insured as required in Paragraph **b.** of Condition **2. Duties In the Event Of Occurrence, Offense, Claim Or Suit** under **Section IV - Commercial General Liability Conditions.**

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

2. With respect to the insurance provided by this endorsement, the following are added to Paragraph **2. Exclusions** under **Section I - Coverage A - Bodily Injury And Property Damage Liability:**

This insurance does not apply to:

a. "Bodily injury" or "property damage" arising from the sole negligence of the additional insured.

b. "Bodily injury" or "property damage" that occurs prior to you commencing operations at the location where such "bodily injury" or "property damage" occurs.

c. "Bodily injury", "property damage" or "personal and advertising injury" arising out of the rendering of, or the failure to render, any professional architectural, engineering or surveying services, including:

(1) The preparing, approving, or failing to prepare or approve, maps, shop drawings, opinions, reports, surveys, field orders, change orders or drawings and specifications; or

(2) Supervisory, inspection, architectural or engineering activities.

This exclusion applies even if the claims against any insured allege negligence or other wrongdoing in the supervision, hiring, employment, training or monitoring of others by that insured, if the "occurrence" which caused the "bodily injury" or "property damage", or the offense which caused the "personal and advertising injury", involved the rendering of, or the failure to render, any professional architectural, engineering or surveying services.

d. "Bodily injury" or "property damage" occurring after:

(1) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

(2) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

e. Any person or organization specifically designated as an additional insured for ongoing operations by a separate **ADDITIONAL INSURED -OWNERS, LESSEES OR CONTRACTORS** endorsement issued by us and made a part of this policy.

3. With respect to the insurance afforded to these additional insureds, the following is added to **Section III - Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

a. Required by the contract or agreement; or

b. Available under the applicable Limits of Insurance shown in the Declarations;

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declaratio ns.

H. PRIMARY AND NON-CONTRIBUTORY ADDITIONAL INSURED EXTENSION

This provision applies to any person or organization who qualifies as an additional insured under any form or endorsement under this policy.

Condition **4. Other Insurance of SECTION IV - COMMERCIAL GENERAL LIABILITY CONDITIONS** is amended as follows:

a. The following is added to Paragraph **a. Primary Insurance:**

If an additional insured's policy has an Other Insurance provision making its policy excess, and you have agreed in a written contract or written agreement to provide the additional insured coverage on a primary and noncontributory basis, this policy shall be primary and we will not seek contribution from the additional insured's policy for damages we cover.

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

62273969 002308 560 115 of 316

b. The following is added to Paragraph **b. Excess Insurance:**

When a written contract or written agreement, other than a premises lease, facilities rental contract or agreement, an equipment rental or lease contract or agreement, or permit issued by a state or political subdivision between you and an additional insured does not require this insurance to be primary or primary and non-contributory, this insurance is excess over any other insurance for which the additional insured is designated as a Named Insured.

Regardless of the written agreement between you and an additional insured, this insurance is excess over any other insurance whether primary, excess, contingent or on any other basis for which the additional insured has been added as an additional insured on other policies.

I. ADDITIONAL INSUREDS - EXTENDED PROTECTION OF YOUR "LIMITS OF INSURANCE"

This provision applies to any person or organization who qualifies as an additional insured under any form or endorsement under this policy.

1. The following is added to Condition **2. Duties In The Event Of Occurrence, Offense, Claim or Suit:**

An additional insured under this endorsement will as soon as practicable:

a. Give written notice of an "occurrence" or an offense that may result in a claim or "suit" under this insurance to us;

b. Tender the defense and indemnity of any claim or "suit" to all insurers whom also have insurance available to the additional insured; and

c. Agree to make available any other insurance which the additional insured has for a loss we cover under this Coverage Part.

d. We have no duty to defend or indemnify an additional insured under this endorsement until we receive written notice of a "suit" by the additional insured.

2. The limits of insurance applicable to the additional insured are those specified in a written contract or written agreement or the limits of insurance as stated in the Declarations of this policy and defined in **Section III - Limits of Insurance** of this policy, whichever are less. These limits are inclusive of and not in addition to the limits of insurance available under this policy.

J. WHO IS AN INSURED - INCIDENTAL MEDICAL ERRORS / MALPRACTICE
WHO IS AN INSURED - FELLOW EMPLOYEE EXTENSION - MANAGEMENT EMPLOYEES

Paragraph **2.a.(1)** of **Section II - Who Is An Insured** is replaced with the following:

(1) "Bodily injury" or "personal and advertising injury":

(a) To you, to your partners or members (if you are a partnership or joint venture), to your members (if you are a limited liability company), to a co-"employee" while in the course of his or her employment or performing duties related to the conduct of your business, or to your other "volunteer workers" while performing duties related to the conduct of your business;

(b) To the spouse, child, parent, brother or sister of that co-"employee" or "volunteer worker" as a consequence of Paragraph **(1) (a)** above;

(c) For which there is any obligation to share damages with or repay someone else who must pay damages because of the injury described in Paragraphs **(1) (a)** or **(b)** above; or

(d) Arising out of his or her providing or failing to provide professional health care services. However, if you are not in the business of providing professional health care services or providing professional health care personnel to others, or if coverage for providing professional health care services is not otherwise excluded by separate endorsement, this provision (Paragraph **(d)**) does not apply.

Paragraphs **(a)** and **(b)** above do not apply to "bodily injury" or "personal and advertising injury" caused by an "employee" who is acting in a supervisory capacity for you. Supervisory capacity as used herein means the "employee's" job responsibilities assigned by you, includes the direct supervision of other "employees" of yours. However, none of these "employees" are insureds for "bodily injury" or "personal and

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

advertising injury" arising out of their willful conduct, which is defined as the purposeful or willful intent to cause "bodily injury" or "personal and advertising injury", or caused in whole or in part by their intoxication by liquor or controlled substances.

The coverage provided by provision **J.** is excess over any other valid and collectable insurance available to your "employee".

K. NEWLY FORMED OR ADDITIONALLY ACQUIRED ENTITIES

Paragraph **3.** of **Section II - Who Is An Insured** is replaced by the following:

3. Any organization you newly acquire or form and over which you maintain ownership or majority interest, will qualify as a Named Insured if there is no other similar insurance available to that organization. However:

a. Coverage under this provision is afforded only until the expiration of the policy period in which the entity was acquired or formed by you;

b. Coverage **A** does not apply to "bodily injury" or "property damage" that occurred before you acquired or formed the organization; and

c. Coverage **B** does not apply to "personal and advertising injury" arising out of an offense committed before you acquired or formed the organization.

d. Records and descriptions of operations must be maintained by the first Named Insured.

No person or organization is an insured with respect to the conduct of any current or past partnership, joint venture or limited liability company that is not shown as a Named Insured in the Declarations or qualifies as an insured under this provision.

L. FAILURE TO DISCLOSE HAZARDS AND PRIOR OCCURRENCES

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **6. Representations:**

Your failure to disclose all hazards or prior "occurrences" existing as of the inception date of the policy shall not prejudice the coverage afforded by this policy provided such failure to disclose all hazards or prior "occurrences" is not intentional.

M. KNOWLEDGE OF OCCURRENCE, OFFENSE, CLAIM OR SUIT

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **2. Duties In The Event of Occurrence, Offense, Claim Or Suit:**

Knowledge of an "occurrence", offense, claim or "suit" by an agent, servant or "employee" of any insured shall not in itself constitute knowledge of the insured unless an insured listed under Paragraph **1.** of **Section II - Who Is An Insured** or a person who has been designated by them to receive reports of "occurrences", offenses, claims or "suits" shall have received such notice from the agent, servant or "employee".

N. LIBERALIZATION CLAUSE

If we revise this Commercial General Liability Extension Endorsement to provide more coverage without additional premium charge, your policy will automatically provide the coverage as of the day the revision is effective in your state.

O. BODILY INJURY REDEFINED

Under **Section V - Definitions,** Definition **3.** is replaced by the following:

3. "Bodily Injury" means physical injury, sickness or disease sustained by a person. This includes mental anguish, mental injury, shock, fright or death that results from such physical injury, sickness or disease.

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

P. EXTENDED PROPERTY DAMAGE

Exclusion a. of **COVERAGE A. BODILY INJURY AND PROPERTY DAMAGE LIABILITY** is replaced by the following:

a. Expected Or Intended Injury

"Bodily injury" or "property damage" expected or intended from the standpoint of the insured. This exclusion does not apply to "bodily injury" or "property damage" resulting from the use of reasonable force to protect persons or property.

Q. WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US - WHEN REQUIRED IN A CONTRACT OR AGREEMENT WITH YOU

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **8. Transfer Of Rights Of Recovery Against Others To Us:**

We waive any right of recovery we may have against a person or organization because of payments we make for injury or damage arising out of your ongoing operations or "your work" done under a contract with that person or organization and included in the "products-completed operations hazard" provided:

1. You and that person or organization have agreed in writing in a contract or agreement that you waive such rights against that person or organization; and

2. The injury or damage occurs subsequent to the execution of the written contract or written agreement.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

BUSINESS AUTO COVERAGE ENHANCEMENT ENDORSEMENT

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM

With respect to coverage afforded by this endorsement, the provisions of the policy apply unless modified by the endorsement.

If the policy to which this endorsement is attached also contains a Business Auto Coverage Enhancement Endorsement with a specific state named in the title, this endorsement does not apply to vehicles garaged in that specified state.

SECTION I - COVERED AUTOS is amended as follows:

1. **TRAILERS - INCREASED LOAD CAPACITY**

   The following replaces Paragraph **C.1. Certain Trailers, Mobile Equipment And Temporary Substitute Autos** of **SECTION I - COVERED AUTOS:**

   "Trailers" with a load capacity of 3,000 pounds or less designed primarily for travel on public roads.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

SECTION II - LIABILITY COVERAGE is amended as follows:

2. NEWLY FORMED OR ACQUIRED SUBSIDIARIES

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. - Who Is An Insured** is amended to include the following as an "insured":

d. Any legally incorporated subsidiary of which you own more than 50 percent interest during the policy period. Coverage is afforded only for 90 days from the date of acquisition or formation. However, "insured" does not include any organization that:

(1) Is a partnership or joint venture; or

(2) Is an "insured" under any other automobile policy except a policy written specifically to apply in excess of this policy; or

(3) Has exhausted its Limit of Insurance or had its policy terminated under any other automobile policy.

Coverage under this provision **d.** does not apply to "bodily injury" or "property damage" that occurred before you acquired or formed the organization.

3. EMPLOYEES AS INSUREDS

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. Who Is An Insured** is amended to include the following as an "insured":

e. Any "employee" of yours while using a covered "auto" you do not own, hire or borrow but only for acts within the scope of their employment by you. Insurance provided by this endorsement is excess over any other insurance available to any "employee".

f. Any "employee" of yours while operating an "auto" hired or borrowed under a written contract or agreement in that "employee's" name, with your permission, while performing duties related to the conduct of your business and within the scope of their employment. Insurance provided by this endorsement is excess over any other insurance available to the "employee".

4. ADDITIONAL INSURED BY CONTRACT, AGREEMENT OR PERMIT

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. Who Is An Insured** is amended to include the following as an "insured":

g. Any person or organization with respect to the operation, maintenance or use of a covered "auto", provided that you and such person or organization have agreed in a written contract, written agreement, or permit issued to you by governmental or public authority, to add such person, or organization, or governmental or public authority to this policy as an "insured".

However, such person or organization is an "insured":

(1) Only with respect to the operation, maintenance or use of a covered "auto";

(2) Only for "bodily injury" or "property damage" caused by an "accident" which takes place after you executed the written contract or written agreement, or the permit has been issued to you; and

(3) Only for the duration of that contract, agreement or permit.

The "insured" is required to submit a claim to any other insurer to which coverage could apply for defense and indemnity. Unless the "insured" has agreed in writing to primary noncontributory wording per enhancement number 24, this policy is excess over any other collectible insurance.

5. SUPPLEMENTARY PAYMENTS

SECTION II - LIABILITY COVERAGE, Coverage Extensions, 2.a. Supplementary Payments, Paragraphs **(2)** and **(4)** are replaced by the following:

(2) Up to $3,000 for cost of bail bonds (including bonds for related traffic violations) required because of an "accident" we cover. We do not have to furnish these bonds.

(4) All reasonable expenses incurred by the "insured" at our request, including actual loss of earnings up to $500 a day because of time off from work.

© 2017 Liberty Mutual Insurance

Includes copyrighted material of Insurance Services Office Inc., with its Permission.

6. AMENDED FELLOW EMPLOYEE EXCLUSION

In those jurisdictions where, by law, fellow "employees" are not entitled to the protection afforded to the employer by the workers compensation exclusivity rule, or similar protection, the following provision is added:

SECTION II - LIABILITY, Exclusion B.5. Fellow Employee does not apply if the "bodily injury" results from the use of a covered "auto" you own or hire if you have workers compensation insurance in force for all of your "employees" at the time of "loss".

This coverage is excess over any other collectible insurance.

SECTION III - PHYSICAL DAMAGE COVERAGE is amended as follows:

7. HIRED AUTO PHYSICAL DAMAGE

Paragraph **A.4. Coverage Extensions** of **SECTION III - PHYSICAL DAMAGE COVERAGE,** is amended by adding the following:

If hired "autos" are covered "autos" for Liability Coverage, and if Comprehensive, Specified Causes of Loss or Collision coverage are provided under the Business Auto Coverage Form for any "auto" you own, then the Physical Damage coverages provided are extended to "autos":

a. You hire, rent or borrow; or

b. Your "employee" hires or rents under a written contract or agreement in that "employee's" name, but only if the damage occurs while the vehicle is being used in the conduct of your business,

subject to the following limit and deductible:

a. The most we will pay for "loss" in any one "accident" or "loss" is the smallest of:

(1) $50,000; or

(2) The actual cash value of the damaged or stolen property as of the time of the "loss"; or

(3) The cost of repairing or replacing the damaged or stolen property with other property of like kind and quality, minus a deductible.

b. The deductible will be equal to the largest deductible applicable to any owned "auto" for that coverage.

c. Subject to the limit, deductible and excess provisions described in this provision, we will provide coverage equal to the broadest coverage applicable to any covered "auto" you own.

d. Subject to a maximum of $1,000 per "accident", we will also cover the actual loss of use of the hired "auto" if it results from an "accident", you are legally liable and the lessor incurs an actual financial loss.

e. This coverage extension does not apply to:

(1) Any "auto" that is hired, rented or borrowed with a driver; or

(2) Any "auto" that is hired, rented or borrowed from your "employee" or any member of your "employee's" household.

Coverage provided under this extension is excess over any other collectible insurance available at the time of "loss".

8. TOWING AND LABOR

SECTION III - PHYSICAL DAMAGE COVERAGE, Paragraph **A.2. Towing,** is amended by the addition of the following:

We will pay towing and labor costs incurred, up to the limits shown below, each time a covered "auto" classified and rated as a private passenger type, "light truck" or "medium truck" is disabled:

a. For private passenger type vehicles, we will pay up to $75 per disablement.

b. For "light trucks", we will pay up to $75 per disablement. "Light trucks" are trucks that have a gross vehicle weight (GVW) of 10,000 pounds or less.

c. For "medium trucks" , we will pay up to $150 per disablement. "Medium trucks" are trucks that have a gross vehicle weight (GVW) of 10,001 - 20,000 pounds.

However, the labor must be performed at the place of disablement.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

9. PHYSICAL DAMAGE - ADDITIONAL TRANSPORTATION EXPENSE COVERAGE

Paragraph **A.4.a. Coverage Extensions, Transportation Expenses** of **SECTION III - PHYSICAL DAMAGE COVERAGE,** is amended to provide a limit of $50 per day and a maximum limit of $1,500.

10. RENTAL REIMBURSEMENT

SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage, is amended by adding the following:

a. We will pay up to $75 per day for rental reimbursement expenses incurred by you for the rental of an "auto" because of "accident" or "loss", to an "auto" for which we also pay a "loss" under Comprehensive, Specified Causes of Loss or Collision Coverages. We will pay only for those expenses incurred after the first 24 hours following the "accident" or "loss" to the covered "auto."

b. Rental Reimbursement requires the rental of a comparable or lessor vehicle, which in many cases may be substantially less than $75 per day, and will only be allowed for the period of time it should take to repair or replace the vehicle with reasonable speed and similar quality, up to a maximum of 30 days.

c. We will also pay up to $500 for reasonable and necessary expenses incurred by you to remove and replace your tools and equipment from the covered "auto". This limit is excess over any other collectible insurance.

d. This coverage does not apply unless you have a business necessity that other "autos" available for your use and operation cannot fill.

e. If "loss" results from the total theft of a covered "auto" of the private passenger type, we will pay under this coverage only that amount of your rental reimbursement expenses which is not already provided under Paragraph **4. Coverage Extension.**

f. No deductible applies to this coverage.

g. The insurance provided under this extension is excess over any other collectible insurance.

If this policy also provides Rental Reimbursement Coverage you purchased, the coverage provided by this Enhancement Endorsement is in addition to the coverage you purchased.

For the purposes of this endorsement provision, materials and equipment do not include "personal effects" as defined in provision **12.B.**

11. EXTRA EXPENSE - BROADENED COVERAGE

Under **SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage,** we will pay for the expense of returning a stolen covered "auto" to you. The maximum amount we will pay is $1,000.

12. PERSONAL EFFECTS COVERAGE

A. SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage, is amended by adding the following:

If you have purchased Comprehensive Coverage on this policy for an "auto" you own and that "auto" is stolen, we will pay, without application of a deductible, up to $600 for "personal effects" stolen with the "auto."

The insurance provided under this provision is excess over any other collectible insurance.

B. SECTION V - DEFINITIONS is amended by adding the following:

For the purposes of this provision, "personal effects" mean tangible property that is worn or carried by an "insured." "Personal effects" does not include tools, equipment, jewelry, money or securities.

13. ACCIDENTAL AIRBAG DEPLOYMENT

SECTION III - PHYSICAL DAMAGE COVERAGE, B. Exclusions is amended by adding the following:

If you have purchased Comprehensive or Collision Coverage under this policy, the exclusion for "loss" relating to mechanical breakdown does not apply to the accidental discharge of an airbag.

Any insurance we provide shall be excess over any other collectible insurance or reimbursement by manufacturer's warranty. However, we agree to pay any deductible applicable to the other coverage or warranty.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

14. PHYSICAL DAMAGE DEDUCTIBLE - VEHICLE TRACKING SYSTEM

SECTION III - PHYSICAL DAMAGE COVERAGE, D. Deductible, is amended by adding the following:

Any Comprehensive Deductible shown in the Declarations will be reduced by 50% for any "loss" caused by theft if the vehicle is equipped with a vehicle tracking device such as a radio tracking device or a global position device and that device was the method of recovery of the vehicle.

15. AUDIO, VISUAL AND DATA ELECTRONIC EQUIPMENT COVERAGE

SECTION III - PHYSICAL DAMAGE COVERAGE, B. Exclusions, Paragraph **a.** of the exception to exclusions **4.c.** and **4.d.** is deleted and replaced with the following:

Exclusions **4.c.** and **4.d.** do not apply to:

a. Electronic equipment that receives or transmits audio, visual or data signals, whether or not designed solely for the reproduction of sound, if the equipment is:

(1) Permanently installed in the covered "auto" at the time of the "loss" or removable from a housing unit that is permanently installed in the covered "auto"; and

(2) Designed to be solely operated by use from the power from the "auto's" electrical system; and

(3) Physical damage coverages are provided for the covered "auto".

If the "loss" occurs solely to audio, visual or data electronic equipment or accessories used with this equipment, then our obligation to pay for, repair, return or replace damaged or stolen property will be reduced by a $100 deductible.

16. LOAN / LEASE GAP COVERAGE (Not Applicable In New York)

A. Paragraph **C. Limit Of Insurance** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by adding the following:

The most we will pay for a "total loss" to a covered "auto" owned by or leased to you in any one "accident" is the greater of the:

1. Balance due under the terms of the loan or lease to which the damaged covered "auto" is subject at the time of the "loss" less the amount of:

a. Overdue payments and financial penalties associated with those payments as of the date of the "loss";

b. Financial penalties imposed under a lease due to high mileage, excessive use or abnormal wear and tear;

c. Costs for extended warranties, Credit Life Insurance, Health, Accident or Disability Insurance purchased with the loan or lease;

d. Transfer or rollover balances from previous loans or leases;

e. Final payment due under a "Balloon Loan";

f. The dollar amount of any unrepaired damage which occurred prior to the "total loss" of a covered "auto";

g. Security deposits not refunded by a lessor;

h. All refunds payable or paid to you as a result of the early termination of a lease agreement or as a result of the early termination of any warranty or extended service agreement on a covered "auto";

i. Any amount representing taxes;

j. Loan or lease termination fees; or

2. The actual cash value of the damage or stolen property as of the time of the "loss".

An adjustment for depreciation and physical condition will be made in determining the actual cash value at the time of the "loss". This adjustment is not applicable in Texas.

B. Additional Conditions

This coverage applies only to the original loan for which the covered "auto" that incurred the "loss" serves as collateral, or lease written on the covered "auto" that incurred the "loss".

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

C. SECTION V - DEFINITIONS is changed by adding the following:

As used in this endorsement provision, the following definitions apply:

"Total loss" means a "loss" in which the cost of repairs plus the salvage value exceeds the actual cash value.

A "balloon loan" is one with periodic payments that are insufficient to repay the balance over the term of the loan, thereby requiring a large final payment.

17. GLASS REPAIR - WAIVER OF DEDUCTIBLE

Paragraph **D. Deductible** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by the addition of the following:

No deductible applies to glass damage if the glass is repaired rather than replaced.

18. PARKED AUTO COLLISION COVERAGE (WAIVER OF DEDUCTIBLE)

Paragraph **D. Deductible** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by the addition of the following:

The deductible does not apply to "loss" caused by collision to such covered "auto" of the private passenger type or light weight truck with a gross vehicle weight of 10,000 lbs. or less as defined by the manufacturer as maximum loaded weight the "auto" is designed to carry while it is:

a. In the charge of an "insured";

b. Legally parked; and

c. Unoccupied.

The "loss" must be reported to the police authorities within 24 hours of known damage.

The total amount of the damage to the covered "auto" must exceed the deductible shown in the Declarations.

This provision does not apply to any "loss" if the covered "auto" is in the charge of any person or organization engaged in the automobile business.

19. TWO OR MORE DEDUCTIBLES

Under **SECTION III - PHYSICAL DAMAGE COVERAGE,** if two or more company policies or coverage forms apply to the same "accident", the following applies to Paragraph **D. Deductible:**

a. If the applicable Business Auto deductible is the smaller (or smallest) deductible, it will be waived; or

b. If the applicable Business Auto deductible is not the smaller (or smallest) deductible , it will be reduced by the amount of the smaller (or smallest) deductible; or

c. If the "loss" involves two or more Business Auto coverage forms or policies, the smaller (or smallest) deductible will be waived.

For the purpose of this endorsement, company means any company that is part of the Liberty Mutual Group.

SECTION IV - BUSINESS AUTO CONDITIONS is amended as follows:

20. UNINTENTIONAL FAILURE TO DISCLOSE HAZARDS

SECTION IV- BUSINESS AUTO CONDITIONS, Paragraph **B.2.** is amended by adding the following:

If you unintentionally fail to disclose any hazards, exposures or material facts existing as of the inception date or renewal date of the Business Auto Coverage Form, the coverage afforded by this policy will not be prejudiced.

However, you must report the undisclosed hazard of exposure as soon as practicable after its discovery, and we have the right to collect additional premium for any such hazard or exposure.

© 2017 Liberty Mutual Insurance

Includes copyrighted material of Insurance Services Office Inc., with its Permission.

21. AMENDED DUTIES IN THE EVENT OF ACCIDENT, CLAIM, SUIT, OR LOSS

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **A.2.a.** is replaced in its entirety by the following:

a. In the event of "accident", claim, "suit" or "loss", you must promptly notify us when it is known to:

(1) You, if you are an individual;

(2) A partner, if you are a partnership;

(3) Member, if you are a limited liability company;

(4) An executive officer or the "employee" designated by the Named Insured to give such notice, if you are a corporation.

To the extent possible, notice to us should include:

(a) How, when and where the "accident" or "loss" took place;

(b) The "insureds" name and address; and

(c) The names and addresses of any injured persons and witnesses.

22. WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **A.5. Transfer Of Rights Of Recovery Against Others To Us,** is amended by the addition of the following:

If the person or organization has in a written agreement waived those rights before an "accident" or "loss", our rights are waived also.

23. HIRED AUTO COVERAGE TERRITORY

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **B.7. Policy Period, Coverage Territory,** is amended by the addition of the following:

f. For "autos" hired 30 days or less, the coverage territory is anywhere in the world, provided that the "insured's" responsibility to pay for damages is determined in a "suit", on the merits, in the United States, the territories and possessions of the United States of America, Puerto Rico or Canada or in a settlement we agree to.

This extension of coverage does not apply to an "auto" hired, leased, rented or borrowed with a driver.

24. PRIMARY AND NON-CONTRIBUTING IF REQUIRED BY WRITTEN CONTRACT OR WRITTEN AGREEMENT

The following is added to **SECTION IV - BUSINESS AUTO CONDITIONS, General Conditions, B.5. Other Insurance** and supersedes any provision to the contrary:

This Coverage Form's Covered Autos Liability Coverage is primary to and will not seek contribution from any other insurance available to an "insured" under your policy provided that:

1. Such "insured" is a Named Insured under such other insurance; and

2. You have agreed in a written contract or written agreement that this insurance would be primary and would not seek contribution from any other insurance available to such "insured".

SECTION V - DEFINITIONS is amended as follows:

25. BODILY INJURY REDEFINED

Under **SECTION V - DEFINITIONS,** Definition **C.** is replaced by the following:

"Bodily injury" means physical injury, sickness or disease sustained by a person, including mental anguish, mental injury, shock, fright or death resulting from any of these at any time.

Subject: Public Safety - Public Records Request :: P005872-031725

Dear Environmental Professional I Emily Loxley,

Thank you for your interest in public records of the City of Cleveland. Your request has been received and is being processed in accordance with the Ohio Sunshine Laws. Your request was received in this office on 3/17/2025 and has been given the reference number P005872-031725 for tracking purposes.

Records Requested: **3/17/2025 601 Lakeside Avenue, Room 227, Cleveland, Ohio 44114 Attn: Fire Chief Anthony Luke Re: Data Request for HUD Environmental Review, Hough Senior Independent Living project Hough Avenue between East 89th Street and East 90th Street Cleveland, Cuyahoga County, Ohio Dear Chief Anthony Luke: We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the Hough Senior Independent Living project located in Cleveland, Cuyahoga County, Ohio. The project involves new construction of senior living apartments. A location map is attached. Please provide the following information: 1. Are you aware of any USTs at or near the project site? 2. Are you aware of any hazardous-material responses or other environmental concerns in the project area? 3. Do you have file(s) available for the project site that can be made available for review, or can copies be provided? 4. What station will provide service to this location? 5. What is the approximate response time for fire and medical emergencies? 6. Who provides ambulance service in the [city or village or township]? 7. Is the fire department included in the building plan review process? If not, would the fire department like to review the plans for this project? Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 330-575-5847 or eloxley@partnersenv.com.**

Your request will be forwarded to the relevant city department(s) to locate the information you seek and to determine the volume and any costs associated with satisfying your request. You will be contacted about the availability and/or provided with copies of the records in question. **PLEASE NOTE:** The public records law does not require a governmental body to create new information, to do legal research, or to answer questions.

You can monitor the progress of your request at the link below and you will receive an email when your request has been completed. Again, thank you for using the Cleveland Public Records Center.

Subject: Automatic reply: Public Records of Request - Hough Senior Independent Living Property

The Cleveland Metropolitan School District ("CMSD") is in receipt of your Public Records Request and will respond within a reasonable time. A reasonable time depends on the circumstances of the request, including the scope and clarity of the request, and the time necessary to identify, review, and prepare the records responsive to the request.

Please be advised that due to the large number of recent and current requests, you may experience a delayed response. CMSD strives to be as accommodating as possible to Public Record Requests and will continue to do so.

Should you have questions regarding your request before receiving a response from CMSD, please email us at publicrecords@clevelandmetroschools.org.

Thank you.

Sent: Tuesday, March 18, 2025 9:07 AM
To: Emily Loxley
Subject: Re: Public Records of Request - Hough Senior Independent Living Property

Good morning Emily,

In response to your Public Records Request, please see the responsive data provided below.

