Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

DRAFT

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 23, 2023

DRAFT

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jan 23, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 23, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 23, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 23, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

DRAFT

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Jan 25, 2023

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

DRAFT

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Dec 22, 2022

State

Division of Environmental Response & Revitalization Database: DERR

The Ohio Environmental Protection Agency's (Ohio EPA) Division of Environmental Response and Revitalization (DERR) database is an index of sites maintained by their district offices. The database contains basic site information only and is NOT a record of contaminated sites in Ohio. Not all sites are contaminated, and a site's absence does not imply that it is uncontaminated. The database is also not a list of Brownfield sites; some sites do not meet the federal or state definitions of Brownfields and many properties in Ohio that may qualify as Brownfields are not included.

Government Publication Date: Jan 16, 2023

Delisted Division of Environmental Response & Revitalization: DELISTED DERR

DRAFT

List of sites which were once included but have since been removed from the Ohio Environmental Protection Agency (Ohio EPA) Division of Environmental Response & Revitalization (DERR) database; an index of sites for which district offices maintain files. DERR is NOT a record of contaminated sites or sites suspected of contamination; not all sites in the database are contaminated, and a site's absence from the database does not imply that it is uncontaminated.

Government Publication Date: Jan 16, 2023

Ohio Licensed Solid Waste Facilities, Landfills and other Waste Facilities: SWF/LF

List of landfill and solid waste facilities of various types as maintained by the Division of Materials and Waste Management of the Ohio Environmental Protection Agency (Ohio EPA), including: municipal solid waste facilities, municipal solid waste transfer stations, construction and demolition landfills, compost class 1,2,3 and 4 facilities, industrial and residual waste landfills, and scrap tire disposal and recycling facilities. Includes active and inactive facilities.

Government Publication Date: Aug 11, 2021

Ohio Old Solid Waste Landfill (OLDSWLF): HIST LF

A list of about 1200 old abandoned dumps or landfills. This database was developed from Ohio EPA staff notebooks and other information dating from the mid-1970's, including old Division of Solid and Hazardous Waste Management and DERR files, the Eckhardt Report and the 1976 Groundwater Pollution Inventory-Summary of Land Disposal.

Government Publication Date: Historic

Ohio Leaking Underground Storage Tanks (LUST): LUST

List of facilities with active and inactive environmental files, and active and inactive tank facilities with releases, made available by the Ohio Department of Commerce, Division of the State Fire Marshall under the Bureau of Underground Storage Tank Regulations (BUSTR). BUSTR's mission is to effectively regulate the safe operation of underground storage tanks and to ensure appropriate investigation and cleanup of releases from underground storage tanks for the purpose of protecting human health and the environment for the citizens of Ohio.

Government Publication Date: Jan 10, 2023

Delisted Petroleum Release List: DELISTED LST

List of petroleum release incidents sites that have been removed from either: the list of facilities with active release from regulated tanks, or the Non-Regulated Leaking Underground Storage Tanks (LUST) list, both made available by the Bureau of Underground Storage Tank Regulations in the Ohio Department of Commerce.

Government Publication Date: Jan 10, 2023

Regulated and Non-Regulated Leaking Underground Storage Tanks (LUST): LST

List of sites where there has been a suspected or confirmed release of petroleum from a regulated or non-regulated underground storage tank (UST). This list has been made available by the Bureau of Underground Storage Tank Regulations in the Ohio Department of Commerce.

Government Publication Date: Jan 9, 2023

Ohio Registered Underground Storage Tanks (UST): UST

List of Active and Inactive Registered Underground Storage Tanks regulated by the Ohio Department of Commerce, Division of the State Fire Marshall under the Bureau of Underground Storage Tank Regulations (BUSTR). BUSTR's mission is to effectively regulate the safe operation of underground storage tanks and to ensure appropriate investigation and cleanup of releases from underground storage tanks for the purpose of protecting human health and the environment for the citizens of Ohio.

Government Publication Date: Jan 10, 2023

Aboveground and Unregulated Tanks: TANKS

A list of tanks in Ohio known to the Division of the State Fire Marshal - Code Enforcement Bureau.

Note: Aboveground Storage Tanks in Ohio are regulated by local fire departments. This list of tanks known to the State Fire Marshall should not be considered a comprehensive list of aboveground or unregulated tanks in Ohio.

Government Publication Date: Aug 22, 2022

Aboveground and Unregulated Tanks (since 2022): TANKS 2

A list of tanks in Ohio known to the Ohio Division of the State Fire Marshal - Code Enforcement Bureau. Note this listing only includes data posted after July 2022.

Note: Aboveground Storage Tanks in Ohio are regulated by local fire departments. This list of tanks known to the State Fire Marshall should not be considered a comprehensive list of aboveground or unregulated tanks in Ohio.

Government Publication Date: Mar 21, 2023

Delisted Storage Tanks: DTNK

DRAFT

A list of sites which once appeared on and have since been removed from either: the list of active or inactive tank sites made available by the State Fire Marshall Bureau of Underground Storage Tanks (BUSTR); or the Ohio Tank Tracking and Environmental Regulations search (BUSTR Public Inquiry page).
Government Publication Date: Jan 10, 2023

Engineering Controls: ENG
List of facilities which have implemented engineering controls under Ohio's Voluntary Action Program (VAP). This list is maintained by the Ohio Environmental Protection Agency (Ohio EPA).
Government Publication Date: Jan 16, 2023

Institutional Controls: INST
This list of sites which have implemented an institutional control is maintained by the Ohio Environmental Protection Agency's (Ohio EPA) Division of Environmental Response and Revitalization (DERR). The site listing is sourced from the DERR List of Projects with Institutional Controls which includes applicable projects under the Voluntary Action Program (VAP) and the Remedial Response Program (RR).
Government Publication Date: Jan 16, 2023

Voluntary Action Program Sites: VCP
This list of Voluntary Action Program sites is provided by the Ohio Environmental Protection Agency's (Ohio EPA) Division of Environmental Response and Revitalization (DERR). The VAP Program gives individuals a way to investigate possible environmental contamination, clean it up if necessary and receive a promise from the State of Ohio that no more cleanup is needed. When cleanup requirements are met, the director of Ohio EPA issues a covenant not to sue. This covenant protects the property owner or operator and future owners from being legally responsible to the State of Ohio for further investigation and cleanup. This protection applies only when the property is used and maintained in the same manner as when the covenant was issued.
Government Publication Date: Jan 16, 2023

Covenants Not to Sue Sites: VAP CNS
List of sites where a covenant not to sue (CNS) has been issued. Ohio's Voluntary Action Program (VAP) sets standards for contaminated site assessment and remediation and reviews the activities conducted by certified professionals based on those standards to issue covenants not to sue (CNS).
Government Publication Date: Sep 1, 2021

Brownfield Inventory: BROWNFIELDS
Statewide inventory of brownfield properties maintained by the Ohio Environmental Protection Agency (Ohio EPA). Ohio EPA describes a brownfield as a previously-developed site with potential contamination from industrial or commercial activity that was not being redeveloped due to fear of litigation. Inclusion on this list is voluntary. Most of the properties contained in the Ohio Brownfield Inventory are properties that have received funding through either the Clean Ohio Assistance Fund (COAF) or Clean Ohio Revitalization Fund (CORF). There are also some properties listed that have received funding through U.S. EPA's Brownfield Grants.
Government Publication Date: Feb 7, 2023

Tribal

Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands: INDIAN LUST
This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 5, which includes Ohio, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in Ohio, according to the U.S. Department of Interior, Bureau of Indian Affairs.
Government Publication Date: Oct 16, 2017

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST
This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 5, which includes Ohio, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in Ohio, according to the U.S. Department of Interior, Bureau of Indian Affairs.
Government Publication Date: Oct 16, 2017

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST
Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Nov 23, 2022

DRAFT

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

PFOA/PFOS Contaminated Sites: PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Dec 28, 2022

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. Sites on this list do not necessarily reflect the source/s of contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Jun 30, 2022

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations https://pfasproject.com/pfas-contamination-site-tr acker/

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills: ERNS PFAS

DRAFT

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The US Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) requiring facilities that manufacture or import chemical substances to report to EPA. This list is specific to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl substances (PFAS). Data file made available by the EPA and includes CDR/Inventory Update Reporting data from 1998 up to 2020. EPA makes notes the following about these data: this data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jun 20, 2022

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Aug 30, 2022

Toxic Substances Control Act: TSCA

DRAFT

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).
Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.
Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).
Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.
Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.
Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.
Government Publication Date: Dec 11, 2022

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

DRAFT

Government Publication Date: Dec 11, 2022

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

DRAFT

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG) fuel type locations.

Government Publication Date: Jan 3, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jan 11, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

DRAFT

Government Publication Date: Nov 3, 2022

State

Ohio Emergency Response (ER) Spills data: SPILLS

Incidents reported to the Emergency Response Unit of the Ohio Environmental Protection Agency (Ohio EPA); includes clandestine drug lab sites with environmental impact.

Government Publication Date: Aug 25, 2020

Ohio Historic Towngas Database (TOWNGAS): TOWNGAS

A list of 82 sites of coal gas generators in Ohio. These plants produced gas for street lights in the communities in which they were located. The production of one million cubic feet of gas also produced about 800 gallons of liquid coal tar, which is a carcinogen. TOWNGAS was developed from a database from Radian Corporation along with information from the Ohio Historical Society and various public libraries.

Government Publication Date: Historic

Dry Cleaning Facilities: DRYCLEANERS

This list of facilities, which have obtained permits to install or operate dry cleaning operations, is maintained by the Ohio Environmental Protection Agency's (Ohio EPA) Division of Air Pollution Control (DAPC). This data is sourced from the Ohio EPA's applicable electronic copies of issued permits search tool and FOIA file.

Government Publication Date: Mar 28, 2023

Delisted Drycleaner Facilities: DELISTED DRYCLEANERS

List of drycleaner facilities/sites which have been delisted from Ohio Environmental Protection Agency (Ohio EPA).

Government Publication Date: Mar 28, 2023

Urban Setting Designation Sites: USD

List of sites granted Urban Setting Designation (USD) by the Ohio Environmental Protection Agency (Ohio EPA). USDs are granted to brownfield and voluntary cleanup properties located in highly urbanized areas where ground water containing chemicals from prior industrial or commercial activities poses no perceptible risk to the community because the ground water is not being used and will not be used for drinking water purposes in the foreseeable future.

Government Publication Date: Feb 17, 2023

Cessation of Regulated Operations (CRO) Program: CRO

The goal of the Cessation of Regulated Operations (CRO) program run by the Ohio Environmental Protection Agency (Ohio EPA) is to prevent threats to human health and the environment created when business owners and operators irresponsibly abandon businesses where chemicals were produced, used, stored or handled.

Government Publication Date: Jan 23, 2023

Ohio Old Sludge Dumping Database (SIABASE): SIAB

This database of about 2800 sites respresent pits, ponds and lagoons where various types of sludge were dumped over many years. The object of this data collection was to determine if harm was done to drinking water supplies below each dump site. The data were collected during the 1970s and published by the Ohio Environmental Protection Agency in 1980.

Government Publication Date: Historic

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

A list of known PFAS contaminated sites. This list is made available by the Ohio Environmental Protection Agency (Ohio EPA).

Government Publication Date: Oct 6, 2022

Underground Injection Control Wells: UIC

The Ohio Environmental Protection Agency provides this listing of Class I and Class V Underground Injection Control Wells.

Government Publication Date: Oct 7, 2019

PFAS Testing of Ohio Public Water Systems: PFAS PWS

A list of public water supply systems that have been tested for PFAS made available by the Ohio Environmental Protection Agency (EPA).

Government Publication Date: Oct 6, 2022

DRAFT

Permit by Rule Air Facilities: AIR PERMITS

A permit-by-rule is a specific permit provision in the Ohio Administrative Code that applies to certain types of low-emitting air pollution sources. This list of Permit by Rule facilities is provided by the Ohio Environmental Protection Agency.

Government Publication Date: Jul 30, 2020

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

DRAFT

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Warranty Deed

KNOW ALL MEN BY THESE PRESENTS THAT Carnell Austin, not married, the Grantor, claiming title by or through instrument recorded in 201305100703 in the Cuyahoga County Recorder's Office, for valuable consideration thereunto given, and for the sum of Ten Dollars ($10.00) received to his/her full satisfaction of **Myrtle & Song, LLC, an Ohio limited liability company**, the Grantee, whose tax mailing address will be 7281 Pearl Road, Middleburg Heights, Ohio 44130 does **GIVE, GRANT, BARGAIN, SELL AND CONVEY** unto said Grantee, his heirs and assigns, the following described premises:

Situated in the City of Cleveland, County of Cuyahoga, and State of Ohio:

And known as being Sublot No. 2 in Holden and Adams Re-Allotment of part of Original One Hundred Acre Lot No. 392, as shown by the recorded plat in Volume 26 of Maps, Page 24 of Cuyahoga County Records, and being 42.50 feet front on the southerly side of Hough Avenue NE, and extending back of equal width 146 feet deep, as appears by said plat, be the same more or less but subject to all legal highways.

Permanent Parcel No(s): 119-09-019
Also Known As: 8924 Hough Avenue, Cleveland, Ohio 44106

TO HAVE AND TO HOLD the above premises, with the appurtenances thereunto belonging, unto the said Grantee, and his/her separate heirs and assigns forever.

AND THE SAID Grantor, for his or herself and his or her heirs, executors and administrators, hereby covenants with the said Grantee, his or her heirs and his or her assigns, that said Grantor is the true and lawful owner of said premises, and is well seized of the same in fee simple, and has good right and full power to bargain, sell and convey the same in the manner aforesaid, and that the same are free and clear from all encumbrances, except zoning ordinances, easements, reservations, conditions and restrictions of record, if

Dear Associate James Keesey,

Thank you for your interest in public records of the City of Cleveland. Your request has been received and is being processed in accordance with the Ohio Sunshine Laws. Your request was received in this office on 4/13/2023 and has been given the reference number P009179-041323 for tracking purposes.

Records Requested: **On behalf of Nova Group, I'd like to request department records of USTs, ASTs, hazardous chemical storage, spills, and hazardous emergency responses for the following property:**

Three parcels of vacant land with addresses listed as 1765 East 89th Street, 8910 Hough Avenue, and 8924 Hough Avenue, Cleveland, Ohio

This information will be used to prepare an environmental assessment of the property.

Your request will be forwarded to the relevant city department(s) to locate the information you seek and to determine the volume and any costs associated with satisfying your request. You will be contacted about the availability and/or provided with copies of the records in question. **PLEASE NOTE:** The public records law does not require a governmental body to create new information, to do legal research, or to answer questions.

You can monitor the progress of your request at the link below and you will receive an email when your request has been completed. Again, thank you for using the Cleveland Public Records Center.

Cleveland Water

2021 WATER QUALITY REPORT

Cleveland Water has a current, unconditional license to operate our public water system, the 10th largest in the United States.

DRAFT

Cleveland Water tiene actualmente una licencia incondicional para operar nuestro sistema público de agua, el décimo más grande de los Estados Unidos.

2021 CONTINUING OUR MISSION TO SERVE YOU

Cleveland Water is the 10th largest public water system in the United States, the largest system in Ohio and the largest system sourcing Lake Erie. Every day, we treat and deliver up to 300 million gallons of water to more than 1.45 million people and thousands of businesses, schools, churches and recreation centers through more than 442,000 customer accounts.

We've stated for decades that, the health and safety of our customers is our number one priority. We continued to prove that in 2021. Cleveland Water is committed to providing economical, high quality drinking water to all customers.

Our success is reflected in this 2021 Water Quality Report, which we've prepared to summarize information for you, our consumers. Cleveland Water is in compliance with all Maximum Contaminant Levels and Treatment Techniques for drinking water. Cleveland Water had a 2021 unconditioned license to operate our water system. The license is issued by the Ohio Environmental Protection Agency. Included within this report is general health information, water quality test results, how to participate in decisions concerning your drinking water and water system contacts.

Martin J. Keane
Director, Department of Public Utilities

OUR SERVICE AREA

LEGEND

City & Suburbs

- Low Service Suburbs
- 1st High Suburbs
- 2nd High Suburbs
- 3rd High Suburbs
- Cleveland
- Master Meter

We provide water to our 640-square mile service area through 5,375 miles of mains in 80 communities in Cuyahoga County and parts of Geauga, Medina, Portage and Summit counties. In 2021, our average demand was 209.7 million gallons per day, which is 76.5 billion gallons of water for the year.

PUBLIC PARTICIPATION

Cleveland Water does not hold regular public meetings. However, the public may participate through attending Public Utilities Committee meetings of Cleveland City Council. At times, council may meet virtually in accordance with the city of Cleveland's emergency declaration and Ohio's Open Meetings Law under H.B. 404. Committee and council meetings are listed on the Cleveland City Council calendar which is linked at clevelandcitycouncil.org and can be watched live on TV20 and YouTube. For more information on your drinking water, contact us at 216-664-2639.

Cleveland Water

- ✔ 2021 UNCONDITIONED LICENSE TO OPERATE
- ✔ ZERO VIOLATIONS
- ✔ SAFE FROM LEAD (ORTHOPHOSPHATE PROTECTION & PH CONTROL)
- ✔ ZERO PFAS DETECTIONS (280 SAMPLES FROM 2014-2021)

$76.2 MILLION
invested in infrastructure improvements in 2021 to our treatment plants, intakes, tanks, towers and water mains

With more than
5,375
miles of water mains in our 640 square mile service area, Cleveland Water is the 10th largest water system in the country. That's why we continually inspect, maintain, plan for and execute upgrades to our infrastructure to meet an ever increasing need for reliability.

NOW COPPER
1,646 lead service lines replaced with copper in 2021

4 buoys monitor Lake Erie source water

4 intakes & 4 treatment plants make water safe

160,000 tests yearly in the plants to ensure proper treatment

35 pump stations, tanks & towers to maintain proper system pressure

> 5,000 water samples collected across our service area yearly to ensure safe water at your tap

DRAFT

"In 2021, Cleveland Water celebrated 165 years of delivering water to customers. Throughout water's journey from the lake to your home, our staff goes above and beyond to ensure the quality and reliability of our services."

Alex Margevicius, P.E.
Commissioner

"The real-time water quality data from our buoys near each intake lets us know source water quality before that water enters our treatment plants. This knowledge helps us make more consistent water. Our goal is that no matter what Lake Erie throws at us, customers never notice a difference at their tap."

Scott Moegling, P.E.
Water Quality Manager

LAKE ERIE – OUR SOURCE WATER

Cleveland draws source water from four intakes located far offshore in Lake Erie's Central Basin. These intakes are spread out over 15 miles and are each 3 to 5 miles offshore where the water is cleaner and has been minimally impacted from tributary runoff and coastal activities. Lake Erie is considered to be a surface water source. Cleveland Water also has interconnections with other area water systems, but these are for emergency use only. These interconnections are designed for Cleveland Water to assist other water systems if needed. We received no emergency water in 2021.

Water enters Lake Erie from precipitation over the lake and watershed. Precipitation on land runs off and flows down streams and rivers into our source water. About 90% of the water entering Lake Erie flows down the Detroit River from Lake St. Clair; another 4% drains from the Maumee River. Both rivers flow into the lake's shallow Western Basin. The remaining runoff drains through dozens of rivers and streams into the lake or off the land along the shore directly into the water. The actions of people on land in Lake Erie's 30,149 square mile watershed can impact the quality of water in Lake Erie. Protecting our drinking water source from contamination is the responsibility of all area residents.

The state of Ohio performed an assessment of our four source water intakes in the late 1990s. An updated Source Water Assessment and Protection Report as prepared by Cleveland Water and Ohio EPA in July 2021. For the purposes of source water assessments, all surface waters are considered to be susceptible to contamination. By their nature, surface waters are accessible and can be easily contaminated by chemicals and pathogens from an upstream spill. Because Cleveland Water's intakes are located a considerable distance offshore, potential contamination from the Cuyahoga River and nearshore sources is minimized to a great degree. As a result, Ohio EPA considers Cleveland Water's source water (Lake Erie) to have a low susceptibility to contamination due to the location of our intakes.

The Cleveland Water public water system treats the water to meet drinking water quality standards, but no single treatment technique can address all potential contaminants. To address this, Cleveland Water uses the multiple barrier approach for protecting and treating our source water. Protection of source water is one of the barriers we use. The potential for water quality impacts can be further decreased by implementing measures to protect Lake Erie. More detailed information is provided in the *Cleveland Water Drinking Water Source Assessment and Protection Report* which can be obtained by calling our Water Quality Section at 216-664-2639.

DRAFT

WHAT TO EXPECT FROM PUBLIC WATER SYSTEMS IN THE UNITED STATES

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

In order to ensure that tap water is safe to drink, USEPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (1-800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infection. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

ABOUT YOUR DRINKING WATER

In 2021 we had an unconditioned license to operate our water system. For licensing, the EPA requires regular sampling to ensure drinking water safety. Cleveland Water conducted sampling for bacteria, and for inorganic, synthetic organic, and volatile organic contaminants during 2021. We were not required to monitor for radiological parameters in 2021.

Samples are analyzed for contaminants, most of which were not detected in the Cleveland Water supply. The Ohio EPA requires us to monitor for some contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of our data, though accurate, are more than one year old. Listed in the table (pages 8-9) is information on those contaminants that were found.

Contaminants that may be present in source water include:

Microbial contaminants such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife

Inorganic contaminants such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming

Pesticides and herbicides which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses

Organic chemical contaminants including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems

Radioactive contaminants which can be naturally-occurring or be the result of oil and gas production and mining activities

DRAFT

"Treatment plant staff control the process that takes water straight from Lake Erie, makes the water safe to drink, and then pumps it throughout the Cleveland Water System to your home. Water Plant Operators continue their training throughout their career to stay up-to-date on treatment practices and ensure the quality of water delivered to our customers."

Maggie Rodgers
Manager of Plant Operations

"Our 50-year plan for infrastructure maintenance and upgrades includes all parts of our system – from the lake intakes to treatment plants to service lines. When you see a water tower being painted or a main being replaced, that is our staff helping ensure delivery of safe water continues for generations."

José N. Hernández, P.E.
Manager of Engineering

HOW WE MAKE THE WATER SAFE

LOCAL Water is pumped in from 3 miles or more offshore in Lake Erie and screened for twigs and other large debris before entering one of our four treatment plants.