1. Which schools within the system will students attend?

CMSD is an open choice school system, therefore there are no "assigned" neighborhood schools. However, students living in that area would be closest to Daniel E. Morgan (PreK-8), Mary B. Martin (PreK-8), Mary M. Bethune (PreK-8), Wade Park (PreK-8), John Hay campus (high school), and Cleveland School of the Arts (high school).

2. Can the schools adequately absorb an influx of students that may result from the construction?

There is sufficient capacity within the schools in this area to absorb any influx of students.

3. Will these students be on bus routes or will students walk to school?

Per CMSD transportation policy, students living less than one mile from the school will walk while students living more than one mile will ride a bus or be given an RTA pass (grade-dependent).

4. Are pre-school and adult education classes available through the school system?

All primary schools listed above offer pre-school. CMSD does not offer adult education within its facilities.

5. If available, please provide literature regarding the school system.

Please visit https://www.clevelandmetroschools.org/domain/166.

This email completes CMSD's response to your Public Records Request. Please feel free to contact us at publicrecords@clevelandmetroschools.org should you have questions.

Best Regards,

FROM: Marla Reichenbach
Administrative Professional 2 BUSTR

On Behalf of the Bureau of Underground Storage Tank Regulations, the Records Management Section is responding to your public records request. Thank you for your request. We have searched our data base regarding records for Underground Storage Tanks and found no release/records for the specific address/facility you requested:

1768 E 90th St, Cleveland, OH
8910 Hough Ave, Cleveland, OH
8920 Hough Ave, Cleveland, OH
8924 Hough Ave, Cleveland, OH

Please contact your local fire department in that they may have records for this address/facility. If you are requesting information for Aboveground Storage tanks, please contact the Code Enforcement Bureau at (614) 728-5460 and if you need records regarding permits and registrations, please contact Maria with the Bureau of Testing and Registration at (614) 995-0301.

Our request forms are designed to use one form per facility number or address. If you have additional addresses you need information for, please submit additional request forms.

Please do not hesitate to contact me if I can be of further assistance.

RE: PUBLIC RECORDS REQUEST of March 17, 2025, Reference #C000663-031725.

Dear Environmental Professional I Emily Loxley,

The City of Cleveland received a public record request from you on March 17, 2025. You requested the following:

"We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the Hough Senior Independent Living project located in Cleveland, Cuyahoga County, Ohio. The project involves new construction of senior living apartments. A location map is attached.

Please provide the following information:
1. Is the health department aware of any environmental concerns at the project site or in the area?
2. Is the health department aware of any air quality concerns at the project site or in the area?
3. Do you have file(s) available for the project site that can be made available for review, or can copies be provided?

Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 330-575-5847 or eloxley@partnersenv.com."

The City has reviewed its files and has located responsive records to your request. Please log in to the Cleveland Public Records Center at the following link Cleveland Public Records Center to retrieve the appropriate responsive documents.

Please note:

- Please make sure that you allow pop-ups from this site in order to view/download records.
- Records may be viewed/downloaded up to 3 times.
- You have up to 30 days to view/download records.

City - Public Records Request - C000663-031725

If responsive materials include video please note:

*Photographs of peace officers whose duties may include undercover or plain clothes positions or assignments are exempt from release under O.R.C. §149.43 (A)(7)(g) and can only be released with the prior written approval of the applicable peace officer.

*Motor vehicle/driver record information (including driver's license numbers, and the entirety of a driver's license including photos) pursuant to 18 U.S.C. 7521, et seq. (Driver's Privacy Protection Act)

If you have any questions, or wish to discuss this further, you can reply to this email, go to the Cleveland Public Records Center and Send a New Message.

Sincerely,

City of Cleveland Public Records

To monitor the progress or update this request please log into the Cleveland Public Records Center.

Subject: Public Records of Request - Hough Senior Independent Living Property
Attachments: Property Location Map.pdf; Ohio EPA NEDO Checklist.docx

Good morning,

Partners Environmental Consulting, Inc. (Partners) is conducting a Phase I Environmental Site Assessment at the Hough Senior Independent Living property located on Hough Avenue between East 89th Street and East 90th Street in Cleveland, Cuyahoga County, Ohio. As part of this process, Partners requests any records the Ohio EPA NEDO may have related to the property, including but not limited to inspections, violations, spills, hazardous materials storage, building blueprints, wells, septic systems, permits, and above/underground storage tanks.

Thank you,

Emily Loxley

OHIO - EPA Map of Radon Zones

http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of Ohio" (USGS Open-file Report 93-292-E) before using this map. http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 3/18/2025 at 12:07 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

The pin location displayed on the map is a point selected by the user. Failure of the user to ensure that the pin location displayed on this map correctly corresponds with the user supplied address/location description below may result in an invalid federal flood insurance policy. **The U.S. Fish and Wildlife Service (Service) has not validated the pin location with respect to the user supplied address/location description below. The Service recommends that all pin locations be verified by federal agencies prior to use of this map for the provision or denial of federal funding or financial assistance**. Please note that a structure bisected by the Coastal Barrier Resources System (CBRS) boundary (i.e., both "partially in" and "partially out") is within the CBRS and therefore affected by CBRA's restrictions on federal flood insurance. A pin placed on a bisected structure must be placed on the portion of the structure within the unit (including any attached features such as a deck or stairs).

User Name: Halle Miller
User Organization: Partners Environmental Consulting, Inc.
User Supplied Address/Location Description: 8900-8928 Hough Avenue, Cleveland, Ohio
Pin Location: Outside CBRS
Pin Flood Insurance Prohibition Date: N/A
Pin System Unit Establishment Date: N/A

The user placed pin location is not within the CBRS. The official CBRS maps are accessible at https://www.fws.gov/library/collections/official-coastal-barrier-resources-system-maps.

The CBRS information is derived directly from the CBRS web service provided by the Service. This map was exported on 3/27/2025 and does not reflect changes or amendments subsequent to this date. The CBRS boundaries on this map may become superseded by new boundaries over time.

This map image may be void if one or more of the following map elements do not appear: basemap imagery, CBRS unit labels, prohibition date labels, legend, scale bar, map creation date. For additional information about flood insurance and the CBRS, visit: https://www.fws.gov/node/263838.

Critical Habitat for Threatened & Endangered Species [USFWS]

Welcome to the US Fish & Wildlife Service's map of Threatened and Endangered Species with Critical Habitat designation across the United States. You are about to use an online mapper that displays designated critical habitat spatial information. It is important to understand that the designated critical habitat displayed in this mapper **DOES NOT** represent all of the critical habitat designated by the U.S Fish & Wildlife Service. Only digitized critical habitat submitted into this system is available. This means that there is additional designated critical habitat that is not displayed in this mapper. If you require critical habitat spatial data not available here, please contact the lead FWS Region for that species.

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the **Day/Night Noise Level Calculator Electronic Assessment Tool Overview (/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/)**.

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative**: Cancel the project at this location
- **Other Reasonable Alternatives**: Choose an alternate site
- **Mitigation**
  - **Contact your Field or Regional Environmental Officer (/programs/environmental-review/hud-environmental-staff-contacts/)**
  - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
  - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
  - Incorporate natural or man-made barriers. See ***The Noise Guidebook (/resource/313/hud-noise-guidebook/)***
  - Construct noise barrier. See the **Barrier Performance Module (/programs/environmental-review/bpm-calculator/)**

% over Age 64	19%	18%	59	18%	62
% People of Color	86%	24%	94	40%	86

Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. For each of the environmental indicators in EJScreen, there is an EJ Index and a Supplement Index. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the EJScre website.

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

SELECTED VARIABLES	PERCENTILE IN STATE	PERCENTILE IN USA
EJ INDEXES		
Particulate Matter EJ Index	93	86

Note: Diesel particulate matter index is from the EPA's Air Toxics Data Update, which is the Agency's ongoing, comprehensive evaluation of air toxics in the United States. This effort aims to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that the air toxics data presented here provide broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations.

APPENDIX I
PROFESSIONAL RESUMES

Copyright © 2025, Partners

PARTNERS

Emily R. Loxley
Environmental Professional I, Assessment, Remediation, and Revitalization

FIELDS OF COMPETENCE

- Environmental Site Assessments
- Soil Sampling and Identification
- Low-Flow Groundwater Sampling
- AutoCAD
- Data Analysis and Interpretation
- Watershed Management

CREDENTIALS

- Bachelor of Science, Environmental Science, Bowling Green State University, Bowling Green, Ohio
- OSHA 40-Hour Hazardous Waste Operations and Emergency Response Training

EXPERIENCE SUMMARY

Ms. Emily Loxley is an environmental scientist at Partners Environmental as an Environmental Professional I. She possesses experience in water and soil data collection, project management, and maintaining strong client relationships. Ms. Loxley obtained her Bachelor of Science in Environmental Science from Bowling Green State University in 2023, with a specialization in watershed management. Highlighted studies include hydrology, fluvial geomorphology, and anthropogenic disturbances to the water cycle.

SELECTED PROJECTS

Phase I Environmental Site Assessment – Bedford, Ohio: Ms. Loxley completed a Phase I Environmental Site Assessment (ESA) for an undeveloped, wooded property surrounded by residential and commercial land. She completed this report in accordance with ASTM standards, utilizing databases, public records from government agencies, and historical records. She completed an inspection of the Subject Property and assessed non-scope items including asbestos containing materials, lead-based paint, and radon. She based the findings and conclusions of the report on all of these factors.

Draft Environmental Impact Statement – Bowling Green State University, Bowling Green, OH: Ms. Loxley served as the project manager for the environmental capstone project at Bowling Green State University. She orchestrated and oversaw the research and assembly of a draft environmental impact statement for the Office of Campus Operations. The project evaluated ten different alternatives regarding the addition of an electric vehicle DC level two charger. Ms. Loxley also acted as a liaison between the clients and team members throughout all stages of the project to promote clear and effective communication.

National Lakes Assessment – Georgia, South Carolina, and Alabama: Ms. Loxley assisted the U.S. EPA with data collection for the National Lakes Assessment across eleven sites. Her responsibilities included water and benthic sampling, quantitative water quality data collection, recording observations on the surrounding environment, and helping with boat and equipment upkeep to protect the integrity and accuracy of the collected data.

Covid-19 Monitoring through Wastewater Sampling – Prisons throughout Eastern Ohio: Ms. Loxley traveled to six prisons biweekly to collect wastewater samples to be analyzed for increasing trends in Covid-19 among prisoners. She utilized an ISCO sampler machine to create a 24-hour composite sample. Ms. Loxley was committed to collecting accurate and comprehensive samples to properly protect the prisoners.

PARTNERS

Halle A. Miller
Associate Director,
Assessment, Remediation,
and Revitalization

FIELDS OF COMPETENCE

- Environmental Site Assessments
- VAP Investigations
- Asbestos Survey & Oversight
- BUSTR Investigations
- OHFA & HUD Compliance

CREDENTIALS

- BS Engineering Management and Environmental Science, Miami University, Oxford, Ohio
- OSHA 40-Hour Hazardous Waste Operations and Emergency Response
- Ohio Asbestos Hazard Evaluation Specialist (ES36323)
- Ohio Asbestos Hazard Abatement Specialist (AS545737)
- Ohio Department of Health Lead Risk Assessor (LA9525)

PROFESSIONAL AFFILIATIONS

- Women's Leadership Initiative and Young Leaders Committees, Urban Land Institute
- Industry-At-Large Member and Annual Meeting Chair, Board of Trustees, The Ohio Academy of Science
- Miami University College of Engineering and Computing, Women's Advisory Council Mentorship Program

EXPERIENCE SUMMARY

Ms. Halle Miller has six years of experience in environmental due diligence, including Phase I and Phase II Environmental Site Assessments (ESAs), asbestos and hazardous materials surveys, lead-based paint (LBP) inspections, and property condition assessments (PCAs). She is knowledgeable in environmental remediation and compliance, as well as grant writing. Ms. Miller is well versed in Ohio Environmental Protection Agency (EPA) Voluntary Action Program (VAP) and Bureau of Underground Storage Tank Regulations (BUSTR) investigations. She works in a senior project management capacity and has developed and implemented technical training programs.

SELECTED PROJECTS

Due Diligence, 22-Site Portfolio – Columbus, Ohio: Ms. Miller managed due diligence services for a portfolio of 22 retail shopping centers, including Phase I ESAs, ADA surveys, zoning reports, ALTA surveys, and PCAs. Of the 22 sites, 14 were further investigated through Phase II ESA sampling of soil, groundwater, sub-slab soil vapor, and indoor air. Subsequently, three sites required ground penetrating radar (GPR) surveys prior to underground storage tank (UST) removal, one required quarterly groundwater monitoring, and four required further delineation of constituents in groundwater and vapor media.

Former Industrial Facilities – Cleveland, Ohio: Ms. Miller completed a VAP Phase I Property Assessment of a 65-acre property which detected 56 Identified Areas. Historical uses of the site include heavy manufacturing and machining, multiple motor car companies, an electric and battery storage facility, and steel manufacturers. A Phase II PA followed for a portion of the property, with her responsibilities including coordination and oversight of soil sampling, installation of monitoring wells, groundwater sampling, sub-slab vapor sampling, data analysis, and reporting, in accordance with VAP guidelines.

Former Dairy Property – Cleveland Heights, Ohio: Ms. Miller managed a Phase I ESA and Limited Phase II Investigation of a former dairy facility that identified multiple orphan USTs, former machine shop/truck wash, and adjacent site concerns. Additional tasks supervised by Ms. Miller included a GPR survey, pre-demolition asbestos survey, National Environmental Policy Act (NEPA) assessment, and an Analysis of Brownfield Cleanup Alternatives (ABCA) report for grant submittal.

Large-Scale Pre-Demolition Asbestos Survey – Pepper Pike, Ohio: Ms. Miller was an integral part of a pre-demolition asbestos survey of nine (9) buildings and a tunnel system totaling over 100,000 square feet. Project tasks required extensive CAD mapping, sampling, analysis, and reporting. She conducted a hazardous materials and universal waste survey concurrently with the asbestos survey and assisted with providing abatement specifications and quantities for a contractor.

Affordable Housing Development – Columbus, Ohio: Ms. Miller provided a Phase I ESA, Phase II ESA, and an Environmental Review (ER) according to the Department of Housing & Urban Development (HUD) standards for a proposed residential redevelopment site funded by the Ohio Housing Finance Agency (OHFA). She oversaw the removal of petroleum-impacted soil from remnant product lines discovered on the site. Additionally, Ms. Miller identified and investigated buried cathodic anodes near the adjacent railroad tracks and managed the consequent disposal of heavy metals contaminated soils. Her tasks also consisted of a pre-demolition asbestos survey and hazardous materials survey prior to building demolition.

Re: *Revised* Limited Subsurface Investigation
Hough Avenue between East 89th Street and East 90th Street
Cleveland, Ohio 44106
August Mack Project Number JY1828.742

Dear Ms. Chandler:

August Mack Environmental, Inc. (August Mack) has completed subsurface investigation activities at the above-referenced subject property. During a recent Phase I Environmental Site Assessment (ESA) performed by Partners Environmental (Partners) (Partners Project No.640.16), the following recognized environmental conditions (RECs) were identified:

- **REC-1:** Various Former Commercial Operations, 8900, 8904, 8918, and 8928 Hough Avenue (subject property): A historical dry cleaner, Checker Cleaners, was listed in the city directories from 1951 through 1961 at 8900 Hough Avenue. The EDR database report and city directories listed Aaron Cohn Clothing Cleaners at 8904 Hough Avenue in 1930, as well as Unity Dry Cleaning and Tailoring later in 1974. According to Sanborn maps, this portion of the subject property was also operated as an oil and paint store in the 1950s. Additionally, another dry cleaning and laundry operation was listed in the EDR database under Benjamin Goldsmith and addressed at the former subject property address of 8918 Hough Avenue in 1935. City directories similarly listed various other cleaners from 1941 through 1961. According to city directories, a photography business, most frequently referred to as Fleming Photo Company, was located on the subject property at 8928 Hough Avenue from at least 1930 through 1955. Based on Partners' experience with these types of facilities and their past use of

hazardous chemicals, it is possible that these former dry cleaning and other select operations along Hough Avenue could have adversely impacted the subject property.

- **REC-2:** Former Retail Filling Station with three (3) Underground Storage Tanks (USTs), 8930-8940 Hough Avenue (Eastern Adjoining Property): The eastern adjoining property was identified as Gonzalez Texaco Service Station in the EDR Historic Automotive database from 1951 through 1961, and in city directories under various names from 1941 through 1961. On the Sanborn Fire Insurance maps, it is also depicted in 1951 and 1952, with notation of an associated storefront and three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners' experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the subject property.

- **REC-3:** Former Retail Filling Station, 8812 Hough Avenue (Eastern Adjoining Site): The eastern adjacent site was identified in the EDR Historic Automotive database as Ashford Union Service Station / 76 Service Station from 1951 through 1974. The Sanborn maps show its presence from 1951 through 1972, along with three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners' experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the subject property.

The purpose of this investigation is to determine if subsurface conditions on the subject property have been impacted by the environmental concerns identified in the Phase I ESA. This report was prepared at the request of Ms. Jennifer Chandler with CHN Housing Partners and may be relied on by CHN Housing Partners. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by August Mack.

SUBSURFACE INVESTIGATION

August Mack mobilized to the subject property on August 1, 2024 to perform the subsurface investigation activities. Prior to starting subsurface activities, ground penetrating radar (GPR), electromagnetic (EM) locating, and other utility locating tools were utilized to clear all boring locations.

A total of four (4) soil borings (SB-1 through SB-4) were advanced across the subject property using a Geoprobe® direct push sampling system (Geoprobe®). Information regarding boring locations is provided below and boring locations are depicted on

Figure 1. The client provided an overlay of the future building development plans; which is also presented on **Figure 1**.

- SB-1 was advanced on the east portion of the subject property, in the location of former Fleming Photo Company and adjacent to a former retail filling station with three (3) USTs;
- SB-2 was advanced on the east portion of the subject property, in the location of former Goldsmith Cleaners;
- SB-3 was advanced on the west portion of the subject property in the location of former Unity Dry Cleaning and a former oil/paint store; and,
- SB-4 was advanced on the west portion of the subject property in the location of former Checker Cleaners, and the adjacent former filling station.

Sampling Methodology

Soil borings SB-1 through SB-4 were advanced to a depth of 20 feet below grade (ft bg) using a Geoprobe® sampling system. The purpose of the borings was to field screen soils, determine geological conditions, and collect soil and groundwater samples for laboratory analysis. All soil sample intervals were inspected in the field for odors and staining and screened using a photoionization detector (PID). Field screening results and soil lithological information is provided on soil boring logs included as **Attachment A**.

One (1) soil sample interval from each boring location was selected for laboratory analysis based on field inspection observations and screening results. Soil samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of volatile organic compounds (VOCs) via United States Environmental Protection Agency (U.S. EPA) method 8260, polycyclic aromatic hydrocarbons (PAHs) via U.S. EPA method 8270 and Resource Conservation and Recovery Act (RCRA) 8 Metals via U.S. EPA method 6010B/7470-7471.

Soil borings were converted into temporary, 1-inch diameter PVC wells to aid in the collection of groundwater samples. Groundwater samples were collected from the temporary wells using a peristaltic pump attached to new, disposable sample tubing and submitted to PACE for analysis of VOCs via U.S. EPA method 8260, PAHs via U.S. EPA method 8270 and RCRA 8 Metals via U.S. EPA method 6010B/7470-7471.

August Mack field procedures are provided in **Attachment B**.

Field Observations

Inspection of collected soil samples from the borings revealed that the subsurface geology consists primarily of alternating layers of clay, sand and clayey sand. A brick was also observed at approximately 6 to 7 ft bg at SB-2, SB-3, and SB-4. Saturated conditions were encountered beginning at approximately 15 to 18 ft bg for all borings.

Field observations at SB-4 from approximately 14 to 18 ft bg reveal evidence of staining, odor, and sheen. In addition, the majority of PID measurements collected from the soil borings were below 2.6 (ppm). Notable elevated PID measurements were observed in SB-1 15 to 16 ft bg (122.8 ppm) and SB-2 4 to 8 ft bg (42.9 ppm).

Soil Analytical Results

The soil analytical results were compared to the 2025 Ohio Environmental Protection Agency (OEPA) Voluntary Action Program (VAP) Generic Direct Contact Soil Standards (GDCSS) for residential, commercial/industrial, and construction worker land use. The laboratory analysis revealed the following results:

- All VOCs were detected below their laboratory reporting limits (LRLs).
- Several PAHs were detected in all soil samples; however, all detected concentrations are below their respective standard with the exception of benzo(a)pyrene in SB-3 (1-3). Benzo(a)pyrene was above the GDCSS standards for residential land use but well below the GDCSS standards for commercial/industrial and construction workers.
- Metals including arsenic, barium, cadmium, chromium, and lead were detected in each of the soil samples. All concentrations were below their respective standards with the exception of arsenic in SB-3 (1-3). Arsenic was above the GDCSS standard for residential but well below the GDCSS standards for commercial/industrial and construction workers.

The soil analytical results are summarized in **Table 1**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

Groundwater Analytical Results

The groundwater analytical results were compared to the 2025 OEPA VAP Generic Unrestricted Potable Use Standards (UPUS). The laboratory analysis revealed the following results:

- Several VOCs were detected in the groundwater sample SB-4 (10-20); however, they were below their respective standards. All other VOCs were below LRLs.

- Several PAH compounds (Benzo(a)anthracene, Benzo(a)pyrene, 1-Methylnaphthalene, and Naphthalene) were detected above the VAP UPUS in the SB-4 (10-20) groundwater sample. All other PAHs were below either LRLs or comparison values.
- All analyzed metals were not detected above LRLs, with the exception of barium. Barium was detected above the LRL, but well below its comparative VAP UPUS standard.

It is noted that the subject property is located within an OEPA approved Urban Setting Designation (USD), known as the Cleveland City Wide. A USD recognizes that remediation of groundwater to drinking water standards is not necessary because no receptors will be drinking the groundwater in the USD area (i.e. area connected to municipal water supply).

The groundwater analytical results are summarized in **Table 2**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

SUMMARY AND CONCLUSION

August Mack has completed a Limited Subsurface Investigation for the subject property located at Hough Avenue between East 89th Street and East 90th Street, Cleveland, Ohio. A total of four (4) soil borings were advanced in the northern portion of the subject property in order to evaluate if subsurface conditions have been impacted by the RECs identified in the recent Phase I ESA completed by August Mack.

Field observations and PID measurements from soil boring SB-4 reveal evidence of impacts (odor, staining, and sheen) at the subject property. Analytical results revealed one (1) PAH (Benzo(a)pyrene) and one (1) metal (Arsenic) were detected slightly above the GDCSS standards for residential land use in soil collected from soil boring SB-3 1 to 3 ft bg. Based on the future development plans provided by the Client, SB-3 is below the building footprint. Several PAHs and metals were identified in soil across the subject property at concentrations that did not exceed comparison standards. VOCs were not detected at concentrations above LRLs in the soil samples.

Analytical results revealed benzo(a)anthracene, benzo(a)pyrene, 1-methylnaphthalene, and naphthalene were detected above their VAP UPUS standards in groundwater collected from soil boring SB-4. It is noted that these compounds were not detected at concentrations above their comparative standards in the soil sample collected at this boring location. Additionally, the subject property is located within the Cleveland

City-Wide USD and will be connected to municipal drinking water. Considering this information, the ingestion pathway is incomplete.

Concentrations of benzo(a) pyrene and arsenic were detected at SB-3 1 to 3 ft bg exceeding their GDCSS residential use standards; however, these compounds are likely generated from the surrounding urban development rather than releases from historical operations at this location. Redevelopment typically includes removal of surface soils to install a building pad. As the surface soils at SB-3 will be removed during redevelopment, and the building pad will act as a direct contact barrier, August Mack does not recommend addition assessment for this location.

We appreciate the opportunity to provide you with environmental consulting services and trust that this submittal is in accordance with your needs. Please feel free to contact us if you have any questions or comments or require additional information regarding this project or the project site.

Sincerely,

Sarah Bergund
Due Diligence Manager

Field Procedures

SOIL & GROUNDWATER SAMPLING PROCEDURES

Soil Sampling Activities

Soil borings were advanced using a Geoprobe® Direct Push Dual-Tube Sampling System (Geoprobe®) and hand augers. Soil borings were advanced to the desired depth required for the investigation. Soil samples were collected continuously from each boring location by using the dual-tube tooling, which includes a disposable acetate sample liner. The sampler was recovered with a 4-foot soil sample collected within an acetate liner inside the barrel. A new acetate liner was used for each sample collected. All reusable equipment that contacted the soil samples was decontaminated with a Liquinox® solution and rinsed with water between each sample collection.

Upon retrieving the 4-foot sections of soil, the samples were divided into 2-foot sections and inspected in the field for evidence of contamination (odors, staining, etc.). Each sample was also screened in the field by headspace analysis using a MiniRae® photoionization detector (PID). The 2-foot section that exhibited the highest potential for contamination was sampled and transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. All samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals, via U.S. EPA 8260, 8270SIM, and 6010B/7470-7471 methods.

Groundwater Sampling Activities

Temporary 1-inch groundwater sampling piezometers were installed in two of the three boring location to allow groundwater to collect for sampling purposes. Groundwater samples were collected from the temporary groundwater sampling points using a check valve and dedicated tubing. The groundwater samples were transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. Groundwater samples were submitted to PACE for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals via U.S. EPA 8260 , 8270SIM, and 6010B/7470-7471 methods.

Site Restoration Activities

Upon completion of the field sampling activities, the boreholes were abandoned by manually pouring soil cuttings and bentonite into the boring. Subject property restoration was completed by patching the surface materials to match pre-investigation conditions.

RE: Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Dear James Bell:

Enclosed are the analytical results for sample(s) received by the laboratory on August 02, 2024. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Indianapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Amanda Gaines

ANALYTICAL RESULTS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Sample: SB-4-2-4 **Lab ID: 50379409001** Collected: 08/01/24 09:45 Received: 08/02/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Sample: SB-3-1-3 **Lab ID: 50379409002** Collected: 08/01/24 10:23 Received: 08/02/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Sample: SB-2-4-8 **Lab ID: 50379409003** Collected: 08/01/24 11:36 Received: 08/02/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

QUALIFIERS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

1d	Neither matrix spike nor matrix precision data could be provided for this analytical batch due to insufficient sample volume.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.
ED	Due to the extract's physical characteristics, the analysis was performed at dilution.
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
M0	Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
M3	Matrix spike recovery was outside laboratory control limits due to matrix interferences.
N2	The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.
R1	RPD value was outside control limits.
S0	Surrogate recovery outside laboratory control limits.
pH	Post-analysis pH measurement indicates insufficient VOA sample preservation.

CHAPTER 5

Temporary Runoff Control

Temporary runoff control is important on developing sites to minimize on-site erosion and to prevent off-site sediment discharge. Temporary runoff control primarily consists of two main strategies: keeping off site water clean and managing on site sediment laden water.

Off site water that passes through an active construction site should be kept as clean as possible. This is accomplished by routing this flow through the site without opportunity to mix with untreated site runoff or by diverting clean water can be diverted around construction areas. Sediment control practices generally will be more effective, less expensive and require less maintenance by not incorporating off site water. Diversions and temporary crossings are examples of runoff controls that are designed to keep off site water clean.

Once construction begins, erosion will occur. To minimize erosion, site runoff must be managed. This starts by minimizing the amount of disturbance and maintaining existing vegetation as much as possible to reduce the volume of runoff generated and subsequent erosion. It is important that the site designer and contractor recognize these opportunities to reduce site runoff.

Sediment laden water must be routed to an appropriate sediment control device before leaving the site. Conveying runoff through stabilized temporary diversions and slope drains not only directs muddy water to treatment devices but also reduces further erosion and prevents costly re-grading associated with gully development. Effective runoff control also makes re-vegetation easier and less costly.

The practices outlined in this chapter will significantly increase the effectiveness of a sediment and erosion control plan.

5.1 Check Dams

Description

Check dams are shaped rock dams constructed in swales, grassed waterways or diversions. They reduce the velocity of concentrated flows, thereby reducing erosion within the swale or waterway. While a rock check dam may trap sediment, its trapping efficiency is extremely poor, therefore it should not be used as the primary sediment-trapping practice.

As an alternative to rock, high flow compost filter socks may be used as check dams. While the primary use of compost socks as check dams is still to reduce flow velocity and subsequent channel erosion, these will have improved sediment removal.