TREATED In each plant we add potassium permanganate, powdered activated carbon and aluminum sulfate to make the tiny particles of mud and algae stick together. These clumps get larger until they are heavy enough to sink to the bottom of the sedimentation tank. This multi-step process is called coagulation, flocculation and sedimentation.

FILTERED The clear water on top of the sedimentation tank flows on to gravity filters that remove all particles larger than a single red blood cell, leaving the water crystal clear. Then we use a small amount of chlorine to kill harmful pathogens (viruses and bacteria) and disinfect the water. We add the minimum amount of fluoride required by the Environmental Protection Agency, which helps prevent tooth decay. We also add orthophosphate that helps prevent corrosion of service lines and home plumbing.

TESTED We test our water regularly before, during and after the treatment process to ensure our customers receive safe, good tasting drinking water. In total, 20,000 parameters in the treatment process are continuously monitored at each plant; 160,000 tests are performed yearly to ensure proper treatment; and 350 to 900 monthly samples are taken in the distribution system to ensure safe delivery.

DELIVERED Water reservoirs, pump stations, tanks and towers ensure water is continuously available at your tap with ample pressure. We deliver safe water to more than 442,000 customer accounts through 5,375 miles of water pipes. Our treatment plant staff and maintenance crews work 24-7 to ensure you have safe water at your tap.

DRAFT

HOW CLEVELAND WATER COMPARES NATIONALLY

Cleveland Water has some of the safest and best tasting water. We hold ourselves to higher standards than what is set by the EPA. Each of our water treatment plants has achieved advanced levels in the national Partnership for Safe Water. The partnership is a voluntary effort between six prestigious drinking water organizations and more than 300 water utilities. The partnership's goal is to optimize treatment plant performance and distribution system operations beyond what regulations require. The result is the production and delivery of superior quality water to all users. Each of our plants go through annual re-certification based on performance and have achieved the highest levels of certification for more than 15 years.

DEFINITIONS OF SOME TERMS CONTAINED WITHIN THIS REPORT

Contaminant: Anything in the water that is not a water molecule, including things that give water its natural flavor such as calcium and magnesium.

Maximum Contaminant Level (MCL): The highest level of contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

- For lead, the action level is exceeded if the concentration of lead in more than 10% of tap water samples collected during a monitoring period is greater than 0.015 ppm, i.e., if the 90th percentile lead levels is at or greater than 0.015 ppm.
- For copper, the action level is exceeded if the concentration of copper in more than 10% of the tap samples collected during a monitoring period is at or greater than 1.3 ppm.

Lead Threshold Level (LTL): The concentration of lead in an individual tap water sample that is at or greater than 0.015 ppm

Master Meter: A master meter is one that connects a wholesale public water system to consecutive public water system(s). This type of meter monitors the amount of water being sent to the consecutive system(s) and can also be used to determine the quality of water being delivered to the consecutive system(s).

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

Turbidity: A measure of the cloudiness of water and an indication of the effectiveness of our filtration system. The turbidity limit set by the EPA is 0.3 NTU in 95% of the monthly samples and shall not exceed 1 NTU at any time.

Parts per Million (ppm) or milligrams per Liter (mg/L): Units of measure for concentration of a contaminant. A part per million corresponds to one second in a little over 11.5 days.

Parts per Billion (ppb) or micrograms per Liter (µg/L): Units of measure for concentration of a contaminant. A part per billion corresponds to one second in 31.7 years.

Parts per Trillion ppt (ppt) or nanograms per Liter (ng/L): Units of measure for concentration of a contaminant. A part per trillion corresponds to one second in 31,500 years.

PFAS: Per- and polyfluoroalkyl substances (PFAS): are a group of man-made chemicals applied to many industrial, commercial and consumer products to make them waterproof, stain resistant, or nonstick. PFAS are also used in products like cosmetics, fast food packaging, and a type of firefighting foam called aqueous film forming foam (AFFF) which are used mainly on large spills of flammable liquids, such as jet fuel. PFAS are classified as contaminants of emerging concern, meaning that research into the harm they may cause to human health is still ongoing.

The "<" symbol: A symbol which means less than. A result of <5 means that the lowest level that could be detected was 5 and the contaminant in that sample was not detected.

DRAFT

1 ppm = four drops of water in a 55 gallon rain barrel.

1 ppb = 1 drop in a 30-foot diameter 4-foot deep swimming pool (21,000 gallons)

1 ppt = 2.3 rain barels of water in all of Lake Erie's 127.7 trillion gallons.

TABLE OF DETECTED CONTAMINANTS

How to Read the Water Quality Data Table: EPA establishes the safe drinking water regulations that limit the amount of contaminants allowed in drinking water. The table shows the concentrations of detected substances in comparison to regulatory limits. Substances that were tested for, but not detected, are not included in this table. Listed below is information on those contaminants that were found in Cleveland Water's drinking water at each of our four treatment plants. The results in the table were either collected during 2021 or were used for compliance in 2021. Typical sources are shown for each contaminant. TTHMs, HAA5s, and TOC also include 9 months of 2020 data as required for the compliance calculations.

* Turbidity is a measure of the cloudiness of water and an indication of the effectiveness of our filtration system. The turbidity limit set by the EPA is 0.3 NTU in 95% of the samples analyzed each month and shall not exceed 1 NTU at any time for each of our water treatment plants.

++ In November, two of the 59 samples taken in Crown's primary distribution area were positive. Repeat samples were safe. Over 600 samples in the Crown area were collected in 2021, and over 4,200 samples were taken in 2021 for the entire distribution system; these were the only two samples that tested positive.

** Cleveland Water has a combined distribution system. Data listed represents this and therefor is identical for each treatment plant.

The value reported under "Level Found" for Total Organic Carbon (TOC) is the lowest running annual average ratio between the percent of TOC actually removed to the percent of TOC required to be removed. A value of greater than one (1) indicates compliance with TOC removal requirements. A value less than 1 indicates a violation of the TOC removal requirements. The values reported under the "Range of Detections" for TOC is the lowest monthly ratio to the highest monthly ratio.

ABBREVIATIONS BELOW APPLY TO ALL WATER QUALITY REPORTING TABLES

AL = Action Level

MCL = Maximum Contaminant Level

MCLG = Maximum Contaminant Level Goal

NTU = Nephelometric Turbidity Units

MRDL = Maximum Residual Disinfectant Level

MRDLG = Maximum Residual Disinfectant Level Goal

n/a = not applicable

ND = Not Detected

ppm = parts per million; milligrams per liter (mg/L)

ppb = parts per billion; or micrograms per liter (µg/L)

< = a symbol which means less than. A result of <5 means the lowest level that can be detected is 5 and the contaminant in that sample was not detected.

TT = Treatment Technique

ADDITIONAL LEGEND FOR AVERAGE CHEMICAL VALUES TABLE (P 11)

NR = Not Regulated
NA = Not Applicable
NM = Not Monitored this Year

1. EPA considers 50 pCi/L to be the level of concern for beta emitters and an MCL of 4 mrems/year
2. Up to 5% monthly of all samples can be positive. 2 out of 4261 samples were positive in 2021
3. NTU – 95% of all samples taken must be less than 0.3 NTU, and no sample may be above 1 NTU
4. TT required rather than the necessity to meet a MCL. Required to be > 1.0
5. Based on first draw samples from customer taps. These are ALs rather than MCLs
6. Ohio EPA considers 0.05 ppm to be an aesthetic concern; 0.3 ppm to be a health concern to infants; and 0.3 ppm for 10 days or 1.0 ppm for one day to be a health concern for all people

Lake Erie raw sulfate (SO_4) level ~ 24 ppm; treated SO_4 ranges from 28-40 ppm, usually 35-40 ppm

ADDITIONAL WATER QUALITY MONITORING

Unregulated Contaminants are substances for which USEPA has no established drinking water standards. USEPA requires public water systems to monitor these substances in order to determine where certain substances occur and whether the USEPA needs to regulate those substances in the future. Between December 2018 and September 2019, Cleveland Water participated in the fourth round of the Unregulated Contaminant Monitoring Rule (UCMR4). Contaminants in the table on this page were detected during UCMR4. Additional contaminants were monitored and not detected. For additional information on UCMR4 results, please call our Water Quality line at 216-664-2639. Information about UCMR monitoring requirements is found on the USEPA website: epa.gov/dwucmr.

WHAT'S NOT IN YOUR WATER

Cleveland Water monitors drinking water for more than 200 regulated and unregulated contaminants. We perform thousands of tests each year to ensure drinking water quality. Many substances that we test for do not appear in this report because they are not found in your drinking water. We analyze your water regularly for the substances listed in the Average Chemical Values Table on page 11, the significant majority of which were not detected. Additionally, we have been monitoring for cyanotoxins in source and finished water since 2010. Cyanotoxins have never been detected in our finished water, therefore results are not included in this report.

We have tested for the six main PFAS chemicals in our source water (Lake Erie) and our finished drinking water as it leaves our treatment plants numerous times. There has not been a reportable detection level for any PFAS chemicals in nearly 300 tests of Cleveland Water. In 2020, our PWS was sampled as part of the State of Ohio's Drinking Water Per- and Polyfluoroalkyl Substances (PFAS) Sampling Initiative. Six PFAS compounds were sampled, and none were detected in our finished drinking water. For more information about PFAS, please visit pfas.ohio.gov.

If you have questions about our water quality monitoring parameters please call our Water Quality Line at 216-664-2639 or scan the QR code on page 15.

DRAFT

REMOVING LEAD LINES

For decades, Cleveland Water has been removing city-owned lead service lines during water main replacement projects and replacing them with copper. In 2018, we began tracking those replacements and replacing customer-owned lead service lines when disturbed during water main replacements projects and repairs. From October 2018 through Dec. 31, 2021, Cleveland Water replaced 4,937 lead service lines. These numbers include lead lines replaced by our Childcare Lead Service Line Removal Program, launched in 2021 with $1.5 million in state and federal funding.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Cleveland Water is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at 800-426-4791 or at epa.gov/safewater/lead. A list of laboratories certified in the state of Ohio to test for lead can be found online by searching the words "Ohio EPA Certified Labs" or by calling 614-644-2752.

LEAD AND COPPER MONITORING

Cleveland Water regularly monitors for lead and copper from homes in the Cleveland Water distribution system that meet Tier 1 requirements (i.e. have lead in their plumbing system). The results shown below are the most recent compliance results from water samples taken June - September 2021. There were no violations or lead or copper action level exceedances.

Cleveland Water's monitoring results have been lower than the federal action level for lead of 15 parts per billion (ppb) for more than 24 years. The low lead levels are a direct result of our water's consistency and successful implementation of treatment techniques to prevent corrosion. These optimizations include adding orthophosphate to finished water and keeping the pH of water above 7 at all times. The orthophosphate forms a thin coating on the inside of pipes which limits water's contact with metals.

The blue line on the graph below shows our lead compliance monitoring results since we began testing. The graph shows how lead levels dropped and stayed below the federal action level since we implemented our corrosion control treatment techniques.

DRAFT

Cleveland Water's 2021 Lead and Copper Compliance Monitoring results are found in the table below.

YEAR Sampled - Contaminant (Units) [Typical Sources in Drinking Water]		AL	Individual Results over AL	90% of test levels were less than	Violation
Lead and Copper	2021 - Copper (ppm) [Corrosion of household plumbing systems; Erosion of natural deposits]	1.3 ppm	0	0.10 ppm	No
		0 out of 58 samples had levels in excess of the copper action level of 1.3 ppm			
	2021 - Lead (ppb) [Corrosion of household plumbing systems; Erosion of natural deposits]	15 ppb	0	2.28 ppb	No
		0 out of 58 samples had levels in excess of the lead action level of 15 ppb			

HOW TO DETERMINE IF YOUR PLUMBING HAS LEAD

Cleveland Water is virtually lead free when it leaves our treatment plants. Our water mains are not made from lead. Lead can be present in service lines and in customers' plumbing, faucets and fixtures.

Not all customers have lead in their service line or premise plumbing. To understand the potential of having lead in your system:

Lead

Copper

Galvanized

CHECK

Check the type of material of your city-owned service line online at clevelandwater.com/lead

TEST

Test your service line material. Our video shows you how: youtube.com/watch?v=AiU7GHzD_Ck. If a magnet sticks to the service line where it enters your home, it is galvanized steel. If you scratch the pipe with a penny and the metal is shiny like a penny, it is copper. If the scratched metal is shiny silver and flakes off, it is lead. You can record your results online, call us at 216-664-2882 or send an email to LeadLookup@ClevelandWater.com with pictures of your service line and we will record the results for you. If our records indicate you have a customer-owned lead service line, we may contact you for replacement if/when we receive grant funding for replacement projects.

DATE

Homes built after 1953 should not have a lead service line. Before 1986, the level of lead in solder used to join copper pipes was usually 50%. There was no regulation on the amount of lead used in faucets that pre-date 1986. In 1986, the allowable level of lead in solder was reduced to less than 0.2% and the allowable level of lead in potable water faucets was reduced to less than 8%. In 2014, the allowable level of lead used in new potable water faucets and fittings was reduced to less than 0.25%.

DRAFT

ADDITIONAL ACTIONS TO ADDRESS LEAD IN SERVICE LINES & PLUMBING

Replace lead service lines.
They connect the water main in the street into your home/building. If you replace your customer-owned service line, Cleveland Water will replace our portion if it is lead.

Identify and replace faucets containing lead.
Faucets made before 1986 can have unlimited lead inside; those that were made between 1986 and 2014 can have up to 8% lead inside.

Check your wiring.
Have a licensed electrician check for connections between your electrical and plumbing systems. Electrified connections accelerate corrosion.

Report your service line material and volunteer your home.
Cleveland Water is actively seeking homeowners for future sampling and service line removal projects.
If you have a lead service line and/or would like to be considered for future sampling, send an email to LeadLookup@ClevelandWater.com with your full contact information and a picture of your service line where it enters your home.

Boiling your water will NOT reduce lead.
Boiling water is used to kill pathogens. If lead is present, water evaporated during boiling will concentrate metals such as lead.

Learn more about our Lead Awareness Campaign.
We teach about lead to meet a portion of the notification requirements in Ohio Administrative Code Rule 3745-83-02. Our education materials include brochures, flyers, videos, social media posts and graphics, and can be found at clevelandwater.com/lead or by calling our Lead Inquiry Line at 216-664-2882 to request printed copies and/or a group presentation.

KEEP YOUR HOME'S WATER HEALTHY*

Clean, Flush and Consume Cold are the actions all customers should implement to help ensure the highest quality of water is coming out of your tap, especially if there is the possibility of lead in your plumbing system. In some situations, a water system repair/replacement may temporarily increase lead levels in water and/or cause discoloration. As a standard practice the USEPA recommends these actions (clean, flush, consume cold) which are important to take when water has been restored after a disruption of service.

CLEAN

Clean your faucet aerator screens regularly. Small particles of solder and other material can accumulate in faucet aerators and in some circumstances can release lead into the water. Aerators should be cleaned at least twice a year, and more frequently after work is done to your plumbing system.

FLUSH

Flush your cold water lines before consuming water when water has not been used for 6 or more hours. The goal is to have cold, fresh water from the main in the street come out of your tap before drinking the water. To flush the plumbing, run water until you feel a temperature change then run water for an additional 30 seconds to 3 minutes. The time depends on the length and diameter of your service line. The farther your home is from the street, the longer you need to flush. **When in doubt, flush it out.**

CONSUME COLD

Always use cold water for cooking, drinking and preparing baby formula. Hot water corrodes pipes faster and is more likely to contain lead. If you need hot water for food or drinks, get water from the cold water tap then heat the water.

*As a standard practice the USEPA recommends these actions to reduce possible lead exposure in drinking water.

DRAFT

CUSTOMER FAQS

Q: What temperature is Cleveland Water?

A: The temperature of the water coming into your home is about the same as Lake Erie, which varies throughout the year. Recent monthly average temperatures of Lake Erie are listed in the table. This is about the same temperature of the water coming out of your cold water tap. The hot water temperature is controlled by your water heater.

Q: Is Cleveland Water safe from viruses such as the COVID-19 virus?

A: Yes! Your water is safe from viruses and is safe to drink. Each plant's treatment process includes disinfection with chlorine. This is very highly effective at killing viruses, including coronaviruses. The U.S. EPA gives our treatment process credit for inactivating 99.99% of all viruses. Chlorine is added as the last step in the treatment process within a closed system. This means there is zero human interaction with water until it comes out of your faucet.

Q: How long does it take water to reach my home?

A: Water leaving our treatment plants reaches nearly all customers' service lines within 3 days. Once water enters your service line, the age and safety of the water becomes your responsibility. With regular daily water use, the safe water coming out of your tap is very fresh, which helps ensure safety.

Q: How can I get my water tested?

A: We maintain a database of people interested in having their water tested, including as part of our lead and copper monitoring program. We are actively seeking volunteer homes with customer-owned lead service lines for this program. To volunteer your single-family residential home, call 216-664-2639. Customers can also choose to have their water tested at their cost by a certified laboratory. The Ohio EPA maintains a list of certified laboratories which can be found online.

Q: What can cause discolored water in homes/buildings?

A: The most common cause of discolored water in premise plumbing is hydrant flushing, followed by water main breaks and valve operation. In these cases, iron sediment can be stirred into the water column. Discolored water can also be caused by premise plumbing that needs replaced, water that sits unused in plumbing for weeks to months, or rarely in summer elevated manganese for which we will issue a notification. Following the "Healthy Water Habits: Clean. Flush. Consume Cold." on page 14 and following building flushing steps found on our water quality webpage (scan QR code) will help restore and maintain the high quality of water in your home.

Q: How can I keep from contaminating my home's water?

A: Preventing cross connections can protect your home's water and the city water supply. A cross connection is when a drinking water pipe is physically joined to any source of potential contamination such as private wells, cisterns, lawn irrigation systems, swimming pools, hot tubs, boiler-radiator heating systems, fire suppression sprinklers, and hoses left in sinks, pools, buckets, puddles or chemical sprayers. Backflow can occur when the pressure in a water main drops lower than the customer's pressure (such as the result of a water main break), causing water to be siphoned backward from customer plumbing toward the water main. If a cross connection exists, contaminated water will flow backwards into your drinking water plumbing or even into our distribution main. We require the installation, testing and maintenance of backflow prevention devices on service line connections that present an actual or potential hazard to our distribution system, including on all commercial water service connections, and residential connections that have an irrigation system, fire sprinkler system or swimming pool/hot tub with an automatic fill valve. To learn more visit clevelandwater.com/construction/backflow-prevention.

APPENDIX G: Qualifications of Environmental Professionals

DRAFT

JAMES KEESEY, EP

NOVA ASSOCIATE

PROFESSIONAL EDUCATION

Bachelor of Science, Environmental Science, Ohio State University, Columbus, Ohio – 2011

CERTIFICATIONS/QUALIFICATIONS

- Environmental Professional (EP) in Accordance with ASTM E1527-13
- Certified Lead Inspector in the State of Ohio
- Environmental Site Assessment (ESA) Experience, 9+ years
- Multifamily ESA Experience, 9+ years

SELECTED EXPERIENCE

Mr. Keesey has over six years of consulting experience in the environmental industry throughout the United States. He has conducted Phase I and Phase II Environmental Site Assessments (ESAs), asbestos-containing materials (ACM) surveys, lead based paint (LBP), and mold assessments for a wide range of local and national clients, including government agencies, banks, agency lenders, investment banks, life companies, law firms and property owners. The properties he has evaluated have included multifamily residential, retail, office, industrial and hospitality.

Mr. Keesey has provided hundreds of environmental site assessments in accordance with ASTM E1527, the USEPA All Appropriate Inquiry rules, Fannie Mae Delegated Underwriting Standards, Freddie Mac guidelines, HUD guidelines, and other client specific scopes of work. He is proficient in conducting site reconnaissance, interviews, regulatory reviews, historical research, and preparing a thorough report.

His environmental background includes a detailed understanding of the risks associated with hazardous and regulated materials storage, use generation and disposal, above ground and underground storage tanks, polychlorinated biphenyls (PCBs), asbestos-containing materials (ACM), lead-based paint (LBP), mold and radon. Some of Mr. Keesey's key accomplishments include: conducting numerous asbestos and lead surveys for houses and apartments slated for demolition, soil and ground water well installation/sampling activities at multiple facilities undergoing the Ohio EPA Voluntary Action Program for property redevelopment, and underground storage tank (UST) closure by removal by following the Ohio BUSTR guidelines. Mr. Keesey has managed numerous subsurface investigations to assess the horizontal and vertical extent of soil and groundwater contamination and has provided oversight services to environmental remediation projects.

PROFESSIONAL ORGANIZATIONS

- Member, Building Environmental Council of Ohio

JENNON LEWIS, EP

SENIOR PROJECT MANAGER

PROFESSIONAL EDUCATION

M.S. Environmental Science, State University of New York - Environmental Science and Forestry, Syracuse, NY, 2001
B.S. Environmental Forest Biology, State University of New York - Environmental Science and Forestry, Syracuse, NY, 1999

CERTIFICATIONS/QUALIFICATIONS

- Environmental Professional (EP) in Accordance with ASTM E1527-13
- AHERA Certified Asbestos Building Inspector
- Certified Asbestos Inspector in the State of Texas, License No. 602233
- Certified Mold Assessment Consultant in the State of Texas, License No. MAC0267
- Certified Mold Assessor in the State of Florida, License No. MRSA1864
- NRPP Certified Residential Radon Measurement Provider, ID No. 108298 RT
- NORM Survey/Supervisor
- OSHA 40-Hour Hazardous Waste Operations Certification with Annual Refresher
- Termites and Other Wood Destroying Pests Training

SELECTED EXPERIENCE

Ms. Lewis has more than 15 years of experience in the professional environmental consulting field throughout the United States. Her experience includes the completion of phase I environmental site assessments (ESAs), subsurface remedial investigations, environmental health and safety, and industrial hygiene/toxicology consulting, including indoor air quality (IAQ), asbestos, vapor encroachment, mold and pesticide exposure assessment, and remediation preparation. Ms. Lewis has also conducted and assisted in the preparation of spill prevention, control, and countermeasure (SPCC) plans, stormwater pollution prevention plans (SWPPP), and compliance reports for a variety of clients.