Condition Where Practice Applies

This practice is limited to use in small channels where it is necessary to slow the velocity of flow in order to prevent gully erosion. Applications include grassed lined conveyances that need protection from gully erosion during the vegetative establishment or temporary swales (which due to short time of service do not practically lend themselves to a non-erodible lining). See other specifications for rock lined channels, gravel riffles and practices (chapter 4) that are more appropriate for larger channels and streams.

This practice is limited to small open channels with a drainage area less than 10 acres (5 ac. for filter socks) with the objective of limiting erosion and subsequent sedimentation in downstream areas. Examples include:

1. Ditches or swales that cannot receive a non-erodible lining and still need protection to reduce erosion.
2. Use during the interim period while the grassed lining is being established.
3. Use as an aid (not a substitute) to trap sediment from construction activity.

Page updated on 3-3-14

Planning Considerations

Rock check dams and filter sock check dams are superior to straw bale dams based on their reduced maintenance and increased effectiveness and because straw bale check dams are not a specified practice in this manual.

Rock check dams and filter sock check dams shall be placed where standing water or excessive siltation will be minimized or where damage to vegetative lining will be insignificant.

Rock check dams should be considered where the ditch or swale will not be mowed until after construction is complete.

Design Criteria

See the specifications below for design guidelines. For increased sediment control of rock check dams, smaller aggregate and or filter fabric on the upstream side may be used. It should be noted that increased ponding and the subsequent increase in the height of water behind a check dam raises the potential for erosion if overtopping occurs.

Table 5.1.1 Sock materials (The Sustainable Site, 2010)

Material	5 mil HDPE	5 mil HDPE / Cotton	Multi-Filament Polypropylene (A)	Multi-Filament Polypropylene (B)
Material characteristic	**Photodegradable**	**Biodegradable**	**Photodegradable**	**Photodegradable**

Tensile Strength	**26 psi (1.83 kg/cm$^{2)}$**	**26 psi (1.83 kg/cm$^{2)}$**	**44 psi (1.83 kg/cm$^{2)}$**	**202 psi (1.83 kg/cm$^{2)}$**
% Original Strength from UV Exposure	**23% at 1000 hr**	**ND**	**100% at 1000 hr**	**100% at 1000 hr**
Functional Longevity	**9 mo. -3 year**	**6-12 months**	**1-4 years**	**2-5 years**

Maintenance

Sediment shall be removed from behind check dam once it accumulates to one-half the original height of the check dam.

Removal

Depending upon the size and type, removal of check dams may be performed by hand or mechanical means. Stone and sediment should be removed and the area graded and seeded. Sediment accumulated behind filter socks shall be removed and then these may be cut open, and the filler material dispersed or incorporated into existing soil in order to aid vegetative establishment and reduce mowing safety concerns.

Filler material shall not be spread within the flow area of the channel or where shear stresses will mobilize sediment and compost before it can be incorporated into dense vegetation. Additionally filler material shall not be spread if it will retard or reduce the existing vegetation. Mesh netting and stakes shall be removed entirely and disposed of in the proper waste or recycling facility.

Common Problems/Concerns

If the check dam materials are not entirely removed, maintenance issues or safety concerns may be created. Removal of check dams is necessary in order to allow complete vegetative establishment.

Specifications
for

Rock Check Dam

1. The check dam shall be constructed of 4-8 inch diameter stone, placed so that it completely covers the width of the channel. ODOT Type D stone is acceptable, but should be underlain with a gravel filter consisting of ODOT No. 3 or 4 or suitable filter fabric.
2. Maximum height of check dam shall not exceed 3.0 feet.
3. The midpoint of the rock check dam shall be a minimum of 6 inches lower than the sides in order to direct across the center and away from the channel sides.
4. The base of the check dam shall be entrenched approximately 6 inches.
5. Spacing of check dams shall be in a manner such that the toe of the upstream dam is at the same elevation as the top of the downstream dam.
6. A Splash Apron shall be constructed where check dams are expected to be in use for an extended period of time, a stone apron shall be constructed immediately downstream of the check dam to prevent flows from undercutting the structure. The apron should be 6 in. thick and its length two times the height of the dam.
7. Stone placement shall be performed either by hand or mechanically as long as the center of check dam is lower than the sides and extends across entire channel.
8. Side slopes shall be a minimum of 2:1.

Specifications
for

Compost Sock Check Dam

Plan View

Cross Section View

Staking

1. Compost sock netting shall use a knitted mesh fabric with 1/8-3/8 inch openings, and compost media with particle sizes 99% < 3 inches, and 60% > 3/8 inches (conforming to media described in Chapter 6 Filter Sock).
2. Compost sock check dams shall be used in areas that drain 5 acres or less.
3. Sediment shall be removed from behind the sock when it reaches ½ the height of the check dam.
4. Compost sock check dams shall be constructed with 12, 18, or 24 in diameter compost socks, and shall completely cover the width of the channel. The midpoint of the compost sock check dam shall be a minimum of 6 inches lower than the sides in order to direct flow across the center and away from the channel sides. Filter sock check dams shall be filled to a density such that they shall reach their intended height (diameter). After installation and use, they shall be considered unsuitable and in need of replacement after falling below 80% of their minimum required height (diameter).
5. Although no trenching is necessary, compost sock check dams shall be placed on a graded surface where consistent contact with the soil surface is made without bridging over gaps, rills, gullies, stones or other irregularities.
6. Place compost sock check dams so that the ends extend to the top of bank. Staking for compost sock check dams shall use 2 inch x 2 inch wooden stakes, placed 5 foot on center. Stake length shall allow them to be driven 12 inches into existing soil and allow at least 2 inches above the sock.
7. Space compost sock check dams so that the toe of the upstream dam is at the same elevation or lower elevation as the top of the downstream compost sock check dam (at the center of the channel). This will be influenced by the height of the sock and gradient of the waterway.
8. A splash apron may be needed where flows over the sock may erode the channel and undercut the compost sock check dam. Create the apron by fixing a length of Temporary Rolled Erosion Control Product (Erosion Control Matting) or Turf Reinforcement Matting starting upstream of the sock a distance equal to the sock height and extending a length two times the height of the compost sock check dam. See Chapter 7 for information regarding these materials. Materials used should be able to be left in place (e.g. biodedegradable/photodegradable TRECP) without creating problems for future mowing or maintanance of the channel.

Page updated on 3-3-14

5.2 Slope Drain

Description

A pipe or chute placed on a slope to convey surface runoff downslope without causing erosion. Slope drains provide a temporary outlet for either a diversion or terraced slope.

Condition Where Practice Applies

Slope drains are used wherever a temporary outlet is needed for a diversion, terrace or embankment. Slope drain are useful along road fills or other long fills where surface flow down the embankment would cause significant damage. This practice may be necessary where drainage cannot easily be directed to the ends of a section of fill. The maximum allowable drainage area for this practice is 5 acres.

Design Criteria

The slope drain shall be designed for non-pressure flow, and a minimum 10 year frequency event. The inlet shall be protected from scouring. In lieu of design computations, the following table may be used for sizing the drain:

Table 5.2.1 Slope Drain Sizing

Diameter (Inches)	Maximum Drainage Area (Acres)
12	0.5
18	1.5
21	2.5
24	3.5

Outlet - When the drainage area is disturbed, the slope drain shall either have inlet protection, or the drain outlet shall be directed into a sediment trapping device. A hard armored apron shall be provided below the outlet where clean water is discharged into a stabilized area or channel.

Common Problems/Concerns

Piping of soil material appears around the pipe outlet. Care should be taken to adequately compact the fill material around and beneath the pipe structure to prevent the flow of water.

Scouring of fill material occurs around the pipe entrance. A vortex may occur at the pipe entrance during high flow conditions. Armoring of the entrance or the installation of an anti-vortex device may be necessary to prevent the failure of the earth fill/dike.

Specifications
for

Slope Drain

1. The slope drain shall be constructed on a minimum slope of 3 percent.
2. All points along the top of the dike/earthfill for the storage area shall be at least one (1) foot higher than the top of the inlet pipe.
3. The pipe drain may be constructed of corrugated metal or PVC pipe. All pipe connections shall be watertight. Flexible tubing may be used, provided rigid pipe is use for the inlet, the flexible tubing is of the same diameter as the inlet, and pipe connections are made with metal strapping or watertight connecting collars. The flexible pipe shall be constructed with hold down apparatus spaced on 10 foot centers for anchoring the pipe.
4. The entrance to the pipe shall be a hooded type.
5. The soil around and/or under the pipe shall be placed in 4-inch layers and hand compacted to the top of the earth dike.
6. A riprap apron shall be installed at the pipe outlet where clean water is discharged into a stabilized area or drainageway.

5.3 Temporary Diversion

Description

A temporary diversion is a dike and/or channel constructed to:

- Direct sediment-laden runoff to a settling pond.
- Route clean runoff away from disturbed areas.
- Divert runoff to reduce the effective length of the slope.
- Direct runoff away from steep cut or fill slopes.

Conditions Where Practice Applies

This practice applies to construction areas where runoff must be redirected in order to prevent offsite sedimentation, erosion or flooding of work areas. Temporary diversions are particularly applicable to prevent flow from damaging erodible or unstable areas.

Temporary diversions are appropriate for drainage areas less then 10 acres.

Planning Considerations

It is important that diversions are properly designed, constructed, and maintained since they concentrate water flow and may increase erosion potential. Particular care must be taken in planning diversion grades. Too much slope can result in erosion in the diversion channel or at the outlet. A change of slope from a steeper grade to a flatter may cause deposition to occur, reducing carrying capacity increasing chances of overtopping and failure.

It is usually less costly to excavate a channel and form a dike or dike on the downhill side with the spoil than to build diversions by other methods. Where space is limited, it may be necessary to build the dike by hauling in diking material. Use gravel to armor the diversion dike where vehicles must cross frequently.

Build and stabilize diversions and outlets or downstream sediment facilities before initiating other land-disturbing activities.

These structures generally have a life expectancy of 18 months or less, but can be prolonged with proper maintenance.

Compare: Temporary Diversion vs. Silt Fence at the perimeter of disturbed areas

Two approaches are commonly used to intercept and treat sediment-laden runoff at the perimeter of disturbed areas: silt fence or diversions that direct runoff to settling ponds. When determining which approach is more appropriate, consider the following:

Table 5.3.1 Temporary Diversion versus Silt Fence comparison.

Temporary Diversion	Silt Fence
Flows up to 10 acres of drainage area	Sheet flow from 1/4 acre per 100 feet of fence (see silt fence specification)
Constructed on positive grade to direct runoff	Must follow the contour of the land
Durable and usually low maintenance	High maintenance
Easily constructed with earth moving equipment	Labor Intensive
Requires additional Settling facilities	Treats Runoff for Sediment
Wider Disturbed area.	Requires little space and causes less disturbance around vegetation or structures

Design Criteria

These are provided in the specifications that follow.

Operation and Maintenance

Inspect temporary diversions once a week and after every storm event. Immediately remove sediment from the flow area and repair the diversion dike as needed.

Carefully check outlets and make necessary repairs immediately.

When the area protected is permanently stabilized, remove the dike and the channel to blend with the natural ground level and stabilize all disturbed areas with vegetation or other erosion control practice.

Mow grass as needed to maintain flow in channel.

Common Problems – Suggested Solutions

Sedimentation results in channel grade decreasing or reversing, leading to overtopping – realign or deepen the channel to maintain grade.

Low point in dike where diversion crosses a natural depression results in overtopping of the dike – build up the dike.

Erosion in channel before vegetation is established results in uneven channel grade, may lead to breach of dike---repair channel and install sod or synthetic liner.

If seepage or poor drainage in channel results in poor vegetation establishment, it may be necessary to re-grade in order to create positive drainage or to install subsurface drains or stone channel bottom.

Vehicle crossings result in rutting and increased erosion – maintain the dike height, flatten the side slopes, protect the dike with gravel or hard surface at the crossing point.

Excessive velocity at the outlet results in erosion – install or repair ROCK OUTLET PROTECTION.

Excessive grade in channel results in gully erosion – repairs channel, and install an erosion resistant lining or realign to reduce the grade.

Specifications
for

Temporary Diversion

1. Drainage area should not exceed 10 acres. Larger areas require a more extensive design.
2. The channel cross section may be parabolic or trapezoidal. Disk the base of the dike before placing fill. Build the dike 10% higher than designed for settlement. The dike shall be compacted by traversing with tracked earth-moving equipment.
3. The minimum cross section of the levee or dike will be as follows: (Minimum design freeboard shall be 0.3 foot.) Where construction traffic will cross, the top width may be made wider and the side slopes flatter than specified above.

Table 5.3.2

Dike Top Width (ft.)	Height (ft.)	Side Slopes	Shape
0	1.5	4.1	Trapezoidal
4	1.5	2.1	Parabolic

4. The grade may be variable depending upon the topography, but must have a positive drainage to the outlet and be stabilized to be non-erosive.

Table 5.3.3

3 - 5%	Seed and Straw	Seed and Straw	Matting
5 - 8%	Seed and Straw	Matting	Matting
8 - 20%	Seed and Straw	Matting	Engineered
Note: Diversions with steeper slopes or greater drainage areas are beyond the scope of this standard and must be designed for stability. Seed, straw and matting used shall meet the Specifications for Temporary Seeding, Mulching and Matting.			

5. Outlet runoff onto a stabilized area, into a properly designed waterway, grade stabilization structure, or sediment trapping facility.
6. Diversions shall be seeded and mulched in accordance with the requirements in practice standards TEMPORARY SEEDING (or PERMANENT SEEDING) and MULCHING as soon as they are constructed or other suitable stabilization in order to preserve dike height and reduce maintenance.

Specifications
for

Temporary Diversion Above Steep Slopes

1. Drainage area should not exceed 5 acres. Larger areas require a more extensive design.
2. The channel cross section may be parabolic, v-shaped, or trapezoidal. Disk the base of the dike before placing fill. Build the dike 10% higher than designed for settlement. The dike shall be compacted by traversing with tracked earth-moving equipment.
3. The minimum cross section of the levee or dike will be as follows: (Minimum design freeboard shall be 0.3 foot.)

Table 5.3.2

Dike Top Width (ft.)	Height (ft.)	Side Slopes	Shape
0	1.5	4.1	Trapezoidal
4	1.5	2.1	Parabolic

4. The grade may be variable depending upon the topography, but must have a positive drainage to the outlet and be stabilized to be non-erosive.

Table 5.3.3

Temporary Diversion Stabilization Treatment			
Diversion Slope	**< 2 ac.**	**2 - 5 ac.**	**5 - 10 ac.**
0 - 3%	Seed and Straw	Seed and Straw	Seed and Straw
3 - 5%	Seed and Straw	Seed and Straw	Matting
5 - 8%	Seed and Straw	Matting	Matting
8 - 20%	Seed and Straw	Matting	Engineered
Note: Diversions with steeper slopes or greater drainage areas are beyond the scope of this standard and must be designed for stability. Seed, straw and matting used shall meet the Specifications for Temporary Seeding, Mulching and Matting.			

5. Outlet runoff onto a stabilized area, settling pond, or into a drop structure.
6. Diversions shall be seeded and mulched in accordance with the requirements in practice standards TEMPORARY SEEDING (or PERMANENT SEEDING) and MULCHING as soon as they are constructed or other suitable stabilization in order to preserve dike height and reduce maintenance.

5.4 Stream Utility Crossing

Description

Stream Utility Crossings include pipeline, power line, or road construction projects that cross creeks or rivers. Measures used to minimize damage from the construction of utilities across streams start in the planning stages of a project and continue through site restoration. They include: determining the location of the utility, timing construction, construction techniques to reduce sediment pollution, and recreating favorable riparian conditions.

Conditions Where Practice Applies

Stream Utility Crossing apply to the following:

- Pipelines including but not limited to gas pipelines, electrical transmission lines, sanitary sewers, water lines, and etc.
- Overhead electric transmission lines,
- Road and bridge construction.

For temporary access of construction traffic across stream channels, see the specification for *Temporary Stream Crossings.*

Planning Considerations

Siting Stream Crossings – The first priority for minimizing the impacts of utility construction across streams is to minimize the length of channel disturbed. This often requires the values of the stream be acknowledged and carefully weighted through a stream assessment.

Routinely, the easiest and most inexpensive location of utilities, particularly sanitary sewers, is right down the stream channel itself. Unfortunately, this method of locating utilities causes long-term negative impacts to the stream and may necessitate higher maintenance costs to protect the utility.

Minimize the length of channel disturbed by:

- Routing utility lines well away from the stream channel and adjacent riparian area. Doing this may require more earthwork through irregular terrain and more bends in the utility.
- Crossing the stream as few times as possible.
- Crossing perpendicular to the Stream, where crossings do occur. Crossings deviating up to 30 degrees from perpendicular shall be considered perpendicular.
- Concentrate crossings of multiple utilities in one location, and/or encase into one conduit. This is most feasible where utilities are serving an individual housing development.

Within stream channels, there are areas, which are more sensitive to the work required for a utility crossing. Crossings should be located along the stream channel where they will cause the least impact. Crossings should occur where the streambanks are most stable such as the crossovers between bends where the curve of the stream changes direction or along fairly straight sections of channel. Sharp bends and steep banks, especially where showing signs of instability, should be avoided. Deep pools within the channel also should be avoided. These are locations where, during high flows, natural scour is occurring, opposed to riffle areas where deposition occurs. Generally, uniform stretches of stream will be least impacted by a utility crossing.

Figure 5.4.1 Stable location for utility crossing

Design Criteria

The following provide general criteria applicable to utility installations. Additional guidance is provided in the specifications that follow.

Construction Season -Utility stream crossing construction is best done during periods of low flow; generally July, August, and September. For perennial streams or important spawning streams, the worst time for construction may be during fish spawning and migration season from March 15 through June 15 or as determined for a particular stream or fish species. This should be taken into consideration along with other construction timing constraints.

Construction Method -In critical crossing situations, the method of construction may be specified. Drilling and boring utility lines under a stream channel cause much less impact than plow-in and trenching methods. Drilling and boring reduce the likelihood of erosion, as well as disturbance of the banks and bottom substrates which typically occurs with both the plow-in and trenching methods. Drilling and boring are usually more expensive and may be unreasonable for certain situations. If a utility line cannot be bored or drilled under the watercourse, the plow-in method should be used where possible. When crossing streams with the plow, a "dry run" is usually recommended prior to attaching the cable or pipe to clear out any possible stumps, logs or other obstructions.

Stream Flow Control -Stream flow should be diverted away from areas where intensive construction will occur.

Confining the Work Area -In large streams with limited areas of disturbance such as along one bank or around a bridge piling, a cofferdam or barricade can be constructed to keep the stream from continually flowing through the disturbed areas. Types of barricades include sheet pilings, sandbags, or turbidity curtains. Sheet pilings are the most durable. Sandbags can be constructed quickly in areas with shallow flow. Turbidity curtains are a geotextile material suspended from floats which hang down to the channel bottom. Unlike sheet pilings and sandbags, turbidity curtains cannot be specified for areas with strong currents or if the work area will be pumped dry.

Sediment Control: Stock piles of material shall be surrounded by silt fence or runoff routed to a sediment pond. Stabilized working pads shall be provided for the equipment in association with the construction of the crossing. Additional sediment control devices shall be implemented (ie. silt fence, sediment traps) when the trench falls within 100 feet of the stream.

Staged Construction -A cofferdam of sheet pilings or sand bags also can be used to confine, one-half of the channel until work there is completed and stabilized, then moved to the other side to complete the crossing without ever having the stream flow through the active work area.

Temporary Rerouting -When extensive or prolonged work will be done to the channel, the stream should be routed around the work area if permitted by terrain and the size of stream. Flow may be pumped around the work area or a temporary channel may be constructed. Temporary channels must be stabilized. A geotextile completely lining the channel bottom and side slopes is suitable temporary stabilization.

Limits on Each Crossing

Crossing Width -The limits of disturbance should be as narrow as possible where utilities cross streams. This includes not only construction operations within the channel itself, but also clearing done through the vegetation growing on the streambanks. The width of clearing should be minimized through the entire riparian area. To ensure minimal width of disturbance through the riparian area, materials excavated from trench construction should be placed well back from the streambanks. The width necessary for the crossing should also be clearly specified on the plans as well as the construction and clearing limits.

Duration of Construction -The time between initial disturbance of the stream and final stabilization should be kept to a minimum. The time necessary for an individual utility stream crossing varies significantly, depending on the specific project. Individual projects should be designed to encourage minimum duration of construction activity within the stream channel. Specific time limits may be specified or the crossing construction may be made dependent on other operations. For example, it could be specified that construction could not begin on the crossing until the utility line was in place to within 10 ft. of the streambanks on each side of the stream.

Fill Placed Within the Channel -The only fill permitted in the channel should be clean aggregate, stone or rock. No soil or other fine erodible material shall be placed in the channel. This restriction includes all fill for temporary crossings, diversions, and trench backfill when placed in flowing water. If the stream flow is diverted away from construction activity the material originally excavated from the trench may be used to back fill the trench.

Streambank Stabilization and Restoration - Streambanks should be restored to their original line and grade. Restoration must not result in a narrower channel or flow restriction. Stabilization of the area shall be conducted immediately upon completion of the stream crossing.

Plan specifications should define the type of stabilization, ideally woody vegetation, as described in the Stream Stabilization section of this book. Vegetation mats or Erosion Control Matting shall stabilize areas within 50' of either streambank. Some bank areas may need to be stabilized with riprap or stone in addition to matting and woody vegetation. Trees should be planted on the entire riparian area, especially the streambanks, to the extent permitted by the type of utility crossing. See the specifications for Streambank Stabilization.

Site Work Associated with Utility Stream Crossing

Runoff Control Along the Right-of-Way – Runoff and sediment controls should be used for the access road or utility easement approaching the stream crossing to prevent sediment-laden runoff from being routed directly to the stream. At a minimum distance of 50 ft. from the stream, runoff should be diverted with water bar or swales to a sediment trapping practice.

Dewatering – Trenches and excavations associated with stream crossings frequently require dewatering. Dewatering or pumping operations must not discharge turbid water directly to the stream. See the Dewatering Measures practice contained in this book for more guidance.

Permits – The specifications contained in this practice pertain primarily to the environmental impacts of stream utility crossings. The designer must also be aware that such structures are subject to the rules and regulations of the U.S. Army Corps of Engineers for instream modifications (404 permits) and Ohio Environmental Protection Agency's State Water Quality Certification (401 permits).

Maintenance

- Maintenance is essential to make sure that all items are functioning properly. This includes making sure only the areas that need to be exposed are exposed, and all other BMP practices are in good working order.
- The designated diversions should maintain the clean water through the site until the project has been completed.
- All desilting devices shall be maintained so that proper filtering occurs to the muddy water before it reenters the stream system.
- Dewatering devices shall be maintained at all times so that proper schedules can be kept for the utility crossing.

Common Problems/Concerns

- Improper staging and construction causes sediment damage because diversions, erosion control devices and dewatering does not occur in the proper order.
- Starting project during bad weather conditions so that a timely construction can occur.
- More area is opened up than for one day's construction to be completed in the stream crossing.

Small Stream Utility Crossing

Note: Show appropriate practices for temporary equipment crossings and diversion of construction runoff. See Stream Crossing

Specifications
for

Stream Utility Crossing

1. When site conditions allow, one of the following shall be used to divert stream flow or keep the flow away from construction activity.

- Drill or bore the utility lines under the stream channel.
- Construct a cofferdam or barricade of sheet pilings, sandbags or a turbidity curtain to keep flow from moving through the disturbed area. Turbidity curtains shall be a pre-assembled system and used only parallel to flow.
- Stage construction by confining first one-half of the channel until work there is completed and stabilized, then move to the other side to complete the crossing.
- Route the stream flow around the work area by bridging the trench with a rigid culvert, pumping, or constructing a temporary channel. Temporary channels shall be stabilized by rock or a geotextile completely lining the channel bottom and side slopes.

2. Crossing Width -The width of clearing shall be minimized through the riparian area. The limits of disturbance shall be as narrow as possible including not only construction operations within the channel itself but also clearing done through the vegetation growing on the streambanks.
3. Clearing shall be done by cutting NOT grubbing. The roots and stumps shall be left in place to help stabilize the banks and accelerate revegetation.
4. Material excavated from the trench shall be placed at least 20 ft. from the streambanks.
5. To the extent other constraints allow, stream shall be crossed during periods of low flow.
6. Duration of Construction -The time between initial disturbance of the stream and final stabilization shall be kept to a minimum. Construction shall not begin on the crossing until the utility line is in place to within 10 ft. of the streambank.
7. Fill Placed Within the Channel -The only fill permitted in the channel should be clean aggregate, stone or rock. No soil or other fine erodible material shall be placed in the channel. This restriction includes all fill for temporary crossings, diversions, and trench backfill when placed in flowing water. If the stream flow is diverted away from construction activity the material originally excavated from the trench may be used to backfill the trench.
8. Streambank Restorations -Streambanks shall be restored to their original line and grade and stabilized with riprap or vegetative bank stabilization.
9. Runoff Control Along the Right-of-Way -To prevent sediment-laden runoff from flowing to the stream, runoff shall be diverted with water bar or swales to a sediment trapping practice a minimum of 50 ft. from the stream.
10. Sediment laden water from pumping or dewatering or pumping shall not be discharged directly to a stream. Flow shall be routed through a settling pond, dewatering sump or a flat, well-vegetated area adequate for removing sediment before the pumped water reaches the stream.
11. Dewatering operations shall not cause significant reductions in stream temperatures. If groundwater is to be discharged in high volumes during summer months, it shall first be routed through a settling pond or overland though a flat well-vegetated area.
12. Permits -In addition to these specifications, stream crossings shall conform to the rules and regulations of the U.S. Army Corps of Engineers for in-stream modifications (404 permits) and Ohio Environmental Protection Agency's State Water Quality Certification (401 permits).

5.5 Temporary Stream Crossing

Description

A stream crossing provides construction traffic temporary access across a stream while reducing the amount of disturbance and sediment pollution. It is a temporary practice which includes restoring the crossing area after construction. Specifications for three typical kinds of stream crossings are provided: bridges, culverts and fords. Each has specific applications and each is designed to minimize stream damage by leaving banks stable and vegetated and adding only coarse stone fill to the channel.

Conditions Where Practice Applies

Where heavy equipment must be moved from one side of a stream channel to another, or where light-duty construction vehicles must cross the stream channel frequently for a short period of time. Generally, a temporary stream crossing is applicable to flowing streams with drainage areas less than 5 square miles. More exacting engineering methods should be used on larger drainage areas.

Planning Considerations

A stream and its entire riparian area should be left undisturbed to the greatest extent feasible. However where construction equipment must cross a stream channel, a temporary stream crossing is necessary. The temporary nature of stream crossings should be stressed. These structures create a channel constriction, which can cause flow backups or washouts during periods of high flow. They should be planned to be in service for the shortest practical period of time and to be removed as soon as their function is completed.

The specifications contained in this practice pertain primarily to the environmental impacts of stream crossings. From a safety and utility standpoint, the designer must also be sure that bridge spans, if used, are capable of withstanding the expected loads from heavy construction

equipment. The designer must also be aware that such structures are subject to the rules and regulations of the U.S. Army Corps of Engineers for instream modifications (404 permits). For designated Scenic Rivers, approval for public projects must be obtained from the Ohio Department of Natural Resources, Division of Natural Areas and Preserves.

Locating Crossings -Stream crossings should be constructed where they will cause the least amount of disturbance to the channel and surrounding vegetation. Good locations generally include straight sections as opposed to bends and shallow areas rather than deep pools. When practical, locate and design temporary stream crossings at permanent crossing locations to minimize stream disturbance.

Figure 5.5.1 Stable locations for stream crossings.

Selecting Type of Stream Crossing:

Bridge:

- Can usually be installed anytime during the year.
- Bridges are preferable to the other types of stream crossings because they cause the least disturbance to the stream.
- Bridges are most applicable for narrow channels and deep channels.
- Must be adequately designed by a qualified professional for the load of the equipment expected during construction.

Culvert:

- Culvert stream crossings should NOT be constructed between March 15 and June 15 because of impacts to fish spawning.
- Culvert stream crossings are most suitable for wide-stream channels and for traffic that may be too heavy for a bridge.
- Usually constructed of readily available materials which can be salvaged after use.
- Installation and removal of culvert crossings causes considerable disturbance to the stream and greatest potential for obstruction during higher flows.

Ford:

- Stream fords should NOT be constructed between March 15 and June 15 because of impacts to fish spawning.
- Fords may be used where very little construction traffic is anticipated.
- Most applicable where normal flow is shallow or intermittent.
- Fords should not be used to cross channels with streambanks greater than 4 ft. high.
- Problems with fords include: approach sections are subject to erosion; the stone fill or surface area is subject to being washout and may need periodic replacement; mud may be directly introduced into the stream by vehicles.

Design Criteria

The following provide general criteria applicable for all types of temporary stream crossings. Additional guidance applicable to individual crossing types shall be consulted in the individual specification that follows.

Flow Capacity – For all types of crossings, the structure shall be designed to pass bankfull flow or the peak flow from a 2 year frequency 24 hour duration storm, whichever is less without overtopping. Also ensure that storms that overtop the structure can safely be conveyed without erosion, property damage or increased hazard. Flow velocity at the outlet of the structure must be non-erosive for the receiving stream.

Minimized Disturbance – Clearing shall be done by cutting and NOT grubbing except in the case of stream fords where approaches may require more grading. The roots and stumps shall be left in place to help stabilize the banks and accelerate re-vegetation.

Sediment Control – Stock piles of material shall be surrounded by silt fence or runoff routed to a sediment pond. Stabilized working pads shall be provided for the equipment in association with the construction of the crossing.

Approach Road – The road approaching the stream crossing shall not route sediment-laden runoff directly to the stream. At a minimum distance of 50 ft. from the stream, runoff shall be diverted with water bar or swales to an adequate sediment-trapping practice.

Roadway and practice materials – The aggregate for the roadway shall be a minimum of 6 inches thick stone or recycled concrete meeting one of the following ODOT coarse aggregate gradations: #1, #2, #3 or #4. The aggregate will be placed on geotextile fabric meeting the requirements in material specification filter fabric ODOT Type “B”. No soil may be used as cover or construction materials for these practices.

Width of Crossing – All crossings shall have one traffic lane. The minimum width shall be 12 feet with a maximum width of 20 feet.

Crossing Alignment – The temporary waterway crossing shall be at right angles to the stream, where approach conditions dictates, the crossing may vary 15° from a line perpendicular to the center line of the stream at the intended crossing location.

Fish Migration Barriers – Stream crossings shall not cause sudden changes in stream elevation, drops or waterfalls, which could create a barrier to migrating fish.

Trench and Groundwater Dewatering – All dewatering shall be passed through a sediment removal measure (see Dewatering Measures in this book). There should be no turbid discharges to streams resulting from dewatering.

Stabilization and Removal – Stabilization of the crossing area shall be conducted immediately upon completion of the stream crossing. The specifications should define the type of stabilization, ideally woody vegetation, as described in the Stream Stabilization section of this book. Vegetation mats or Erosion Control Matting shall stabilize the crossing of the stream, within 50' of either streambank.

To minimize obstructions and barriers, all temporary bridges, culverts, and other structures must be removed as soon as the crossing is no longer needed. However, clean stone and rock similar in size to stream bed material is usually best left in the channel because removing it causes more disturbance. Stone and rock left in the channel must be formed so that it does not impede fish passage or significantly change the slope, dimension or flow pattern of the stream.

Plans and Specifications

The plans and specifications will show the location of the crossing. They also will contain the required material specifications.

Operation and Maintenance

Inspect temporary stream crossings after runoff-producing rains to check for blockage in channel, erosion of abutments, channel scour, stone displacement, or piping along culverts. Make all repairs immediately to prevent further damage to the installation.

Remove temporary stream crossings immediately when they are no longer needed. Restore the stream channel to its original cross-section, and smooth and appropriately stabilize all disturbed areas.

Common Concerns

- Inadequate flow capacities and/or lack of overflow area around structure results in washout of the culvert or the bridge abatement.
- Inadequate stabilization of overflow area results in severe erosion around the bridge or culvert.
- Debris not removed after a storm event results in clogging that may cause washout of the culvert and/or bridge.
- Stone size too small causes the Ford to wash out.
- Inadequate compaction under or around culvert pipes, results in seepage and piping, causing the culvert to wash out.

Specifications
for

Temporary Access Bridge

This specification does not define the strength of the temporary bridge. It shall be the designer's responsibility to select bridge construction materials with adequate strength for the anticipated construction traffic loads.

1. Stream Disturbance -Disturbance to the stream shall be kept to a minimum. Streambank vegetation shall be preserved to the maximum extent practical and the stream crossing shall be as narrow as practical.
2. Clearing shall be done by cutting NOT grubbing. The roots and stumps shall be left in place to help stabilize the banks and accelerate revegetation.
3. Water shall be prevented from flowing along the road directly to the stream. Diversions and swales shall direct runoff away from the access road to a sediment-control practice.
4. Bridges shall be constructed to span the entire channel. If the channel width exceeds 8 ft. as measured from the top-of-bank, then a footing, pier or bridge support may be constructed within the waterway. No more than one additional footing, pier or bridge support shall be permitted for each additional 8-ft. width of the channel. However, no footing, pier or bridge support will be permitted within the channel for waterways less than 8 ft. wide.
5. Some steep watersheds subject to flash flood events may require that the bridge be cabled ore secured to prevent downstream damage or hazard.
6. No fill other than clean stone free from soil shall be placed within the stream channel.

Specifications
for

Culvert Stream Crossing

Specifications
for

Culvert Stream Crossing

1. Stream Disturbance -Disturbance to the stream shall be kept to a minimum. Streambank vegetation shall be preserved to the maximum extent practical and the stream crossing shall be as narrow as practical.
2. Clearing shall be done by cutting NOT grubbing. The roots and stumps shall be left in place to help stabilize the banks and accelerate revegetation.
3. To minimize interference with fish spawning and migration, crossing construction should be avoided where practical from March 15 through June 15.
4. Water shall not be allowed to flow along the road directly to the stream. Diversions and swales shall direct runoff away from the access road to a sediment-control practice.
5. Placement -Culverts shall be placed on the existing streambed to avoid a drop or waterfall at the downstream end of the pipe, which would be a barrier to fish migration. Crossings shall be made in shallow areas rather than deep pools where possible.
6. Culvert Size -Culvert diameter shall be at least three times the depth of normal stream flow at the point of the stream crossing. If the crossing must be placed in deep, slow-moving pools, the culvert diameter may be reduced to twice the depth of normal stream flow. The minimum size culvert that may be used is 18 in.
7. Number of Culverts -There shall be sufficient number of culverts to completely cross the stream channel from streambank to streambank with no more than a 12-in. space between each one.
8. Fill and Surface Material -All material placed in the stream channel, around the culverts and on the surface of the crossing shall be stone, rock or aggregate. ODOT No. 1 shall be the minimum acceptable size. To prevent washouts, larger stone and rock may be used and they may be placed in gabion mattresses. NO SOIL SHALL BE USED IN THE CONSTRUCTION OF A STREAM CROSSING OR PLACED IN THE STEAM CHANNEL.
9. Removal -Aggregate stone and rock used for this structure does not need to be removed. Care should be taken so that any aggregate left does not create an impoundment or impede fish passage. All pipes, culverts, gabions or structures must be removed.
10. Stabilization -Streambanks shall be stabilized. Plantings shall include woody vegetation where practical.

Specifications
for

Temporary Stream Ford

1. Timing -No construction or removal of a temporary stream ford will be permitted on perennial streams from March 15 through June 15 to minimize interference with fish spawning and migration.
2. Stream Disturbance -Disturbance to the stream shall be kept to a minimum. Streambank vegetation shall be preserved to the maximum extent practical and the stream crossing shall be as narrow as practical. Clearing shall be done by cutting NOT grubbing where possible.
3. Surface Runoff -Water shall not be allowed to flow along the road directly to the stream. Diversions and swales shall direct runoff away from the access road to a sediment-control practice.
4. Fill and Surface Material -All material placed in the stream channel shall be stone, rock or aggregate. ODOT No. 1 shall be the minimum acceptable size. Larger stone and rock may be used. NO SOIL SHALL BE USED IN THE CONSTRUCTION OF A STREAM FORD OR PLACED IN THE STEAM CHANNEL.
5. Removal -Aggregate, stone and rock used for the stream crossing shall NOT be removed but shall be formed so it does not create an impoundment, impede fish passage, or cause erosion of streambanks.
6. Stabilization -Streambanks shall be stabilized. Plantings shall include woody vegetation where practical.

5.6 Water Bar

Description

A water bar is a diversion constructed across the slope of an access road or utility right-of-way. Water bars are used to reduce concentrated runoff on unpaved road surfaces, thus reducing water accumulation and erosion gullies from occurring. Water bars divert runoff to road side swales, vegetated areas or settling ponds.

Conditions Where Practice Applies

Water bars are used at construction site ingress/egress points, on long sloping access roads, on temporary construction roads, or at utility right-of-ways which do not have a stable surface or where runoff would otherwise collect and cause erosion.

Planning Considerations

If the contributing area is disturbed, this practice should be associated with sediment traps that will receive and treat the runoff.

The outlet of each water bar must be resistant to erosion. For small contributing areas, spreading the flow into a undisturbed vegetated area may be sufficient. For larger areas or higher velocities flow may need rock outlet protection to prevent gully erosion.

Specifications
for

Water Bar

1. The minimum water bar dimensions shall be:

   Top width of berm/dike – 2 feet minimum.

   Height/depth – 18 inches unless otherwise noted on plans.

   Side Slopes – Sufficiently flat to accommodate the expected traffic.

2. The spacing between water bars shall be as noted:

   Table 5.6.1 Water Bar Spacing

Road Grade (%)	Distance (Ft.)
1	400
2	250
5	135
10	80
15	60
20	45

3. The field location shall be adjusted as needed to provide a stabilized safe outlet.
4. The diverted runoff shall be directed onto an undisturbed vegetative area, to a settling trap or basin or trap if contributing area is stable.
5. Diversions/dikes shall be compacted by traversing with equipment during construction.
6. The water bars shall be angled slightly downslope across the centerline of the travel lane.

5.7 Dewatering Measures

Description

Dewatering measures provide a stable area for receiving and treating water pumped from excavation or work areas prior to being released off the site. These practices reduce sediment impacts to downstream water resources.

Conditions Where Practice Applies

De-watering measures are used whenever water, either surface or subsurface, prevents or hinders construction activities and has the potential of contributing sediment to streams. This practice is appropriate for any kind of pumping used in conjunction with construction activities.

Planning Considerations

Construction activities often require that water be pumped from an area to facilitate work. This water often has large amounts of suspended sediments. Rather than discharge this water directly to a stream, a means to settle or remove sediment must be provided.

A dewatering plan should be prepared utilizing ground water conditions and soils information to predict areas where de-watering will likely occur. Plans should include the length of time de-watering will occur, the method of de-watering (pumping, siphon...), the discharge point(s), methods to control sediment impacts and the contents of a written log to be kept on-site. These plans may need to be approved by local authorities prior to construction.

All dewatering discharges with suspended solids should pass through a practice to remove sediments While a vegetated filter areas may be sufficient for some situations (e.g. short duration low pumping rates) many will need additional measures, such as sediment traps,

filter bag or flocculation. All structures must have adequate outlet protection to prevent gully erosion. Please note that the Ohio Environmental Protection Agency will find turbid discharges to the stream resulting from any dewatering activity a violation of Ohio Revised Code 6111.04 independent of the methods employed. Therefore even if one method is selected, additional measures may be required to fully treat turbid water.

The particle size distribution, that is the relative proportion of sands, silts and clays, of a soil that is suspended will determine the difficulty of removing sediments. Soils with coarser particle size distributions (large proportion of sand) will be easier to settle out with filter strips and settling ponds. Finer particle size distributions (predominantly silt and clays) will be increasingly difficult and may need a series of measures.

Ground Water Lowering: Often dewatering wells are established to lower the ground water table for utility installation or construction. Generally, this water is free from suspended solids and may be discharged to waters of the state provided the water is not contaminated.

Measures should be taken to ensure the discharge from the de-watering wells does not flow over disturbed areas and suspend sediments, resulting in contaminated discharge. Waterways established to transport dewatering flow should be protected from erosion from the point of discharge all the way to waters of the state. Extending hoses to waters of the state will ensure the discharge remains free from suspended solids. This practice is recommended for discharges of short duration.

Water pumped from wells is about 55° F, which may cause thermal impacts in some situations. High pumping rates near small streams in summer will have major changes in stream metabolism, i.e., throw off spawning. Where this potential occurs, groundwater should not be discharged directly to the stream but roughed through settling ponds or other shallow holding ponds.

The Ohio Department of Natural Resources, Division of Water requires a Water Withdraw Registration for the de-watering activities in the event the facility has the capacity of pumping in excess of 100, 000 gallons per day. This registration must be submitted to ODNR within 90 days following the completion of the project. A water withdraw registration can be obtained by contacting ODNR, Division of Water at 614-265-6735. Assistance regarding proper well installation and abandonment is also available.

Design Criteria

Vegetated Filter Areas: Densely vegetated areas may offer sufficient conditions to treat short duration discharges provided that: flow is not channelized directly to a water resource and the area encourages infiltration, slow overland flow and settling. A minimum of 100 feet is required to utilize a vegetated area. Dense grass or areas with natural depressions will provide the best conditions. Critical areas like wetlands (e.g. vernal pools) or areas with sensitive vegetation that will be damaged (smothering) by sedimentation should not be used.

Sediment trap or basin: In most cases, contaminated discharge should be directed to a sediment trap where the suspended solids can settle/filter out prior to the discharge to waters of the state. Sediment traps should have sufficient storage to receive all the discharged water from pumping and detain this water a minimum of 24 hours. The sediment storage volume is directly related to the pumping capacity and the amount of turbidity. The sediment pond should be designed to optimize the amount of travel time through the impoundment.

The sediment pond should not be more than 4 feet deep with the distance between the intake and outlet maximized to the extent practical.

Pump intakes should withdraw water from the surface of the trench or work area in order not to re-suspend or continually mix water. Continually drawing water from the floor of the area will draw the muddiest water and increase the amount of sediment that must be removed.

Geotextile Filter Bags are a increasingly common way to remove sediment from dewatering discharge. Commonly discharge is pumped into a filter bag chosen for the predominant sediment size. Filter bags are manufactured products made typically from woven monofilament polypropylene textile (coarse materials, e.g. sands) or non-woven geotextile (silts/clays). They are single use products that must be replaced when they become clogged or half full of sediment.

While they may be useful, they are generally high flow products, which have limited ability to treat fine-grained sediments. Gravity drained filter bags should apply the following:

- They should place outside of a vegetated filter area and not in close proximity to the stream or water resource.
- They must sit on a relatively flat grade so that water leaving the bag does cause additional erosion. Placing the bag on a flat bed of aggregate will maximize the flow and useful surface area of the bag.
- They should be used in conjunction with a large vegetative buffer or a secondary pond or barrier

Enhanced Treatment Through Multiple Practices. The need for further reduction in turbidity will likely require more than one treatment measure. The following are devices or measures that when used in sequence with others will reduce turbidity.

Filter bags (gravity flow) are highly variable depending on the pore size and flow rate. Typically filter bags are limited to removing large particles (small sands and large silts).

Sediment traps, weir tanks, filter boxes are effective for the removal of large particles such as sand. Their effective increases as detention times increase.

Sand Media Filters effective for removal of smaller particles such as sand and large silts. These often have the ability to backflush and thus maintain effectiveness and flow rate.

Some commercially available additives are available for further decreasing turbidity. Chitosan and chitin based additives have been shown to significantly increase the effectiveness of filtration and settling. Chitosan (Poly-D-glucosamine) is a low-toxicity product extracted from Chitin (Poly-N-acetyl-D-glucosamine), a by-product of the shellfish industry. Other products such as anionic polyacrylamide (anionic PAM) are commercially available to increase settling. Often these are utilized through wet or dry dosing mechanisms or as water runs over a gel block upstream of a settling or filtration practice. Each product should be utilized within the manufacturers specifications and tailored to the soil and site conditions.

Particulate filter units utilizing cartridges or enclosed filter bags can remove smaller particles depending on the filter size. This type of measure is usually necessary to treat clays. Filters may be need to be changed daily or more frequently.

An example of an enhanced treatment might include: dewatering a trench with a trash pump to a settling tank or pit then pumping from the settling practice to a sand media filter or to a particulate filter.

Common Problems/Concerns

Complete settling of solids within the Sediment Basin does not occur prior to discharge. The length to width ratio of the pond must be increased to lengthen travel time through the structure. In addition, flocculent may be necessary to promote settlement.

Water discharged from subsurface/ground water pumping maybe significantly lower in temperature than that of the receiving stream. The water will need pre-conditioned in order to minimize the biological affects on the stream.

Specifications
for

De-Watering

1. A de-watering plan shall be developed prior to the commencement of any pumping activities.
2. The de-watering plan shall include all pumps and related equipment necessary for the dewatering activities and designate areas for placement of practices. Outlets for practices shall be protected from scour either by riprap protection, fabric liner, or other acceptable method of outlet protection.
3. Water that is not discharged into a settling/treatment basin but directly into waters of the state shall be monitored hourly. Discharged water shall be within +/- 5° F of the receiving waters.
4. Settling basins shall not be greater than four (4) feet in depth. The basin shall be constructed for sediment storage as outlined in Chapter 6, SEDIMENT BASIN OR SEDIMENT TRAP. The inlet and outlet for the basin shall be located at the furthest points of the storage. A floating outlet shall be used to ensure that settled solids do not re-suspend during the discharge process. The settling basin shall be cleaned out when the storage has been reduced by 50% of its original capacity.
5. All necessary National, State and Local permits shall be secured prior to discharging into waters of the state

OHFA COMPLIANT PHASE I ENVIRONMENTAL SITE ASSESSMENT

Hough Senior Independent Living
Hough Avenue between East 89th Street and East 90th Street
Cleveland, Cuyahoga County, Ohio

EXECUTIVE SUMMARY

Partners was contracted by CHN Housing Partners (User/Client) to conduct a Phase I Environmental Site Assessment (ESA) at a Hough Senior Independent Living Property located on Hough Avenue between East 89th Street and East 90th Street in the City of Cleveland, Cuyahoga County, Ohio (Subject Property) in an effort to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), and *de minimis* conditions. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the ASTM International (ASTM) Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21). Additionally, Partners incorporated Ohio Housing Finance Agency (OHFA) requirements as specified in their *Environmental Review Standards for HOME Funded Projects*, effective May 11, 2016, and the *2023 Qualified Allocation Plan Technical Amendment*, approved September 21, 2022. Limitations and deviations from the ASTM E1527-21 standard are described in **Section 1.4** of this report.

The Subject Property consists of approximately 1.25 acres, designated as seven (7) Permanent Parcel Numbers (PPNs) 119-09-014, 119-09-015, 119-09-016, 119-09-017, 119-09-018, 119-09-019, and 119-09-024. The Subject Property is located off Hough Avenue between East 89th and East 90th Street, and is currently undeveloped, vacant land. The current land use is designated as “Residential Vacant Land”, “Commercial Vacant Land”, and “Residential Single-Family Platted Lot”.

The Subject Property was historically developed with residential dwellings prior to 1896. Through the early 1900s the Subject Property contained commercial retail shops along Hough Avenue. These store fronts included dry cleaners, a barber shop, a grocery store, walkup apartments, and various other retail businesses. Notably, at least three (3) former retail units on the Subject Property contained dry cleaners and were historically addressed at 8900, 8904, and 8918 Hough Avenue from the 1930s through the early 1960s. An oil and paint shop was also located at 8904 Hough Avenue in the 1950s and a photography business was addressed at 8928 Hough Avenue from at least 1930 through 1955. By the mid-1970s the Subject Property most of the store fronts were razed. From that time, several single-family dwellings remained. Throughout the early 2000s, most of the dwellings were razed and left as green space.

The area surrounding the Subject Property was developed prior to 1896 for residential use. By 1951, most of the surrounding area was densely developed with a school to the north of the Subject Property and retail businesses along Hough Avenue. A retail filling station with three (3) underground storage tanks was present on the eastern adjoining site addressed as 8930-8940 Hough Avenue from the 1940s through the early 1960s. A site further east also consisted of a dry cleaner in the late 1980s, while the western adjoining site was a filling station with three (3) underground storage tanks (USTs).

August Mack completed a Limited Phase II Investigation in 2024 which detected benzo(a)pyrene and arsenic in one (1) soil sample on the east side of the Subject Property in exceedance of the Residential Land Use standard. Ethylbenzene concentrations in groundwater were also detected above the USEPA Residential and Commercial Vapor Intrusion Screening Levels (VISL).

Below are conclusions derived from this Phase I ESA, which were based on, but not necessarily limited to, a visual inspection of the Subject Property; review of pertinent background and historical information; evaluation of physical setting sources; interviews with persons knowledgeable of the Subject Property (as available); review of environmental records; and Partners’ professional experience. The Phase I ESA has revealed no evidence of RECs, HRECs, and/or CRECs in connection with the Subject Property with the exception of the following:

REC-1: Various Former Commercial Operations, 8900, 8904, 8918, and 8928 Hough Avenue (Subject Property): A historical dry cleaner, Checker Cleaners, was listed in the city directories from 1951 through 1961 at 8900 Hough Avenue. The EDR database report and city directories listed Aaron Cohn Clothing Cleaners at 8904 Hough Avenue in 1930, as well as Unity Dry Cleaning and Tailoring later in 1974. According to Sanborn maps, this portion of the Subject Property was also operated as an oil and paint store in the 1950s. Additionally, another dry cleaning and laundry operation was listed in the EDR database under Benjamin Goldsmith and addressed at the former Subject Property address of 8918 Hough Avenue in 1935. City directories similarly listed various other cleaners from 1941 through 1961. According to city directories, a photography business, most frequently referred to as Fleming Photo Company, was located on the Subject Property at 8928 Hough Avenue from at least 1930 through 1955. Based on Partners’

Copyright © 2025, Partners

experience with these types of facilities and their past use of hazardous chemicals, it is possible that these former dry cleaning and other select operations along Hough Avenue could have adversely impacted the Subject Property.

REC-2: Former Retail Filling Station, 8812 Hough Avenue (Western Adjoining Site): The eastern adjacent site was identified in the EDR Historic Automotive database as Ashford Union Service Station/ 76 Service Station from 1951 through 1974. The Sanborn maps show its presence from 1951 through 1972, along with three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the Subject Property.

Additionally, this Phase I ESA has revealed no evidence of *de minimis* conditions or other conditions of concern (OCCs) in connection with the Subject Property.

Significant Data Gaps

No significant data gaps were identified during the performance of this Phase I ESA.

Recommendations

Based on the findings and conclusions of this Phase I ESA, Partners recommends a Supplemental Phase II Investigation to further delineate exceedances from the 2024 August Mack Limited Subsurface Investigation and determine the extent to which the above-listed RECs have adversely impacted the Subject Property. Alternatively, soil to the next clean boring could be removed and disposed of at an appropriate disposal facility during construction and a sub-slab depressurization system to manage indoor air could be installed within the new structure.

In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system. Additionally, noise mitigation measures, such as barriers or berms, site design, or acoustical construction (e.g., specialized insulation, double-pane windows) could be justified. A noise analysis study may also be warranted.

Notice

This Executive Summary is part of this complete report; any findings, opinions or conclusions in this Executive Summary are made in context with the complete report. Partners recommends that the User read the entire report and the supporting documentation for all supporting information related to findings, opinions, and conclusions.

1.0 INTRODUCTION

Partners was contracted by CHN Housing Partners (User/Client) to conduct an ASTM E1527-21 and OHFA compliant Phase I ESA at a Hough Senior Independent Living Property located on Hough Avenue between East 89th Street and East 90th Street in the City of Cleveland, Cuyahoga County, Ohio (Subject Property). The Subject Property is located approximately 1,200 feet north of Chester Avenue, 10 feet south of Hough Avenue, 125 feet west of East 90th Street, and 15 feet east of East 89th Street. According to information obtained from the Cuyahoga County Auditor's website, the Subject Property is composed of 1.25 total acres associated with seven (7) the following Permanent Parcel Numbers (PPNs): 119-09-014, 119-09-015, 119-09-016, 119-09-017, 119-09-018, 119-09-019, and 119-09-024.

1.1 Purpose

One of the purposes of conducting a Phase I ESA in accordance with the ASTM Practice E1527-21 and the All Appropriate Inquiries (AAI) Final Rule is to permit the User to satisfy one of the requirements to qualify for the Innocent Landowner, Contiguous Property Owner, or Bona Fide Prospective Purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability.

Partners understands that this Phase I ESA Report was completed in preparation of the Subject Property being submitted for Low Income Housing Tax Credit (LIHTC) funding by the Client. It is our understanding that there will be senior living apartments constructed at the Subject Property.

1.2 Objective

The goal of the Phase I ESA process is to identify environmental conditions at the Subject Property and present findings in a written report. A REC is defined by ASTM E1527-21 as follows:

1) "the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* to the *environment*;
2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* or likely *release* to the *environment*; or
3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* under conditions that pose a *material threat* of a future *release* to the *environment*."

The ASTM E1527-21 standard indicates (Appendix X4) that Historical RECs (HRECs), Controlled RECs (CRECs), and *de minimis* conditions are defined differently from RECs.

An HREC is defined by ASTM E1527-21 as follows:

> *A previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

A CREC is defined by ASTM E1527-21 as follows:

> *A recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

Copyright © 2025, Partners

A *de minimis* condition is defined by ASTM E1527-21 as follows:

> *A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.*

Partners has considered the migration of hazardous substances and petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property.

1.3 Scope of Work

Partners conducted the Phase I ESA in general accordance with the United States Environmental Protection Agency (U.S. EPA), *Standard and Practices for All Appropriate Inquires (AAI), Final Rule (40 CFR Part 312)* and *ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-21), effective February 13, 2023.* Phase I ESA activities generally consisted of the following components, presented below with the dates those activities commenced:

ASTM E1527-21 Component	Date Activity Started
Retention of Partners to perform ASTM E1527-21 Phase I ESA;	March 14, 2025
Obtaining and reviewing federal, state, and local environmental databases;	March 14, 2025
Reviewing other reasonably ascertainable public records (historical and current) for the Subject Property and surrounding sites;	March 17, 2025
Conducting a site visit to observe and document existing conditions;	March 18, 2025
Interviewing knowledgeable people about current and past operations at the Subject Property;	April 2, 2025
Documentation of findings in this Phase I ESA Report; and	March 17, 2025
Declaration by Environmental Professional.	April 4, 2025

Exceptions to or deletions from these practices are described in **Section 1.4** of this report. In addition to ASTM standards, at the request of the Client, Partners had also included Ohio Housing Finance Agency (OHFA) considerations as described in the *Ohio Housing Finance Agency* (OHFA) *Environmental Review Standards for HOME Funded Projects* (OHFA Requirements), effective May 11, 2016, and the OHFA *2024-2025 Qualified Allocation Plan*. These non-scope items are detailed in **Section 8.0**.

1.4 Limitations to the ASTM Standard and Data Gaps

Limitations or exceptions to ASTM Standard E1527-21 and data gaps, as defined in the AAI Final Rule noted during the Phase I ESA are discussed below.

Based on a review of available resources and conditions observed during the site visit, the potential data gaps or limitations to ASTM Standard E1527-21 described below do not likely affect the ability to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the Subject Property or would be likely to have a material impact on the conclusions of this report. The following

Copyright © 2025, Partners

limitations or deviations to the ASTM standard are not considered significant, as they do not substantially change the findings and conclusions of this report.

- Although available resources were reviewed, there are intervals over five (5) year periods when data were not available.
- The apparent uses of the Subject Property were identified to 1896, the date of the earliest historical resource that was reviewed and contained information as to the Subject Property's use. The use of the Subject Property as dwellings and store fronts in the 1896 Sanborn maps could not definitively be identified as first use. Topographic maps were reviewed back to 1901; however, Topographic maps do not generally provide information regarding property use. Although additional information sources listed in ASTM E1527-21 were not reviewed (other than as described in **Section 5.0**), it is not expected that any information reviewed prior to 1896 would substantially change the findings and conclusions of this report.
- The Client did not provide Partners with an environmental lien and/or activity use limitation (AUL) search for the Subject Property. Partners was not requested to obtain this item for the purposes of review. The Environmental Data Resources, Inc. (EDR) Regulatory Database report examined Federal and State databases for Engineering Controls (EC) and Institutional Controls (IC). The Subject Property was not found in either database. However, AULs might be recorded at the county or municipal level, which the regulatory database report may not capture. While no other resource reviewed as part of this Phase I ESA provided an indication that such information would change the conclusions of this report, the absence of this information may limit various protections provided under the AAI standard.