Ms. Lewis has performed hundreds of ESAs nationwide for various industrial, commercial, manufacturing, and oil and gas properties. These assessments include project planning, onsite research and assessment, review and analysis of federal, state, local, and historical records, report preparation, and client consultation. She understands facility operating systems, state and federal regulations, and the fate and transport of chemicals through air, soil, surface water, and groundwater. Ms. Lewis's environmental background includes a detailed understanding of the risks associated with hazardous and regulated materials, underground storage tanks (USTs), polychlorinated biphenyls (PCBs), asbestos-containing materials (ACM), lead-based paint (LBP), mold, and radon.

RICHARD M. GEORGE
REGIONAL CLIENT MANAGER

PROFESSIONAL EDUCATION
B.S. Geology, Richard Stockton College, Galloway Township, NJ, 1995

CERTIFICATIONS/QUALIFICATIONS
- Licensed Site Remediation Professional (LSRP) in the State of New Jersey, License #594676
- Licensed Professional Geologist in the State of Tennessee, License #2178
- 40-Hour OSHA Hazardous Waste Site Training
- 8-Hour OSHA Hazardous Waste Supervisory Training
- Certified Wetlands Specialist

SELECTED EXPERIENCE
Mr. George has over 24 years of experience in the due diligence, environmental, and engineering industry. His responsibilities have included the management of projects for commercial, industrial, and multifamily facilities, on tasks involving: soil and groundwater assessments and remediation (both hazardous and petroleum-related releases); environmental compliance audits; phase I environmental site assessments (ESAs); and property condition assessments (PCAs). He is experienced in managing multiple-site portfolio projects that require quick-responses, technical support for engineering assessments, and research activities for a wide variety of environmental issues.

As a Regional Client Manager, Mr. George is responsible for managing due diligence investigations for property acquisition and financing, including environmental site assessments, property condition reports, subsurface site investigations, site characterizations, remediation, and other due diligence related activities. This includes providing expert-level managerial, technical, and operational project coordination and client relations for the development and implementation of Nova's services to support our clients' needs. Mr. George works directly with clients to delineate appropriate scopes, objectives, budgets, and priorities to meet their project needs.

Mr. George has managed over 5,000 environmental site assessments and conducted, designed, and managed site characterizations, investigations, delineations, and remediations at former/active industrial sites, commercial properties, residential properties, underground storage tank (UST) and petroleum sites, dry cleaners, former/active landfills, heavy metal and polychlorinated biphenyls (PCB) facilities, agricultural sites, and Brownfield sites throughout the United States. Mr. George's remediation experience includes designing and implementing remedial action programs under the oversight of state regulatory agencies. His remedial design and implementation experience include conventional remediation technologies (i.e., source removal, contaminated site encapsulation, natural attenuation) and innovative technologies, including in-situ bioremediation, soil vapor extraction, vapor mitigation, enhanced bioremediation, subsurface injection, and other in-situ soil and groundwater treatment technologies. He has extensive knowledge dealing with both state and federal regulations.

As a Licensed Site Remediation Professional (LSRP) in New Jersey, Mr. George is the lead environmental expert for Nova's clients to assist in obtaining environmental closure through the State of New Jersey Site Remediation Professional Licensing Board (SRPLB) Site Remediation Reform Act (N.J.S.A. 58:10C-1 et seq.).

Ms. Jennifer Chandler
CHN Housing Partners
2999 Payne Avenue
Cleveland, Ohio 44114

Re: *Revised* Limited Subsurface Investigation
Hough Avenue between East 89th Street and East 90th Street
Cleveland, Ohio 44106
August Mack Project Number JY1828.742

Dear Ms. Chandler:

August Mack Environmental, Inc. (August Mack) has completed subsurface investigation activities at the above-referenced subject property. During a recent Phase I Environmental Site Assessment (ESA) performed by Partners Environmental (Partners) (Partners Project No.640.16), the following recognized environmental conditions (RECs) were identified:

- **REC-1:** Various Former Commercial Operations, 8900, 8904, 8918, and 8928 Hough Avenue (subject property): A historical dry cleaner, Checker Cleaners, was listed in the city directories from 1951 through 1961 at 8900 Hough Avenue. The EDR database report and city directories listed Aaron Cohn Clothing Cleaners at 8904 Hough Avenue in 1930, as well as Unity Dry Cleaning and Tailoring later in 1974. According to Sanborn maps, this portion of the subject property was also operated as an oil and paint store in the 1950s. Additionally, another dry cleaning and laundry operation was listed in the EDR database under Benjamin Goldsmith and addressed at the former subject property address of 8918 Hough Avenue in 1935. City directories similarly listed various other cleaners from 1941 through 1961. According to city directories, a photography business, most frequently referred to as Fleming Photo Company, was located on the subject property at 8928 Hough Avenue from at least 1930 through 1955. Based on Partners' experience with these types of facilities and their past use of

EXPERTISE. INNOVATION. COMMITMENT.

hazardous chemicals, it is possible that these former dry cleaning and other select operations along Hough Avenue could have adversely impacted the subject property.

- **REC-2:** Former Retail Filling Station with three (3) Underground Storage Tanks (USTs), 8930-8940 Hough Avenue (Eastern Adjoining Property): The eastern adjoining property was identified as Gonzalez Texaco Service Station in the EDR Historic Automotive database from 1951 through 1961, and in city directories under various names from 1941 through 1961. On the Sanborn Fire Insurance maps, it is also depicted in 1951 and 1952, with notation of an associated storefront and three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners' experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the subject property.

- **REC-3:** Former Retail Filling Station, 8812 Hough Avenue (Eastern Adjoining Site): The eastern adjacent site was identified in the EDR Historic Automotive database as Ashford Union Service Station / 76 Service Station from 1951 through 1974. The Sanborn maps show its presence from 1951 through 1972, along with three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners' experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the subject property.

The purpose of this investigation is to determine if subsurface conditions on the subject property have been impacted by the environmental concerns identified in the Phase I ESA. This report was prepared at the request of Ms. Jennifer Chandler with CHN Housing Partners and may be relied on by CHN Housing Partners. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by August Mack.

SUBSURFACE INVESTIGATION

August Mack mobilized to the subject property on August 1, 2024 to perform the subsurface investigation activities. Prior to starting subsurface activities, ground penetrating radar (GPR), electromagnetic (EM) locating, and other utility locating tools were utilized to clear all boring locations.

A total of four (4) soil borings (SB-1 through SB-4) were advanced across the subject property using a Geoprobe® direct push sampling system (Geoprobe®). Information

regarding boring locations is provided below and boring locations are depicted on **Figure 1**. The client provided an overlay of the future building development plans; which is also presented on **Figure 1**.

- SB-1 was advanced on the east portion of the subject property, in the location of former Fleming Photo Company and adjacent to a former retail filling station with three (3) USTs;
- SB-2 was advanced on the east portion of the subject property, in the location of former Goldsmith Cleaners;
- SB-3 was advanced on the west portion of the subject property in the location of former Unity Dry Cleaning and a former oil / paint store; and,
- SB-4 was advanced on the west portion of the subject property in the location of former Checker Cleaners, and the adjacent former filling station.

Sampling Methodology

Soil borings SB-1 through SB-4 were advanced to a depth of 20 feet below grade (ft bg) using a Geoprobe® sampling system. The purpose of the borings was to field screen soils, determine geological conditions, and collect soil and groundwater samples for laboratory analysis. All soil sample intervals were inspected in the field for odors and staining and screened using a photoionization detector (PID). Field screening results and soil lithological information is provided on soil boring logs included as **Attachment A**.

One (1) soil sample interval from each boring location was selected for laboratory analysis based on field inspection observations and screening results. Soil samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of volatile organic compounds (VOCs) via United States Environmental Protection Agency (U.S. EPA) method 8260, polycyclic aromatic hydrocarbons (PAHs) via U.S. EPA method 8270 and Resource Conservation and Recovery Act (RCRA) 8 Metals via U.S. EPA method 6010B / 7470-7471.

Soil borings were converted into temporary, 1-inch diameter PVC wells to aid in the collection of groundwater samples. Groundwater samples were collected from the temporary wells using a peristaltic pump attached to new, disposable sample tubing and submitted to PACE for analysis of VOCs via U.S. EPA method 8260, PAHs via U.S. EPA method 8270 and RCRA 8 Metals via U.S. EPA method 6010B / 7470-7471.

August Mack field procedures are provided in **Attachment B**.

Field Observations

Inspection of collected soil samples from the borings revealed that the subsurface geology consists primarily of alternating layers of clay, sand and clayey sand. A brick was also observed at approximately 6 to 7 ft bg at SB-2, SB-3, and SB-4. Saturated conditions were encountered beginning at approximately 15 to 18 ft bg for all borings.

Field observations at SB-4 from approximately 14 to 18 ft bg reveal evidence of staining, odor, and sheen. In addition, the majority of PID measurements collected from the soil borings were below 2.6 (ppm). Notable elevated PID measurements were observed in SB-1 15 to 16 ft bg (122.8 ppm) and SB-2 4 to 8 ft bg (42.9 ppm).

Soil Analytical Results

The soil analytical results were compared to the Ohio Environmental Protection Agency (OEPA) Voluntary Action Program (VAP) Generic Direct Contact Soil Standards (GDCSS) for residential, commercial/industrial, and construction worker land use. The laboratory analysis revealed the following results:

- All VOCs were detected below their laboratory reporting limits (LRLs).
- Several PAHs were detected in all soil samples; however, all detected concentrations are below their respective standard with the exception of benzo(a)pyrene in SB-3 (1-3). Benzo(a)pyrene was above the GDCSS standards for residential land use but well below the GDCSS standards for commercial/industrial and construction workers.
- Metals including arsenic, barium, cadmium, chromium, and lead were detected in each of the soil samples. All concentrations were below their respective standards with the exception of arsenic in SB-3 (1-3). Arsenic was above the GDCSS standard for residential but well below the GDCSS standards for commercial/industrial and construction workers.

The soil analytical results are summarized in **Table 1**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

Groundwater Analytical Results

The groundwater analytical results were compared to the OEPA VAP Generic Unrestricted Potable Use Standards (UPUS). The laboratory analysis revealed the following results:

- Several VOCs were detected in the groundwater sample SB-4 (10-20); however, they were below their respective standards. All other VOCs were below LRLs.
- Several PAH compounds (Benzo(a)anthracene, Benzo(a)pyrene, 1-Methylnaphthalene, and Naphthalene) were detected above the VAP UPUS in the SB-4 (10-20) groundwater sample. All other PAHs were below LRLs.
- All analyzed metals were not detected above LRLs, with the exception of barium. Barium was detected above the LRL, but well below its comparative VAP UPUS standard.

It is noted that the subject property is located within an OEPA approved Urban Setting Designation (USD), known as the Cleveland City Wide. A USD recognizes that remediation of groundwater to drinking water standards is not necessary because no receptors will be drinking the groundwater in the USD area (i.e. area connected to municipal water supply).

The groundwater analytical results are summarized in **Table 2**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

SUMMARY AND CONCLUSION

August Mack has completed a Limited Subsurface Investigation for the subject property located at Hough Avenue between East 89th Street and East 90th Street, Cleveland, Ohio. A total of four (4) soil borings were advanced in the northern portion of the subject property in order to evaluate if subsurface conditions have been impacted by the RECs identified in the recent Phase I ESA completed by August Mack.

Field observations and PID measurements from soil boring SB-4 reveal evidence of impacts (odor, staining, and sheen) at the subject property. Analytical results revealed one (1) PAH (Benzo(a)pyrene) and one (1) metal (Arsenic) were detected slightly above the GDCSS standards for residential land use in soil collected from soil boring SB-3 1 to 3 ft bg. Based on the future development plans provided by the Client, SB-3 is below the building footprint. Several PAHs and metals were identified in soil across the subject property at concentrations that did not exceed comparison standards. VOCs were not detected at concentrations above LRLs in the soil samples.

Analytical results revealed benzo(a)anthracene, benzo(a)pyrene, 1-methylnaphthalene, and naphthalene were detected above their VAP UPUS standards in groundwater collected from soil boring SB-4. It is noted that these compounds were not detected at concentrations above their comparative standards in the soil sample collected at this

boring location. Additionally, the subject property is located within the Cleveland City-Wide USD and will be connected to municipal drinking water. Considering this information, the ingestion pathway is incomplete.

Concentrations of benzo(a) pyrene and arsenic were detected at SB-3 1 to 3 ft bg exceeding their GDCSS residential use standards; however, these compounds are likely generated from the surrounding urban development rather than releases from historical operations at this location. Redevelopment typically includes removal of surface soils to install a building pad. As the surface soils at SB-3 will be removed during redevelopment, and the building pad will act as a direct contact barrier, August Mack does not recommend addition assessment for this location.

We appreciate the opportunity to provide you with environmental consulting services and trust that this submittal is in accordance with your needs. Please feel free to contact us if you have any questions or comments or require additional information regarding this project or the project site.

Sincerely,

Sarah Bergund
Due Diligence Manager

Field Procedures

SOIL & GROUNDWATER SAMPLING PROCEDURES

Soil Sampling Activities

Soil borings were advanced using a Geoprobe® Direct Push Dual-Tube Sampling System (Geoprobe®) and hand augers. Soil borings were advanced to the desired depth required for the investigation. Soil samples were collected continuously from each boring location by using the dual-tube tooling, which includes a disposable acetate sample liner. The sampler was recovered with a 4-foot soil sample collected within an acetate liner inside the barrel. A new acetate liner was used for each sample collected. All reusable equipment that contacted the soil samples was decontaminated with a Liquinox® solution and rinsed with water between each sample collection.

Upon retrieving the 4-foot sections of soil, the samples were divided into 2-foot sections and inspected in the field for evidence of contamination (odors, staining, etc.). Each sample was also screened in the field by headspace analysis using a MiniRae® photoionization detector (PID). The 2-foot section that exhibited the highest potential for contamination was sampled and transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. All samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals, via U.S. EPA 8260, 8270SIM, and 6010B/7470-7471 methods.

Groundwater Sampling Activities

Temporary 1-inch groundwater sampling piezometers were installed in two of the three boring location to allow groundwater to collect for sampling purposes. Groundwater samples were collected from the temporary groundwater sampling points using a check valve and dedicated tubing. The groundwater samples were transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. Groundwater samples were submitted to PACE for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals via U.S. EPA 8260 , 8270SIM, and 6010B/7470-7471 methods.

Site Restoration Activities

Upon completion of the field sampling activities, the boreholes were abandoned by manually pouring soil cuttings and bentonite into the boring. Subject property restoration was completed by patching the surface materials to match pre-investigation conditions.

RE: Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Dear James Bell:

Enclosed are the analytical results for sample(s) received by the laboratory on August 02, 2024. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Indianapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Amanda Gaines

ANALYTICAL RESULTS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Sample: SB-3-1-3 **Lab ID: 50379409002** Collected: 08/01/24 10:23 Received: 08/02/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Sample: SB-2-4-8 **Lab ID: 50379409003** Collected: 08/01/24 11:36 Received: 08/02/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

QUALIFIERS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

1d	Neither matrix spike nor matrix precision data could be provided for this analytical batch due to insufficient sample volume.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.
ED	Due to the extract's physical characteristics, the analysis was performed at dilution.
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
M0	Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
M3	Matrix spike recovery was outside laboratory control limits due to matrix interferences.
N2	The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.
R1	RPD value was outside control limits.
S0	Surrogate recovery outside laboratory control limits.
pH	Post-analysis pH measurement indicates insufficient VOA sample preservation.

RE: Phase I Environmental Site Assessment for: Hough Senior Independent Living Property
Hough Avenue between East 89th Street and East 90th Street
Cleveland, Cuyahoga County, Ohio
Project Number: 640.16A

Dear Project Administration Manager:

Please find enclosed the Phase I Environmental Site Assessment for the Subject Property dated March 31, 2025, and addressed to the Ohio Housing Finance Agency (OHFA) and Ohio Development Services Agency (ODSA).

It is Partners' understanding that the information contained in the Environmental Site Assessment will be used by OHFA in considering proposed financing of residential development of the property and, furthermore, that OHFA and ODSA may rely upon the Environmental Site Assessment as if it were issued to OHFA and ODSA.

Partners certifies that the attached is a true, correct and complete copy of the Environmental Site Assessment and that the report represents Partners' professional opinion of the site as of this date. Partners also confirms the evaluation, recommendations and conclusions contained in the Environmental Site Assessment as of this date and that the Environmental Site Assessment has been performed in conformance with the scope and limitations of both the ASTM Practice E1527-21, and OHFA'S Environmental Review Requirements.

Sincerely,
Partners Environmental Consulting, Inc.

With respect to coverage afforded by this endorsement, the provisions of the policy apply unless modified by the endorsement.

A. NON-OWNED AIRCRAFT

Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** exclusion **g. Aircraft, Auto Or Watercraft** does not apply to an aircraft provided:

1. It is not owned by any insured;

2. It is hired, chartered or loaned with a trained paid crew;

3. The pilot in command holds a currently effective certificate, issued by the duly constituted authority of the United States of America or Canada, designating her or him a commercial or airline pilot; and

4. It is not being used to carry persons or property for a charge.

However, the insurance afforded by this provision does not apply if there is available to the insured other valid and collectible insurance, whether primary, excess (other than insurance written to apply specifically in excess of this policy), contingent or on any other basis, that would also apply to the loss covered under this provision.

B. NON-OWNED WATERCRAFT

Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** Subparagraph **(2)** of exclusion **g. Aircraft, Auto Or Watercraft** is replaced by the following:

This exclusion does not apply to:

(2) A watercraft you do not own that is:

(a) Less than 52 feet long; and

(b) Not being used to carry persons or property for a charge.

C. PROPERTY DAMAGE LIABILITY - ELEVATORS

1. Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** Subparagraphs **(3), (4)** and **(6)** of exclusion **j. Damage To Property** do not apply if such "property damage" results from the use of elevators. For the purpose of this provision, elevators do not include vehicle lifts. Vehicle lifts are lifts or hoists used in automobile service or repair operations.

2. The following is added to **Section IV - Commercial General Liability Conditions,** Condition **4. Other Insurance,** Paragraph **b. Excess Insurance:**

The insurance afforded by this provision of this endorsement is excess over any property insurance, whether primary, excess, contingent or on any other basis.

D. EXTENDED DAMAGE TO PROPERTY RENTED TO YOU (Tenant's Property Damage)

If Damage To Premises Rented To You is not otherwise excluded from this Coverage Part:

1. Under Paragraph **2. Exclusions of Section I - Coverage A - Bodily Injury and Property Damage Liability:**

a. The fourth from the last paragraph of exclusion **j. Damage To Property** is replaced by the following:

Paragraphs **(1), (3)** and **(4)** of this exclusion do not apply to "property damage" (other than damage by fire, lightning, explosion, smoke, or leakage from an automatic fire protection system) to:

(i) Premises rented to you for a period of 7 or fewer consecutive days; or

(ii) Contents that you rent or lease as part of a premises rental or lease agreement for a period of more than 7 days.

Paragraphs **(1), (3)** and **(4)** of this exclusion do not apply to "property damage" to contents of premises rented to you for a period of 7 or fewer consecutive days.

A separate limit of insurance applies to this coverage as described in **Section III - Limits of Insurance.**

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

112 of 316

b. The last paragraph of subsection **2. Exclusions** is replaced by the following:

Exclusions **c.** through **n.** do not apply to damage by fire, lightning, explosion, smoke or leakage from automatic fire protection systems to premises while rented to you or temporarily occupied by you with permission of the owner. A separate limit of insurance applies to Damage To Premises Rented To You as described in **Section III - Limits Of Insurance.**

2. Paragraph **6.** under **Section III - Limits Of Insurance** is replaced by the following:

6. Subject to Paragraph **5.** above, the Damage To Premises Rented To You Limit is the most we will pay under Coverage **A** for damages because of "property damage" to:

a. Any one premise:

(1) While rented to you; or

(2) While rented to you or temporarily occupied by you with permission of the owner for damage by fire, lightning, explosion, smoke or leakage from automatic protection systems; or

b. Contents that you rent or lease as part of a premises rental or lease agreement.

3. As regards coverage provided by this provision **D. EXTENDED DAMAGE TO PROPERTY RENTED TO YOU (Tenant's Property Damage) -** Paragraph **9.a.** of **Definitions** is replaced with the following:

9.a. A contract for a lease of premises. However, that portion of the contract for a lease of premises that indemnifies any person or organization for damage by fire, lightning, explosion, smoke, or leakage from automatic fire protection systems to premises while rented to you or temporarily occupied by you with the permission of the owner, or for damage to contents of such premises that are included in your premises rental or lease agreement, is not an "insured contract".

E. MEDICAL PAYMENTS EXTENSION

If **Coverage C Medical Payments** is not otherwise excluded, the Medical Payments provided by this policy are amended as follows:

Under Paragraph **1. Insuring Agreement** of **Section I - Coverage C - Medical Payments,** Subparagraph **(b)** of Paragraph **a.** is replaced by the following:

(b) The expenses are incurred and reported within three years of the date of the accident; and

F. EXTENSION OF SUPPLEMENTARY PAYMENTS - COVERAGES A AND B

1. Under **Supplementary Payments - Coverages A** and **B**, Paragraph **1.b.** is replaced by the following:

b. Up to **$3,000** for cost of bail bonds required because of accidents or traffic law violations arising out of the use of any vehicle to which the Bodily Injury Liability Coverage applies. We do not have to furnish these bonds.

2. Paragraph **1.d.** is replaced by the following:

d. All reasonable expenses incurred by the insured at our request to assist us in the investigation or defense of the claim or "suit", including actual loss of earnings up to **$500** a day because of time off from work.

G. ADDITIONAL INSUREDS - BY CONTRACT, AGREEMENT OR PERMIT

1. Paragraph **2.** under **Section II - Who Is An Insured** is amended to include as an insured any person or organization whom you have agreed to add as an additional insured in a written contract, written agreement or permit. Such person or organization is an additional insured but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused in whole or in part by:

a. Your acts or omissions, or the acts or omissions of those acting on your behalf, in the performance of your on going operations for the additional insured that are the subject of the written contract or written agreement provided that the "bodily injury" or "property damage" occurs, or the "personal and advertising injury" is committed, subsequent to the signing of such written contract or written agreement; or

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

b. Premises or facilities rented by you or used by you; or

c. The maintenance, operation or use by you of equipment rented or leased to you by such person or organization; or

d. Operations performed by you or on your behalf for which the state or political subdivision has issued a permit subject to the following additional provisions:

(1) This insurance does not apply to "bodily injury", "property damage", or "personal and advertising injury" arising out of the operations performed for the state or political subdivision;

(2) This insurance does not apply to "bodily injury" or "property damage" included within the "completed operations hazard".

(3) Insurance applies to premises you own, rent, or control but only with respect to the following hazards:

(a) The existence, maintenance, repair, construction, erection, or removal of advertising signs, awnings, canopies, cellar entrances, coal holes, driveways, manholes, marquees, hoist away openings, sidewalk vaults, street banners, or decorations and similar exposures; or

(b) The construction, erection, or removal of elevators; or

(c) The ownership, maintenance, or use of any elevators covered by this insurance.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and

2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

With respect to Paragraph **1.a.** above, a person's or organization's status as an additional insured under this endorsement ends when:

(1) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

(2) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

With respect to Paragraph **1.b.** above, a person's or organization's status as an additional insured under this endorsement ends when their written contract or written agreement with you for such premises or facilities ends.

With respects to Paragraph **1.c.** above, this insurance does not apply to any "occurrence" which takes place after the equipment rental or lease agreement has expired or you have returned such equipment to the lessor.

The insurance provided by this endorsement applies only if the written contract or written agreement is signed prior to the "bodily injury" or "property damage".

We have no duty to defend an additional insured under this endorsement until we receive written notice of a "suit" by the additional insured as required in Paragraph **b.** of Condition **2. Duties In the Event Of Occurrence, Offense, Claim Or Suit** under **Section IV - Commercial General Liability Conditions.**

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

2. With respect to the insurance provided by this endorsement, the following are added to Paragraph **2. Exclusions** under **Section I - Coverage A - Bodily Injury And Property Damage Liability:**

This insurance does not apply to:

a. "Bodily injury" or "property damage" arising from the sole negligence of the additional insured.

b. "Bodily injury" or "property damage" that occurs prior to you commencing operations at the location where such "bodily injury" or "property damage" occurs.

c. "Bodily injury", "property damage" or "personal and advertising injury" arising out of the rendering of, or the failure to render, any professional architectural, engineering or surveying services, including:

(1) The preparing, approving, or failing to prepare or approve, maps, shop drawings, opinions, reports, surveys, field orders, change orders or drawings and specifications; or

(2) Supervisory, inspection, architectural or engineering activities.

This exclusion applies even if the claims against any insured allege negligence or other wrongdoing in the supervision, hiring, employment, training or monitoring of others by that insured, if the "occurrence" which caused the "bodily injury" or "property damage", or the offense which caused the "personal and advertising injury", involved the rendering of, or the failure to render, any professional architectural, engineering or surveying services.

d. "Bodily injury" or "property damage" occurring after:

(1) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

(2) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

e. Any person or organization specifically designated as an additional insured for ongoing operations by a separate **ADDITIONAL INSURED -OWNERS, LESSEES OR CONTRACTORS** endorsement issued by us and made a part of this policy.

3. With respect to the insurance afforded to these additional insureds, the following is added to **Section III - Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

a. Required by the contract or agreement; or

b. Available under the applicable Limits of Insurance shown in the Declarations;

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declaratio ns.

H. PRIMARY AND NON-CONTRIBUTORY ADDITIONAL INSURED EXTENSION

This provision applies to any person or organization who qualifies as an additional insured under any form or endorsement under this policy.

Condition **4. Other Insurance of SECTION IV - COMMERCIAL GENERAL LIABILITY CONDITIONS** is amended as follows:

a. The following is added to Paragraph **a. Primary Insurance:**

If an additional insured's policy has an Other Insurance provision making its policy excess, and you have agreed in a written contract or written agreement to provide the additional insured coverage on a primary and noncontributory basis, this policy shall be primary and we will not seek contribution from the additional insured's policy for damages we cover.

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

62273969 002308 560 115 of 316

b. The following is added to Paragraph **b. Excess Insurance:**

When a written contract or written agreement, other than a premises lease, facilities rental contract or agreement, an equipment rental or lease contract or agreement, or permit issued by a state or political subdivision between you and an additional insured does not require this insurance to be primary or primary and non-contributory, this insurance is excess over any other insurance for which the additional insured is designated as a Named Insured.

Regardless of the written agreement between you and an additional insured, this insurance is excess over any other insurance whether primary, excess, contingent or on any other basis for which the additional insured has been added as an additional insured on other policies.

I. ADDITIONAL INSUREDS - EXTENDED PROTECTION OF YOUR "LIMITS OF INSURANCE"

This provision applies to any person or organization who qualifies as an additional insured under any form or endorsement under this policy.

1. The following is added to Condition **2. Duties In The Event Of Occurrence, Offense, Claim or Suit:**

An additional insured under this endorsement will as soon as practicable:

a. Give written notice of an "occurrence" or an offense that may result in a claim or "suit" under this insurance to us;

b. Tender the defense and indemnity of any claim or "suit" to all insurers whom also have insurance available to the additional insured; and

c. Agree to make available any other insurance which the additional insured has for a loss we cover under this Coverage Part.

d. We have no duty to defend or indemnify an additional insured under this endorsement until we receive written notice of a "suit" by the additional insured.

2. The limits of insurance applicable to the additional insured are those specified in a written contract or written agreement or the limits of insurance as stated in the Declarations of this policy and defined in **Section III - Limits of Insurance** of this policy, whichever are less. These limits are inclusive of and not in addition to the limits of insurance available under this policy.

J. WHO IS AN INSURED - INCIDENTAL MEDICAL ERRORS / MALPRACTICE
WHO IS AN INSURED - FELLOW EMPLOYEE EXTENSION - MANAGEMENT EMPLOYEES

Paragraph **2.a.(1)** of **Section II - Who Is An Insured** is replaced with the following:

(1) "Bodily injury" or "personal and advertising injury":

(a) To you, to your partners or members (if you are a partnership or joint venture), to your members (if you are a limited liability company), to a co-"employee" while in the course of his or her employment or performing duties related to the conduct of your business, or to your other "volunteer workers" while performing duties related to the conduct of your business;

(b) To the spouse, child, parent, brother or sister of that co-"employee" or "volunteer worker" as a consequence of Paragraph **(1) (a)** above;

(c) For which there is any obligation to share damages with or repay someone else who must pay damages because of the injury described in Paragraphs **(1) (a)** or **(b)** above; or

(d) Arising out of his or her providing or failing to provide professional health care services. However, if you are not in the business of providing professional health care services or providing professional health care personnel to others, or if coverage for providing professional health care services is not otherwise excluded by separate endorsement, this provision (Paragraph **(d)**) does not apply.

Paragraphs **(a)** and **(b)** above do not apply to "bodily injury" or "personal and advertising injury" caused by an "employee" who is acting in a supervisory capacity for you. Supervisory capacity as used herein means the "employee's" job responsibilities assigned by you, includes the direct supervision of other "employees" of yours. However, none of these "employees" are insureds for "bodily injury" or "personal and

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

advertising injury" arising out of their willful conduct, which is defined as the purposeful or willful intent to cause "bodily injury" or "personal and advertising injury", or caused in whole or in part by their intoxication by liquor or controlled substances.

The coverage provided by provision **J.** is excess over any other valid and collectable insurance available to your "employee".

K. NEWLY FORMED OR ADDITIONALLY ACQUIRED ENTITIES

Paragraph **3.** of **Section II - Who Is An Insured** is replaced by the following:

3. Any organization you newly acquire or form and over which you maintain ownership or majority interest, will qualify as a Named Insured if there is no other similar insurance available to that organization. However:

a. Coverage under this provision is afforded only until the expiration of the policy period in which the entity was acquired or formed by you;

b. Coverage **A** does not apply to "bodily injury" or "property damage" that occurred before you acquired or formed the organization; and

c. Coverage **B** does not apply to "personal and advertising injury" arising out of an offense committed before you acquired or formed the organization.

d. Records and descriptions of operations must be maintained by the first Named Insured.

No person or organization is an insured with respect to the conduct of any current or past partnership, joint venture or limited liability company that is not shown as a Named Insured in the Declarations or qualifies as an insured under this provision.

L. FAILURE TO DISCLOSE HAZARDS AND PRIOR OCCURRENCES

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **6. Representations:**

Your failure to disclose all hazards or prior "occurrences" existing as of the inception date of the policy shall not prejudice the coverage afforded by this policy provided such failure to disclose all hazards or prior "occurrences" is not intentional.

M. KNOWLEDGE OF OCCURRENCE, OFFENSE, CLAIM OR SUIT

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **2. Duties In The Event of Occurrence, Offense, Claim Or Suit:**

Knowledge of an "occurrence", offense, claim or "suit" by an agent, servant or "employee" of any insured shall not in itself constitute knowledge of the insured unless an insured listed under Paragraph **1.** of **Section II - Who Is An Insured** or a person who has been designated by them to receive reports of "occurrences", offenses, claims or "suits" shall have received such notice from the agent, servant or "employee".

N. LIBERALIZATION CLAUSE

If we revise this Commercial General Liability Extension Endorsement to provide more coverage without additional premium charge, your policy will automatically provide the coverage as of the day the revision is effective in your state.

O. BODILY INJURY REDEFINED

Under **Section V - Definitions,** Definition **3.** is replaced by the following:

3. "Bodily Injury" means physical injury, sickness or disease sustained by a person. This includes mental anguish, mental injury, shock, fright or death that results from such physical injury, sickness or disease.

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

P. EXTENDED PROPERTY DAMAGE

Exclusion a. of **COVERAGE A. BODILY INJURY AND PROPERTY DAMAGE LIABILITY** is replaced by the following:

a. Expected Or Intended Injury

"Bodily injury" or "property damage" expected or intended from the standpoint of the insured. This exclusion does not apply to "bodily injury" or "property damage" resulting from the use of reasonable force to protect persons or property.

Q. WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US - WHEN REQUIRED IN A CONTRACT OR AGREEMENT WITH YOU

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **8. Transfer Of Rights Of Recovery Against Others To Us:**

We waive any right of recovery we may have against a person or organization because of payments we make for injury or damage arising out of your ongoing operations or "your work" done under a contract with that person or organization and included in the "products-completed operations hazard" provided:

1. You and that person or organization have agreed in writing in a contract or agreement that you waive such rights against that person or organization; and

2. The injury or damage occurs subsequent to the execution of the written contract or written agreement.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

BUSINESS AUTO COVERAGE ENHANCEMENT ENDORSEMENT

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM

With respect to coverage afforded by this endorsement, the provisions of the policy apply unless modified by the endorsement.

If the policy to which this endorsement is attached also contains a Business Auto Coverage Enhancement Endorsement with a specific state named in the title, this endorsement does not apply to vehicles garaged in that specified state.

SECTION I - COVERED AUTOS is amended as follows:

1. **TRAILERS - INCREASED LOAD CAPACITY**

   The following replaces Paragraph **C.1. Certain Trailers, Mobile Equipment And Temporary Substitute Autos** of **SECTION I - COVERED AUTOS:**

   "Trailers" with a load capacity of 3,000 pounds or less designed primarily for travel on public roads.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

SECTION II - LIABILITY COVERAGE is amended as follows:

2. NEWLY FORMED OR ACQUIRED SUBSIDIARIES

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. - Who Is An Insured** is amended to include the following as an "insured":

d. Any legally incorporated subsidiary of which you own more than 50 percent interest during the policy period. Coverage is afforded only for 90 days from the date of acquisition or formation. However, "insured" does not include any organization that:

(1) Is a partnership or joint venture; or

(2) Is an "insured" under any other automobile policy except a policy written specifically to apply in excess of this policy; or

(3) Has exhausted its Limit of Insurance or had its policy terminated under any other automobile policy.

Coverage under this provision **d.** does not apply to "bodily injury" or "property damage" that occurred before you acquired or formed the organization.

3. EMPLOYEES AS INSUREDS

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. Who Is An Insured** is amended to include the following as an "insured":

e. Any "employee" of yours while using a covered "auto" you do not own, hire or borrow but only for acts within the scope of their employment by you. Insurance provided by this endorsement is excess over any other insurance available to any "employee".

f. Any "employee" of yours while operating an "auto" hired or borrowed under a written contract or agreement in that "employee's" name, with your permission, while performing duties related to the conduct of your business and within the scope of their employment. Insurance provided by this endorsement is excess over any other insurance available to the "employee".

4. ADDITIONAL INSURED BY CONTRACT, AGREEMENT OR PERMIT

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. Who Is An Insured** is amended to include the following as an "insured":

g. Any person or organization with respect to the operation, maintenance or use of a covered "auto", provided that you and such person or organization have agreed in a written contract, written agreement, or permit issued to you by governmental or public authority, to add such person, or organization, or governmental or public authority to this policy as an "insured".

However, such person or organization is an "insured":

(1) Only with respect to the operation, maintenance or use of a covered "auto";

(2) Only for "bodily injury" or "property damage" caused by an "accident" which takes place after you executed the written contract or written agreement, or the permit has been issued to you; and

(3) Only for the duration of that contract, agreement or permit.

The "insured" is required to submit a claim to any other insurer to which coverage could apply for defense and indemnity. Unless the "insured" has agreed in writing to primary noncontributory wording per enhancement number 24, this policy is excess over any other collectible insurance.

5. SUPPLEMENTARY PAYMENTS

SECTION II - LIABILITY COVERAGE, Coverage Extensions, 2.a. Supplementary Payments, Paragraphs **(2)** and **(4)** are replaced by the following:

(2) Up to $3,000 for cost of bail bonds (including bonds for related traffic violations) required because of an "accident" we cover. We do not have to furnish these bonds.

(4) All reasonable expenses incurred by the "insured" at our request, including actual loss of earnings up to $500 a day because of time off from work.

© 2017 Liberty Mutual Insurance

Includes copyrighted material of Insurance Services Office Inc., with its Permission.

6. AMENDED FELLOW EMPLOYEE EXCLUSION

In those jurisdictions where, by law, fellow "employees" are not entitled to the protection afforded to the employer by the workers compensation exclusivity rule, or similar protection, the following provision is added:

SECTION II - LIABILITY, Exclusion B.5. Fellow Employee does not apply if the "bodily injury" results from the use of a covered "auto" you own or hire if you have workers compensation insurance in force for all of your "employees" at the time of "loss".

This coverage is excess over any other collectible insurance.

SECTION III - PHYSICAL DAMAGE COVERAGE is amended as follows:

7. HIRED AUTO PHYSICAL DAMAGE

Paragraph **A.4. Coverage Extensions** of **SECTION III - PHYSICAL DAMAGE COVERAGE,** is amended by adding the following:

If hired "autos" are covered "autos" for Liability Coverage, and if Comprehensive, Specified Causes of Loss or Collision coverage are provided under the Business Auto Coverage Form for any "auto" you own, then the Physical Damage coverages provided are extended to "autos":

a. You hire, rent or borrow; or

b. Your "employee" hires or rents under a written contract or agreement in that "employee's" name, but only if the damage occurs while the vehicle is being used in the conduct of your business,

subject to the following limit and deductible:

a. The most we will pay for "loss" in any one "accident" or "loss" is the smallest of:

(1) $50,000; or

(2) The actual cash value of the damaged or stolen property as of the time of the "loss"; or

(3) The cost of repairing or replacing the damaged or stolen property with other property of like kind and quality, minus a deductible.

b. The deductible will be equal to the largest deductible applicable to any owned "auto" for that coverage.

c. Subject to the limit, deductible and excess provisions described in this provision, we will provide coverage equal to the broadest coverage applicable to any covered "auto" you own.

d. Subject to a maximum of $1,000 per "accident", we will also cover the actual loss of use of the hired "auto" if it results from an "accident", you are legally liable and the lessor incurs an actual financial loss.

e. This coverage extension does not apply to:

(1) Any "auto" that is hired, rented or borrowed with a driver; or

(2) Any "auto" that is hired, rented or borrowed from your "employee" or any member of your "employee's" household.

Coverage provided under this extension is excess over any other collectible insurance available at the time of "loss".

8. TOWING AND LABOR

SECTION III - PHYSICAL DAMAGE COVERAGE, Paragraph **A.2. Towing,** is amended by the addition of the following:

We will pay towing and labor costs incurred, up to the limits shown below, each time a covered "auto" classified and rated as a private passenger type, "light truck" or "medium truck" is disabled:

a. For private passenger type vehicles, we will pay up to $75 per disablement.

b. For "light trucks", we will pay up to $75 per disablement. "Light trucks" are trucks that have a gross vehicle weight (GVW) of 10,000 pounds or less.

c. For "medium trucks" , we will pay up to $150 per disablement. "Medium trucks" are trucks that have a gross vehicle weight (GVW) of 10,001 - 20,000 pounds.

However, the labor must be performed at the place of disablement.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

9. PHYSICAL DAMAGE - ADDITIONAL TRANSPORTATION EXPENSE COVERAGE

Paragraph **A.4.a. Coverage Extensions, Transportation Expenses** of **SECTION III - PHYSICAL DAMAGE COVERAGE,** is amended to provide a limit of $50 per day and a maximum limit of $1,500.

10. RENTAL REIMBURSEMENT

SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage, is amended by adding the following:

a. We will pay up to $75 per day for rental reimbursement expenses incurred by you for the rental of an "auto" because of "accident" or "loss", to an "auto" for which we also pay a "loss" under Comprehensive, Specified Causes of Loss or Collision Coverages. We will pay only for those expenses incurred after the first 24 hours following the "accident" or "loss" to the covered "auto."

b. Rental Reimbursement requires the rental of a comparable or lessor vehicle, which in many cases may be substantially less than $75 per day, and will only be allowed for the period of time it should take to repair or replace the vehicle with reasonable speed and similar quality, up to a maximum of 30 days.

c. We will also pay up to $500 for reasonable and necessary expenses incurred by you to remove and replace your tools and equipment from the covered "auto". This limit is excess over any other collectible insurance.

d. This coverage does not apply unless you have a business necessity that other "autos" available for your use and operation cannot fill.

e. If "loss" results from the total theft of a covered "auto" of the private passenger type, we will pay under this coverage only that amount of your rental reimbursement expenses which is not already provided under Paragraph **4. Coverage Extension.**

f. No deductible applies to this coverage.

g. The insurance provided under this extension is excess over any other collectible insurance.

If this policy also provides Rental Reimbursement Coverage you purchased, the coverage provided by this Enhancement Endorsement is in addition to the coverage you purchased.

For the purposes of this endorsement provision, materials and equipment do not include "personal effects" as defined in provision **12.B.**

11. EXTRA EXPENSE - BROADENED COVERAGE

Under **SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage,** we will pay for the expense of returning a stolen covered "auto" to you. The maximum amount we will pay is $1,000.

12. PERSONAL EFFECTS COVERAGE

A. SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage, is amended by adding the following:

If you have purchased Comprehensive Coverage on this policy for an "auto" you own and that "auto" is stolen, we will pay, without application of a deductible, up to $600 for "personal effects" stolen with the "auto."

The insurance provided under this provision is excess over any other collectible insurance.

B. SECTION V - DEFINITIONS is amended by adding the following:

For the purposes of this provision, "personal effects" mean tangible property that is worn or carried by an "insured." "Personal effects" does not include tools, equipment, jewelry, money or securities.

13. ACCIDENTAL AIRBAG DEPLOYMENT

SECTION III - PHYSICAL DAMAGE COVERAGE, B. Exclusions is amended by adding the following:

If you have purchased Comprehensive or Collision Coverage under this policy, the exclusion for "loss" relating to mechanical breakdown does not apply to the accidental discharge of an airbag.

Any insurance we provide shall be excess over any other collectible insurance or reimbursement by manufacturer's warranty. However, we agree to pay any deductible applicable to the other coverage or warranty.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

14. PHYSICAL DAMAGE DEDUCTIBLE - VEHICLE TRACKING SYSTEM

SECTION III - PHYSICAL DAMAGE COVERAGE, D. Deductible, is amended by adding the following:

Any Comprehensive Deductible shown in the Declarations will be reduced by 50% for any "loss" caused by theft if the vehicle is equipped with a vehicle tracking device such as a radio tracking device or a global position device and that device was the method of recovery of the vehicle.

15. AUDIO, VISUAL AND DATA ELECTRONIC EQUIPMENT COVERAGE

SECTION III - PHYSICAL DAMAGE COVERAGE, B. Exclusions, Paragraph **a.** of the exception to exclusions **4.c.** and **4.d.** is deleted and replaced with the following:

Exclusions **4.c.** and **4.d.** do not apply to:

a. Electronic equipment that receives or transmits audio, visual or data signals, whether or not designed solely for the reproduction of sound, if the equipment is:

(1) Permanently installed in the covered "auto" at the time of the "loss" or removable from a housing unit that is permanently installed in the covered "auto"; and

(2) Designed to be solely operated by use from the power from the "auto's" electrical system; and

(3) Physical damage coverages are provided for the covered "auto".

If the "loss" occurs solely to audio, visual or data electronic equipment or accessories used with this equipment, then our obligation to pay for, repair, return or replace damaged or stolen property will be reduced by a $100 deductible.

16. LOAN / LEASE GAP COVERAGE (Not Applicable In New York)

A. Paragraph **C. Limit Of Insurance** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by adding the following:

The most we will pay for a "total loss" to a covered "auto" owned by or leased to you in any one "accident" is the greater of the:

1. Balance due under the terms of the loan or lease to which the damaged covered "auto" is subject at the time of the "loss" less the amount of:

a. Overdue payments and financial penalties associated with those payments as of the date of the "loss";

b. Financial penalties imposed under a lease due to high mileage, excessive use or abnormal wear and tear;

c. Costs for extended warranties, Credit Life Insurance, Health, Accident or Disability Insurance purchased with the loan or lease;

d. Transfer or rollover balances from previous loans or leases;

e. Final payment due under a "Balloon Loan";

f. The dollar amount of any unrepaired damage which occurred prior to the "total loss" of a covered "auto";

g. Security deposits not refunded by a lessor;

h. All refunds payable or paid to you as a result of the early termination of a lease agreement or as a result of the early termination of any warranty or extended service agreement on a covered "auto";

i. Any amount representing taxes;

j. Loan or lease termination fees; or

2. The actual cash value of the damage or stolen property as of the time of the "loss".

An adjustment for depreciation and physical condition will be made in determining the actual cash value at the time of the "loss". This adjustment is not applicable in Texas.

B. Additional Conditions

This coverage applies only to the original loan for which the covered "auto" that incurred the "loss" serves as collateral, or lease written on the covered "auto" that incurred the "loss".