There were no exceptions and/or significant data gaps encountered during the performance of this Phase I ESA. As a result, they did not affect the ability of the Environmental Professional (EP) to identify a REC.

1.5 Non-Scope Considerations

Non-scope considerations may be present at a property that do not present potential CERCLA liability and are beyond the scope of ASTM Standard E1527-21. These may include but are not limited to items such as asbestos containing building materials, biological agents, cultural and historical resources, ecological resources, endangered species, health and safety, indoor air quality, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, and wetlands.

Business Environmental Risk is defined by ASTM 1527-21 as follows:

> *A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope consideration, some of which are identified in Section 13 (of the Standard).*

The Client has not requested that any additional non-scope considerations or BERs be assessed as part of this Phase I ESA except for the OHFA considerations as specified in their *Environmental Review Standards for HOME Funded Projects*, effective May 11, 2016, and the *2023 Qualified Allocation Plan Technical Amendment*, approved September 21, 2022.

1.6 Reliance

The Phase I ESA Report has been prepared for the exclusive use of the Client and OHFA and may not be relied upon by any other party. The Client and OHFA may rely on this Phase I ESA subject to the terms and conditions of the contractual agreement between Partners and the Client for environmental consulting services relative to the Subject Property, and any limitations identified in this Phase I ESA.

Copyright © 2025, Partners

2.0 SUBJECT PROPERTY AND ADJOINING SITES DESCRIPTION

2.1 General Subject Property Location

The Subject Property is located on Hough Avenue between East 89th Street and East 90th Street in the City of Cleveland, Cuyahoga County, Ohio and is approximately 50 feet northwest of Amesbury Avenue and 950 feet southeast of East 85th Street. The Subject Property is located in an area developed primarily for residential and commercial uses. The location of the Subject Property is depicted on **Figure 1**

The Subject Property's current land use is designated "Residential Vacant Land", "Commercial Vacant Land", and "Residential Single-Family Platted Lot." A zoning map of the Subject Property and surrounding area obtained from the Cleveland City Planning Committee website indicates that the Subject Property is zoned "Urban Flex 3." The Subject Property information obtained from the Cuyahoga County Auditor's and Cleveland City Planning Committee's websites are included in **Appendix A**.

2.2 Land Title Records

The Subject Property is composed of Cuyahoga County parcels 119-09-014, 119-09-015, 119-09-016, 119-09-017, 119-09-018, 119-09-019, and 119-09-024, which consist of approximately 1.25 total acres. According to the Cuyahoga County Auditor's website, current parcel ownership is summarized in the table below:

PPN	Current Address	Current Owner
119-09-014	1765 East 89th Street	Chester Portal, LLC
119-09-015	East 89th Street	City of Cleveland LB85
119-09-016	8910 Hough Avenue	Chester Portal, LLC
119-09-017	Hough Avenue	City of Cleveland LB81
119-09-018	8920 Hough Avenue	City of Cleveland L/B 2007
119-09-019	8924 Hough Avenue	Chester Portal, LLC
119-09-024	1768 East 90th Street	City of Cleveland Land Reutilization Program

Parcel transfer data is provided in the parcel cards and available parcel information related to the Subject Property provided in **Appendix A**. Subject Property ownership information was not available prior to 1975.

The Client neither contracted with Partners to procure title, lien search and/or an AUL, nor did the Client provide these items to Partners as part of this Phase I ESA.

2.3 Subject Property Characteristics

Figure 2 depicts the features on the Subject Property. Photographs are included in **Appendix B**. The table below includes descriptions of the Subject Property features and characteristics.

Subject Property Feature/Characteristics	Description
Approximate Acres	1.25 Acres
Approximate Elevation	665 feet above the mean sea level (AMSL)

Copyright © 2025, Partners

Subject Property Feature/Characteristics	Description
Topographic Gradient(1)	North towards Lake Erie approximately 2.2 miles away.
Roads, Paths, and/or Rail	Access to the Subject Property is gained from East 89th Street and Hough Avenue by means of a concrete drive.
Water Supply System	City of Cleveland
Sanitary Disposal System	Northeast Ohio Regional Sewer District (NEORSD)
Industrial Wastewater System	Not Applicable
Stormwater Control System	Municipal
Electric Provider	First Energy
Natural Gas Provider	Dominion
Back-Up Power System	Not Applicable
Heating/Cooling System (including fuel source)	Not Applicable
Solid Waste Storage/Transport Provider	Not Applicable
Exterior	Undeveloped Land

(1) According to the East Cleveland, Ohio Quadrangle, USGS 7.5-Minute Topographic Map (**Figure 1**).

2.4 Current Uses of Subject Property

Currently, the Subject Property exists as undeveloped, vacant land.

2.5 Current Uses of Adjoining Sites and Surrounding Area

The following current uses of the adjoining sites were observed from the Subject Property or public rights-of-way. The surrounding area generally consists of residential developments with some commercial developments to the west. Current uses of adjoining sites and the surrounding areas are also depicted on **Figure 2**.

Adjoining Site	Owner/Operator	Description of Use
North	Various	Residential

Adjoining Site	Owner/Operator	Description of Use
East	Various	C Town Food & Deli, Smitty's Seaway Barber Shop, Residential
South	Various	Residential
West	Various	Residential

3.0 USER PROVIDED INFORMATION

Where the term "User" appears in this report, it refers to the Client. To satisfy the intent of the ASTM E1527-21, inquiries were made with the User for information that will help identify the potential for a REC. Therefore, Partners provided the User with an *ASTM E1527-21 Questionnaire* (User Questionnaire). When completed, the User Questionnaire provides certain information and satisfies Section 6. User's Responsibilities of the ASTM E1527-21 Standard.

The User completed the User Questionnaire to assist in gathering information that may be material to identifying RECs at the Subject Property. The User provided the information in **Sections 3.1** through **3.7** by means of the User Questionnaire. Refer to **Appendix C** for a copy of the completed questionnaire.

3.1 Environmental Cleanup Liens

The User is not aware of environmental cleanup liens that have been filed or recorded for the Subject Property.

3.2 Activity and Land Use Limitations

The User is not aware of any activity or land use limitations in place on the Subject Property or that have been filed or recorded in a registry.

3.3 Specialized Knowledge or Experience

The User does not have any specialized knowledge or experience related to the Subject Property.

3.4 Relationship of Purchase Price to Fair Market Value

According to the User, the purchase price being paid for the Chester Portal LLC owned parcels will reasonably reflects the fair market value and parcels obtained from the Cuyahoga County Land Reutilization Corporation will be below fair market value per the City/County pricing policy.

3.5 Commonly Known or Reasonably Ascertainable Information

Based on Partners' February 2024 Phase I ESA, the User is aware that past uses of the Subject Property consisted of various former dry cleaners, oil and paint shops, a photo company, and other miscellaneous residential and commercial uses. The User is not aware of any specific chemicals currently present on the Subject Property, spills, or chemical releases or any environmental cleanups that have taken place on the Subject Property. A Phase II report prepared by August Mack in August 2024 and summarized in Section 6.3 of this report details chemicals that have impacted soils on the Subject Property.

Copyright © 2025, Partners

3.6 Presence of Contamination

The User is not aware of any obvious indicators that point to the presence or likely presence of contamination at the Subject Property, other than that presented in previous reports.

3.7 Other

The User did not provide any other information of environmental significance.

4.0 GEOLOGIC AND HYDROGEOLOGIC INFORMATION

Partners evaluated readily available information provided by the Ohio Department of Natural Resources (ODNR) website and other sources about geology, soil, groundwater, water wells, oil and gas wells, and abandoned mines in the general area of the Subject Property. Copies of geologic and hydrogeologic information are included in **Appendix D**. Site-specific information regarding the Subject Property is not available.

4.1 Geology

According to the *Bedrock Geologic Map of Ohio*, bedrock in the vicinity of the Subject Property consists of Devonian-age Columbus Limestone, including shale and siltstone with some sandstone. Additionally, the *Surficial Geology of the East Cleveland 30 x 60 Minute Quadrangle* figure depicts subsurface materials at the Subject Property as Wisconsinan-age sand, which includes minor amounts of disseminated gravel or thin lenses of silt or gravel, with an average thickness of 20 feet below ground surface (bgs); underlain by Wisconsin-age silt and clay and shale bedrock.

4.2 Soils

According to the United States Department of Agriculture's (USDA) Natural Resources Conservation Service Web Soil Survey, the Subject Property is underlain with the following soil type:

Soil Name	Soil Description	Permeability	Meets Hydric Criteria
Urban land[(1)]-Elnora Complex	Loamy Fine Sand	Moderately well drained	No

[(1)] Urban Land is characterized as areas in which more than 80 percent of the surface is covered by asphalt, concrete, buildings, and/or other manmade surfaces. Most areas are artificially drained by sewer systems and gutters.

4.3 Groundwater

The ODNR *Groundwater Resources Map of Cuyahoga County, Ohio* identifies the Subject Property in an area where sand and gravel deposits may yield less than 15 gallons per minute (GPM). Bedrock is water-bearing sand and gravel and exists just below the ground surface.

No information was available to quantitatively determine shallow groundwater flow direction at the Subject Property. However, shallow groundwater typically follows surface topography. According to the East Cleveland, Ohio Quadrangle, USGS 7.5-Minute Topographic Map, regional topography in the vicinity of the Subject Property slopes down to the north. Therefore, the inferred direction of groundwater flow is to the north.

4.4 Water Wells

According to the ODNR website, no water wells are located on the Subject Property. However, a total of 21 water wells are located within a one-half (0.5) mile radius of the Subject Property.

- A total of nine (9) groundwater monitoring wells have been abandoned or contain unknown status.

Copyright © 2025, Partners

- A total of three (3) groundwater monitoring wells are located at a hospital (9500 Euclid Avenue) located approximately 0.4 miles south of the Subject Property.
- A total of three (3) groundwater monitoring wells are located near townhomes (Chester Parkway between East 83rd Street and East 84th Street) located approximately 0.35 miles southwest of the Subject Property.
- A total of one (1) groundwater monitoring well is located at a community outreach center (8231 Hough Avenue) located approximately 0.25 miles northwest of the Subject Property.
- A total of five (5) groundwater monitoring wells are located at a shopping center (9300 Wade Park Avenue) located approximately 0.3 miles north of the Subject Property.

According to the ODNR Water Well Logs, subsurface material generally consists of sand from the surface to a depth of 15 feet below ground surface (bgs), underlain by clay and shale to a depth of 45 feet bgs (terminal depth of the deepest water well). Static water levels ranged from 4.6 to 19.5 feet below ground surface (bgs).

4.5 Oil and Gas Wells

According to the ODNR Oil and Gas Wells map, no oil or gas wells are located on the Subject Property or on the adjoining sites.

4.6 Mines

According to the ODNR Mines of Ohio map, no mines are located on or beneath the Subject Property or in the surrounding area.

5.0 HISTORICAL RECORDS REVIEW

Past uses of the Subject Property, adjoining sites, and the surrounding area were determined by reviewing 1) historical topographic maps dated between 1901 and 2019; 2) historical aerial photographs dated between 1938 and 2019; 3) historical Sanborn Fire Insurance (Sanborn) Maps dated 1896, 1903, 1913, 1951, 1952, 1970,and 1972; and 4) city directories dated back to 1930. Historical information reviewed was provided by EDR. The historical information is included in **Appendix E**.

5.1 Subject Property History

Based on the review of the aforementioned historical records, the following Subject Property history was obtained.

5.1.1 Topographic Maps

The 1901 topographic map depicts several structures along the northern and western boundaries of the Subject Property. By 1953, there is increased development at the Subject Property. It appears to remain unchanged through 2019.

5.1.2 Aerial Photographs

The 1938 aerial photograph depicts dense urban development at the Subject Property. By 1977, the buildings within the western portion of the Subject Property have been demolished, and it exists as undeveloped land. The Subject Property appears to remain relatively unchanged through 2019.

5.1.3 Sanborn Maps

The 1896 Sanborn map showed five (5) dwellings along the eastern and western boundaries of the Subject Property. There was one (1) store located along the northern boundary of the Subject Property. By 1913, residential and commercial development increased with a total of five (5) stores along the northern

Copyright © 2025, Partners

boundary of the Subject Property. The 1951 Sanborn map showed increased commercial development: an automotive repair shop in the eastern central portion and an oil and paints store in the northwestern portion of the Subject Property. By 1970, the gas station was no longer present, but the rest of the Subject Property remained relatively unchanged through 1972.

5.1.4 City Directories

Subject Property addresses include Hough Avenue (8900 to 8928 [even]), East 89th Street (1751,1755, 1761, 1765, 1767), and East 90th Street (1768) with numerous previous retail occupants in each unit. Pertinent historical tenants are summarized below:

Address	Occupant	Year(s)
8900 Hough Avenue	Harold Baker Grocery; Benjamin Sherwin Grocery; Checkers Cleaners; Roger's Corner	1930; 1941; 1951 to 1961; 1970 to 1974
8904 Hough Avenue	Aaron Cohn Clothes Cleaners; Unity Dry Cleaning & Tailoring	1930; 1974
8918 Hough Avenue	Abraham Congress Clothes Cleaner; Seaway Barber Shop	1941 to 1961; 1970
8928 Hough Avenue	Lawrence Studio Photographs Company; Flemming Photo Company; Hough House of Beauty	1930; 1941 to 1955; 1970

No notable occupants are listed for 8902, 8906, 8908, 8908, 8910, 8912, 8914, 8916, 8920, 8922, 8924, and 8926 Hough Avenue; 1768 East 90th Street; or 1751, 1755, 1761, 1765, and 1767 East 89th Street.

5.2 Adjoining and Surrounding Site History

Based on the review of the aforementioned historical records, the following history of the adjoining sites was obtained.

5.2.1 Topographic Maps

The 1901 topographic map depicts a generally urban area with two roads adjoining the Subject Property to the north (present-day Hough Avenue) and west (present-day East 89th Street). Residential development surrounds the Subject Property, and present-day Dain Brook is located approximately 0.25 miles to the east. By 1953, surrounding development has increased, with Hough School adjoining the Subject Property to the north across Hough Avenue. Orr School is noted approximately 0.25 miles to the southeast in 1963. The area appears to remain relatively unchanged through 2019.

5.2.2 Aerial Photographs

The 1938 aerial photograph depicts two (2) roads adjoining the Subject Property to the north (present-day Hough Avenue) and west (present-day East 89th Street). Residential development surrounds the Subject Property with Hough School adjoining the Subject Property to the north across Hough Avenue. By 1977, the school has been replaced with a high-rise apartment building and parking lot. Additionally, the residential development that adjoins the Subject Property to the northwest across the intersection of Hough

Copyright © 2025, Partners

Avenue and East 89th Street has been demolished. It has been replaced by the Cleveland Thurgood Marshall Recreation Center, two (2) baseball fields, and walking paths. Little change is noted through 2019.

5.2.3 Sanborn Fire Insurance Maps

In 1896, the adjoining and surrounding sites were depicted as mainly residential development with adjoining roads to the north (present-day Hough Avenue), east (present-day East 90th Street), and west (present-day East 89th Street). Hough School and a chapel adjoined the Subject Property to the north across Hough Avenue. By 1903, additional commercial developments appeared to the north, northeast, and west of the Subject Property. There was an increase in residential development in 1913. By 1951, a filling station with three (3) gasoline USTs was noted in the eastern adjoining site until at least 1952. Furthermore, a filling station with three (3) USTs was depicted in the western adjoining site between at least 1951 and 1972. Commercial development continued to increase along Hough Avenue through 1972 as florists, dry cleaners, salons, restaurants, and other stores became established.

5.2.4 City Directories

The city directories indicate that adjoining sites consisted of several commercial and residential uses. Of these, the notable tenants are summarized below.

Location	Address	Occupant	Year(s)
Eastern Adjoining	8930 Hough Avenue	Erdman G. Behnke Grocery; Gonzalez Texaco Service Station	1930 1961
Eastern Adjoining	8932 Hough Avenue	Gonzalez Texaco Service Station; H & L Texaco Service Station; Hall Franklin Filling Station; Arthur L. Gerfen Filling Station	1961 1955 1951 1941
Northern Adjoining	8915 Hough Avenue	Hough School	1930 to 1974

6.0 RECORDS REVIEW

6.1 Regulatory Database Records

Records reviewed during the Phase I ESA include databases maintained by federal, tribal, and state agencies. Partners contracted EDR to conduct a database search in accordance with ASTM Standard E1527-21 and the AAI Final Rule. In preparing this Phase I ESA report, Partners relied upon the results of the database search provided by EDR. The conclusions can only be as accurate as the information provided by EDR and Partners cannot be held liable for inaccurate or incomplete information provided by EDR. The purpose of the database search was to obtain for review the records that would help identify RECs in connection with the Subject Property and the surrounding sites.

The following is a summary of our review and evaluation of the sites identified in the EDR report. All the statements in **Sections 6.1.1** through **6.1.3** are based on the EDR report. A copy of the EDR report is provided in **Appendix F**.

Copyright © 2025, Partners

6.1.1 Subject Property

There are two (2) records identified for the Subject Property in the listed regulatory databases, for which two (2) records are listed in the EDR proprietary databases. There are no records that indicate an unresolved regulatory issue. The identified records are further described below:

- **Unity Dry Cleaning & Tailoring, 8904 Hough Avenue:** The northwest portion of the Subject Property is identified in the EDR Historic Cleaner database as a dry cleaner and tailoring store in 1974. No other useful information is provided in the database.
- **Goldsmith Benj Laundry, 8918 Hough Avenue:** The northern central portion of the Subject Property is identified in the EDR Historic Cleaner database as a laundromat in 1935. No other useful information is provided in this database.

6.1.2 Adjoining and Surrounding Sites

There were 64 records for other sites identified in the listed regulatory databases, for which 17 records were listed in the EDR proprietary databases. These sites were reviewed based on their distance to the Subject Property, the inferred direction of groundwater flow to the Subject Property and regulatory status. Based on the information reviewed in **Section 4.0**, the first encountered groundwater at the Subject Property likely flows to the north. Therefore, sites located hydraulically upgradient in the inferred direction of groundwater flow are more likely to adversely impact the Subject Property.

Based on this review of all listed records, 10 sites were identified to have the potential to adversely impact the Subject Property's environmental condition. These adjoining and/or surrounding sites are further described below.

- **Gonzalez Texaco Service Station, 8932 Hough Avenue:** This facility adjoins the Subject Property to the east, and it is identified in the EDR Historic Automotive database as a filling station between 1951 and 1961. It operated under the name Hall Franklin in 1951, H & L Texaco Station in 1955, and Gonzalez Texaco Service Station in 1961. No other useful information is provided in this database. Due to the location adjoining the Subject Property and the site being hydraulically up-gradient, it is possible that this site has adversely impacted the Subject Property.
- **Ashford Union Service Station, 8812 Hough Avenue:** This facility is approximately 65 feet west of the Subject Property which is hydraulically up-gradient in the inferred direction of groundwater flow from the Subject Property. This facility is listed under the EDR Historic Automotive database from 1951 to 1974 under various names (Davis Hi-Speed Service Station, Pure Gasoline Station, Davis Pure Oil Service Station, Ashford Pure Oil Service, Ashford Union-76 Service). No other useful information is given in the database. Due to the location adjoining the Subject Property and the site being hydraulically up-gradient, it is possible that this site has adversely impacted the Subject Property.
- **Community Circle Two, 8925 Hough Avenue:** This facility is located approximately 95 feet north of the Subject Property, which is hydraulically down-gradient in the inferred direction of groundwater flow from the Subject Property. It is identified in the Leaking Underground Storage Tank (LUST) and Archive Underground Storage Tank (UST) databases for a non-regulated UST. In August 1999, a release (180008884-N00001) occurred. This site is also listed in the Asbestos and Lead databases; however, this was only to document demolition work. No other useful information was given for this site. Due to the separation distance and the site being hydraulically down-gradient in the inferred direction of groundwater flow from the Subject Property, it is unlikely that this site could adversely impact the Subject Property.
- **New Hub Dry Cleaner Company, 9020 Hough Avenue:** This facility is approximately 120 feet to the east of the Subject Property which is hydraulically down-gradient in the inferred direction of groundwater flow. This facility is listed under the EDR Historic Cleaner database in 1986 and 1987. No other useful information is provided in this database. Due to the separation distance and location down-gradient to the Subject Property, it is unlikely that this site adversely impacted the Subject Property.

Copyright © 2025, Partners

- **De Luxe Odorless Cleaners, 8714 Hough Avenue:** This facility is approximately 165 feet west of the Subject Property which is hydraulically cross-gradient in the inferred direction of groundwater flow from the Subject Property. It is listed under the EDR Historic Cleaner database in 1951. No other useful information is provided in this database. Due to the separation distance and location cross-gradient to the Subject Property, it is unlikely that this site adversely impacted the Subject Property.
- **Yee Lim Laundry, 8713 Hough Avenue:** This facility is approximately 210 feet northwest of the Subject Property which is hydraulically cross-gradient in the inferred direction of groundwater flow from the Subject Property. It is listed under the EDR Historic Cleaner database in 1935. No other useful information is provided in this database. Due to the separation distance and location cross-gradient to the Subject Property, it is unlikely that this site adversely impacted the Subject Property.
- **Bokey Laundry, 9201 Hough Avenue:** This facility is approximately 325 feet northeast of the Subject Property which is hydraulically down-gradient in the inferred direction of groundwater flow from the Subject Property. It is listed under the EDR Historic Cleaner database in 1955 (Bokay Laundry) and 1961 (J & S Half Hour Laundry). No other useful information is provided in this database. Due to the separation distance and location down-gradient to the Subject Property, it is unlikely that this site adversely impacted the Subject Property.
- **Royal Cleaners, 9221, Hough Avenue: T**his facility is approximately 415 feet northeast of the Subject Property which is hydraulically down-gradient in the inferred direction of groundwater flow from the Subject Property. It is listed under the EDR Historic Cleaner database in 1935 (Israel Chait) and 1951 (Royal Cleaners). No other useful information is provided in this database. Due to the separation distance and location down-gradient to the Subject Property, it is unlikely that this site adversely impacted the Subject Property.
- **Alex Ranen Dry Cleaner, 1765 East 93rd Street:** This facility is approximately 495 feet east of the Subject Property which is hydraulically cross-gradient in the inferred direction of groundwater flow from the Subject Property. It is listed under the EDR Historic Cleaner database in 1935 (Alex Ranen) and 1951 (Max Simon). No other useful information is provided in this database. Due to the separation distance and location cross-gradient to the Subject Property, it is unlikely that this site adversely impacted the Subject Property.
- **Troy B. Thacker Dry Cleaner, 1738 Crawford Road:** This facility is approximately 585 feet north of the Subject Property which is hydraulically down-gradient in the inferred direction of groundwater flow from the Subject Property. It is listed under the EDR Historic Cleaner database in 1935. No other useful information is provided in this database. Due to the separation distance and location down-gradient to the Subject Property, it is unlikely that this site adversely impacted the Subject Property.

6.1.3 Orphan Sites

Orphan sites are listed in one (1) or more of the federal, tribal, state, or local databases that have not been mapped due to an inadequate address. A total of three (3) orphan sites are identified in the database report. Partners verified the addresses of the orphan sites and determined they are located outside the ASTM standard search distances and are unlikely to have adversely impacted the Subject Property.

6.2 Regulatory Records Requests

Partners has contacted multiple federal, state, and local agencies to obtain information regarding the Subject Property and relevant adjoining properties, as deemed appropriate. See **Sections 8.1.1** through **8.1.8** for a summary of each agency contacted. Copies of the requests and, when applicable, the responses and any provided files, are included in **Appendix H**.

6.3 Previous Reports

The Client provided the following previous environmental reports, which are included in **Appendix G**:

Copyright © 2025, Partners

Phase I Environmental Site Assessment Report, Three Parcels of Undeveloped Land, 8910 & 8924 Hough Avenue and 1765 East 89th Street, Cleveland Ohio 44106, prepared by Nova Group and dated April 26, 2023.

The following RECs were identified during the Phase I ESA conducted by the Nova Group (Nova):

- *"Based on review of historical resources, the Subject Property was developed with commercial buildings from at least 1913 through the 1970s. Fromer commercial occupants included dry cleaners, a grocery store, a photo shop, salons/barber shops, hardware store, cafes/delis, shoe repair and a church. Aforementioned dry cleaners operated at 8900 Hough Avenue in 1951 under the name Checker Cleaners and at 8904 Hough Avenue in 1971. The 8900 Hough Avenue and 8904 Hough Avenue addresses are not listed in city directories subsequent to 1951 and 1976, respectively. References dry cleaners were located on the northwest Subject Property parcel. In addition, a photo shop operated at 8928 Hough Avenue from at least 1932 through 1951. Dry cleaning operations typically involve the use of hazardous substances and generation of hazardous wastes, characteristics of which when released to the subsurface in their pure form, can leave no visible trace of releases or spills. Furthermore, dry cleaning operations are of potential environmental concern due to the potential for undetected/unreported releases in conjunction with dry cleaning activities and the environmental persistence of dry-cleaning chemicals. Photo processing operations also typically involve the use, storage and potential release of hazardous substances related to printing and photo development operations and equipment. Given the absence of determining information regarding the use/disposal of hazardous substances and/or petroleum products, historical use of the Subject Property represents a REC in connection with the Subject Property.*
- *Based on review of the information discussed above, dry cleaners and gasoline fueling/service stations historically operated on adjoining land. Specifically, a former auto filling station operated on adjoining land east from circa 1929 to 1961, a former auto filling station operated on adjoining land west from circa 1932 to 1972, and two former dry cleaners operated on adjoining land east/central (adjoining parcel between the northwest and northeast Subject Property parcels) from at least the late 1930s through the early 1940s. No additional municipal, regulatory or interview information was available regarding these former facilities. Given that referenced facility likely used/generated hazardous substances and/or petroleum products prior to current RCRA regulations and/or local/state oversight, historical use of adjoining land by dry cleaners and gasoline fueling/service stations represents a REC in connection with the Subject Property."*

OHFA and HUD Compliant Phase I Environmental Site Assessment for Hough Senior Independent Living at Hough Avenue between East 89th Street and East 90th Street, Cleveland, Ohio 44106, prepared by Partners and dated February 14, 2024.

Phase I ESA has revealed no evidence of HRECs, CRECs, OCCs in connection with the Subject Property. The following RECs were identified:

- **REC-1: Various Former Commercial Operations, 8900, 8904, 8918, and 8928 Hough Avenue (Subject Property):** A historical dry cleaner, Checker Cleaners, was listed in the city directories from 1951 through 1961 at 8900 Hough Avenue. The EDR database report and city directories listed Aaron Cohn Clothing Cleaners at 8904 Hough Avenue in 1930, as well as Unity Dry Cleaning and Tailoring later in 1974. According to Sanborn maps, this portion of the Subject Property was also operated as an oil and paint store in the 1950s. Additionally, another dry cleaning and laundry operation was listed in the EDR database under Benjamin Goldsmith and addressed at the former Subject Property address of 8918 Hough Avenue in 1935. City directories similarly listed various other cleaners from 1941 through 1961. According to city directories, a photography business, most frequently referred to as Fleming Photo Company, was located on the Subject Property at 8928 Hough Avenue from at least 1930 through 1955. Based on Partners' experience with these types of facilities and their past use of hazardous chemicals, it is possible that these former dry cleaning and other select operations along Hough Avenue could have adversely impacted the Subject Property.
- **REC-2: Former Retail Filling Station with Three (3) USTs, 8930-8940 Hough Avenue (Eastern Adjoining Property):** The eastern adjoining property was identified as Gonzalez Texaco Service

Copyright © 2025, Partners

Station in the EDR Historic Automotive database from 1951 through 1961, and in city directories under various names from 1941 through 1961. On the Sanborn Fire Insurance maps, it is also depicted in 1951 and 1952, with notation of an associated storefront and three (3) underground storage tanks (USTs). No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the Subject Property.

- **REC-3: Former Retail Filling Station, 8812 Hough Avenue (Eastern Adjoining Site)**: The eastern adjacent site was identified in the EDR Historic Automotive database as Ashford Union Service Station/ 76 Service Station from 1951 through 1974. The Sanborn maps show its presence from 1951 through 1972, along with three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the Subject Property. Based on the findings and conclusions of this prior Phase I ESA, no further investigation was recommended for the Subject Property. However, to meet OHFA specifications, a Pre-Renovation Asbestos Survey and Lead-Based Paint Inspection were recommended.