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

C. SECTION V - DEFINITIONS is changed by adding the following:

As used in this endorsement provision, the following definitions apply:

"Total loss" means a "loss" in which the cost of repairs plus the salvage value exceeds the actual cash value.

A "balloon loan" is one with periodic payments that are insufficient to repay the balance over the term of the loan, thereby requiring a large final payment.

17. GLASS REPAIR - WAIVER OF DEDUCTIBLE

Paragraph **D. Deductible** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by the addition of the following:

No deductible applies to glass damage if the glass is repaired rather than replaced.

18. PARKED AUTO COLLISION COVERAGE (WAIVER OF DEDUCTIBLE)

Paragraph **D. Deductible** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by the addition of the following:

The deductible does not apply to "loss" caused by collision to such covered "auto" of the private passenger type or light weight truck with a gross vehicle weight of 10,000 lbs. or less as defined by the manufacturer as maximum loaded weight the "auto" is designed to carry while it is:

a. In the charge of an "insured";

b. Legally parked; and

c. Unoccupied.

The "loss" must be reported to the police authorities within 24 hours of known damage.

The total amount of the damage to the covered "auto" must exceed the deductible shown in the Declarations.

This provision does not apply to any "loss" if the covered "auto" is in the charge of any person or organization engaged in the automobile business.

19. TWO OR MORE DEDUCTIBLES

Under **SECTION III - PHYSICAL DAMAGE COVERAGE,** if two or more company policies or coverage forms apply to the same "accident", the following applies to Paragraph **D. Deductible:**

a. If the applicable Business Auto deductible is the smaller (or smallest) deductible, it will be waived; or

b. If the applicable Business Auto deductible is not the smaller (or smallest) deductible , it will be reduced by the amount of the smaller (or smallest) deductible; or

c. If the "loss" involves two or more Business Auto coverage forms or policies, the smaller (or smallest) deductible will be waived.

For the purpose of this endorsement, company means any company that is part of the Liberty Mutual Group.

SECTION IV - BUSINESS AUTO CONDITIONS is amended as follows:

20. UNINTENTIONAL FAILURE TO DISCLOSE HAZARDS

SECTION IV- BUSINESS AUTO CONDITIONS, Paragraph **B.2.** is amended by adding the following:

If you unintentionally fail to disclose any hazards, exposures or material facts existing as of the inception date or renewal date of the Business Auto Coverage Form, the coverage afforded by this policy will not be prejudiced.

However, you must report the undisclosed hazard of exposure as soon as practicable after its discovery, and we have the right to collect additional premium for any such hazard or exposure.

© 2017 Liberty Mutual Insurance

Includes copyrighted material of Insurance Services Office Inc., with its Permission.

21. AMENDED DUTIES IN THE EVENT OF ACCIDENT, CLAIM, SUIT, OR LOSS

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **A.2.a.** is replaced in its entirety by the following:

a. In the event of "accident", claim, "suit" or "loss", you must promptly notify us when it is known to:

(1) You, if you are an individual;

(2) A partner, if you are a partnership;

(3) Member, if you are a limited liability company;

(4) An executive officer or the "employee" designated by the Named Insured to give such notice, if you are a corporation.

To the extent possible, notice to us should include:

(a) How, when and where the "accident" or "loss" took place;

(b) The "insureds" name and address; and

(c) The names and addresses of any injured persons and witnesses.

22. WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **A.5. Transfer Of Rights Of Recovery Against Others To Us,** is amended by the addition of the following:

If the person or organization has in a written agreement waived those rights before an "accident" or "loss", our rights are waived also.

23. HIRED AUTO COVERAGE TERRITORY

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **B.7. Policy Period, Coverage Territory,** is amended by the addition of the following:

f. For "autos" hired 30 days or less, the coverage territory is anywhere in the world, provided that the "insured's" responsibility to pay for damages is determined in a "suit", on the merits, in the United States, the territories and possessions of the United States of America, Puerto Rico or Canada or in a settlement we agree to.

This extension of coverage does not apply to an "auto" hired, leased, rented or borrowed with a driver.

24. PRIMARY AND NON-CONTRIBUTING IF REQUIRED BY WRITTEN CONTRACT OR WRITTEN AGREEMENT

The following is added to **SECTION IV - BUSINESS AUTO CONDITIONS, General Conditions, B.5. Other Insurance** and supersedes any provision to the contrary:

This Coverage Form's Covered Autos Liability Coverage is primary to and will not seek contribution from any other insurance available to an "insured" under your policy provided that:

1. Such "insured" is a Named Insured under such other insurance; and

2. You have agreed in a written contract or written agreement that this insurance would be primary and would not seek contribution from any other insurance available to such "insured".

SECTION V - DEFINITIONS is amended as follows:

25. BODILY INJURY REDEFINED

Under **SECTION V - DEFINITIONS,** Definition **C.** is replaced by the following:

"Bodily injury" means physical injury, sickness or disease sustained by a person, including mental anguish, mental injury, shock, fright or death resulting from any of these at any time.

Subject: Public Safety - Public Records Request :: P005872-031725

Dear Environmental Professional I Emily Loxley,

Thank you for your interest in public records of the City of Cleveland. Your request has been received and is being processed in accordance with the Ohio Sunshine Laws. Your request was received in this office on 3/17/2025 and has been given the reference number P005872-031725 for tracking purposes.

Records Requested: **3/17/2025 601 Lakeside Avenue, Room 227, Cleveland, Ohio 44114 Attn: Fire Chief Anthony Luke Re: Data Request for HUD Environmental Review, Hough Senior Independent Living project Hough Avenue between East 89th Street and East 90th Street Cleveland, Cuyahoga County, Ohio Dear Chief Anthony Luke: We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the Hough Senior Independent Living project located in Cleveland, Cuyahoga County, Ohio. The project involves new construction of senior living apartments. A location map is attached. Please provide the following information: 1. Are you aware of any USTs at or near the project site? 2. Are you aware of any hazardous-material responses or other environmental concerns in the project area? 3. Do you have file(s) available for the project site that can be made available for review, or can copies be provided? 4. What station will provide service to this location? 5. What is the approximate response time for fire and medical emergencies? 6. Who provides ambulance service in the [city or village or township]? 7. Is the fire department included in the building plan review process? If not, would the fire department like to review the plans for this project? Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 330-575-5847 or eloxley@partnersenv.com.**

Your request will be forwarded to the relevant city department(s) to locate the information you seek and to determine the volume and any costs associated with satisfying your request. You will be contacted about the availability and/or provided with copies of the records in question. **PLEASE NOTE:** The public records law does not require a governmental body to create new information, to do legal research, or to answer questions.

You can monitor the progress of your request at the link below and you will receive an email when your request has been completed. Again, thank you for using the Cleveland Public Records Center.

Subject: Automatic reply: Public Records of Request - Hough Senior Independent Living Property

The Cleveland Metropolitan School District ("CMSD") is in receipt of your Public Records Request and will respond within a reasonable time. A reasonable time depends on the circumstances of the request, including the scope and clarity of the request, and the time necessary to identify, review, and prepare the records responsive to the request.

Please be advised that due to the large number of recent and current requests, you may experience a delayed response. CMSD strives to be as accommodating as possible to Public Record Requests and will continue to do so.

Should you have questions regarding your request before receiving a response from CMSD, please email us at publicrecords@clevelandmetroschools.org.

Thank you.

To: Emily Loxley
Subject: Re: Public Records of Request - Hough Senior Independent Living Property

Good morning Emily,

In response to your Public Records Request, please see the responsive data provided below.

1. Which schools within the system will students attend?

CMSD is an open choice school system, therefore there are no "assigned" neighborhood schools. However, students living in that area would be closest to Daniel E. Morgan (PreK-8), Mary B. Martin (PreK-8), Mary M. Bethune (PreK-8), Wade Park (PreK-8), John Hay campus (high school), and Cleveland School of the Arts (high school).

2. Can the schools adequately absorb an influx of students that may result from the construction?

There is sufficient capacity within the schools in this area to absorb any influx of students.

3. Will these students be on bus routes or will students walk to school?

Per CMSD transportation policy, students living less than one mile from the school will walk while students living more than one mile will ride a bus or be given an RTA pass (grade-dependent).

4. Are pre-school and adult education classes available through the school system?

All primary schools listed above offer pre-school. CMSD does not offer adult education within its facilities.

5. If available, please provide literature regarding the school system.

Please visit https://www.clevelandmetroschools.org/domain/166.

This email completes CMSD's response to your Public Records Request. Please feel free to contact us at publicrecords@clevelandmetroschools.org should you have questions.

Best Regards,

TO: Emily Loxley

FROM: Marla Reichenbach
Administrative Professional 2 BUSTR

On Behalf of the Bureau of Underground Storage Tank Regulations, the Records Management Section is responding to your public records request. Thank you for your request. We have searched our data base regarding records for Underground Storage Tanks and found no release/records for the specific address/facility you requested:

1768 E 90th St, Cleveland, OH
8910 Hough Ave, Cleveland, OH
8920 Hough Ave, Cleveland, OH
8924 Hough Ave, Cleveland, OH

Please contact your local fire department in that they may have records for this address/facility. If you are requesting information for Aboveground Storage tanks, please contact the Code Enforcement Bureau at (614) 728-5460 and if you need records regarding permits and registrations, please contact Maria with the Bureau of Testing and Registration at (614) 995-0301.

Our request forms are designed to use one form per facility number or address. If you have additional addresses you need information for, please submit additional request forms.

Please do not hesitate to contact me if I can be of further assistance.

RE: PUBLIC RECORDS REQUEST of March 17, 2025, Reference #C000663-031725.

Dear Environmental Professional I Emily Loxley,

The City of Cleveland received a public record request from you on March 17, 2025. You requested the following:

"We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the Hough Senior Independent Living project located in Cleveland, Cuyahoga County, Ohio. The project involves new construction of senior living apartments. A location map is attached.

Please provide the following information:
1. Is the health department aware of any environmental concerns at the project site or in the area?
2. Is the health department aware of any air quality concerns at the project site or in the area?
3. Do you have file(s) available for the project site that can be made available for review, or can copies be provided?

Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 330-575-5847 or eloxley@partnersenv.com."

The City has reviewed its files and has located responsive records to your request. Please log in to the Cleveland Public Records Center at the following link Cleveland Public Records Center to retrieve the appropriate responsive documents.

Please note:

- Please make sure that you allow pop-ups from this site in order to view/download records.
- Records may be viewed/downloaded up to 3 times.
- You have up to 30 days to view/download records.

City - Public Records Request - C000663-031725

If responsive materials include video please note:

*Photographs of peace officers whose duties may include undercover or plain clothes positions or assignments are exempt from release under O.R.C. §149.43 (A)(7)(g) and can only be released with the prior written approval of the applicable peace officer.

*Motor vehicle/driver record information (including driver's license numbers, and the entirety of a driver's license including photos) pursuant to 18 U.S.C. 7521, et seq. (Driver's Privacy Protection Act)

If you have any questions, or wish to discuss this further, you can reply to this email, go to the Cleveland Public Records Center and Send a New Message.

Sincerely,

City of Cleveland Public Records

OHIO - EPA Map of Radon Zones

http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of Ohio" (USGS Open-file Report 93-292-E) before using this map. http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

The pin location displayed on the map is a point selected by the user. Failure of the user to ensure that the pin location displayed on this map correctly corresponds with the user supplied address/location description below may result in an invalid federal flood insurance policy. **The U.S. Fish and Wildlife Service (Service) has not validated the pin location with respect to the user supplied address/location description below. The Service recommends that all pin locations be verified by federal agencies prior to use of this map for the provision or denial of federal funding or financial assistance**. Please note that a structure bisected by the Coastal Barrier Resources System (CBRS) boundary (i.e., both "partially in" and "partially out") is within the CBRS and therefore affected by CBRA's restrictions on federal flood insurance. A pin placed on a bisected structure must be placed on the portion of the structure within the unit (including any attached features such as a deck or stairs).

User Name: Halle Miller
User Organization: Partners Environmental Consulting, Inc.
User Supplied Address/Location Description: 8900-8928 Hough Avenue, Cleveland, Ohio
Pin Location: Outside CBRS
Pin Flood Insurance Prohibition Date: N/A
Pin System Unit Establishment Date: N/A

The user placed pin location is not within the CBRS. The official CBRS maps are accessible at https://www.fws.gov/library/collections/official-coastal-barrier-resources-system-maps.

The CBRS information is derived directly from the CBRS web service provided by the Service. This map was exported on 3/27/2025 and does not reflect changes or amendments subsequent to this date. The CBRS boundaries on this map may become superseded by new boundaries over time.

This map image may be void if one or more of the following map elements do not appear: basemap imagery, CBRS unit labels, prohibition date labels, legend, scale bar, map creation date. For additional information about flood insurance and the CBRS, visit: https://www.fws.gov/node/263838.

Critical Habitat for Threatened & Endangered Species [USFWS]

Welcome to the US Fish & Wildlife Service's map of Threatened and Endangered Species with Critical Habitat designation across the United States. You are about to use an online mapper that displays designated critical habitat spatial information. It is important to understand that the designated critical habitat displayed in this mapper **DOES NOT** represent all of the critical habitat designated by the U.S Fish & Wildlife Service. Only digitized critical habitat submitted into this system is available. This means that there is additional designated critical habitat that is not displayed in this mapper. If you require critical habitat spatial data not available here, please contact the lead FWS Region for that species.

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the **Day/Night Noise Level Calculator Electronic Assessment Tool Overview (/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/)**.

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative**: Cancel the project at this location
- **Other Reasonable Alternatives**: Choose an alternate site
- **Mitigation**
  - **Contact your Field or Regional Environmental Officer (/programs/environmental-review/hud-environmental-staff-contacts/)**
  - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
  - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
  - Incorporate natural or man-made barriers. See ***The Noise Guidebook (/resource/313/hud-noise-guidebook/)***
  - Construct noise barrier. See the **Barrier Performance Module (/programs/environmental-review/bpm-calculator/)**

Tools and Guidance

% in limited English-speaking Households	2%	1%	80	5%	62
% Unemployed	13%	6%	88	6%	89
% with Less Than High School Education	20%	9%	87	11%	81
% under Age 5	4%	5%	41	5%	42
% over Age 64	19%	18%	59	18%	62
% People of Color	86%	24%	94	40%	86

Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. For each of the environmental indicators in EJScreen, there is an EJ Index and a Supplement Index. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the EJScre website.

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

SELECTED VARIABLES	PERCENTILE IN STATE	PERCENTILE IN USA
EJ INDEXES		
Particulate Matter EJ Index	93	86
Ozone EJ Index	92	95

Note: Diesel particulate matter index is from the EPA's Air Toxics Data Update, which is the Agency's ongoing, comprehensive evaluation of air toxics in the United States. This effort aims to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that the air toxics data presented here provide broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations.

APPENDIX I
PROFESSIONAL RESUMES

PARTNERS

Emily R. Loxley
Environmental Professional I, Assessment, Remediation, and Revitalization

FIELDS OF COMPETENCE

- Environmental Site Assessments
- Soil Sampling and Identification
- Low-Flow Groundwater Sampling
- AutoCAD
- Data Analysis and Interpretation
- Watershed Management

CREDENTIALS

- Bachelor of Science, Environmental Science, Bowling Green State University, Bowling Green, Ohio
- OSHA 40-Hour Hazardous Waste Operations and Emergency Response Training

EXPERIENCE SUMMARY

Ms. Emily Loxley is an environmental scientist at Partners Environmental as an Environmental Professional I. She possesses experience in water and soil data collection, project management, and maintaining strong client relationships. Ms. Loxley obtained her Bachelor of Science in Environmental Science from Bowling Green State University in 2023, with a specialization in watershed management. Highlighted studies include hydrology, fluvial geomorphology, and anthropogenic disturbances to the water cycle.

SELECTED PROJECTS

Phase I Environmental Site Assessment – Bedford, Ohio: Ms. Loxley completed a Phase I Environmental Site Assessment (ESA) for an undeveloped, wooded property surrounded by residential and commercial land. She completed this report in accordance with ASTM standards, utilizing databases, public records from government agencies, and historical records. She completed an inspection of the Subject Property and assessed non-scope items including asbestos containing materials, lead-based paint, and radon. She based the findings and conclusions of the report on all of these factors.

Draft Environmental Impact Statement – Bowling Green State University, Bowling Green, OH: Ms. Loxley served as the project manager for the environmental capstone project at Bowling Green State University. She orchestrated and oversaw the research and assembly of a draft environmental impact statement for the Office of Campus Operations. The project evaluated ten different alternatives regarding the addition of an electric vehicle DC level two charger. Ms. Loxley also acted as a liaison between the clients and team members throughout all stages of the project to promote clear and effective communication.

National Lakes Assessment – Georgia, South Carolina, and Alabama: Ms. Loxley assisted the U.S. EPA with data collection for the National Lakes Assessment across eleven sites. Her responsibilities included water and benthic sampling, quantitative water quality data collection, recording observations on the surrounding environment, and helping with boat and equipment upkeep to protect the integrity and accuracy of the collected data.

Covid-19 Monitoring through Wastewater Sampling – Prisons throughout Eastern Ohio: Ms. Loxley traveled to six prisons biweekly to collect wastewater samples to be analyzed for increasing trends in Covid-19 among prisoners. She utilized an ISCO sampler machine to create a 24-hour composite sample. Ms. Loxley was committed to collecting accurate and comprehensive samples to properly protect the prisoners.

PARTNERS

Halle A. Miller
Associate Director,
Assessment, Remediation,
and Revitalization

FIELDS OF COMPETENCE

- Environmental Site Assessments
- VAP Investigations
- Asbestos Survey & Oversight
- BUSTR Investigations
- OHFA & HUD Compliance

CREDENTIALS

- BS Engineering Management and Environmental Science, Miami University, Oxford, Ohio
- OSHA 40-Hour Hazardous Waste Operations and Emergency Response
- Ohio Asbestos Hazard Evaluation Specialist (ES36323)
- Ohio Asbestos Hazard Abatement Specialist (AS545737)
- Ohio Department of Health Lead Risk Assessor (LA9525)

PROFESSIONAL AFFILIATIONS

- Women's Leadership Initiative and Young Leaders Committees, Urban Land Institute
- Industry-At-Large Member and Annual Meeting Chair, Board of Trustees, The Ohio Academy of Science
- Miami University College of Engineering and Computing, Women's Advisory Council Mentorship Program

EXPERIENCE SUMMARY

Ms. Halle Miller has six years of experience in environmental due diligence, including Phase I and Phase II Environmental Site Assessments (ESAs), asbestos and hazardous materials surveys, lead-based paint (LBP) inspections, and property condition assessments (PCAs). She is knowledgeable in environmental remediation and compliance, as well as grant writing. Ms. Miller is well versed in Ohio Environmental Protection Agency (EPA) Voluntary Action Program (VAP) and Bureau of Underground Storage Tank Regulations (BUSTR) investigations. She works in a senior project management capacity and has developed and implemented technical training programs.

SELECTED PROJECTS

Due Diligence, 22-Site Portfolio – Columbus, Ohio: Ms. Miller managed due diligence services for a portfolio of 22 retail shopping centers, including Phase I ESAs, ADA surveys, zoning reports, ALTA surveys, and PCAs. Of the 22 sites, 14 were further investigated through Phase II ESA sampling of soil, groundwater, sub-slab soil vapor, and indoor air. Subsequently, three sites required ground penetrating radar (GPR) surveys prior to underground storage tank (UST) removal, one required quarterly groundwater monitoring, and four required further delineation of constituents in groundwater and vapor media.

Former Industrial Facilities – Cleveland, Ohio: Ms. Miller completed a VAP Phase I Property Assessment of a 65-acre property which detected 56 Identified Areas. Historical uses of the site include heavy manufacturing and machining, multiple motor car companies, an electric and battery storage facility, and steel manufacturers. A Phase II PA followed for a portion of the property, with her responsibilities including coordination and oversight of soil sampling, installation of monitoring wells, groundwater sampling, sub-slab vapor sampling, data analysis, and reporting, in accordance with VAP guidelines.

Former Dairy Property – Cleveland Heights, Ohio: Ms. Miller managed a Phase I ESA and Limited Phase II Investigation of a former dairy facility that identified multiple orphan USTs, former machine shop/truck wash, and adjacent site concerns. Additional tasks supervised by Ms. Miller included a GPR survey, pre-demolition asbestos survey, National Environmental Policy Act (NEPA) assessment, and an Analysis of Brownfield Cleanup Alternatives (ABCA) report for grant submittal.

Large-Scale Pre-Demolition Asbestos Survey – Pepper Pike, Ohio: Ms. Miller was an integral part of a pre-demolition asbestos survey of nine (9) buildings and a tunnel system totaling over 100,000 square feet. Project tasks required extensive CAD mapping, sampling, analysis, and reporting. She conducted a hazardous materials and universal waste survey concurrently with the asbestos survey and assisted with providing abatement specifications and quantities for a contractor.

Affordable Housing Development – Columbus, Ohio: Ms. Miller provided a Phase I ESA, Phase II ESA, and an Environmental Review (ER) according to the Department of Housing & Urban Development (HUD) standards for a proposed residential redevelopment site funded by the Ohio Housing Finance Agency (OHFA). She oversaw the removal of petroleum-impacted soil from remnant product lines discovered on the site. Additionally, Ms. Miller identified and investigated buried cathodic anodes near the adjacent railroad tracks and managed the consequent disposal of heavy metals contaminated soils. Her tasks also consisted of a pre-demolition asbestos survey and hazardous materials survey prior to building demolition.

Ms. Jennifer Chandler
CHN Housing Partners
2999 Payne Avenue
Cleveland, Ohio 44114

Re: *Revised* Limited Subsurface Investigation
Hough Avenue between East 89th Street and East 90th Street
Cleveland, Ohio 44106
August Mack Project Number JY1828.742

Dear Ms. Chandler:

August Mack Environmental, Inc. (August Mack) has completed subsurface investigation activities at the above-referenced subject property. During a recent Phase I Environmental Site Assessment (ESA) performed by Partners Environmental (Partners) (Partners Project No.640.16), the following recognized environmental conditions (RECs) were identified:

- **REC-1:** Various Former Commercial Operations, 8900, 8904, 8918, and 8928 Hough Avenue (subject property): A historical dry cleaner, Checker Cleaners, was listed in the city directories from 1951 through 1961 at 8900 Hough Avenue. The EDR database report and city directories listed Aaron Cohn Clothing Cleaners at 8904 Hough Avenue in 1930, as well as Unity Dry Cleaning and Tailoring later in 1974. According to Sanborn maps, this portion of the subject property was also operated as an oil and paint store in the 1950s. Additionally, another dry cleaning and laundry operation was listed in the EDR database under Benjamin Goldsmith and addressed at the former subject property address of 8918 Hough Avenue in 1935. City directories similarly listed various other cleaners from 1941 through 1961. According to city directories, a photography business, most frequently referred to as Fleming Photo Company, was located on the subject property at 8928 Hough Avenue from at least 1930 through 1955. Based on Partners' experience with these types of facilities and their past use of

hazardous chemicals, it is possible that these former dry cleaning and other select operations along Hough Avenue could have adversely impacted the subject property.

- **REC-2:** Former Retail Filling Station with three (3) Underground Storage Tanks (USTs), 8930-8940 Hough Avenue (Eastern Adjoining Property): The eastern adjoining property was identified as Gonzalez Texaco Service Station in the EDR Historic Automotive database from 1951 through 1961, and in city directories under various names from 1941 through 1961. On the Sanborn Fire Insurance maps, it is also depicted in 1951 and 1952, with notation of an associated storefront and three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners' experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the subject property.

- **REC-3:** Former Retail Filling Station, 8812 Hough Avenue (Eastern Adjoining Site): The eastern adjacent site was identified in the EDR Historic Automotive database as Ashford Union Service Station / 76 Service Station from 1951 through 1974. The Sanborn maps show its presence from 1951 through 1972, along with three (3) USTs. No other information regarding the status of these USTs was provided in any of the available sources. Based on Partners' experience with these types of facilities, it is possible that the related petroleum substances could have adversely impacted the subject property.

The purpose of this investigation is to determine if subsurface conditions on the subject property have been impacted by the environmental concerns identified in the Phase I ESA. This report was prepared at the request of Ms. Jennifer Chandler with CHN Housing Partners and may be relied on by CHN Housing Partners. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by August Mack.

SUBSURFACE INVESTIGATION

August Mack mobilized to the subject property on August 1, 2024 to perform the subsurface investigation activities. Prior to starting subsurface activities, ground penetrating radar (GPR), electromagnetic (EM) locating, and other utility locating tools were utilized to clear all boring locations.

A total of four (4) soil borings (SB-1 through SB-4) were advanced across the subject property using a Geoprobe® direct push sampling system (Geoprobe®). Information regarding boring locations is provided below and boring locations are depicted on

Figure 1. The client provided an overlay of the future building development plans; which is also presented on **Figure 1**.

- SB-1 was advanced on the east portion of the subject property, in the location of former Fleming Photo Company and adjacent to a former retail filling station with three (3) USTs;
- SB-2 was advanced on the east portion of the subject property, in the location of former Goldsmith Cleaners;
- SB-3 was advanced on the west portion of the subject property in the location of former Unity Dry Cleaning and a former oil/paint store; and,
- SB-4 was advanced on the west portion of the subject property in the location of former Checker Cleaners, and the adjacent former filling station.

Sampling Methodology

Soil borings SB-1 through SB-4 were advanced to a depth of 20 feet below grade (ft bg) using a Geoprobe® sampling system. The purpose of the borings was to field screen soils, determine geological conditions, and collect soil and groundwater samples for laboratory analysis. All soil sample intervals were inspected in the field for odors and staining and screened using a photoionization detector (PID). Field screening results and soil lithological information is provided on soil boring logs included as **Attachment A**.

One (1) soil sample interval from each boring location was selected for laboratory analysis based on field inspection observations and screening results. Soil samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of volatile organic compounds (VOCs) via United States Environmental Protection Agency (U.S. EPA) method 8260, polycyclic aromatic hydrocarbons (PAHs) via U.S. EPA method 8270 and Resource Conservation and Recovery Act (RCRA) 8 Metals via U.S. EPA method 6010B/7470-7471.

Soil borings were converted into temporary, 1-inch diameter PVC wells to aid in the collection of groundwater samples. Groundwater samples were collected from the temporary wells using a peristaltic pump attached to new, disposable sample tubing and submitted to PACE for analysis of VOCs via U.S. EPA method 8260, PAHs via U.S. EPA method 8270 and RCRA 8 Metals via U.S. EPA method 6010B/7470-7471.

August Mack field procedures are provided in **Attachment B**.

Field Observations

Inspection of collected soil samples from the borings revealed that the subsurface geology consists primarily of alternating layers of clay, sand and clayey sand. A brick was also observed at approximately 6 to 7 ft bg at SB-2, SB-3, and SB-4. Saturated conditions were encountered beginning at approximately 15 to 18 ft bg for all borings.

Field observations at SB-4 from approximately 14 to 18 ft bg reveal evidence of staining, odor, and sheen. In addition, the majority of PID measurements collected from the soil borings were below 2.6 (ppm). Notable elevated PID measurements were observed in SB-1 15 to 16 ft bg (122.8 ppm) and SB-2 4 to 8 ft bg (42.9 ppm).

Soil Analytical Results

The soil analytical results were compared to the 2025 Ohio Environmental Protection Agency (OEPA) Voluntary Action Program (VAP) Generic Direct Contact Soil Standards (GDCSS) for residential, commercial/industrial, and construction worker land use. The laboratory analysis revealed the following results:

- All VOCs were detected below their laboratory reporting limits (LRLs).
- Several PAHs were detected in all soil samples; however, all detected concentrations are below their respective standard with the exception of benzo(a)pyrene in SB-3 (1-3). Benzo(a)pyrene was above the GDCSS standards for residential land use but well below the GDCSS standards for commercial/industrial and construction workers.
- Metals including arsenic, barium, cadmium, chromium, and lead were detected in each of the soil samples. All concentrations were below their respective standards with the exception of arsenic in SB-3 (1-3). Arsenic was above the GDCSS standard for residential but well below the GDCSS standards for commercial/industrial and construction workers.

The soil analytical results are summarized in **Table 1**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

Groundwater Analytical Results

The groundwater analytical results were compared to the 2025 OEPA VAP Generic Unrestricted Potable Use Standards (UPUS). The laboratory analysis revealed the following results:

- Several VOCs were detected in the groundwater sample SB-4 (10-20); however, they were below their respective standards. All other VOCs were below LRLs.

- Several PAH compounds (Benzo(a)anthracene, Benzo(a)pyrene, 1-Methylnaphthalene, and Naphthalene) were detected above the VAP UPUS in the SB-4 (10-20) groundwater sample. All other PAHs were below either LRLs or comparison values.
- All analyzed metals were not detected above LRLs, with the exception of barium. Barium was detected above the LRL, but well below its comparative VAP UPUS standard.

It is noted that the subject property is located within an OEPA approved Urban Setting Designation (USD), known as the Cleveland City Wide. A USD recognizes that remediation of groundwater to drinking water standards is not necessary because no receptors will be drinking the groundwater in the USD area (i.e. area connected to municipal water supply).

The groundwater analytical results are summarized in **Table 2**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

SUMMARY AND CONCLUSION

August Mack has completed a Limited Subsurface Investigation for the subject property located at Hough Avenue between East 89th Street and East 90th Street, Cleveland, Ohio. A total of four (4) soil borings were advanced in the northern portion of the subject property in order to evaluate if subsurface conditions have been impacted by the RECs identified in the recent Phase I ESA completed by August Mack.

Field observations and PID measurements from soil boring SB-4 reveal evidence of impacts (odor, staining, and sheen) at the subject property. Analytical results revealed one (1) PAH (Benzo(a)pyrene) and one (1) metal (Arsenic) were detected slightly above the GDCSS standards for residential land use in soil collected from soil boring SB-3 1 to 3 ft bg. Based on the future development plans provided by the Client, SB-3 is below the building footprint. Several PAHs and metals were identified in soil across the subject property at concentrations that did not exceed comparison standards. VOCs were not detected at concentrations above LRLs in the soil samples.

Analytical results revealed benzo(a)anthracene, benzo(a)pyrene, 1-methylnaphthalene, and naphthalene were detected above their VAP UPUS standards in groundwater collected from soil boring SB-4. It is noted that these compounds were not detected at concentrations above their comparative standards in the soil sample collected at this boring location. Additionally, the subject property is located within the Cleveland

City-Wide USD and will be connected to municipal drinking water. Considering this information, the ingestion pathway is incomplete.

Concentrations of benzo(a) pyrene and arsenic were detected at SB-3 1 to 3 ft bg exceeding their GDCSS residential use standards; however, these compounds are likely generated from the surrounding urban development rather than releases from historical operations at this location. Redevelopment typically includes removal of surface soils to install a building pad. As the surface soils at SB-3 will be removed during redevelopment, and the building pad will act as a direct contact barrier, August Mack does not recommend addition assessment for this location.

We appreciate the opportunity to provide you with environmental consulting services and trust that this submittal is in accordance with your needs. Please feel free to contact us if you have any questions or comments or require additional information regarding this project or the project site.

Sincerely,

Sarah Bergund

ATTACHMENT B

Field Procedures

SOIL & GROUNDWATER SAMPLING PROCEDURES

Soil Sampling Activities

Soil borings were advanced using a Geoprobe® Direct Push Dual-Tube Sampling System (Geoprobe®) and hand augers. Soil borings were advanced to the desired depth required for the investigation. Soil samples were collected continuously from each boring location by using the dual-tube tooling, which includes a disposable acetate sample liner. The sampler was recovered with a 4-foot soil sample collected within an acetate liner inside the barrel. A new acetate liner was used for each sample collected. All reusable equipment that contacted the soil samples was decontaminated with a Liquinox® solution and rinsed with water between each sample collection.

Upon retrieving the 4-foot sections of soil, the samples were divided into 2-foot sections and inspected in the field for evidence of contamination (odors, staining, etc.). Each sample was also screened in the field by headspace analysis using a MiniRae® photoionization detector (PID). The 2-foot section that exhibited the highest potential for contamination was sampled and transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. All samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals, via U.S. EPA 8260, 8270SIM, and 6010B/7470-7471 methods.

Groundwater Sampling Activities

Temporary 1-inch groundwater sampling piezometers were installed in two of the three boring location to allow groundwater to collect for sampling purposes. Groundwater samples were collected from the temporary groundwater sampling points using a check valve and dedicated tubing. The groundwater samples were transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. Groundwater samples were submitted to PACE for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals via U.S. EPA 8260 , 8270SIM, and 6010B/7470-7471 methods.

Site Restoration Activities

Upon completion of the field sampling activities, the boreholes were abandoned by manually pouring soil cuttings and bentonite into the boring. Subject property restoration was completed by patching the surface materials to match pre-investigation conditions.

ANALYTICAL RESULTS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Sample: SB-4-2-4 **Lab ID: 50379409001** Collected: 08/01/24 09:45 Received: 08/02/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

Sample: SB-4-2-4 **Lab ID: 50379409001** Collected: 08/01/24 09:45 Received: 08/02/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

QUALIFIERS

Project: JY1828.742-Hough Senior
Pace Project No.: 50379409

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

1d	Neither matrix spike nor matrix precision data could be provided for this analytical batch due to insufficient sample volume.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.
ED	Due to the extract's physical characteristics, the analysis was performed at dilution.
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
M0	Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
M3	Matrix spike recovery was outside laboratory control limits due to matrix interferences.
N2	The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.
R1	RPD value was outside control limits.
S0	Surrogate recovery outside laboratory control limits.
pH	Post-analysis pH measurement indicates insufficient VOA sample preservation.

CHAPTER 5

Temporary Runoff Control

Temporary runoff control is important on developing sites to minimize on-site erosion and to prevent off-site sediment discharge. Temporary runoff control primarily consists of two main strategies: keeping off site water clean and managing on site sediment laden water.

Off site water that passes through an active construction site should be kept as clean as possible. This is accomplished by routing this flow through the site without opportunity to mix with untreated site runoff or by diverting clean water can be diverted around construction areas. Sediment control practices generally will be more effective, less expensive and require less maintenance by not incorporating off site water. Diversions and temporary crossings are examples of runoff controls that are designed to keep off site water clean.

Once construction begins, erosion will occur. To minimize erosion, site runoff must be managed. This starts by minimizing the amount of disturbance and maintaining existing vegetation as much as possible to reduce the volume of runoff generated and subsequent erosion. It is important that the site designer and contractor recognize these opportunities to reduce site runoff.

Sediment laden water must be routed to an appropriate sediment control device before leaving the site. Conveying runoff through stabilized temporary diversions and slope drains not only directs muddy water to treatment devices but also reduces further erosion and prevents costly re-grading associated with gully development. Effective runoff control also makes re-vegetation easier and less costly.

The practices outlined in this chapter will significantly increase the effectiveness of a sediment and erosion control plan.

5.1 Check Dams

Description

Check dams are shaped rock dams constructed in swales, grassed waterways or diversions. They reduce the velocity of concentrated flows, thereby reducing erosion within the swale or waterway. While a rock check dam may trap sediment, its trapping efficiency is extremely poor, therefore it should not be used as the primary sediment-trapping practice.

As an alternative to rock, high flow compost filter socks may be used as check dams. While the primary use of compost socks as check dams is still to reduce flow velocity and subsequent channel erosion, these will have improved sediment removal.

Condition Where Practice Applies

This practice is limited to use in small channels where it is necessary to slow the velocity of flow in order to prevent gully erosion. Applications include grassed lined conveyances that need protection from gully erosion during the vegetative establishment or temporary swales (which due to short time of service do not practically lend themselves to a non-erodible lining). See other specifications for rock lined channels, gravel riffles and practices (chapter 4) that are more appropriate for larger channels and streams.

This practice is limited to small open channels with a drainage area less than 10 acres (5 ac. for filter socks) with the objective of limiting erosion and subsequent sedimentation in downstream areas. Examples include:

1. Ditches or swales that cannot receive a non-erodible lining and still need protection to reduce erosion.
2. Use during the interim period while the grassed lining is being established.
3. Use as an aid (not a substitute) to trap sediment from construction activity.

Page updated on 3-3-14

Planning Considerations

Rock check dams and filter sock check dams are superior to straw bale dams based on their reduced maintenance and increased effectiveness and because straw bale check dams are not a specified practice in this manual.

Rock check dams and filter sock check dams shall be placed where standing water or excessive siltation will be minimized or where damage to vegetative lining will be insignificant.

Rock check dams should be considered where the ditch or swale will not be mowed until after construction is complete.

Design Criteria

See the specifications below for design guidelines. For increased sediment control of rock check dams, smaller aggregate and or filter fabric on the upstream side may be used. It should be noted that increased ponding and the subsequent increase in the height of water behind a check dam raises the potential for erosion if overtopping occurs.

Table 5.1.1 Sock materials (The Sustainable Site, 2010)

Material	5 mil HDPE	5 mil HDPE / Cotton	Multi-Filament Polypropylene (A)	Multi-Filament Polypropylene (B)
Material characteristic	**Photodegradable**	**Biodegradable**	**Photodegradable**	**Photodegradable**

Tensile Strength	**26 psi (1.83 kg/cm$^{2)}$**	**26 psi (1.83 kg/cm$^{2)}$**	**44 psi (1.83 kg/cm$^{2)}$**	**202 psi (1.83 kg/cm$^{2)}$**
% Original Strength from UV Exposure	**23% at 1000 hr**	**ND**	**100% at 1000 hr**	**100% at 1000 hr**
Functional Longevity	**9 mo. -3 year**	**6-12 months**	**1-4 years**	**2-5 years**

Maintenance

Sediment shall be removed from behind check dam once it accumulates to one-half the original height of the check dam.

Removal

Depending upon the size and type, removal of check dams may be performed by hand or mechanical means. Stone and sediment should be removed and the area graded and seeded. Sediment accumulated behind filter socks shall be removed and then these may be cut open, and the filler material dispersed or incorporated into existing soil in order to aid vegetative establishment and reduce mowing safety concerns.

Filler material shall not be spread within the flow area of the channel or where shear stresses will mobilize sediment and compost before it can be incorporated into dense vegetation. Additionally filler material shall not be spread if it will retard or reduce the existing vegetation. Mesh netting and stakes shall be removed entirely and disposed of in the proper waste or recycling facility.

Common Problems/Concerns

If the check dam materials are not entirely removed, maintenance issues or safety concerns may be created. Removal of check dams is necessary in order to allow complete vegetative establishment.

Specifications
for

Rock Check Dam

1. The check dam shall be constructed of 4-8 inch diameter stone, placed so that it completely covers the width of the channel. ODOT Type D stone is acceptable, but should be underlain with a gravel filter consisting of ODOT No. 3 or 4 or suitable filter fabric.
2. Maximum height of check dam shall not exceed 3.0 feet.
3. The midpoint of the rock check dam shall be a minimum of 6 inches lower than the sides in order to direct across the center and away from the channel sides.
4. The base of the check dam shall be entrenched approximately 6 inches.
5. Spacing of check dams shall be in a manner such that the toe of the upstream dam is at the same elevation as the top of the downstream dam.
6. A Splash Apron shall be constructed where check dams are expected to be in use for an extended period of time, a stone apron shall be constructed immediately downstream of the check dam to prevent flows from undercutting the structure. The apron should be 6 in. thick and its length two times the height of the dam.
7. Stone placement shall be performed either by hand or mechanically as long as the center of check dam is lower than the sides and extends across entire channel.
8. Side slopes shall be a minimum of 2:1.

Specifications
for

Compost Sock Check Dam

Plan View

Cross Section View

Staking

1. Compost sock netting shall use a knitted mesh fabric with 1/8-3/8 inch openings, and compost media with particle sizes 99% < 3 inches, and 60% > 3/8 inches (conforming to media described in Chapter 6 Filter Sock).
2. Compost sock check dams shall be used in areas that drain 5 acres or less.
3. Sediment shall be removed from behind the sock when it reaches ½ the height of the check dam.
4. Compost sock check dams shall be constructed with 12, 18, or 24 in diameter compost socks, and shall completely cover the width of the channel. The midpoint of the compost sock check dam shall be a minimum of 6 inches lower than the sides in order to direct flow across the center and away from the channel sides. Filter sock check dams shall be filled to a density such that they shall reach their intended height (diameter). After installation and use, they shall be considered unsuitable and in need of replacement after falling below 80% of their minimum required height (diameter).
5. Although no trenching is necessary, compost sock check dams shall be placed on a graded surface where consistent contact with the soil surface is made without bridging over gaps, rills, gullies, stones or other irregularities.
6. Place compost sock check dams so that the ends extend to the top of bank. Staking for compost sock check dams shall use 2 inch x 2 inch wooden stakes, placed 5 foot on center. Stake length shall allow them to be driven 12 inches into existing soil and allow at least 2 inches above the sock.
7. Space compost sock check dams so that the toe of the upstream dam is at the same elevation or lower elevation as the top of the downstream compost sock check dam (at the center of the channel). This will be influenced by the height of the sock and gradient of the waterway.
8. A splash apron may be needed where flows over the sock may erode the channel and undercut the compost sock check dam. Create the apron by fixing a length of Temporary Rolled Erosion Control Product (Erosion Control Matting) or Turf Reinforcement Matting starting upstream of the sock a distance equal to the sock height and extending a length two times the height of the compost sock check dam. See Chapter 7 for information regarding these materials. Materials used should be able to be left in place (e.g. biodedegradable/photodegradable TRECP) without creating problems for future mowing or maintanance of the channel.

Page updated on 3-3-14

5.2 Slope Drain

Description

A pipe or chute placed on a slope to convey surface runoff downslope without causing erosion. Slope drains provide a temporary outlet for either a diversion or terraced slope.

Condition Where Practice Applies

Slope drains are used wherever a temporary outlet is needed for a diversion, terrace or embankment. Slope drain are useful along road fills or other long fills where surface flow down the embankment would cause significant damage. This practice may be necessary where drainage cannot easily be directed to the ends of a section of fill. The maximum allowable drainage area for this practice is 5 acres.

Design Criteria

The slope drain shall be designed for non-pressure flow, and a minimum 10 year frequency event. The inlet shall be protected from scouring. In lieu of design computations, the following table may be used for sizing the drain:

Table 5.2.1 Slope Drain Sizing

Diameter (Inches)	Maximum Drainage Area (Acres)
12	0.5
18	1.5
21	2.5
24	3.5

Outlet - When the drainage area is disturbed, the slope drain shall either have inlet protection, or the drain outlet shall be directed into a sediment trapping device. A hard armored apron shall be provided below the outlet where clean water is discharged into a stabilized area or channel.

Common Problems/Concerns

Piping of soil material appears around the pipe outlet. Care should be taken to adequately compact the fill material around and beneath the pipe structure to prevent the flow of water.

Scouring of fill material occurs around the pipe entrance. A vortex may occur at the pipe entrance during high flow conditions. Armoring of the entrance or the installation of an anti-vortex device may be necessary to prevent the failure of the earth fill/dike.

Specifications
for

Slope Drain

1. The slope drain shall be constructed on a minimum slope of 3 percent.
2. All points along the top of the dike/earthfill for the storage area shall be at least one (1) foot higher than the top of the inlet pipe.
3. The pipe drain may be constructed of corrugated metal or PVC pipe. All pipe connections shall be watertight. Flexible tubing may be used, provided rigid pipe is use for the inlet, the flexible tubing is of the same diameter as the inlet, and pipe connections are made with metal strapping or watertight connecting collars. The flexible pipe shall be constructed with hold down apparatus spaced on 10 foot centers for anchoring the pipe.
4. The entrance to the pipe shall be a hooded type.
5. The soil around and/or under the pipe shall be placed in 4-inch layers and hand compacted to the top of the earth dike.
6. A riprap apron shall be installed at the pipe outlet where clean water is discharged into a stabilized area or drainageway.

5.3 Temporary Diversion

Description

A temporary diversion is a dike and/or channel constructed to:

- Direct sediment-laden runoff to a settling pond.
- Route clean runoff away from disturbed areas.
- Divert runoff to reduce the effective length of the slope.
- Direct runoff away from steep cut or fill slopes.

Conditions Where Practice Applies

This practice applies to construction areas where runoff must be redirected in order to prevent offsite sedimentation, erosion or flooding of work areas. Temporary diversions are particularly applicable to prevent flow from damaging erodible or unstable areas.

Temporary diversions are appropriate for drainage areas less then 10 acres.