Based on the findings and conclusions of this Phase I ESA, Partners recommended a Limited Phase II Investigation to determine if the above-listed RECs have adversely impacted the Subject Property. It was also noted that all new construction will require a radon mitigation system.

Limited Subsurface Investigation, Hough Avenue between East 89th Street and East 90th Street, Cleveland, Ohio 44106, prepared by August Mack Environmental and dated August 19, 2024.

In order to assess the RECs identified in Partners' February 2024 Phase I ESA, August Mack installed four (4) soil borings to 20 feet below grade. One (1) soil sample from each boring was submitted for analysis of VOCs, PAHs, and RCRA Metals. All four (4) soil borings were then converted into one (1)-inch temporary monitoring wells and sampled for the same chemicals of concern as the soils. Benzo(a)pyrene and arsenic were detected in one (1) soil sample on the east side of the Subject Property in exceedance of the Residential Land Use standard. While not noted in August Mack's report, the soil exceedance of arsenic (15.6 mg/kg) while above the Residential Land Use standard (14 mg/kg) is below the Cuyahoga County background level (24 mg/kg). Therefore, this is not considered a concern.

Several VOCs, PAHs, and metals, were detected in the groundwater sample from the easternmost location on the Subject Property. Of those detected the following were in exceedance of the VAP Unrestricted Potable Use Standard (UPUS): benzo(a)anthracene, benzo(a)pyrene, 1-methylnaphthalene, naphthalene, and barium. August Mack's report compared groundwater results to the UPUS only, which does not apply since the Subject Property is located within the City of Cleveland Urban Setting Designation (USD). When compared to the USEPA Residential and Commercial Vapor Intrusion Screening Levels (VISL), one sample of ethylbenzene (0.108 mg/l) exceeds the Residential VISL standard (0.07 mg/l). The conclusion of August Mack's report was contaminated soil should be removed during construction.

7.0 SUBJECT PROPERTY AND ADJOINING SITE RECONNAISSANCE

Ms. Emily Loxley of Partners conducted a reconnaissance of the Subject Property on March 18, 2025 to observe and document existing conditions in accordance with the requirements of ASTM E1527-21 and the AAI Final Rule. The weather conditions at the time of the inspection included clear, sunny skies and temperatures in the 40s (degrees Fahrenheit). Photographs are included in **Appendix B**.

7.1 Subject Property Reconnaissance

Observations made during the reconnaissance were directed at the use, treatment, storage, disposal, or generation of hazardous substances and petroleum products with the potential to adversely impact the Subject Property. An inspection was made for the following: aboveground storage tanks (ASTs); USTs; drums and other containers; electrical or hydraulic equipment likely to contain polychlorinated biphenyls (PCBs); pits, ponds, or lagoons; stained soils or pavement; stressed vegetation; depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors. For

Copyright © 2025, Partners

any buildings present, observations were made regarding the means of heating and cooling, including the following: fuel sources; stains or corrosion on walls, floors, and ceilings; and the presence of floor drains.

7.1.1 Underground Storage Tanks

Partners did not observe apparent locations of current and/or former underground storage tanks (USTs).

7.1.2 Aboveground Storage Tanks

Partners did not observe apparent locations of current and/or former aboveground storage tanks (ASTs).

7.1.3 Storage Drums and Containers

Partners did not observe visual evidence of storage drums or containers.

7.1.4 Stained Surfaces, Corrosion, Pooled Liquids, or Stressed Vegetation

Partners did not identify stained surfaces, corrosion, pooled liquids, or stressed vegetation.

7.1.5 Strong, Pungent, or Noxious Odors

Partners did not identify strong, pungent, or noxious odors emanating from the Subject Property.

7.1.6 Polychlorinated Biphenyls

Partners observed the following potential polychlorinated biphenyl (PCB)-containing equipment:

- A total of three (3) pole-mounted electrical transformers were observed on electrical poles at the corner of Hough Avenue and East 89th Street. The electrical transformers were observed to be in good condition with no evidence of a release (leakage and staining). The electrical transformers were not labeled as to the PCB content. Due to the unknown age of the transformers, the dielectric fluids in the transformers may contain PCBs.
- A total of one (1) pole-mounted electrical transformer was observed on an electrical pole along the southern central boundary of the Subject Property. The electrical transformer was observed to be in good condition with no evidence of a release (leakage and staining). The electrical transformer was not labeled as to the PCB content. Due to the unknown age of the transformers, the dielectric fluid in the transformer may contain PCBs.

7.1.7 Solid Waste Disposal, Fill Material, Mounds, or Depressions

Partners did not identify apparent fill material, mounds, or depressions.

The following solid waste disposal activities were observed:

- Miscellaneous trash and debris were observed in the southeastern portion of the Subject Property.

7.1.8 Pits, Ponds, or Lagoons

Partners did not identify apparent pits, ponds, or lagoons.

7.1.9 Wastewater Discharge or Treatment, Floor Drains, Sumps, Septic Systems, or Wells

Partners did not observe apparent wastewater discharge or treatment, floor drains, sumps, septic systems, or wells.

Copyright © 2025, Partners

7.1.10 Other Observations

Partners did not identify any other notable observations during Subject Property reconnaissance.

7.2 Adjoining Sites and Surrounding Area

Current uses of the adjoining sites and surrounding area were observed from the Subject Property or public rights-of-way. The following are observations of the current uses of adjoining sites and the surrounding area, which are depicted on **Figure 2**.

Adjoining Site	Owner/Operator	Description of Use
North	Various	Residential
East	Various	C Town Food & Deli, Smitty's Seaway Barber Shop, Residential
South	Various	Residential
West	Various	Residential

Observations made of the adjoining sites and surrounding area during the site visit were directed at the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products on adjoining sites or surrounding area with the potential to adversely impact the Subject Property. Observations of the adjoining sites and surrounding area were made from the Subject Property or from public rights-of-way. Observations were made for the following: ASTs; USTs; drums and containers; electrical or hydraulic equipment likely to contain PCBs; pits, ponds or lagoons; stained soils or pavement; stressed vegetation and depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors.

Partners did not observe visual evidence of environmental concerns at the adjoining or surrounding sites.

8.0 OHFA CONSIDERATIONS

In addition to the observations made in accordance with ASTM E 1527-21 and AAI Final Rule, Partners conducted a preliminary review of environmental conditions, which, according to the OHFA, may pose a threat to the health and safety of proposed residents of the sites. Partners' evaluation of OHFA considerations is limited to information that was obtained from sources typically utilized in the completion of a Phase I ESA under the ASTM E 1527-21 standard, and no physical testing or laboratory analysis was completed. Supporting documentation for the OHFA considerations, including associated maps, the OHFA letter of reliance, and certificate of liability insurance is included in **Appendix H**.

8.1 Legal Regulatory Review

8.1.1 Fire Department

On March 17, 2025, Partners submitted an OHFA form letter via online portal to the City of Cleveland Fire Department (CCFD) to obtain information pertaining to the Subject Property and surrounding sites. The CCFD responded on March 18, 2025, stating that they do no records on file of environmental significance for the Subject Property and/or the adjoining and surrounding sites.

Copyright © 2025, Partners

8.1.2 Health Department

On March 17, 2025, Partners submitted an OHFA form letter via online portal to the City of Cleveland Department of Public Health (CDPH) to obtain information pertaining to the Subject Property and surrounding sites. The CDPH responded on March 20, 2025, stating that they do no records on file of environmental significance for the Subject Property and/or the adjoining and surrounding sites.

8.1.3 Building Department

On March 17, 2025, Partners submitted an OHFA form letter via email to the City of Cleveland Department of Building and Housing (CDBH) to obtain information pertaining to the Subject Property and surrounding sites. The CDBH has not responded to Partners' request, and follow-up email on March 24, 2025, for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum only if there are any relevant changes to our findings and conclusions.

8.1.4 Police Department

On March 17, 2025, Partners submitted an OHFA form letter via online portal to the City of Cleveland Police Department (CCPD) to obtain information pertaining to the Subject Property and surrounding sites. The CCPD has not responded to Partners' request, and follow-up request on March 24, 2025, for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum only if there are any relevant changes to our findings and conclusions.

8.1.5 Public School District

On March 17, 2025, Partners submitted an OHFA form letter to the Cleveland Metropolitan School District (CMSD) to obtain information pertaining to the Subject Property and surrounding sites. The Public Record Requests Department responded via email on March 18, 2025. They stated that "CMSD is an open choice school system; therefore, there are no 'assigned' neighborhood schools. However, students living in that area would be closest to Daniel E. Morgan (PreK-8), Mary B. Martin (PreK-8), Mary M. Bethune (PreK-8), Wade Park (PreK-8), John Hay campus (high school), and Cleveland School of the Arts (high school)." Additionally, there is no concern regarding absorbing an influx of students as they stated that the school district has "sufficient capacity." The CMSD transportation policy states that "students living less than one (1) mile from the school will walk while students living more than one (1) mile will ride a bus or be given an RTA [Rapid Transit Authority] pass (grade dependent)." The school district's primary schools offer pre-school, but the district does not offer adult education within its facilities. For additional information, Partners was directed to the CMSD website; the district "serves more than 36,000 students in approximately 100 locations. [Its] schools cover the entire spectrum of learning and offer a variety of extracurricular and community activities."

8.1.6 Local Emergency Planning Committee

Partners contacted the Cuyahoga County Local Emergency Planning Committee (LEPC) on March 17, 2025 to obtain information. No response was received by Partners from the LEPC online request submission and March 24, 2025, follow-up request. The LEPC has not responded to Partners' request for information at this time. If the records become available within 20 days of this report being submitted, then Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.7 State Regulatory Agency

Partners contacted the Ohio EPA on March 17, 2025, to obtain information. No response was received by Partners from the EPA online request submission/email and March 24, 2025 follow-up email. The Ohio EPA has not responded to Partners' request for information at this time. If the records become available

Copyright © 2025, Partners

within 20 days of this report being submitted, then Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

Additionally, Partners searched for the Subject Property on the Ohio EPA eDocuments website. No files related to the Subject Property were provided.

8.1.8 Bureau of Underground Storage Tank Regulations

Partners conducted a file review of documents provided by the Bureau of Underground Storage Tank Regulations (BUSTR) on March 18, 2025, to obtain information. The BUSTR had the no records on file of environmental significance for the Subject Property and/or the adjoining and surrounding sites.

8.2 Observations for Structures Undergoing Demolition and/or Rehabilitation

8.2.1 Asbestos Containing Materials

The Subject Property is vacant with no structures or improvements; therefore, a pre-demolition/renovation asbestos containing materials (ACM) inspection to identify and quantify all ACM that might be disturbed during any renovation or demolition work is not applicable.

8.2.2 Lead Based Paint

The Subject Property is vacant with no structures or improvements; therefore, a pre-demolition/renovation lead-based paint inspection to identify and quantify all lead-based paint materials that might be disturbed during any renovation or demolition work is not applicable.

8.2.3 Lead in Drinking Water

The Subject Property is vacant with no structures or improvements; therefore, there is not a concern over lead in drinking water. However, the water treatment process for the region will be described for future reference. Drinking water in the surrounding area is supplied by the City of Cleveland, which draws from four (4) intake sources offshore in Lake Erie's Central Basin. Raw water is treated and tested at an on-site Ohio EPA certified lab before distribution to public consumers. According to the City of Cleveland Water Department website, the drinking water does not have high levels of naturally occurring lead and the water is treated to prevent corroded lead from piping and soldering from entering the water flow. The City of Cleveland follows all EPA mandates to treat and test water to prevent lead from entering public drinking water systems. Drinking water for the Subject Property is not acquired from a sole source aquifer or located within a protected drinking water source area. Therefore, drinking water sampling and lab testing for lead in drinking water are not required.

8.2.4 Histoplasmosis

The presence of birds or bats was not apparent during the Subject Property reconnaissance conducted on March 18, 2025. While there were several large trees seen at the Subject Property, no birds, bats, or evidence of these animals (nests, etc.) were observed. If redevelopment takes place between April 1 and September 30, Indiana Bat activity should be verified and tree removal restrictions may apply.

8.2.5 Mold

The Subject Property is currently vacant land with no structures; therefore, a mold assessment is not applicable.

8.2.6 Radon

According to the Ohio EPA Map of Radon Zones, the Subject Property is located in Zone 2. In this zone, indoor radon can range between two (2) to four (4) picocuries per liter of air (pCi/L). The EPA recommends

Copyright © 2025, Partners

action if the radon level is four (4) pCi/L (picocuries per liter) or more. A copy of the map is included in **Appendix H.**

In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system. If the current Subject Property buildings remain, a radon mitigation system within the buildings would be necessary.

8.2.7 Historic Preservation

The Subject Property is currently vacant land with no structures. According to the Ohio Historic Preservation Office (OHPO) National Register website, the Subject Property is not a registered historical site; however, a portion of the Subject Property is included in the National Register of Historic Places polygon. This does not appear to affect the Subject Property due to the lack of structures. No known historic sites adjoin the Subject Property. The associated map is included in **Appendix H**.

8.3 Geologic, Hydrogeologic, and Natural Observations

8.3.1 Floodplain

Partners reviewed the National Flood Insurance Program, Flood Insurance Rate Map, for the Subject Property and surrounding area. The Subject Property is mapped as Zone X, which is defined as an area of minimal flood hazard. A copy of the floodplain map is included in **Appendix H**.

8.3.2 Wetlands

Partners reviewed the National Wetlands Inventory (NWI) map obtained from the U.S. Fish and Wildlife Service (USFWS) Wetlands website. According to the NWI map, no wetlands are identified on the Subject Property. A copy of the NWI Map is included in **Appendix H**.

According to the USDA's Natural Resources Conservation Service Web Soil Survey, the Subject Property is underlain with soil classified by the USDA as Urban land(1)-Enora Complex silty clay loam, two (2) to six (6) percent slopes (CtA), which is listed to not be a hydric soil.

8.3.3 Wild and Scenic Rivers

According to the National Wild and Scenic Rivers System website, no applicable rivers are located on or near the Subject Property. The associated map is included in **Appendix H**.

8.3.4 Coastal Barrier Resources

According to the USFWS Coastal Barrier Resources System Mapper website, the Subject Property is not located within a designated coastal barrier resources area. The associated map is included in **Appendix H**.

8.3.5 Coastal Zone Management

According to the ODNR Office of Coastal Management website, the Subject Property is not located within a designated coastal management area. The Ohio Coastal Atlas Map is included in **Appendix H**.

8.3.6 Sole Source Aquifer

According to the USEPA's Sole Source Aquifer website for Region 5, the Subject Property is not located in a sole source aquifer. The Sole Source Aquifer Map is included in **Appendix H**.

Copyright © 2025, Partners

8.3.7 Safe Drinking Water

According to the Cleveland Water 2023 Water Quality Report, the city of Cleveland ensures safe drinking water for the community. Cleveland water uses a conventional treatment process to ensure drinking water meets federal and state requirements. This process turns water into clean and safe drinking water by coagulation, flocculation, sedimentation, filtration, disinfection, and finishing to remove dirt, bacteria, and viruses. The city of Cleveland complies with the US EPA drinking water standards and the federal Safe Drinking Water Act.

8.3.8 Soil Suitability

Soils on the property consist of Urban land complex soils, which are nearly level silty-clay loams that are poorly drained. This soil does not meet hydric criteria and no wetlands were mapped via USFWS or observed during site reconnaissance. Storm water runoff is managed by a municipal system. Further geologic information is included in **Section 4.0**.

8.3.9 Farmland Protection Area

According to the American Farmland Trust Protected Agricultural Lands Database, no protected agricultural areas are located in the vicinity of the Subject Property. Additionally, due to the historic residential land use and urban setting of the Subject Property, farmland protection considerations are not applicable. The Farmland Protection Area Map is included in **Appendix H**.

8.3.10 Endangered Species

According to the USFWS Critical Habitat Mapper, the Subject Property is not located in or within the vicinity of any registered critical habitats. A copy of the Critical Habitats map is included in **Appendix H**.

According to the ODNR State Listed Wildlife Species by County website, three (3) endangered species are listed in Cuyahoga County including the Upland Sandpiper, Lake Sturgeon, and Smooth Green Snake. No natural surface water bodies were present at the Subject Property, so the Lake Sturgeon could not be present. No evidence of habitats for the Upland Sandpiper and Smooth Green Snake was noted during Subject Property reconnaissance. A copy of the species informational pages is also included in **Appendix H**.

8.4 Manmade Hazards

8.4.1 Aboveground Storage Tanks

Partners did not observe visual evidence of current or former ASTs on the Subject Property or surrounding sites during the Subject Property reconnaissance.

8.4.2 Underground Storage Tanks

Partners did not observe visual evidence of current or former USTs on the Subject Property or surrounding sites during the Subject Property reconnaissance. Based on historical records, orphan UST may be present on the eastern adjoining site. The eastern and western adjoining sites formerly operated as retail filling stations.

8.4.3 Electromagnetic Fields

Overhead electric distribution lines along various public rights-of-way provide service to the Subject Property and surrounding areas. Other than electrical lines, three (3) pole-mounted transformers in the northwest corner of the Subject Property, and one (1) pad-mounted transformer along the southern central boundary of the Subject Property, no high voltage electrical transmission lines were observed during the Subject Property reconnaissance.

Copyright © 2025, Partners

8.4.4 High Pressure Buried Gas Lines or Liquid Petroleum Transportation Pipelines or Explosion Hazards

According to the East Cleveland, Ohio Quadrangle, USGS 7.5-Minute Topographic Map, no pipelines are depicted on or in the vicinity of the Subject Property. In addition, no evidence of buried high-pressure gas pipelines or liquid petroleum pipelines were observed on or in the vicinity of the Subject Property during the Subject Property reconnaissance.

According to the United States Department of Transportation (DOT) National Pipeline Mapping System, the nearest hazardous liquid pipeline is located approximately 2.6 miles southwest of the Subject Property. No information is provided to indicate what type of hazardous liquid is being transported by the previously mentioned pipeline. A copy of the U.S. DOT National Pipeline Map is included in **Appendix H**.

No oil or gas wells were identified on the Subject Property or adjoining sites in reviewed ODNR information.

8.4.5 Traffic Hazard Conditions

The Ohio Department of Transportation (ODOT) conducted a traffic count through the Transportation Information Mapping System (TIMS) in 2023 for the northern adjoining road, Hough Avenue. Partners observed typical residential traffic in the area during the Subject Property reconnaissance. A total average annual daily traffic (AADT) of 2,756 was counted for the segment of Hough Avenue (Route #14698) directly north of the Subject Property. Additionally, the AADT for cars was 2,643, the AADT for medium trucks was 113, and the AADT for heavy trucks was 36.

ODOT also conducted a traffic count through TIMS in 2023 for the western adjoining road, East 89th Street. Partners observed typical residential traffic in the area during the Subject Property reconnaissance. A total AADT of 4,662 was counted for the segment of East 89th Street (Route #02856) directly west of the Subject Property. Additionally, the AADT for cars was 4,615, the AADT for medium trucks was 47, and the AADT for heavy trucks was zero (0).

Additionally, noise-related considerations related to traffic are addressed in **Section 8.4.7**.

8.4.6 Airport Hazards

The Cleveland Burke Lakefront Airport is located approximately three and a half (3.5) miles northwest of the Subject Property, which is inside of the five (5) mile consideration. According to the Global Land and Flight Noise Dashboard, the Subject Property has a nightly average of 47 decibels, daily average of 51 decibels, and an overall average of 50 decibels. It is designated as quiet rural background noise. The Global Land and Flight Noise Map is included in **Appendix H**. Based on this assessment, Cleveland Burke Lakefront Airport does not represent a noise concern to the Subject Property.

8.4.7 Major Roadways

Hough Avenue, a major roadway, adjoins the Subject Property to the north; therefore, it is within the 1,000-foot consideration and can reach 50 decibels within 24 hours. The Level of Traffic Stress of 2023 for Hough Avenue was given a level of three (3), indicating that this street involves interaction with moderate traffic stress. East 89th Street, a major roadway, adjoins the Subject Property to the west; therefore, it is within the 1,000-foot consideration and can reach 50 decibels within 24 hours. The Level of Traffic Stress of 2023 for East 89th Street was given a level of three (3), indicating that this street involves interaction with moderate traffic stress.

The CSXT Great Lakes Division Cleveland Short Line Subdivision Railroad, Norfolk Southern Keystone Division Lake Erie District Railroad, and the Greater Cleveland RTA tracks are located approximately 6,300 feet east of the Subject Property. The Subject Property and railroads are separated by residential and commercial buildings. The railroads are not within the 3,000-foot consideration. Based on this assessment, the railroads do not represent a noise condition to the Subject Property.

Copyright © 2025, Partners

According to the HUD Exchange's Day/Night Noise Level (DNL) reference materials and calculator, a day-night average of 71 decibels was determined for Hough Avenue. The following assumptions were made to calculate this DNL value:

- Vehicle Type: Cars, Medium Trucks, and Heavy Trucks
- Effective Distance: 10 feet
- Distance to Stop Sign: Greater than 600 feet
- Average Speed: 25 miles per hour
- Average Daily Trips (ADT): Cars (2,643), Medium Trucks (113), and Heavy Trucks (36)
- Night Fraction of ADT: 15
- Road Gradient (percent): 2

According to the HUD Exchange's DNL reference materials and calculator, a day-night average of 56 decibels was determined for East 89th Street. The following assumptions were made to calculate this DNL value:

- Vehicle Type: Cars, Medium Trucks, and Heavy Trucks
- Effective Distance: 15 feet
- Distance to Stop Sign: Greater than 600 feet
- Average Speed: 25 miles per hour
- Average Daily Trips (ADT): Cars (4,615), Medium Trucks (47), and Heavy Trucks (0)
- Night Fraction of ADT: 15
- Road Gradient (percent): 2

According to the HUD Exchange's DNL reference materials and calculator, a day-night average of 71 decibels which is greater than 65 decibels for exterior and 45 decibels for interior noise. The HUD DNL output is included in **Appendix H**. Based on this assessment, Hough Avenue and East 89th Street may represent noise conditions to the Subject Property. Noise mitigation measures, such as barriers or berms, site design, or acoustical construction (e.g., specialized insulation, double-pane windows) could be justified. A noise analysis study may be warranted.

Other potential noise considerations are listed in **Sections 8.4.5** and **8.4.6** above and were factored into the DNL calculations, as necessary.

8.4.8 Air Quality Consideration

The Subject Property's county, Cuyahoga County, is in non-attainment status for the following: Eight-Hour Ozone (2015). This project exceeds de minimis emissions levels or the screening level established by the state or air quality management district for the pollutant identified above. However, Partners does not anticipate the Subject Property to be impacted by the Eight-Hour Ozone non-attainment status. Cuyahoga County is in attainment status for One-Hour Ozone (1979), Eight-Hour Ozone (1997), Eight-Hour Ozone (2008), Carbon Monoxide (1971), Lead (2008), PM-10 (1987), PM-2.5 (1997), PM-2.5 (2006), PM-2.5 (2012), and Sulfur Dioxide (1971). This project does not exceed de minimis emissions levels or the screening level established by the state or air quality management district for the pollutants identified above. The project is in compliance with the Clean Air Act, as construction is not anticipated to change this status in a long-term capacity.

8.4.9 Emerging Contaminants

Emerging contaminants were considered during the Phase I ESA process. Based on historical uses, dry cleaning chemicals, paints, and oils were noted to be stored on the Subject Property. No known spills were documented.

Copyright © 2025, Partners

8.4.10 Environmental Justice

According to information included in the Environmental Justice Assessment for the Subject Property, obtained from the Public Environmental Data Partners EJScreen website, the Property is located in an area in which 95 percent or greater of the residents live below the poverty line, the per capita income is not reported, and 80 to 90 percent of the population is a minority. It is Partners' understanding that the senior living apartments will be constructed at the Subject Property for low-income individuals. These statistics support that the neighborhood would appear to benefit in a net positive manner from this development. The EJSCREEN Summary Report is included in **Appendix H**. It should be noted that the US EPA EJView website is no longer active.

8.5 Vapor

Partners prepared a Tier 1 Vapor Encroachment Screening (VES) in general accordance with *ASTM E 2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (VES Standard). Under the ASTM VES Standard, information obtained during the Phase I ESA is used to evaluate if the Subject Property is subject to a Vapor Encroachment Condition (VEC). A VEC is defined by ASTM E 2600-10 as follows:

> *The presence or likely presence of chemicals of concern (COC) vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property as identified by Tier 1 or Tier 2 procedures*.

The purpose of a VES is to identify, to the extent feasible pursuant to the procedures presented in ASTM VES Standard, if a VEC exists at the Subject Property.

The first step of the VES is to identify known or suspected contaminated sites within an established search distance or Area of Concern (AOC). The ASTM VES Standard establishes a search radius of one third (1/3) of a mile for non-petroleum hydrocarbon sources and one tenth (1/10) of a mile for petroleum hydrocarbon sources. If a known or suspected contaminated site is located within the AOC, the site is evaluated to determine if the site is located, up-, cross-, or down-gradient in the inferred direction of groundwater flow from the Subject Property or if the site is separated from the Subject Property by a hydraulic or physical barrier (i.e., stream, perched aquifer, utility corridor, etc.). The conclusion from a Tier 1 VES can be any of the following:

1. A VEC exists;
2. A VEC likely exists;
3. A VEC cannot be ruled out; or
4. A VEC can be ruled out because a VEC does not or is not likely to exist.

Partners reviewed historical documents (**Section 5.0**) and regulatory database records (**Section 6.0**) to identify sites located within 1/10 of a mile from the Subject Property for petroleum sources (i.e., service stations, UST, or LUST sites) and sites within 1/3 of a mile of the Subject Property for non-petroleum hydrocarbon sources. Facilities that were determined to be far enough away or hydraulically cross gradient to down gradient in the inferred direction of groundwater flow from the Subject Property and would not be expected to have an impact on the Subject Property are not discussed in further detail. The sites that may represent a VEC to the Subject Property are listed below and discussed in further detail as RECs in **Section 11.0**.

<u>Subject Property:</u>

- Former Checker Cleaners, 8900 Hough Avenue
- Former Aaron Cohn Clothing Cleaners/Unity Cry Cleaning and Tailoring, 8904 Hough Avenue
- Former Oil/Paint Store, 8904 Hough Avenue
- Benjamin Goldsmith Cleaners/Various Dry Cleaners, 8918 Hough Avenue
- Fleming Photo Company, 8928 Hough Avenue

Copyright © 2025, Partners

Adjoining and Surrounding Sites:

- Former Retail Filling Station (under various names), 8930-8940 Hough Avenue
- Former Ashford Union Service Station, 8812 Hough Avenue

In accordance with the ASTM VES Standard, a finding that a VEC exists or likely exists at the Property or that a VEC cannot be ruled out for the Property is not a determination that a REC is identified at the Subject Property. Refer to **Section 10.0 and 11.0** for further discussion of the findings and conclusions of this Phase I ESA report.

9.0 INTERVIEWS

Interviews were conducted with the following individuals in order to obtain pertinent information regarding the Subject Property including the current or historical presence of the following: ASTs; USTs; drums and containers; electrical or hydraulic equipment likely to contain PCBs; pits, ponds, or lagoons; stained soils or pavement; stressed vegetation and depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors.

9.1 Owner

The current owner contact information was not provided; however, during a prior Phase I ESA completed by Partners for the Subject Property in 2024, Mr. Jacob Silvermetz, a representative of the Subject Property owner, completed an owner interview form and returned it by email to Partners to satisfy the owner interview requirements. No significant changes have occurred on the Subject Property since this time. Mr. Silvermetz stated that there are no water wells, oil/gas wells, USTs, ASTs, hazardous substances, or petroleum products on or in use at the Subject Property. He did indicate that at least one dry cleaner and laundry operation was previously present on the Subject Property. Contact information for other Subject Property owners was not provided; therefore, additional interviews were not conducted.

9.2 Operator

The Subject Property is vacant, undeveloped land with no current operator or occupant.

10.0 FINDINGS

1. According to city directory listings and Sanborn maps, at least three (3) former retail units on the Subject Property contained dry cleaners and were historically addressed at 8900, 8904, and 8918 Hough Avenue from the 1930s through the early 1960s. An oil and paint shop was also located at 8904 Hough Avenue in the 1950s and a photography business was addressed at 8928 Hough Avenue from at least 1930 through 1955. August Mack's Limited Phase II Investigation detected benzo(a)pyrene and arsenic in one (1) soil sample on the east side of the Subject Property in exceedance of the Residential Land Use standard. Ethylbenzene concentrations in groundwater were also detected above the USEPA Residential and Commercial Vapor Intrusion Screening Levels (VISL).