Planning Considerations

It is important that diversions are properly designed, constructed, and maintained since they concentrate water flow and may increase erosion potential. Particular care must be taken in planning diversion grades. Too much slope can result in erosion in the diversion channel or at the outlet. A change of slope from a steeper grade to a flatter may cause deposition to occur, reducing carrying capacity increasing chances of overtopping and failure.

It is usually less costly to excavate a channel and form a dike or dike on the downhill side with the spoil than to build diversions by other methods. Where space is limited, it may be necessary to build the dike by hauling in diking material. Use gravel to armor the diversion dike where vehicles must cross frequently.

Build and stabilize diversions and outlets or downstream sediment facilities before initiating other land-disturbing activities.

These structures generally have a life expectancy of 18 months or less, but can be prolonged with proper maintenance.

Compare: Temporary Diversion vs. Silt Fence at the perimeter of disturbed areas

Two approaches are commonly used to intercept and treat sediment-laden runoff at the perimeter of disturbed areas: silt fence or diversions that direct runoff to settling ponds. When determining which approach is more appropriate, consider the following:

Table 5.3.1 Temporary Diversion versus Silt Fence comparison.

Temporary Diversion	Silt Fence
Flows up to 10 acres of drainage area	Sheet flow from 1/4 acre per 100 feet of fence (see silt fence specification)
Constructed on positive grade to direct runoff	Must follow the contour of the land
Durable and usually low maintenance	High maintenance
Easily constructed with earth moving equipment	Labor Intensive
Requires additional Settling facilities	Treats Runoff for Sediment
Wider Disturbed area.	Requires little space and causes less disturbance around vegetation or structures

Design Criteria

These are provided in the specifications that follow.

Operation and Maintenance

Inspect temporary diversions once a week and after every storm event. Immediately remove sediment from the flow area and repair the diversion dike as needed.

Carefully check outlets and make necessary repairs immediately.

When the area protected is permanently stabilized, remove the dike and the channel to blend with the natural ground level and stabilize all disturbed areas with vegetation or other erosion control practice.

Mow grass as needed to maintain flow in channel.

Common Problems – Suggested Solutions

Sedimentation results in channel grade decreasing or reversing, leading to overtopping – realign or deepen the channel to maintain grade.

Low point in dike where diversion crosses a natural depression results in overtopping of the dike – build up the dike.

Erosion in channel before vegetation is established results in uneven channel grade, may lead to breach of dike---repair channel and install sod or synthetic liner.

If seepage or poor drainage in channel results in poor vegetation establishment, it may be necessary to re-grade in order to create positive drainage or to install subsurface drains or stone channel bottom.

Vehicle crossings result in rutting and increased erosion – maintain the dike height, flatten the side slopes, protect the dike with gravel or hard surface at the crossing point.

Excessive velocity at the outlet results in erosion – install or repair ROCK OUTLET PROTECTION.

Excessive grade in channel results in gully erosion – repairs channel, and install an erosion resistant lining or realign to reduce the grade.

Specifications
for

Temporary Diversion

1. Drainage area should not exceed 10 acres. Larger areas require a more extensive design.
2. The channel cross section may be parabolic or trapezoidal. Disk the base of the dike before placing fill. Build the dike 10% higher than designed for settlement. The dike shall be compacted by traversing with tracked earth-moving equipment.
3. The minimum cross section of the levee or dike will be as follows: (Minimum design freeboard shall be 0.3 foot.) Where construction traffic will cross, the top width may be made wider and the side slopes flatter than specified above.

Table 5.3.2

Dike Top Width (ft.)	Height (ft.)	Side Slopes	Shape
0	1.5	4.1	Trapezoidal
4	1.5	2.1	Parabolic

4. The grade may be variable depending upon the topography, but must have a positive drainage to the outlet and be stabilized to be non-erosive.

Table 5.3.3

Temporary Diversion Stabilization Treatment			
Diversion Slope	**< 2 ac.**	**2 - 5 ac.**	**5 - 10 ac.**
0 - 3%	Seed and Straw	Seed and Straw	Seed and Straw
3 - 5%	Seed and Straw	Seed and Straw	Matting
5 - 8%	Seed and Straw	Matting	Matting
8 - 20%	Seed and Straw	Matting	Engineered
Note: Diversions with steeper slopes or greater drainage areas are beyond the scope of this standard and must be designed for stability. Seed, straw and matting used shall meet the Specifications for Temporary Seeding, Mulching and Matting.			

5. Outlet runoff onto a stabilized area, into a properly designed waterway, grade stabilization structure, or sediment trapping facility.
6. Diversions shall be seeded and mulched in accordance with the requirements in practice standards TEMPORARY SEEDING (or PERMANENT SEEDING) and MULCHING as soon as they are constructed or other suitable stabilization in order to preserve dike height and reduce maintenance.

Specifications
for

Temporary Diversion Above Steep Slopes

1. Drainage area should not exceed 5 acres. Larger areas require a more extensive design.
2. The channel cross section may be parabolic, v-shaped, or trapezoidal. Disk the base of the dike before placing fill. Build the dike 10% higher than designed for settlement. The dike shall be compacted by traversing with tracked earth-moving equipment.
3. The minimum cross section of the levee or dike will be as follows: (Minimum design freeboard shall be 0.3 foot.)

Table 5.3.2

Dike Top Width (ft.)	Height (ft.)	Side Slopes	Shape
0	1.5	4.1	Trapezoidal
4	1.5	2.1	Parabolic

4. The grade may be variable depending upon the topography, but must have a positive drainage to the outlet and be stabilized to be non-erosive.

Table 5.3.3

Temporary Diversion Stabilization Treatment			
Diversion Slope	**< 2 ac.**	**2 - 5 ac.**	**5 - 10 ac.**
0 - 3%	Seed and Straw	Seed and Straw	Seed and Straw
3 - 5%	Seed and Straw	Seed and Straw	Matting
5 - 8%	Seed and Straw	Matting	Matting
8 - 20%	Seed and Straw	Matting	Engineered
Note: Diversions with steeper slopes or greater drainage areas are beyond the scope of this standard and must be designed for stability. Seed, straw and matting used shall meet the Specifications for Temporary Seeding, Mulching and Matting.			

5. Outlet runoff onto a stabilized area, settling pond, or into a drop structure.
6. Diversions shall be seeded and mulched in accordance with the requirements in practice standards TEMPORARY SEEDING (or PERMANENT SEEDING) and MULCHING as soon as they are constructed or other suitable stabilization in order to preserve dike height and reduce maintenance.

5.4 Stream Utility Crossing

Description

Stream Utility Crossings include pipeline, power line, or road construction projects that cross creeks or rivers. Measures used to minimize damage from the construction of utilities across streams start in the planning stages of a project and continue through site restoration. They include: determining the location of the utility, timing construction, construction techniques to reduce sediment pollution, and recreating favorable riparian conditions.

Conditions Where Practice Applies

Stream Utility Crossing apply to the following:

- Pipelines including but not limited to gas pipelines, electrical transmission lines, sanitary sewers, water lines, and etc.
- Overhead electric transmission lines,
- Road and bridge construction.

For temporary access of construction traffic across stream channels, see the specification for *Temporary Stream Crossings.*

Planning Considerations

Siting Stream Crossings – The first priority for minimizing the impacts of utility construction across streams is to minimize the length of channel disturbed. This often requires the values of the stream be acknowledged and carefully weighted through a stream assessment.

Routinely, the easiest and most inexpensive location of utilities, particularly sanitary sewers, is right down the stream channel itself. Unfortunately, this method of locating utilities causes long-term negative impacts to the stream and may necessitate higher maintenance costs to protect the utility.

Minimize the length of channel disturbed by:

- Routing utility lines well away from the stream channel and adjacent riparian area. Doing this may require more earthwork through irregular terrain and more bends in the utility.
- Crossing the stream as few times as possible.
- Crossing perpendicular to the Stream, where crossings do occur. Crossings deviating up to 30 degrees from perpendicular shall be considered perpendicular.
- Concentrate crossings of multiple utilities in one location, and/or encase into one conduit. This is most feasible where utilities are serving an individual housing development.

Within stream channels, there are areas, which are more sensitive to the work required for a utility crossing. Crossings should be located along the stream channel where they will cause the least impact. Crossings should occur where the streambanks are most stable such as the crossovers between bends where the curve of the stream changes direction or along fairly straight sections of channel. Sharp bends and steep banks, especially where showing signs of instability, should be avoided. Deep pools within the channel also should be avoided. These are locations where, during high flows, natural scour is occurring, opposed to riffle areas where deposition occurs. Generally, uniform stretches of stream will be least impacted by a utility crossing.

Figure 5.4.1 Stable location for utility crossing

Design Criteria

The following provide general criteria applicable to utility installations. Additional guidance is provided in the specifications that follow.

Construction Season -Utility stream crossing construction is best done during periods of low flow; generally July, August, and September. For perennial streams or important spawning streams, the worst time for construction may be during fish spawning and migration season from March 15 through June 15 or as determined for a particular stream or fish species. This should be taken into consideration along with other construction timing constraints.

Construction Method -In critical crossing situations, the method of construction may be specified. Drilling and boring utility lines under a stream channel cause much less impact than plow-in and trenching methods. Drilling and boring reduce the likelihood of erosion, as well as disturbance of the banks and bottom substrates which typically occurs with both the plow-in and trenching methods. Drilling and boring are usually more expensive and may be unreasonable for certain situations. If a utility line cannot be bored or drilled under the watercourse, the plow-in method should be used where possible. When crossing streams with the plow, a "dry run" is usually recommended prior to attaching the cable or pipe to clear out any possible stumps, logs or other obstructions.

Stream Flow Control -Stream flow should be diverted away from areas where intensive construction will occur.

Confining the Work Area -In large streams with limited areas of disturbance such as along one bank or around a bridge piling, a cofferdam or barricade can be constructed to keep the stream from continually flowing through the disturbed areas. Types of barricades include sheet pilings, sandbags, or turbidity curtains. Sheet pilings are the most durable. Sandbags can be constructed quickly in areas with shallow flow. Turbidity curtains are a geotextile material suspended from floats which hang down to the channel bottom. Unlike sheet pilings and sandbags, turbidity curtains cannot be specified for areas with strong currents or if the work area will be pumped dry.

Sediment Control: Stock piles of material shall be surrounded by silt fence or runoff routed to a sediment pond. Stabilized working pads shall be provided for the equipment in association with the construction of the crossing. Additional sediment control devices shall be implemented (ie. silt fence, sediment traps) when the trench falls within 100 feet of the stream.

Staged Construction -A cofferdam of sheet pilings or sand bags also can be used to confine, one-half of the channel until work there is completed and stabilized, then moved to the other side to complete the crossing without ever having the stream flow through the active work area.

Temporary Rerouting -When extensive or prolonged work will be done to the channel, the stream should be routed around the work area if permitted by terrain and the size of stream. Flow may be pumped around the work area or a temporary channel may be constructed. Temporary channels must be stabilized. A geotextile completely lining the channel bottom and side slopes is suitable temporary stabilization.

Limits on Each Crossing

Crossing Width -The limits of disturbance should be as narrow as possible where utilities cross streams. This includes not only construction operations within the channel itself, but also clearing done through the vegetation growing on the streambanks. The width of clearing should be minimized through the entire riparian area. To ensure minimal width of disturbance through the riparian area, materials excavated from trench construction should be placed well back from the streambanks. The width necessary for the crossing should also be clearly specified on the plans as well as the construction and clearing limits.

Duration of Construction -The time between initial disturbance of the stream and final stabilization should be kept to a minimum. The time necessary for an individual utility stream crossing varies significantly, depending on the specific project. Individual projects should be designed to encourage minimum duration of construction activity within the stream channel. Specific time limits may be specified or the crossing construction may be made dependent on other operations. For example, it could be specified that construction could not begin on the crossing until the utility line was in place to within 10 ft. of the streambanks on each side of the stream.

Fill Placed Within the Channel -The only fill permitted in the channel should be clean aggregate, stone or rock. No soil or other fine erodible material shall be placed in the channel. This restriction includes all fill for temporary crossings, diversions, and trench backfill when placed in flowing water. If the stream flow is diverted away from construction activity the material originally excavated from the trench may be used to back fill the trench.

Streambank Stabilization and Restoration - Streambanks should be restored to their original line and grade. Restoration must not result in a narrower channel or flow restriction. Stabilization of the area shall be conducted immediately upon completion of the stream crossing.

Plan specifications should define the type of stabilization, ideally woody vegetation, as described in the Stream Stabilization section of this book. Vegetation mats or Erosion Control Matting shall stabilize areas within 50' of either streambank. Some bank areas may need to be stabilized with riprap or stone in addition to matting and woody vegetation. Trees should be planted on the entire riparian area, especially the streambanks, to the extent permitted by the type of utility crossing. See the specifications for Streambank Stabilization.

Site Work Associated with Utility Stream Crossing

Runoff Control Along the Right-of-Way – Runoff and sediment controls should be used for the access road or utility easement approaching the stream crossing to prevent sediment-laden runoff from being routed directly to the stream. At a minimum distance of 50 ft. from the stream, runoff should be diverted with water bar or swales to a sediment trapping practice.

Dewatering – Trenches and excavations associated with stream crossings frequently require dewatering. Dewatering or pumping operations must not discharge turbid water directly to the stream. See the Dewatering Measures practice contained in this book for more guidance.

Permits – The specifications contained in this practice pertain primarily to the environmental impacts of stream utility crossings. The designer must also be aware that such structures are subject to the rules and regulations of the U.S. Army Corps of Engineers for instream modifications (404 permits) and Ohio Environmental Protection Agency's State Water Quality Certification (401 permits).

Maintenance

- Maintenance is essential to make sure that all items are functioning properly. This includes making sure only the areas that need to be exposed are exposed, and all other BMP practices are in good working order.
- The designated diversions should maintain the clean water through the site until the project has been completed.
- All desilting devices shall be maintained so that proper filtering occurs to the muddy water before it reenters the stream system.
- Dewatering devices shall be maintained at all times so that proper schedules can be kept for the utility crossing.

Common Problems/Concerns

- Improper staging and construction causes sediment damage because diversions, erosion control devices and dewatering does not occur in the proper order.
- Starting project during bad weather conditions so that a timely construction can occur.
- More area is opened up than for one day's construction to be completed in the stream crossing.

Note: Show appropriate practices for temporary equipment crossings and diversion of construction runoff. See Stream Crossing

Specifications
for

Stream Utility Crossing

1. When site conditions allow, one of the following shall be used to divert stream flow or keep the flow away from construction activity.

- Drill or bore the utility lines under the stream channel.
- Construct a cofferdam or barricade of sheet pilings, sandbags or a turbidity curtain to keep flow from moving through the disturbed area. Turbidity curtains shall be a pre-assembled system and used only parallel to flow.
- Stage construction by confining first one-half of the channel until work there is completed and stabilized, then move to the other side to complete the crossing.
- Route the stream flow around the work area by bridging the trench with a rigid culvert, pumping, or constructing a temporary channel. Temporary channels shall be stabilized by rock or a geotextile completely lining the channel bottom and side slopes.

2. Crossing Width -The width of clearing shall be minimized through the riparian area. The limits of disturbance shall be as narrow as possible including not only construction operations within the channel itself but also clearing done through the vegetation growing on the streambanks.
3. Clearing shall be done by cutting NOT grubbing. The roots and stumps shall be left in place to help stabilize the banks and accelerate revegetation.
4. Material excavated from the trench shall be placed at least 20 ft. from the streambanks.
5. To the extent other constraints allow, stream shall be crossed during periods of low flow.
6. Duration of Construction -The time between initial disturbance of the stream and final stabilization shall be kept to a minimum. Construction shall not begin on the crossing until the utility line is in place to within 10 ft. of the streambank.
7. Fill Placed Within the Channel -The only fill permitted in the channel should be clean aggregate, stone or rock. No soil or other fine erodible material shall be placed in the channel. This restriction includes all fill for temporary crossings, diversions, and trench backfill when placed in flowing water. If the stream flow is diverted away from construction activity the material originally excavated from the trench may be used to backfill the trench.
8. Streambank Restorations -Streambanks shall be restored to their original line and grade and stabilized with riprap or vegetative bank stabilization.
9. Runoff Control Along the Right-of-Way -To prevent sediment-laden runoff from flowing to the stream, runoff shall be diverted with water bar or swales to a sediment trapping practice a minimum of 50 ft. from the stream.
10. Sediment laden water from pumping or dewatering or pumping shall not be discharged directly to a stream. Flow shall be routed through a settling pond, dewatering sump or a flat, well-vegetated area adequate for removing sediment before the pumped water reaches the stream.
11. Dewatering operations shall not cause significant reductions in stream temperatures. If groundwater is to be discharged in high volumes during summer months, it shall first be routed through a settling pond or overland though a flat well-vegetated area.
12. Permits -In addition to these specifications, stream crossings shall conform to the rules and regulations of the U.S. Army Corps of Engineers for in-stream modifications (404 permits) and Ohio Environmental Protection Agency's State Water Quality Certification (401 permits).

5.5 Temporary Stream Crossing

Description

A stream crossing provides construction traffic temporary access across a stream while reducing the amount of disturbance and sediment pollution. It is a temporary practice which includes restoring the crossing area after construction. Specifications for three typical kinds of stream crossings are provided: bridges, culverts and fords. Each has specific applications and each is designed to minimize stream damage by leaving banks stable and vegetated and adding only coarse stone fill to the channel.

Conditions Where Practice Applies

Where heavy equipment must be moved from one side of a stream channel to another, or where light-duty construction vehicles must cross the stream channel frequently for a short period of time. Generally, a temporary stream crossing is applicable to flowing streams with drainage areas less than 5 square miles. More exacting engineering methods should be used on larger drainage areas.

Planning Considerations

A stream and its entire riparian area should be left undisturbed to the greatest extent feasible. However where construction equipment must cross a stream channel, a temporary stream crossing is necessary. The temporary nature of stream crossings should be stressed. These structures create a channel constriction, which can cause flow backups or washouts during periods of high flow. They should be planned to be in service for the shortest practical period of time and to be removed as soon as their function is completed.

The specifications contained in this practice pertain primarily to the environmental impacts of stream crossings. From a safety and utility standpoint, the designer must also be sure that bridge spans, if used, are capable of withstanding the expected loads from heavy construction

equipment. The designer must also be aware that such structures are subject to the rules and regulations of the U.S. Army Corps of Engineers for instream modifications (404 permits). For designated Scenic Rivers, approval for public projects must be obtained from the Ohio Department of Natural Resources, Division of Natural Areas and Preserves.

Locating Crossings -Stream crossings should be constructed where they will cause the least amount of disturbance to the channel and surrounding vegetation. Good locations generally include straight sections as opposed to bends and shallow areas rather than deep pools. When practical, locate and design temporary stream crossings at permanent crossing locations to minimize stream disturbance.

Figure 5.5.1 Stable locations for stream crossings.

Selecting Type of Stream Crossing:

Bridge:

- Can usually be installed anytime during the year.
- Bridges are preferable to the other types of stream crossings because they cause the least disturbance to the stream.
- Bridges are most applicable for narrow channels and deep channels.
- Must be adequately designed by a qualified professional for the load of the equipment expected during construction.

Culvert:

- Culvert stream crossings should NOT be constructed between March 15 and June 15 because of impacts to fish spawning.
- Culvert stream crossings are most suitable for wide-stream channels and for traffic that may be too heavy for a bridge.
- Usually constructed of readily available materials which can be salvaged after use.
- Installation and removal of culvert crossings causes considerable disturbance to the stream and greatest potential for obstruction during higher flows.

Ford:

- Stream fords should NOT be constructed between March 15 and June 15 because of impacts to fish spawning.
- Fords may be used where very little construction traffic is anticipated.
- Most applicable where normal flow is shallow or intermittent.
- Fords should not be used to cross channels with streambanks greater than 4 ft. high.
- Problems with fords include: approach sections are subject to erosion; the stone fill or surface area is subject to being washout and may need periodic replacement; mud may be directly introduced into the stream by vehicles.

Design Criteria

The following provide general criteria applicable for all types of temporary stream crossings. Additional guidance applicable to individual crossing types shall be consulted in the individual specification that follows.

Flow Capacity – For all types of crossings, the structure shall be designed to pass bankfull flow or the peak flow from a 2 year frequency 24 hour duration storm, whichever is less without overtopping. Also ensure that storms that overtop the structure can safely be conveyed without erosion, property damage or increased hazard. Flow velocity at the outlet of the structure must be non-erosive for the receiving stream.

Minimized Disturbance – Clearing shall be done by cutting and NOT grubbing except in the case of stream fords where approaches may require more grading. The roots and stumps shall be left in place to help stabilize the banks and accelerate re-vegetation.

Sediment Control – Stock piles of material shall be surrounded by silt fence or runoff routed to a sediment pond. Stabilized working pads shall be provided for the equipment in association with the construction of the crossing.

Approach Road – The road approaching the stream crossing shall not route sediment-laden runoff directly to the stream. At a minimum distance of 50 ft. from the stream, runoff shall be diverted with water bar or swales to an adequate sediment-trapping practice.

Roadway and practice materials – The aggregate for the roadway shall be a minimum of 6 inches thick stone or recycled concrete meeting one of the following ODOT coarse aggregate gradations: #1, #2, #3 or #4. The aggregate will be placed on geotextile fabric meeting the requirements in material specification filter fabric ODOT Type “B”. No soil may be used as cover or construction materials for these practices.

Width of Crossing – All crossings shall have one traffic lane. The minimum width shall be 12 feet with a maximum width of 20 feet.

Crossing Alignment – The temporary waterway crossing shall be at right angles to the stream, where approach conditions dictates, the crossing may vary 15° from a line perpendicular to the center line of the stream at the intended crossing location.

Fish Migration Barriers – Stream crossings shall not cause sudden changes in stream elevation, drops or waterfalls, which could create a barrier to migrating fish.

Trench and Groundwater Dewatering – All dewatering shall be passed through a sediment removal measure (see Dewatering Measures in this book). There should be no turbid discharges to streams resulting from dewatering.

Stabilization and Removal – Stabilization of the crossing area shall be conducted immediately upon completion of the stream crossing. The specifications should define the type of stabilization, ideally woody vegetation, as described in the Stream Stabilization section of this book. Vegetation mats or Erosion Control Matting shall stabilize the crossing of the stream, within 50' of either streambank.