2. According to city directory listings and Sanborn maps, the eastern adjoining site contained a filling station and was historically addressed at 8930 to 8940 Hough Avenue from the 1940s through the early 1960s. It contained three (3) gasoline USTs. However, the August Mack Phase II found no evidence of petroleum related compounds in the nearest boring to this site.

3. According to the database report and Sanborn maps, the western adjoining site contained a filling station and was historically addressed at 8812 Hough Avenue from the 1950s through the mid-1970s. It contained three (3) gasoline USTs. Field observations and analytical results from the August Mack Phase II suggest that petroleum impacts are present on the western side of the Subject Property.

4. According to the HUD Exchange's DNL reference materials and calculator, a day-night average of 71 decibels which is greater than 65 decibels for exterior and 45 decibels for interior noise.

Copyright © 2025, Partners

11.0 OPINIONS AND CONCLUSIONS

Partners was contracted by CHN Housing Partners (User/Client) to conduct a Phase I ESA at a Hough Senior Independent Living property located on Hough Avenue between East 89th Street and East 90th Street in the City of Cleveland, Cuyahoga County, Ohio (Subject Property). The Subject Property is further defined as PPNs 119-09-014, 119-09-015, 119-09-016, 119-09-017, 119-09-018, 119-09-019, and 119-09-024.

Partners conducted the Phase I ESA in general accordance with the U.S. EPA, *Standard and Practices for AAI, Final Rule* (40 CFR Part 312) and the *ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-21).* Additionally, Partners incorporated Ohio Housing Finance Agency (OHFA) requirements as specified in their *Environmental Review Standards for HOME Funded Projects*, effective May 11, 2016, and the *2023 Qualified Allocation Plan Technical Amendment*, approved September 21, 2022. Exceptions to, or deletions from these practices are described in **Section 1.4** of this report. The purpose of conducting a Phase I ESA in accordance with the ASTM Practice E1527-21 and the AAI Final Rule is to permit the User to satisfy one of the requirements to qualify for the Innocent Landowner, Contiguous Property Owner, or Bona Fide Prospective Purchaser limitations on CERCLA liability.

Partners opinions about the Subject Property findings are listed below:

1. Based on the results of the Phase II, soil media and the groundwater to indoor air pathway contain exceedances above residential standards. Therefore, this is considered a REC.
2. Based on the results of the August Mack Phase II, the eastern adjoining site is not considered a REC.
3. Based on Partners experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the Subject Property. Furthermore, the results of the August Mack Phase II found petroleum related constituents in exceedance of residential standards on the western portion of the Subject Property, which adjoins this former filling station. Therefore, the western adjoining site is considered a REC.
4. Based on this noise calculator output, Hough Avenue and East 89th Street may represent noise conditions to the Subject Property. Noise mitigation measures, such as barriers or berms, site design, or acoustical construction (e.g., specialized insulation, double-pane windows) could be justified. A noise analysis study may also be warranted.

Below are conclusions derived from this Phase I ESA, which were based on, but not necessarily limited to, a visual inspection of the Subject Property; review of pertinent background and historical information; evaluation of physical setting sources; interviews with persons knowledgeable of the Subject Property (as available); review of environmental records; and Partners' professional experience. Partners has considered the migration of hazardous substances or petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property. The Phase I ESA has revealed no evidence of RECs, HRECs, and/or CRECs in connection with the Subject Property with the exception of the following:

REC-1: Various Former Commercial Operations, 8900, 8904, 8918, and 8928 Hough Avenue (Subject Property)

REC-2: Former Retail Filling Station, 8812 Hough Avenue (Western Adjoining Site)

Additionally, the Phase I ESA has revealed no evidence of de minimis conditions or other conditions of concern (OCCs) in connection with the Subject Property.

Significant Data Gaps

No significant data gaps were identified during the performance of this Phase I ESA.

Copyright © 2025, Partners

12.0 RECOMMENDATIONS

Based on the findings and conclusions of this Phase I ESA, Partners recommends a Supplemental Phase II Investigation to further delineate exceedances from the 2024 August Mack Limited Subsurface Investigation and determine the extent to which the above-listed RECs have adversely impacted the Subject Property. Alternatively, soil to the next clean boring could be removed and disposed of at an appropriate disposal facility during construction and a sub-slab depressurization system to manage indoor air could be installed within the new structure.

In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system. Additionally, noise mitigation measures, such as barriers or berms, site design, or acoustical construction (e.g., specialized insulation, double-pane windows) could be justified. A noise analysis study may also be warranted.

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

Partners has prepared this report on behalf of its Client, CHN Housing Partners. Resumes for the individuals who worked on this report are included in **Appendix I** and signatures are provided below.

The following participated in the preparation of this Phase I ESA Report:

Emily Loxley

Emily Loxley
Author

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312.10.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiry in conformance with the standards and practices set forth in 40 CFR Part 312.

X3. USER QUESTIONNAIRE
INTRODUCTION

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[35] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*)[36] the *user* must provide the following information (if available) to the *environmental professional.* Failure to provide this information could result in a determination that *"all appropriate inquiry"* is not complete.

1. **Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**
   Are you aware of any environmental cleanup liens against the *subject property* that are filed or recorded under federal, tribal, state of local law?
   YES ☐ **NO** ☐

2. **Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).**
   Are you aware of any AULs, such as *engineering controls,* land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a Registry under federal, tribal, state or local law?
   YES ☐ **NO** ☐

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**
   As the user of this ***ESA*** do you have any specialized knowledge or *experience* related to the *subject property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   YES ☐ **NO** ☐

4. **Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**
   a. Does the purchase price being paid for this *subject property* reasonably reflect the fair market value of the *property?* The parcels acquired from Chester Portal LLC will be acquired fair market value. Parcels acquired from City of Cleveland Land Bank will be below fair market value per City pricing policy. **YES** ☐ **NO** ☐
   b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *subject property?*
   YES ☐ **NO** ☐

5. **Commonly known or *reasonably ascertainable* information about the subject property (40 CFR 312.30).**
   Are you aware of commonly known or *reasonably ascertainable* information about the *subject property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as user,
   a. Do you know the past uses of the *subject property*? Per Phase I ESA by Partners dated 2/14/24, various dry cleaners, oil & paint company, photo company, and other misc. retail store fronts. **YES** ☐ **NO** ☐
   b. Do you know of specific chemicals that are present or once were present at the *subject property*? Limited Phase II by Partners dated 8/19/24 revealed benzo(a)anthracene, benzo(a)pyrene, 1-methylnaphthalene, and naphthalene were collected from soil boring. **YES** ☐ **NO** ☐
   c. Do you know of spills or other chemical releases that have taken place at the *subject property*? **YES** ☐ **NO** ☐
   d. Do you know of any environmental cleanups that have taken place at the *subject property*? **YES** ☐ **NO** ☐

6. **The degree of obviousness of the presence or likely presence of contamination at the *subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).***
   As the user of this ***ESA***, based on your knowledge and experience related to the subject *property,* are there any obvious indicators that point to the presence or likely presence of contamination at the *subject property*? **YES** ☐ **NO** ☐

BEDROCK GEOLOGIC MAP OF OHIO

Recommended citation: Ohio Division of Geological Survey, 2006, Bedrock geologic map of Ohio: Ohio Department of Natural Resources, Division of Geological Survey Map BG-1, generalized page-size version with text, 2 p., scale 1:2,000,000.

This map is a generalization of the Bedrock Geologic Map of Ohio (Slucher and others, 2006)—the first statewide 1:500,000-scale bedrock-geology map compiled by the Ohio Division of Geological Survey since 1920 and the first to properly portray the bedrock geology that exists beneath the extensive deposits of Quaternary sediments that cover much of the bedrock in the state. Overall, the bedrock geology of Ohio consists of flat lying to gently dipping carbonate, siliciclastic, evaporite, and organoclastic strata of sedimentary origin that range in age from Upper Ordovician to Upper Carboniferous-Lower Permian. At depth, as illustrated in the cross section, older sedimentary, igneous, and metamorphic rocks that range from Lower Ordovician to Mesoproterozoic in age occur. At the surface, an irregular veneer of mainly unconsolidated Quaternary sediments conceal most bedrock units occurring northward and westward of the glacial margin.

Strata of the Ordovician System are the oldest exposed rocks in Ohio and consist mainly of alternating shale and limestone sequences. Silurian System strata are mostly dolomites with lesser amounts of shale. Rocks of the Devonian System consist of two contrasting types. Lower and Middle Devonian-age strata are mainly carbonate rocks whereas Upper Devonian-age rocks consist mostly of clastic rocks. In Champaign and Logan Counties, Devonian rocks occur on a small erosional remnant referred to as the Bellefontaine Outlier by geologists. Coincidentally, the highest topographic point in Ohio (Campbell Hill–1,549 feet above sea level) occurs also in this area.

The Carboniferous System is divided into two Subsystems, the Mississippian and Pennsylvanian. Mississippian strata are mostly shales and sandstones that occur locally in various proportions. Pennsylvanian strata consist mainly of a diverse array of alternating sandstones, siltstones, shales, mudstones, limestones, and underclays; economic coal beds occur also in portions of this sequence. The youngest interval of sedimentary rocks in Ohio, the Dunkard Group, occurs only in southeastern Ohio and consists of strata similar in composition to the underlying Upper Pennsylvanian-age rocks; however, the age of the Dunkard Group has been debated since the late 1800s. Dunkard strata contain a well-studied late Pennsylvanian-age assemblage of plant fossils with infrequent early Permian-age forms. Yet, fossil plant spores found in coal beds in the interval only support a late, but not latest Pennsylvanian age. Thus, until more definitive fossils are found, geologist are unable to determine the exact age of the Dunkard Group beyond a combined Permian-Pennsylvanian age assignment.

In west-central Ohio, the ancient Teays River system extended across much of Ohio during the late Neogene to early Quaternary Periods and sculptured an extensive network of deeply dissected valleys into the bedrock surface. The spatial configuration of many geologic units on this map clearly reflects the major channel networks of these former drainage systems. Also, four major regional structural geology elements affect the spatial distribution of rocks in Ohio: the Appalachian and Michigan basins, and the Cincinnati and Findlay arches which occur between the two basins. Locally, several high-angle normal faults displace rocks in the state.

The Serpent Mound Impact Structure in southern Ohio is a circular area of deformed and broken rocks that is approximately four and one-half miles in diameter. Recent investigations indicate the feature is the result of a meteorite impact believed to have occurred between 256 and 330 million years ago.

Cross section A-A' traverses Ohio from the northwest to the southeast and intersects the southern portion of the Michigan Basin, the area between the Cincinnati and Findlay arches, and the western Appalachian Basin, respectively. The stratigraphic units shown in this profile illustrate the broad, arching geometric distortion to the bedrock in Ohio created mainly by periods of tectonic subsidence within these regional structural basins. For specific details on the various rock units, economic commodities, and geologic hazards within Ohio, see either the printed or digital version of the Bedrock Geologic Map of Ohio (Slucher and others, 2006). Both products are available for purchase by contacting the ODNR Geologic Records Center by calling 614-265-6576 or emailing: geo.survey@dnr.state.oh.us.

Quaternary (about 1.8 million years ago to present)—Unconsolidated sediments: till, gravel, sand, silt, clay, and organic debris. Continental origin. (Shown in cross section only)

Period of widespread erosion

Permian and Pennsylvanian (about 298 to 302 million years ago)—Sedimentary rocks: mainly shale, sandstone, siltstone, mudstone, and minor coal. Continental origin.

Pennsylvanian (about 302 to 307 million years ago) Sedimentary rocks: mainly shale, sandstone, siltstone, mudstone, limestone, and some coal. Continental and marine origin.

Pennsylvanian (about 307 to 318 million years ago)—Sedimentary rocks: mainly sandstone, siltstone, shale, and conglomerate, with some coal and limestone. Deltaic and marine origin.

Period of widespread erosion

Mississippian (about 322 to 359 million years ago)—Sedimentary rocks: sandstone, shale, siltstone, conglomerate, and minor limestone. Marine to marginal marine origin.

Devonian (about 359 to 385 million years ago)—Sedimentary rocks: mainly shale and siltstone with some sandstone. Marine to marginal marine origin.

Devonian (about 385 to 407 million years ago)—Sedimentary rocks: mainly limestone and dolomite with some shale, and minor sandstone. Marine and eolian origin.

Period of widespread erosion

Silurian (about 416 to 423 million years ago)—Sedimentary rocks: dolomite, anhydrite, gypsum, salt, and shale. Marine and restricted marine origin.

Silurian (about 423 to 435 million years ago)—Sedimentary rocks: dolomite and shale with some limestone. Marine origin.

Period of widespread erosion

Ordovician (about 446 to 450 million years ago)—Sedimentary rocks: shale and limestone. Marine origin.

Ordovician (about 450 to 460 million years ago)—Sedimentary rocks: limestone and shale. Marine origin.

Period of widespread erosion

Ordovician and Cambrian (about 486 to 510 million years ago)—Sedimentary rocks: mainly dolomite, sandstone, shale, with minor limestone. Marine origin. (Shown in cross section only)

Period of widespread erosion

Neoproterozoic (between 900 million and 1 billion years ago)—Metamorphic rocks: gneiss, schist, amphibolite, and marble; and igneous rocks: granite. Form during collision of tectonic plates. (Shown in cross section only)

Mesoproterozoic (between 1.0 and 1.2 billion years ago)—Sedimentary rocks: sandstone and siltstone; and igneous rocks: basalt and rhyolite. Form during rifting of continental landmass. (Shown in cross section only)

Period of widespread erosion

Mesoproterozoic (between 1.45 and 1.52 billion years ago)—Igneous rocks: granite and rhyolite. Formed during crustal evolution and differentiation. (Shown in cross section only)

SURFICIAL GEOLOGY OF THE CLEVELAND NORTH 30 X 60 MINUTE QUADRANGLE

DRAFT

C. Scott Brockman and Gregory A. Schumacher
GIS and Cartography by Donovan M. Powers

OHIO DIVISION OF GEOLOGICAL SURVEY
Map SG-2 CLEVELAND NORTH
3/2006
Prepared in cooperation with the United States Geological Survey, National Cooperative Geologic Mapping Program (STATEMAP) Grant No. 04HQAG0047

INTRODUCTION

This map provides a three-dimensional framework of the area's surficial geology and depicts four important aspects of surficial geology:

1) the geologic deposits, indicated by letters which represent the major lithologies;
2) the thickness of the individual deposits, indicated by numbers and modifiers;
3) the lateral extent of the deposits, indicated by map-unit area boundaries;
4) the vertical sequence of deposits, shown by the stack of symbols within each map-unit area.

In effect, each stack represents a generalized cross section for each area.

Letters represent geologic deposits (lithologic units) and are described in detail below. Lithologic units may be a single lithology such as sand (S) or clay (C), or a combination of related lithologies that are found in specific depositional environments, such as sand and gravel (SG) or ice-contact deposits (IC). The bottom symbol in each stack indicates the bedrock lithologies that underlie the surficial deposits. The detailed lithologic unit descriptions below summarize:

1) geologic characteristics such as range of textures, bedding, and age;
2) engineering properties or concerns attributed to the unit;
3) depositional environment;
4) geomorphology or geomorphic location;
5) geographic location within the map area, if pertinent.

Numbers (without modifiers) that follow the lithology designator represent the average thickness of a lithologic unit in tens of feet (for example, 3 represents 30 feet). If no number is present, the average thickness is assumed to be 1 (10 feet). These unmodified numbers correspond to a thickness range centered on the specified value, but may vary up to 50 percent. For example, T4 indicates the average thickness of till in a map-unit area is 40 feet, but thickness may vary from 20 to 60 feet.

Modifiers provide additional thickness and distribution information:

1) Parentheses indicate that a unit has a patchy or discontinuous distribution and is missing in portions of that map-unit area. For example, (T2) indicates that till with an average thickness of 20 feet is present in only part of that map-unit area.

2) A minus sign following a number indicates the maximum thickness for that unit in areas such as a buried valley or ridge. Thickness decreases from the specified value, commonly near the center of the map-unit area, to the thickness of the same lithologic unit and vertical position specified in an adjacent map-unit area. For example, an SG5- map-unit area adjacent to an SG3 area indicates a sand and gravel unit having a maximum thickness of 90 feet that thins to an average of 30 feet at the edge of the map-unit area. If the material is not present in an adjacent area, it decreases to zero at that boundary.

These letters, numbers, and **modifiers** are arranged in stacks that depict the vertical sequence of lithologic units for a given map-unit area. A single stack of symbols occurs in each map-unit area and applies only to the volume of sediments within that particular map-unit area. **Figure 1** illustrates mapping conventions.

The small scale of this reconnaissance map generalizes the great local variability within surficial deposits. That variability is explained in the lithologic unit descriptions and by the use of thickness ranges. Some areas and lithologies are too small to delineate at 1:100,000 scale and have been included in adjacent areas. This map should serve only as a regional predictive guide to the area's surficial geology and not as a replacement for subsurface borings and geophysical studies required for site-specific characterizations.

DATA SOURCES

Data were collected from numerous sources (see References). The concentration of data was greatest near the surface and decreased with depth. County soil survey maps, which described the top 5 feet of surficial materials, provided an initial guide to map-unit areas. These areas were modified through interpretation of local geomorphic settings and other data which indicated change of deposits at depth, such as Ohio Department of Natural Resources water-well logs, Ohio Department of Transportation and Ohio EPA test-boring logs; theses, and published or unpublished geologic reports, maps, and field notes. These data also provided the basis for lithologic unit descriptions, which summarize, as accurately as possible, recognized associations of genetically related materials. The total thickness of surficial deposits was calculated from Division of Geological Survey open-file bedrock-topography maps, which are available for each 7.5-minute quadrangle in the map area. The bedrock units were summarized from Division of Geological Survey bedrock-geology maps, also available for each 7.5-minute quadrangle. Land-surface topography shown on the basemap was prepared largely from data derived from the U.S. Geological Survey's National Elevation Dataset (30 meter grid spacing).

LITHOLOGIC UNIT DESCRIPTIONS

SURFICIAL UNITS

m — Made land. Large areas of cut and fill such as dams, landfills, and urban areas; may include reclaimed strip mine areas. May be underlain by bedrock or other lithologic units.

a — Alluvium, Holocene age. Includes a wide variety of textures from silt and clay to boulders; commonly includes organic material; generally not compact; rarely greater than 20 feet thick. Found in floodplains of modern streams throughout entire map area. Mapped only where areal extent and thickness are significant.

o — Organic deposits, Holocene age. Muck and peat, may contain clay at depth. Generally less than 10 feet thick. Formed in undrained depressions. Organic deposits too small to map at this scale are indicated by an asterisk (*) and are underlain by material shown in surrounding map-unit area. Occurs on outwash trains, ice-contact areas, and hummocky moraine in the southern map areas.

C — Clay, Wisconsinan age. Massive to laminated; may contain interbedded silt and fine sand. Laminated clay commonly contains silt or sand partings. Distributed in southern map area as terrace and lowland surface deposits.

CG — Complexly interbedded deposits of clay, silt, sand, gravel, and till in deeper parts of buried valleys, unspecified age. Unit identified from well logs; data insufficient for more detailed differentiation or age assignment. Present in southern map area.

IC — Ice-contact deposits, Wisconsinan age. Highly variable deposits of poorly sorted gravel and sand; silt, clay, and till lenses common; may be partially covered or surrounded by till. Deposited directly from stagnant ice as kame or esker landforms. Found in southern map area, commonly associated with deep buried valleys.

L — Silt, Wisconsinan age. Massive or laminated; commonly contains thin sand partings. May contain localized clay, sand, or gravel layers. Clay content commonly increases with depth. Found in southern map area in lowland surface deposits and terraces.

LC — Silt and clay, Wisconsinan age. Laminated to interbedded; may contain thin fine sand or gravel layers. Found in northern map area in terraces along the Chagrin River, and as thick, deltaic deposits of high, proglacial predecessors of Lake Erie.

S — Sand, Wisconsinan age. Contains minor amounts of disseminated gravel or thin lenses of silt or gravel; grains well to moderately sorted, moderately to well rounded; finely stratified to massive, may be cross bedded; locally may contain organic material. In deep buried valleys, may be older than Wisconsinan age. Found in association with the deltaic deposits and nearshore dune and beach ridge deposits of high, proglacial predecessors of Lake Erie.

SG — Sand and gravel, generally Wisconsinan age. Intermixed and interbedded sand and gravel commonly containing thin, discontinuous layers of silt, clay, and till; grains well to moderately sorted, moderately to well rounded; finely stratified to massive, may be cross bedded; locally may contain organic material. In deep buried valleys, may be older than Wisconsinan age. Present as widespread fluvial deposits in terraces and buried valleys, and high-energy beach ridge deposits of proglacial predecessors of Lake Erie.

TG — Clayey to silty till, low carbonate content, Wisconsinan age. May contain silt, sand and gravel lenses. Joints/fractures common. At depth includes a pebbly basal unit as well as unspecified till units of various lithologies. Common surface till on lake plain in northern map area; bounded to south by Lake Escarpment Moraine.

T — Clay loamy till, low carbonate content, Wisconsinan age. Till contains silt, sand, and gravel lenses. Joints/fractures common. Older low carbonate till units may also be present at surface and at depth. Common until in Glaciated Appalachian Plateau.

T — Till, undifferentiated in subsurface, unspecified age. Unit designated where insufficient data prohibits designating other till units. Separated from overlying till units by its greater density (Tharthan?) or intervening non-till units. Designated throughout map area beneath 10 to 70 feet of surface till and other units.

BEDROCK UNITS

P — Sandstone, shale, siltstone, claystone, limestone, and coal bedrock, Pennsylvanian age. Includes associated colluvium. Sandstone nonbedded to massive, may be conglomeratic in basal portion. Interbedds of shale, sandstone, siltstone, clay, coal, and limestone common in upper portion of unit. Common horizontal and vertical changes of rock types. Stratigraphic names: Pottsville and Allegheny Groups. Surface unit in southern map area.

Sh — Sandstone bedrock, Pennsylvanian age. Includes associated colluvium. Sandstone nonbedded to massive, medium to coarse grained with abundant rounded quartz pebbles and granules; porous; weakly cemented; quartz-pebble conglomeratic may be present in basal portion. Stratigraphic name: Sharon Sandstone of the Pottsville Group. Surface unit in southern map area.

SSh — Sandstone and shale bedrock, Mississippian age. Includes associated colluvium. Interbedded shale, siltstone, and sandstone with common vertical and horizontal changes. Stratigraphic names: Logan and Cuyahoga Formations. Most common bedrock unit in southern map area.

Sh — Shale bedrock, Devonian age. Includes associated colluvium. Black to brown, silty, organic-rich, hard, fissile shale, and overlying gray to greenish-gray, soft, clay shale. Stratigraphic name: Ohio Shale. Found landward of Lake Erie shoreline.

EXPLANATION

Sand and gravel pit. Pit bottom generally underlain by unconsolidated lithologic units of surrounding polygon(s). May contain reclaimed areas.

Quarry, mine, or strip mine; floored in bedrock; may contain reclaimed areas

Small area of organic deposits

Boundary between map-unit areas having different uppermost continuous lithologies; underlying lithologies may or may not differ

Boundary between map-unit areas having the same uppermost continuous lithology but different thickness or different underlying lithologies

Note: Boundary types reflect the relationships among uppermost continuous lithologies only, not patchy, discontinuous lithologies (in parentheses).

KEY TO LITHOLOGIC COLORS*

Surficial Units

- m — Made land, larger pits, quarries, or mines
- a — Alluvium
- o — Organic deposits
- C — Clay, Wisconsinan age
- IC — Ice contact deposits, Wisconsinan age
- L — Silt, Wisconsinan age
- LC — Silt and clay, Wisconsinan age
- S — Sand, Wisconsinan age
- SG — Sand and gravel, Wisconsinan age
- TG — Clayey to loamy till, low carbonate content, Wisconsinan age
- T — Clayey to silty till, low carbonate content, Wisconsinan age

Bedrock Units

- P — Sandstone, shale, siltstone, claystone, limestone, and coal bedrock, and associated colluvium, Pennsylvanian age
- Sh — Sandstone bedrock, Pennsylvanian age
- SSh — Sandstone and shale bedrock, and associated colluvium, Mississippian age
- Sh — Shale bedrock and associated colluvium, Devonian age

* The colors on this map depict the uppermost continuous unit and are intended to assist in visualizing the geology of the area. Discontinuous units (in parentheses) and subsurface-only units are excluded in colors assignments.

Mapping responsibility and index to 7.5-minute (1:24,000 scale) quadrangles in the Cleveland North 30 x 60 minute quadrangle. Mapping completed in 2005.

FIGURE 1. – Map view and cross section of a hypothetical stack-unit map. See lithologic-unit descriptions for explanation of symbols. In the map view (top), solid-line boundaries separate map-unit areas having different lithologic units at the surface; underlying lithologic units may or may not differ. Dashed-line boundaries separate map-unit areas having the same surface lithologic unit but different thickness or different underlying lithologic units. The cross section illustrates thickness and mapping conventions. Thickness values are in tens of feet. Values are gross averages that can vary up to 50 percent, except (1) those followed by a minus sign (-), which represent the maximum thickness of a thinning trough- or wedge-shaped sediment body, or (2) units in parentheses ( ), which indicate a discontinuous distribution of that unit. Precise surface topography can be determined from topographic maps that are available from the Division of Geological Survey at several scales; bedrock-surface topography and bedrock geology are available from the Division of Geological Survey as 1:24,000 scale quadrangle maps.

Ground Water Resources of CUYAHOGA COUNTY

by
Katie Crowell

Well Yields

AREAS IN WHICH 300 OR MORE GALLONS PER MINUTE MAY BE DEVELOPED

Best ground water area in Cuyahoga County. Permeable sand and gravel deposits traversed by Mill Creek. Wells may yield as much as 1500 gallons per minute. Suitable for municipal and large industrial well field development.

AREAS IN WHICH 100 TO 300 GALLONS PER MINUTE MAY BE DEVELOPED

Good ground water areas. Permeable sand and gravel deposits interbedded with silt and clay lie in a buried valley. Yields of as much as 250 gallons per minute are available where sufficient coarse material is found. Exploratory drilling may be required to locate such deposits.

AREAS IN WHICH 25 TO 100 GALLONS PER MINUTE MAY BE DEVELOPED

Ground water obtained from buried valley deposits of sand and gravel beneath thick clay and silt. Wells encountering permeable deposits may yield as much as 100 gallons per minute. Adequate domestic and small subdivision supplies may be available from relatively shallow wells less than 100 feet in depth.

Ground water supplies developed from the Sharon Sandstone encountered at depths less than 75 feet beneath land surface. Wells will produce sustained yields of as much as 40 gallons per minute. Greater yields may be available for short periods of intermittent pumping.

AREAS IN WHICH 10 TO 25 GALLONS PER MINUTE MAY BE DEVELOPED

Ground water obtained from buried valley sand and gravel deposits of limited thickness and extent. Wells developed in permeable deposits may yield from 10 to 25 gallons per minute. Wells not encountering those deposits must be drilled into the underlying bedrock.

Ground water from the Sharon Sandstone. Yields from 10 to 25 gallons per minute may be obtained at less than 50 feet; however, wells of 200 feet or more have been recorded.

Ground water developed in the Berea Sandstone of the Cuyahoga Group. Average well depth is less than 50 feet.

AREAS IN WHICH 3 TO 10 GALLONS PER MINUTE MAY BE DEVELOPED

Ground water obtained from Cuyahoga Group or Chagrin, Ohio and Bedford Shales. The 3 to 10 gallon per minute aquifer may be encountered less than 30 feet below land surface.

Buried valleys contain 200 to 300 feet of fine sand, silt, and clay. Drilled wells yield meager supplies unless encountering thin, isolated sand and gravel lenses.

AREAS IN WHICH LESS THAN 3 GALLONS PER MINUTE MAY BE DEVELOPED

Impermeable deposits, basically clay overlaying shale or shaley sandstone, provide a very poor area for even minimal domestic supplies. Brackish water and dry wells are common. Storage is necessary to supply peak demands.

AREAS IN WHICH BRACKISH AND SALT WATER HAVE BEEN ENCOUNTERED

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Cuyahoga County, Ohio
Survey Area Data: Version 23, Aug 27, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Aug 17, 2020—Sep 22, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Descriptions (Hough Senior Independent Living)

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The

delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Cuyahoga County, Ohio

UeA—Urban land-Elnora complex, nearly level

Map Unit Setting

National map unit symbol: 9mxv
Elevation: 590 to 1,970 feet
Mean annual precipitation: 27 to 42 inches
Mean annual air temperature: 45 to 55 degrees F
Frost-free period: 130 to 200 days
Farmland classification: Not prime farmland

Map Unit Composition

Urban land: 70 percent
Elnora and similar soils: 20 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Elnora

Setting

Landform: Ridges on lake plains
Parent material: Sandy lacustrine deposits

Typical profile

H1 - 0 to 9 inches: loamy fine sand
H2 - 9 to 32 inches: loamy fine sand
H3 - 32 to 60 inches: loamy fine sand

Properties and qualities

Slope: 0 to 4 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): High (2.00 to 6.00 in/hr)
Depth to water table: About 18 to 24 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 4.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Hydrologic Soil Group: A/D
Ecological site: F139XY002OH - Moist Calcareous Drift Flats
Hydric soil rating: No

Minor Components

Jimtown

Percent of map unit: 2 percent
Landform: Terraces
Landform position (two-dimensional): Footslope
Landform position (three-dimensional): Tread
Down-slope shape: Concave
Across-slope shape: Linear
Hydric soil rating: No

Haskins

Percent of map unit: 2 percent
Landform: Till plains, lake plains
Landform position (two-dimensional): Summit, shoulder, backslope
Landform position (three-dimensional): Rise
Down-slope shape: Convex
Across-slope shape: Linear
Hydric soil rating: No

Oshtemo

Percent of map unit: 2 percent
Landform: Terraces
Hydric soil rating: No

Fitchville

Percent of map unit: 2 percent
Landform: Terraces, lake plains
Down-slope shape: Concave
Across-slope shape: Linear
Hydric soil rating: No

Stafford variant

Percent of map unit: 2 percent
Landform: Lake plains
Landform position (two-dimensional): Footslope
Landform position (three-dimensional): Base slope
Down-slope shape: Concave
Across-slope shape: Linear
Hydric soil rating: No

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partners Env. Consulting, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

EXECUTIVE SUMMARY

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HARSHAW/FILTROL PART Site ID: 0504369 EPA Id: OHD053276390	***1945 EAST 97 STREET***	***SE 1/4 - 1/2 (0.401 mi.)***	***I36***	***94***

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the DERR list, as provided by EDR, and dated 09/20/2024 has revealed that there are 13 DERR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Ohio Environmental Protection Agency's Licensed Solid Waste Facilities.

A review of the SWF/LF list, as provided by EDR, and dated 09/30/2024 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Commerce Division of State Fire Marshal's List of Reported Petroleum Underground Storage Tank Release Incidents.

A review of the LUST list, as provided by EDR, and dated 10/31/2024 has revealed that there are 15 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

EXECUTIVE SUMMARY

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 09/09/2024 has revealed that there are 2 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 9 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 15 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Waste Description: 2,4,6-Trichlorophenol

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P002
Waste Description: 1-Acetyl-2-Thiourea (Or) Acetamide, N-(Aminothioxomethyl)-

Waste Code: P003
Waste Description: 2-Propenal (Or) Acrolein

Waste Code: P004
Waste Description: 1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5alpha, 8alpha, 8abeta)- (Or) Aldrin

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P006
Waste Description: Aluminum Phosphide (R,T)

Waste Code: P007
Waste Description: 3(2h)-Isoxazolone, 5-(Aminomethyl)- (Or) 5-(Aminomethyl)-3-Isoxazolol

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P009
Waste Description: Ammonium Picrate (R) (Or) Phenol, 2,4,6-Trinitro-, Ammonium Salt (R)

Waste Code: P010
Waste Description: Arsenic Acid H3aso4

Waste Code: P011
Waste Description: Arsenic Oxide As2o5 (Or) Arsenic Pentoxide

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P013

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Description: Barium Cyanide

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P015
Waste Description: Beryllium

Waste Code: P016
Waste Description: Dichloromethyl Ether (Or) Methane, Oxybis[Chloro-

Waste Code: P017
Waste Description: 2-Propanone, 1-Bromo- (Or) Bromoacetone

Waste Code: P018
Waste Description: Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-

Waste Code: P020
Waste Description: Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-

Waste Code: P021
Waste Description: Calcium Cyanide (Or) Calcium Cyanide Ca(Cn)2

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P023
Waste Description: Acetaldehyde, Chloro- (Or) Chloroacetaldehyde

Waste Code: P024
Waste Description: Benzenamine, 4-Chloro- (Or) P-Chloraniline

Waste Code: P026
Waste Description: 1-(O-Chlorophenyl)Thiourea (Or) Thiourea, (2-Chlorophenyl)-

Waste Code: P027
Waste Description: 3-Chloropropionitrile (Or) Propanenitrile, 3-Chloro-

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P031
Waste Description: Cyanogen (Or) Ethanedinitrile

Waste Code: P033
Waste Description: Cyanogen Chloride (Or) Cyanogen Chloride (Cn)Cl

Waste Code: P034
Waste Description: 2-Cyclohexyl-4,6-Dinitrophenol (Or) Phenol, 2-Cyclohexyl-4,6-Dinitro-

Waste Code: P036

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Description: Arsonous Dichloride, Phenyl- (Or) Dichlorophenylarsine

Waste Code: P037
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2aalpha, 3beta, 6beta, 6aalpha, 7beta, 7aalpha)- (Or) Dieldrin

Waste Code: P038
Waste Description: Arsine, Diethyl- (Or) Diethylarsine

Waste Code: P039
Waste Description: Disulfoton (Or) Phosphorodithioic Acid, O,O-Diethyl S-[2-(Ethylthio)Ethyl] Ester

Waste Code: P040
Waste Description: O,O-Diethyl O-Pyrazinyl Phosphorothioate (Or) Phosphorothioic Acid, O,O-Diethyl O-Pyrazinyl Ester

Waste Code: P041
Waste Description: Diethyl-P-Nitrophenyl Phosphate (Or) Phosphoric Acid, Diethyl 4-Nitrophenyl Ester

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P043
Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

Waste Code: P044
Waste Description: Dimethoate (Or) Phosphorodithioic Acid, O,O-Dimethyl S-[2-(Methylamino)-2-Oxoethyl] Ester

Waste Code: P045
Waste Description: 2-Butanone, 3,3-Dimethyl-1-(Methylthio)-, O-[Methylamino)Carbonyl] Oxime (Or) Thiofanox

Waste Code: P046
Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P047
Waste Description: 4,6-Dinitro-O-Cresol, & Salts (Or) Phenol, 2-Methyl-4,6-Dinitro-, & Salts

Waste Code: P048
Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P049
Waste Description: Dithiobiuret (Or) Thioimidodicarbonic Diamide [(H2n)C(S)]2nh

Waste Code: P050
Waste Description: 6,9-Methano-2,4,3-Benzodioxathiepin,6,7,8,9,10,10-Hexachloro-1,5,5a,6, 9,9a-Hexahydro-,3-Oxide (Or) Endosulfan

Waste Code: P051

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Code: U076
Waste Description: Ethane, 1,1-Dichloro- (Or) Ethylidene Dichloride

Waste Code: U077
Waste Description: Ethane, 1,2-Dichloro- (Or) Ethylene Dichloride

Waste Code: U078
Waste Description: 1,1-Dichloroethylene (Or) Ethene, 1,1-Dichloro-

Waste Code: U079
Waste Description: 1,2-Dichloroethylene (Or) Ethene, 1,2-Dichloro-,(E)-

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U081
Waste Description: 2,4-Dichlorophenol (Or) Phenol, 2,4-Dichloro-

Waste Code: U082
Waste Description: 2,6-Dichlorophenol (Or) Phenol, 2,6-Dichloro-

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Code: U083
Waste Description: Propane, 1,2-Dichloro- (Or) Propylene Dichloride

Waste Code: U084
Waste Description: 1,3-Dichloropropene (Or) 1-Propene, 1,3-Dichloro-

Waste Code: U085
Waste Description: 1,2:3,4-Diepoxybutane (I,T) (Or) 2,2'-Bioxirane

Waste Code: U086
Waste Description: Hydrazine, 1,2-Diethyl- (Or) N,N'-Diethylhydrazine

Waste Code: U087
Waste Description: O,O-Diethyl S-Methyl Dithiophosphate (Or) Phosphorodithioic Acid, O,O-Diethyl S-Methyl Ester

Waste Code: U088
Waste Description: 1,2-Benzenedicarboxylic Acid, Diethyl Ester (Or) Diethyl Phthalate

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U090
Waste Description: 1,3-Benzodioxole, 5-Propyl- (Or) Dihydrosafrole

Waste Code: U091
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dimethoxy- (Or) 3,3'-Dimethoxybenzidine

Waste Code: U092
Waste Description: Dimethylamine (I) (Or) Methanamine, N-Methyl- (I)

Waste Code: U093
Waste Description: Benzenamine, N,N-Dimethyl-4-(Phenylazo)- (Or) P-Dimethylaminoazobenzene

Waste Code: U094
Waste Description: 7,12-Dimethylbenz[A]Anthracene (Or) Benz[A]Anthracene, 7,12-Dimethyl-

Waste Code: U095
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dimethyl- (Or) 3,3'-Dimethylbenzidine

Waste Code: U096
Waste Description: Alpha,Alpha-Dimethylbenzylhydroperoxide (R) (Or) Hydroperoxide, 1-Methyl-1-Phenylethyl- (R)

Waste Code: U097
Waste Description: Carbamic Chloride, Dimethyl- (Or) Dimethylcarbamoyl Chloride

Waste Code: U098
Waste Description: 1,1-Dimethylhydrazine (Or) Hydrazine, 1,1-Dimethyl-

Waste Code: U099
Waste Description: 1,2-Dimethylhydrazine (Or) Hydrazine, 1,2-Diphenyl-

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Code: U101
Waste Description: 2,4-Dimethylphenol (Or) Phenol, 2,4-Dimethyl-

Waste Code: U102
Waste Description: 1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U105
Waste Description: 2,4-Dinitrotoluene (Or) Benzene, 1-Methyl-2,4-Dinitro-

Waste Code: U106
Waste Description: 2,6-Dinitrotoluene (Or) Benzene, 2-Methyl-1,3-Dinitro-

Waste Code: U107
Waste Description: 1,2-Benzenedicarboxylic Acid, Dioctyl Ester (Or) Di-N-Octyl Phthalate

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U109
Waste Description: 1,2-Diphenylhydrazine (Or) Hydrazine, 1,2-Diphenyl-

Waste Code: U110
Waste Description: 1-Propanimine, N-Propyl-(I) (Or) Dipropylamine (I)

Waste Code: U111
Waste Description: 1-Propanamine, N-Nitroso-N-Propyl- (Or) Di-N-Propylnitrosamine

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U113
Waste Description: 2-Propenoic Acid, Ethyl Ester (I) (Or) Ethyl Acrylate (I)

Waste Code: U114
Waste Description: Carbamodithioic Acid, 1,2-Ethanediylbis-, Salts & Esters (Or) Ethylenebisdithiocarbamic Acid, Salts & Esters

Waste Code: U115
Waste Description: Ethylene Oxide (I,T) (Or) Oxirane (I,T)

Waste Code: U116
Waste Description: 2-Imidazolidinethione (Or) Ethylenethiourea

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U118
Waste Description: 2-Propenoic Acid, 2-Methyl-, Ethyl Ester (Or) Ethyl Methacrylate

Waste Code: U119
Waste Description: Ethyl Methanesulfonate (Or) Methanesulfonic Acid, Ethyl Ester

Waste Code: U120
Waste Description: Fluoranthene

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Code: U121
Waste Description: Methane, Trichlorofluoro- (Or) Trichloromonofluoromethane

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U124
Waste Description: Furan (I) (Or) Furfuran (I)

Waste Code: U125
Waste Description: 2-Furancarboxaldehyde (I) (Or) Furfural (I)

Waste Code: U126
Waste Description: Glycidylaldehyde (Or) Oxiranecarboxyaldehyde

Waste Code: U127
Waste Description: Benzene, Hexachloro- (Or) Hexachlorobenzene

Waste Code: U128
Waste Description: 1,3-Butadiene, 1,1,2,3,4,4-Hexachloro- (Or) Hexachlorobutadiene

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U130
Waste Description: 1,3-Cyclopentadiene, 1,2,3,4,5,5-Hexachloro- (Or) Hexachlorocyclopentadiene

Waste Code: U131
Waste Description: Ethane, Hexachloro- (Or) Hexachloroethane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U136
Waste Description: Arsinic Acid, Dimethyl- (Or) Cacodylic Acid

Waste Code: U137
Waste Description: Indeno[1,2,3-Cd]Pyrene

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U140

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U141

Waste Code: U142
Waste Description: 1,3,4-Metheno-2h-Cyclobuta[Cd]Pentalen-2-One, 1,1a,3,3a,4,5,5,5a,5b,6-Decachlorooctahydro- (Or) Kepone

Waste Code: U143
Waste Description: 2-Butenoic Acid, 2-Methyl-, 7-[[2,3-Dihydroxy-2-(1-Methoxyethyl)-3-Methyl-1-Oxobutoxy]Methyl]-2,3,5,7a-Tetrahydro-1h-Pyrrolizin-1-Yl Ester, [1s-[1alpha(Z), 7(2s*,3r*), 7aalpha]]- (Or) Lasiocarpine

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U145
Waste Description: Lead Phosphate (Or) Phosphoric Acid, Lead(2+) Salt (2:3)

Waste Code: U146
Waste Description: Lead Subacetate (Or) Lead, Bis(Acetato-O)Tetrahydroxytri-

Waste Code: U147
Waste Description: 2,5-Furandione (Or) Maleic Anhydride

Waste Code: U148
Waste Description: 3,6-Pyridazinedione, 1,2-Dihydro- (Or) Maleic Hydrazide

Waste Code: U149
Waste Description: Malononitrile (Or) Propanedinitrile

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U151
Waste Description: Mercury

Waste Code: U152
Waste Description: 2-Propenenitrile, 2-Methyl- (I,T) (Or) Methacrylonitrile (I,T)

Waste Code: U153
Waste Description: Methanethiol (I,T) (Or) Thiomethanol (I,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U155
Waste Description: 1,2-Ethanediamine, N,N-Dimethyl-N'-2-Pyridinyl-N'-(2-Thienylmethyl)- (Or) Methapyrilene

Waste Code: U156
Waste Description: Carbonochloridic Acid, Methyl Ester, (I,T) (Or) Methyl Chlorocarbonate (I,T)

Waste Code: U157

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Description: 3-Methylcholanthrene (Or) Benz[J]Aceanthrylene, 1,2-Dihydro-3-Methyl-

Waste Code: U158
Waste Description: 4,4'-Methylenebis(2-Chloroaniline) (Or) Benzenamine, 4,4'-Methylenebis[2-Chloro-

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U160
Waste Description: 2-Butanone, Peroxide (R,T) (Or) Methyl Ethyl Ketone Peroxide (R,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U163
Waste Description: Guanidine, N-Methyl-N'-Nitro-N-Nitroso- (Or) Mnng

Waste Code: U164
Waste Description: 4(1h)-Pyrimidinone, 2,3-Dihydro-6-Methyl-2-Thioxo- (Or) Methylthiouracil

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U166
Waste Description: 1,4-Naphthalenedione (Or) 1,4-Naphthoquinone

Waste Code: U167
Waste Description: 1-Napthalenamine (Or) Alpha-Naphthylamine

Waste Code: U168
Waste Description: 2-Napthalenamine (Or) Beta-Naphthylamine

Waste Code: U169

Waste Description: N-Nitroso-N-Ethylurea (Or) Urea, N-Ethyl-N-Nitroso-

Waste Code: U177
Waste Description: N-Nitroso-N-Methylurea (Or) Urea, N-Methyl-N-Nitroso-

Waste Code: U178
Waste Description: Carbamic Acid, Methylnitroso-, Ethyl Ester (Or) N-Nitroso-N-Methylurethane

Waste Code: U179
Waste Description: N-Nitrosopiperidine (Or) Piperidine, 1-Nitroso-

Waste Code: U180
Waste Description: N-Nitrosopyrrolidine (Or) Pyrrolidine, 1-Nitroso-

Waste Code: U181
Waste Description: 5-Nitro-O-Toluidine (Or) Benzenamine, 2-Methyl-5-Nitro

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U183
Waste Description: Benzene, Pentachloro- (Or) Pentachlorobenzene

Waste Code: U184
Waste Description: Ethane, Pentachloro- (Or) Pentachloroethane

Waste Code: U185
Waste Description: Benzene, Pentachloronitro- (Or) Pentachloronitrobenzene (Pcnb)

Waste Code: U186
Waste Description: 1,3-Pentadiene (I) (Or) 1-Methylbutadiene (I)

Waste Code: U187
Waste Description: Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin

Waste Code: U188
Waste Description: Phenol

Waste Code: U189
Waste Description: Phosphorus Sulfide (R) (Or) Sulfur Phosphide (R)

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

Waste Code: U191
Waste Description: 2-Picoline (Or) Pyridine, 2-Methyl-

Waste Code: U192
Waste Description: Benzamide, 3,5-Dichloro-N-(1,1-Dimethyl-2-Propynyl)- (Or) Pronamide

Waste Code: U193
Waste Description: 1,2-Oxathiolane, 2,2-Dioxide (Or) 1,3-Propane Sultone

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Description: Pyridine

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U202
Waste Description: 1,2-Benzisothiazol-3(2h)-One, 1,1-Dioxide, & Salts (Or) Saccharin, & Salts

Waste Code: U203
Waste Description: 1,3-Benzodioxole, 5-(2-Propenyl)- (Or) Safrole

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U207
Waste Description: 1,2,4,5-Tetrachlorobenzene (Or) Benzene, 1,2,4,5-Tetrachloro-

Waste Code: U208
Waste Description: 1,1,1,2-Tetrachloroethane (Or) Ethane, 1,1,1,2-Tetrachloro-

Waste Code: U209
Waste Description: 1,1,2,2-Tetrachloroethane (Or) Ethane, 1,1,2,2-Tetrachloro-

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U214
Waste Description: Acetic Acid, Thallium(1+) Salt (Or) Thallium(I) Acetate

Waste Code: U215
Waste Description: Carbonic Acid, Dithallium(1+) Salt (Or) Thallium(I) Carbonate

Waste Code: U216

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Description: Thallium Chloride Tlcl (Or) Thallium(I) Chloride

Waste Code: U217
Waste Description: Nitric Acid, Thallium(1+) Salt (Or) Thallium(I) Nitrate

Waste Code: U218
Waste Description: Ethanethioamide (Or) Thioacetamide

Waste Code: U219
Waste Description: Thiourea

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U221
Waste Description: Benzenediamine, Ar-Methyl- (Or) Toluenediamine

Waste Code: U222
Waste Description: Benzenamine, 2-Methyl-, Hydrochloride (Or) O-Toluidine Hydrochloride

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U225
Waste Description: Bromoform (Or) Methane, Tribromo-

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U234
Waste Description: 1,3,5-Trinitrobenzene (R,T) (Or) Benzene, 1,3,5-Trinitro-

Waste Code: U235
Waste Description: 1-Propanol, 2,3-Dibromo-, Phosphate (3:1) (Or) Tris(2,3,-Dibromopropyl) Phosphate

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

Waste Code: U237
Waste Description: 2,4-(1h,3h)-Pyrimidinedione, 5-[Bis(2-Chloroethyl)Amino]- (Or) Uracil Mustard

Waste Code: U238
Waste Description: Carbamic Acid, Ethyl Ester (Or) Ethyl Carbamate (Urethane)

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

CASE WESTERN RESERVE UNIVERSITY WEST QUAD (Continued) **1000321750**

Waste Description:	Arsenic
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007

HARSHAW/FILTROL PARTNERSHIP (Continued) **1015735772**

Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005

HARSHAW/FILTROL PARTNERSHIP (Continued) **1015735772**

Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P056
Waste Description: Fluorine

Waste Code: P074
Waste Description: Nickel Cyanide (Or) Nickel Cyanide Ni(Cn)2

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P102
Waste Description: 2-Propyn-1-Ol (Or) Propargyl Alcohol

Waste Code: P105

HARSHAW/FILTROL PARTNERSHIP (Continued) **1015735772**

Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: P119
Waste Description: Ammonium Vanadate (Or) Vanadic Acid, Ammonium Salt

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U003
Waste Description: Acetonitrile (I,T)

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U019
Waste Description: Benzene (I,T)

Waste Code: U023
Waste Description: Benzene, (Trichloromethyl)- (Or) Benzotrichloride (C,R,T)

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U073
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dichloro- (Or) 3,3'-Dichlorobenzidine

Waste Code: U092
Waste Description: Dimethylamine (I) (Or) Methanamine, N-Methyl- (I)

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U121
Waste Description: Methane, Trichlorofluoro- (Or) Trichloromonofluoromethane

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

HARSHAW/FILTROL PARTNERSHIP (Continued) **1015735772**

Waste Code: U151
Waste Description: Mercury

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Hazardous Waste Summary:

Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D013
Waste Description: Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D021
Waste Description: Chlorobenzene

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Code: D022
Waste Description: Chloroform

Waste Code: D023
Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F027
Waste Description: Discarded Unused Formulations Containing Tri-, Tetra-, Or Pentachlorophenol Or Discarded Unused Formulations Containing Compounds Derived From These Chlorophenols. (This Listing Does Not Include Formulations Containing Hexachlorophene Synthesized From Prepurified 2,4,5-Trichlorophenol As The Sole Component.)

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P002
Waste Description: 1-Acetyl-2-Thiourea (Or) Acetamide, N-(Aminothioxomethyl)-

Waste Code: P003
Waste Description: 2-Propenal (Or) Acrolein

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P011
Waste Description: Arsenic Oxide As2o5 (Or) Arsenic Pentoxide

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P023
Waste Description: Acetaldehyde, Chloro- (Or) Chloroacetaldehyde

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P043
Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

Waste Code: P046
Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P048
Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P074
Waste Description: Nickel Cyanide (Or) Nickel Cyanide Ni(Cn)2

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P077
Waste Description: Benzenamine, 4-Nitro- (Or) P-Nitroaniline

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: P092
Waste Description: Mercury, (Acetato-O)Phenyl- (Or) Phenylmercury Acetate

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: P115
Waste Description: Sulfuric Acid, Dithallium (1+) Salt (Or) Thallium(I) Sulfate

Waste Code: P119
Waste Description: Ammonium Vanadate (Or) Vanadic Acid, Ammonium Salt

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Code: P120
Waste Description: Vanadium Oxide V2o5 (Or) Vanadium Pentoxide

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U003
Waste Description: Acetonitrile (I,T)

Waste Code: U004
Waste Description: Acetophenone (Or) Ethanone, 1-Phenyl-

Waste Code: U005
Waste Description: 2-Acetylaminofluorene (Or) Acetamide, N-9h-Fluoren-2-Yl

Waste Code: U006
Waste Description: Acetyl Chloride (C,R,T)

Waste Code: U007
Waste Description: 2-Propenamide (Or) Acrylamide

Waste Code: U008
Waste Description: 2-Propenoic Acid (I) (Or) Acrylic Acid (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U019
Waste Description: Benzene (I,T)

Waste Code: U021
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine (Or) Benzidine

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U041
Waste Description: Epichlorohydrin (Or) Oxirane, (Chloromethyl)-

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U049

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Description: 4-Chloro-O-Toluidine, Hydrochloride (Or) Benzenamine, 4-Chloro-2-Methyl-, Hydrochloride

Waste Code: U052
Waste Description: Cresol (Cresylic Acid) (Or) Phenol, Methyl-

Waste Code: U056
Waste Description: Benzene, Hexahydro- (I) (Or) Cyclohexane (I)

Waste Code: U057
Waste Description: Cyclohexanone (I)

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U059
Waste Description: 5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin

Waste Code: U061
Waste Description: Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Chloro- (Or) Ddt

Waste Code: U067
Waste Description: Ethane, 1,2-Dibromo- (Or) Ethylene Dibromide

Waste Code: U069
Waste Description: 1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate

Waste Code: U077
Waste Description: Ethane, 1,2-Dichloro- (Or) Ethylene Dichloride

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U088
Waste Description: 1,2-Benzenedicarboxylic Acid, Diethyl Ester (Or) Diethyl Phthalate

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U094
Waste Description: 7,12-Dimethylbenz[A]Anthracene (Or) Benz[A]Anthracene, 7,12-Dimethyl-

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U106
Waste Description: 2,6-Dinitrotoluene (Or) Benzene, 2-Methyl-1,3-Dinitro-

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U112

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U115
Waste Description: Ethylene Oxide (I,T) (Or) Oxirane (I,T)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U136
Waste Description: Arsinic Acid, Dimethyl- (Or) Cacodylic Acid

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U140
Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U147
Waste Description: 2,5-Furandione (Or) Maleic Anhydride

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U169
Waste Description: Benzene, Nitro- (Or) Nitrobenzene (I,T)

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Code: U170
Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U176
Waste Description: N-Nitroso-N-Ethylurea (Or) Urea, N-Ethyl-N-Nitroso-

Waste Code: U188
Waste Description: Phenol

Waste Code: U196
Waste Description: Pyridine

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U219
Waste Description: Thiourea

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

Waste Code: U237
Waste Description: 2,4-(1h,3h)-Pyrimidinedione, 5-[Bis(2-Chloroethyl)Amino]- (Or) Uracil Mustard

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Waste Code: U238
Waste Description: Carbamic Acid, Ethyl Ester (Or) Ethyl Carbamate (Urethane)

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U246
Waste Description: Cyanogen Bromide (Cn)Br

Waste Code: U328
Waste Description: Benzenamine, 2-Methyl- (Or) O-Toluidine

Waste Code: U404
Waste Description: U404

Environmental Interest/Information System:
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and

CLEVELAND CLINIC FOUNDATION (Continued) **1000429892**

Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

THE ELECTRONIC GREENHOUSE GAS REPORTING TOOL (E-GGRT) IS ACCESSIBLE THROUGH AN EPA WEB PAGE AND USED TO SUBMIT ANNUAL REPORTS IN SUPPORT OF THE EPA RULE FOR MANDATORY REPORTING OF GREENHOUSE GASES (GHG) FROM LARGE GHG EMISSIONS SOURCES. IMPLEMENTATION OF 40 CFR PART 98 IS REFERRED TO AS THE GREENHOUSE GAS REPORTING PROGRAM (GHGRP). THIS COMPREHENSIVE, NATIONWIDE EMISSIONS DATA WILL PROVIDE A BETTER UNDERSTANDING OF THE SOURCES OF GHGS AND WILL GUIDE DEVELOPMENT OF THE POLICIES AND PROGRAMS TO REDUCE EMISSIONS. THE PUBLICALLY AVAILABLE DATA WILL ALLOW REPORTERS TO TRACK THEIR OWN EMISSIONS, COMPARE THEM TO SIMILAR FACILITIES, AND AID IN IDENTIFYING COST EFFECTIVE OPPORTUNITIES TO REDUCE EMISSIONS IN THE FUTURE.

OH HISTORICAL INSTITUTIONAL CONTROL :
NFA Number: 99NFA079
Other Names: Coyne Laundry
Date NFA Submitted to VAP: 12/09/1999
Date VAP CNS Signed by Director: 06/23/2000
District Office: NEDO
NFA Number: 99NFA079
Any Billing Number: Not reported
Institutional Controls: CNS documents a commercial use restriction, a GW use restriction, and a restriction on buidling basements and other subsurface structures. No O&M obligation in CNS. Although, the Property does rely on institutional controls including a GW use restriction, prohibits the installation of basements, and a commercial use restriction.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

HIST INST CONTROLS: Institutional Controls Database

"Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005
Date Data Arrived at EDR: 04/06/2006
Date Made Active in Reports: 05/04/2006
Number of Days to Update: 28

Source: Ohio EPA

Last EDR Contact: 06/02/2008
Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PROJECT: NORTHEASTERN UNIVERSITY PFAS PROJECT

The PFAS Contamination Site Tracker records qualitative and quantitative data from each site in a chart, specifically examining discovery, contamination levels, government response, litigation, health impacts, media coverage, and community characteristics. All data presented in the chart were extracted from government websites, such as state health departments or the Environmental Protection Agency, and news articles.