To minimize obstructions and barriers, all temporary bridges, culverts, and other structures must be removed as soon as the crossing is no longer needed. However, clean stone and rock similar in size to stream bed material is usually best left in the channel because removing it causes more disturbance. Stone and rock left in the channel must be formed so that it does not impede fish passage or significantly change the slope, dimension or flow pattern of the stream.

Plans and Specifications

The plans and specifications will show the location of the crossing. They also will contain the required material specifications.

Operation and Maintenance

Inspect temporary stream crossings after runoff-producing rains to check for blockage in channel, erosion of abutments, channel scour, stone displacement, or piping along culverts. Make all repairs immediately to prevent further damage to the installation.

Remove temporary stream crossings immediately when they are no longer needed. Restore the stream channel to its original cross-section, and smooth and appropriately stabilize all disturbed areas.

Common Concerns

- Inadequate flow capacities and/or lack of overflow area around structure results in washout of the culvert or the bridge abatement.
- Inadequate stabilization of overflow area results in severe erosion around the bridge or culvert.
- Debris not removed after a storm event results in clogging that may cause washout of the culvert and/or bridge.
- Stone size too small causes the Ford to wash out.
- Inadequate compaction under or around culvert pipes, results in seepage and piping, causing the culvert to wash out.

Specifications
for

Temporary Access Bridge

This specification does not define the strength of the temporary bridge. It shall be the designer's responsibility to select bridge construction materials with adequate strength for the anticipated construction traffic loads.

1. Stream Disturbance -Disturbance to the stream shall be kept to a minimum. Streambank vegetation shall be preserved to the maximum extent practical and the stream crossing shall be as narrow as practical.
2. Clearing shall be done by cutting NOT grubbing. The roots and stumps shall be left in place to help stabilize the banks and accelerate revegetation.
3. Water shall be prevented from flowing along the road directly to the stream. Diversions and swales shall direct runoff away from the access road to a sediment-control practice.
4. Bridges shall be constructed to span the entire channel. If the channel width exceeds 8 ft. as measured from the top-of-bank, then a footing, pier or bridge support may be constructed within the waterway. No more than one additional footing, pier or bridge support shall be permitted for each additional 8-ft. width of the channel. However, no footing, pier or bridge support will be permitted within the channel for waterways less than 8 ft. wide.
5. Some steep watersheds subject to flash flood events may require that the bridge be cabled ore secured to prevent downstream damage or hazard.
6. No fill other than clean stone free from soil shall be placed within the stream channel.

Specifications
for

Culvert Stream Crossing

Specifications
for

Culvert Stream Crossing

1. Stream Disturbance -Disturbance to the stream shall be kept to a minimum. Streambank vegetation shall be preserved to the maximum extent practical and the stream crossing shall be as narrow as practical.
2. Clearing shall be done by cutting NOT grubbing. The roots and stumps shall be left in place to help stabilize the banks and accelerate revegetation.
3. To minimize interference with fish spawning and migration, crossing construction should be avoided where practical from March 15 through June 15.
4. Water shall not be allowed to flow along the road directly to the stream. Diversions and swales shall direct runoff away from the access road to a sediment-control practice.
5. Placement -Culverts shall be placed on the existing streambed to avoid a drop or waterfall at the downstream end of the pipe, which would be a barrier to fish migration. Crossings shall be made in shallow areas rather than deep pools where possible.
6. Culvert Size -Culvert diameter shall be at least three times the depth of normal stream flow at the point of the stream crossing. If the crossing must be placed in deep, slow-moving pools, the culvert diameter may be reduced to twice the depth of normal stream flow. The minimum size culvert that may be used is 18 in.
7. Number of Culverts -There shall be sufficient number of culverts to completely cross the stream channel from streambank to streambank with no more than a 12-in. space between each one.
8. Fill and Surface Material -All material placed in the stream channel, around the culverts and on the surface of the crossing shall be stone, rock or aggregate. ODOT No. 1 shall be the minimum acceptable size. To prevent washouts, larger stone and rock may be used and they may be placed in gabion mattresses. NO SOIL SHALL BE USED IN THE CONSTRUCTION OF A STREAM CROSSING OR PLACED IN THE STEAM CHANNEL.
9. Removal -Aggregate stone and rock used for this structure does not need to be removed. Care should be taken so that any aggregate left does not create an impoundment or impede fish passage. All pipes, culverts, gabions or structures must be removed.
10. Stabilization -Streambanks shall be stabilized. Plantings shall include woody vegetation where practical.

Specifications
for

Temporary Stream Ford

1. Timing -No construction or removal of a temporary stream ford will be permitted on perennial streams from March 15 through June 15 to minimize interference with fish spawning and migration.
2. Stream Disturbance -Disturbance to the stream shall be kept to a minimum. Streambank vegetation shall be preserved to the maximum extent practical and the stream crossing shall be as narrow as practical. Clearing shall be done by cutting NOT grubbing where possible.
3. Surface Runoff -Water shall not be allowed to flow along the road directly to the stream. Diversions and swales shall direct runoff away from the access road to a sediment-control practice.
4. Fill and Surface Material -All material placed in the stream channel shall be stone, rock or aggregate. ODOT No. 1 shall be the minimum acceptable size. Larger stone and rock may be used. NO SOIL SHALL BE USED IN THE CONSTRUCTION OF A STREAM FORD OR PLACED IN THE STEAM CHANNEL.
5. Removal -Aggregate, stone and rock used for the stream crossing shall NOT be removed but shall be formed so it does not create an impoundment, impede fish passage, or cause erosion of streambanks.
6. Stabilization -Streambanks shall be stabilized. Plantings shall include woody vegetation where practical.

5.6 Water Bar

Description

A water bar is a diversion constructed across the slope of an access road or utility right-of-way. Water bars are used to reduce concentrated runoff on unpaved road surfaces, thus reducing water accumulation and erosion gullies from occurring. Water bars divert runoff to road side swales, vegetated areas or settling ponds.

Conditions Where Practice Applies

Water bars are used at construction site ingress/egress points, on long sloping access roads, on temporary construction roads, or at utility right-of-ways which do not have a stable surface or where runoff would otherwise collect and cause erosion.

Planning Considerations

If the contributing area is disturbed, this practice should be associated with sediment traps that will receive and treat the runoff.

The outlet of each water bar must be resistant to erosion. For small contributing areas, spreading the flow into a undisturbed vegetated area may be sufficient. For larger areas or higher velocities flow may need rock outlet protection to prevent gully erosion.

Specifications
for

Water Bar

1. The minimum water bar dimensions shall be:

   Top width of berm/dike – 2 feet minimum.

   Height/depth – 18 inches unless otherwise noted on plans.

   Side Slopes – Sufficiently flat to accommodate the expected traffic.

2. The spacing between water bars shall be as noted:

   Table 5.6.1 Water Bar Spacing

Road Grade (%)	Distance (Ft.)
1	400
2	250
5	135
10	80
15	60
20	45

3. The field location shall be adjusted as needed to provide a stabilized safe outlet.
4. The diverted runoff shall be directed onto an undisturbed vegetative area, to a settling trap or basin or trap if contributing area is stable.
5. Diversions/dikes shall be compacted by traversing with equipment during construction.
6. The water bars shall be angled slightly downslope across the centerline of the travel lane.

5.7 Dewatering Measures

Description

Dewatering measures provide a stable area for receiving and treating water pumped from excavation or work areas prior to being released off the site. These practices reduce sediment impacts to downstream water resources.

Conditions Where Practice Applies

De-watering measures are used whenever water, either surface or subsurface, prevents or hinders construction activities and has the potential of contributing sediment to streams. This practice is appropriate for any kind of pumping used in conjunction with construction activities.

Planning Considerations

Construction activities often require that water be pumped from an area to facilitate work. This water often has large amounts of suspended sediments. Rather than discharge this water directly to a stream, a means to settle or remove sediment must be provided.

A dewatering plan should be prepared utilizing ground water conditions and soils information to predict areas where de-watering will likely occur. Plans should include the length of time de-watering will occur, the method of de-watering (pumping, siphon...), the discharge point(s), methods to control sediment impacts and the contents of a written log to be kept on-site. These plans may need to be approved by local authorities prior to construction.

All dewatering discharges with suspended solids should pass through a practice to remove sediments While a vegetated filter areas may be sufficient for some situations (e.g. short duration low pumping rates) many will need additional measures, such as sediment traps,

filter bag or flocculation. All structures must have adequate outlet protection to prevent gully erosion. Please note that the Ohio Environmental Protection Agency will find turbid discharges to the stream resulting from any dewatering activity a violation of Ohio Revised Code 6111.04 independent of the methods employed. Therefore even if one method is selected, additional measures may be required to fully treat turbid water.

The particle size distribution, that is the relative proportion of sands, silts and clays, of a soil that is suspended will determine the difficulty of removing sediments. Soils with coarser particle size distributions (large proportion of sand) will be easier to settle out with filter strips and settling ponds. Finer particle size distributions (predominantly silt and clays) will be increasingly difficult and may need a series of measures.

Ground Water Lowering: Often dewatering wells are established to lower the ground water table for utility installation or construction. Generally, this water is free from suspended solids and may be discharged to waters of the state provided the water is not contaminated.

Measures should be taken to ensure the discharge from the de-watering wells does not flow over disturbed areas and suspend sediments, resulting in contaminated discharge. Waterways established to transport dewatering flow should be protected from erosion from the point of discharge all the way to waters of the state. Extending hoses to waters of the state will ensure the discharge remains free from suspended solids. This practice is recommended for discharges of short duration.

Water pumped from wells is about 55° F, which may cause thermal impacts in some situations. High pumping rates near small streams in summer will have major changes in stream metabolism, i.e., throw off spawning. Where this potential occurs, groundwater should not be discharged directly to the stream but roughed through settling ponds or other shallow holding ponds.

The Ohio Department of Natural Resources, Division of Water requires a Water Withdraw Registration for the de-watering activities in the event the facility has the capacity of pumping in excess of 100, 000 gallons per day. This registration must be submitted to ODNR within 90 days following the completion of the project. A water withdraw registration can be obtained by contacting ODNR, Division of Water at 614-265-6735. Assistance regarding proper well installation and abandonment is also available.

Design Criteria

Vegetated Filter Areas: Densely vegetated areas may offer sufficient conditions to treat short duration discharges provided that: flow is not channelized directly to a water resource and the area encourages infiltration, slow overland flow and settling. A minimum of 100 feet is required to utilize a vegetated area. Dense grass or areas with natural depressions will provide the best conditions. Critical areas like wetlands (e.g. vernal pools) or areas with sensitive vegetation that will be damaged (smothering) by sedimentation should not be used.

Sediment trap or basin: In most cases, contaminated discharge should be directed to a sediment trap where the suspended solids can settle/filter out prior to the discharge to waters of the state. Sediment traps should have sufficient storage to receive all the discharged water from pumping and detain this water a minimum of 24 hours. The sediment storage volume is directly related to the pumping capacity and the amount of turbidity. The sediment pond should be designed to optimize the amount of travel time through the impoundment.

The sediment pond should not be more than 4 feet deep with the distance between the intake and outlet maximized to the extent practical.

Pump intakes should withdraw water from the surface of the trench or work area in order not to re-suspend or continually mix water. Continually drawing water from the floor of the area will draw the muddiest water and increase the amount of sediment that must be removed.

Geotextile Filter Bags are a increasingly common way to remove sediment from dewatering discharge. Commonly discharge is pumped into a filter bag chosen for the predominant sediment size. Filter bags are manufactured products made typically from woven monofilament polypropylene textile (coarse materials, e.g. sands) or non-woven geotextile (silts/clays). They are single use products that must be replaced when they become clogged or half full of sediment.

While they may be useful, they are generally high flow products, which have limited ability to treat fine-grained sediments. Gravity drained filter bags should apply the following:

- They should place outside of a vegetated filter area and not in close proximity to the stream or water resource.
- They must sit on a relatively flat grade so that water leaving the bag does cause additional erosion. Placing the bag on a flat bed of aggregate will maximize the flow and useful surface area of the bag.
- They should be used in conjunction with a large vegetative buffer or a secondary pond or barrier

Enhanced Treatment Through Multiple Practices. The need for further reduction in turbidity will likely require more than one treatment measure. The following are devices or measures that when used in sequence with others will reduce turbidity.

Filter bags (gravity flow) are highly variable depending on the pore size and flow rate. Typically filter bags are limited to removing large particles (small sands and large silts).

Sediment traps, weir tanks, filter boxes are effective for the removal of large particles such as sand. Their effective increases as detention times increase.

Sand Media Filters effective for removal of smaller particles such as sand and large silts. These often have the ability to backflush and thus maintain effectiveness and flow rate.

Some commercially available additives are available for further decreasing turbidity. Chitosan and chitin based additives have been shown to significantly increase the effectiveness of filtration and settling. Chitosan (Poly-D-glucosamine) is a low-toxicity product extracted from Chitin (Poly-N-acetyl-D-glucosamine), a by-product of the shellfish industry. Other products such as anionic polyacrylamide (anionic PAM) are commercially available to increase settling. Often these are utilized through wet or dry dosing mechanisms or as water runs over a gel block upstream of a settling or filtration practice. Each product should be utilized within the manufacturers specifications and tailored to the soil and site conditions.

Particulate filter units utilizing cartridges or enclosed filter bags can remove smaller particles depending on the filter size. This type of measure is usually necessary to treat clays. Filters may be need to be changed daily or more frequently.

An example of an enhanced treatment might include: dewatering a trench with a trash pump to a settling tank or pit then pumping from the settling practice to a sand media filter or to a particulate filter.

Common Problems/Concerns

Complete settling of solids within the Sediment Basin does not occur prior to discharge. The length to width ratio of the pond must be increased to lengthen travel time through the structure. In addition, flocculent may be necessary to promote settlement.

Water discharged from subsurface/ground water pumping maybe significantly lower in temperature than that of the receiving stream. The water will need pre-conditioned in order to minimize the biological affects on the stream.

Specifications
for

De-Watering

1. A de-watering plan shall be developed prior to the commencement of any pumping activities.
2. The de-watering plan shall include all pumps and related equipment necessary for the dewatering activities and designate areas for placement of practices. Outlets for practices shall be protected from scour either by riprap protection, fabric liner, or other acceptable method of outlet protection.
3. Water that is not discharged into a settling/treatment basin but directly into waters of the state shall be monitored hourly. Discharged water shall be within +/- 5° F of the receiving waters.
4. Settling basins shall not be greater than four (4) feet in depth. The basin shall be constructed for sediment storage as outlined in Chapter 6, SEDIMENT BASIN OR SEDIMENT TRAP. The inlet and outlet for the basin shall be located at the furthest points of the storage. A floating outlet shall be used to ensure that settled solids do not re-suspend during the discharge process. The settling basin shall be cleaned out when the storage has been reduced by 50% of its original capacity.
5. All necessary National, State and Local permits shall be secured prior to discharging into waters of the state

APPENDIX D
AIR QUALITY

Counties Designated "Nonattainment"

for Clean Air Act's National Ambient Air Quality Standards (NAAQS) *

Legend **

- County Designated Nonattainment for 6 NAAQS Pollutants
- County Designated Nonattainment for 5 NAAQS Pollutants
- County Designated Nonattainment for 4 NAAQS Pollutants
- County Designated Nonattainment for 3 NAAQS Pollutants
- County Designated Nonattainment for 2 NAAQS Pollutants
- County Designated Nonattainment for 1 NAAQS Pollutant

* The National Ambient Air Quality Standards (NAAQS) are health standards for Carbon Monoxide, Lead (1978 and 2008), Nitrogen Dioxide, 8-hour Ozone (2008), Particulate Matter (PM-10 and PM-2.5 (1997, 2006 and 2012), and Sulfur Dioxide.(1971 and 2010)

** Included in the counts are counties designated for NAAQS and revised NAAQS pollutants. Revoked 1-hour (1979) and 8-hour Ozone (1997) are excluded. Partial counties, those with part of the county designated nonattainment and part attainment, are shown as full counties on the map.

The Coastal Barrier Resources System (CBRS) boundaries depicted on this map are representations of the controlling CBRS boundaries, which are shown on the official maps, accessible at https://www.fws.gov/library/collections/official-coastal-barrier-resources-system-maps. All CBRS related data should be used in accordance with the layer metadata found on the CBRS Mapper website.

The CBRS Buffer Zone represents the area immediately adjacent to the CBRS boundary where users are advised to contact the Service for an official determination (https://www.fws.gov/service/coastal-barrier-resources-system-property-documentation) as to whether the property or project site is located "in" or "out" of the CBRS.

CBRS Units normally extend seaward out to the 20- or 30-foot bathymetric contour (depending on the location of the unit). The true seaward

Re: 24-1924 - Hough Senior Independent Living

Project: The proposed project involves the construction of a 55-unit senior living community with associated paved areas, landscaping, and a parking area.

Location: The proposed project is located in Hough, Cuyahoga County, Ohio.

The Ohio Department of Natural Resources (ODNR) has completed a review of the above referenced project. These comments were generated by an inter-disciplinary review within the Department. These comments have been prepared under the authority of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.), the National Environmental Policy Act, the Coastal Zone Management Act, Ohio Revised Code and other applicable laws and regulations. These comments are also based on ODNR's experience as the state natural resource management agency and do not supersede or replace the regulatory authority of any local, state, or federal agency nor relieve the applicant of the obligation to comply with any local, state, or federal laws or regulations.

Natural Heritage Database: A review of the Ohio Natural Heritage Database indicates there are no records of state or federally listed plants or animals within one mile of the specified project area. Records searched date from 1980.

Please note that Ohio has not been completely surveyed and we rely on receiving information from many sources. Therefore, a lack of records for any particular area is not a statement that rare species or unique features are absent from that area.

Fish and Wildlife: The Division of Wildlife (DOW) has the following comments.

The DOW recommends that impacts to streams, wetlands and other water resources be avoided and minimized to the fullest extent possible, and that Best Management Practices be utilized to minimize erosion and sedimentation.

The entire state of Ohio is within the range of the Indiana bat (*Myotis sodalis*), a state endangered and federally endangered species, the northern long-eared bat (*Myotis septentrionalis*), a state endangered and federally endangered species, the little brown bat (*Myotis lucifugus*), a state endangered species,

and the tricolored bat (*Perimyotis subflavus*), a state endangered species. During the spring and summer (April 1 through September 30), these species of bats predominately roost in trees behind loose, exfoliating bark, in crevices and cavities, or in the leaves. However, these species are also dependent on the forest structure surrounding roost trees. If trees are present within the project area, and trees must be cut, the DOW recommends cutting only occur from October 1 through March 31, conserving trees with loose, shaggy bark and/or crevices, holes, or cavities, as well as trees with DBH ≥ 20 if possible. If trees are present within the project area, and trees must be cut during the summer months, the DOW recommends a mist net survey or acoustic survey be conducted from June 1 through August 15, prior to any cutting. Mist net and acoustic surveys should be conducted in accordance with the most recent version of the "*OHIO DIVISION OF WILDLIFE GUIDANCE FOR BAT SURVEYS AND TREE CLEARING*". If state listed bats are documented, DOW recommends cutting only occur from October 1 through March 31. However, limited summer tree cutting may be acceptable after consultation with the DOW (contact Eileen Wyza at Eileen.Wyza@dnr.ohio.gov).

The DOW also recommends that a desktop habitat assessment is conducted, followed by a field assessment if needed, to determine if a potential hibernaculum is present within the project area. Direction on how to conduct habitat assessments can be found in the current USFWS "*RANGE-WIDE INDIANA BAT & NORTHERN LONG-EARED BAT SURVEY GUIDELINES*." If a habitat assessment finds that a potential hibernaculum is present within 0.25 miles of the project area, please send this information to Eileen Wyza for project recommendations. If a potential or known hibernaculum is found, the DOW recommends a 0.25-mile tree cutting and subsurface disturbance buffer around the hibernaculum entrance, however, limited summer or winter tree cutting may be acceptable after consultation with the DOW. If no tree cutting or subsurface impacts to a hibernaculum are proposed, this project is not likely to impact these species.

The project is within the range of the lake sturgeon (*Acipenser fulvescens*), a state endangered fish and a federal species of concern, the channel darter (*Percina copelandi*), a state threatened fish, and the bigmouth shiner (*Notropis dorsalis*), a state threatened fish. The DOW recommends no in-water work in perennial streams from March 15 through June 30 to reduce impacts to indigenous aquatic species and their habitat. If no in-water work is proposed in a perennial stream, this project is not likely to impact these or other aquatic species.

The project is within the range of the smooth greensnake (*Opheodrys vernalis*), a state endangered species. This species is primarily a prairie inhabitant, but also found in marshy meadows and roadside ditches. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

The project is within the range of the spotted turtle (*Clemmys guttata*), a state threatened species. This species prefers fens, bogs and marshes, but also is known to inhabit wet prairies, meadows, pond edges, wet woods, and the shallow sluggish waters of small streams and ditches. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

The project is within the range of the Blanding's turtle (*Emydoidea blandingii*), a state threatened species. This species inhabits marshes, ponds, lakes, streams, wet meadows, and swampy forests. Although essentially aquatic, the Blanding's turtle will travel over land as it moves from one wetland to the next. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

Due to the potential of impacts to federally listed species, as well as to state listed species, we recommend that this project be coordinated with the US Fish & Wildlife Service.

Water Resources: The Division of Water Resources has the following comment.

If the subject project is in a floodplain regulated by the Federal Emergency Management Agency (FEMA), the local local floodplain administrator should be contacted concerning the possible need for any floodplain permits or approvals. The FEMA National Flood Hazard Layer (NHFL) Viewer website can be utilized to see if the project is in a FEMA regulated floodplain. If the project is not in a FEMA regulated floodplain, then no further action is required.

ODNR appreciates the opportunity to provide these comments. Please contact Mike Pettegrew (Environmental Services Administrator) at mike.pettegrew@dnr.ohio.gov if you have questions about these comments or need additional information.

Expiration: *ODNR Environmental Reviews are typically valid for 2 years from the issuance date. If the scope of work, project area, construction limits, and/or anticipated impacts to natural resources have changed significantly from the original project submittal, then a new Environmental Review request should be submitted.*

Project Name: MSG-OHFA-Hough Senior Independent Living-24-0055

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Attachment(s):

- Official Species List

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Ohio Ecological Services Field Office

PROJECT SUMMARY

Project Code: 2025-0026540
Project Name: MSG-OHFA-Hough Senior Independent Living-24-0055
Project Type: Residential Construction
Project Description: Development of a 55-unit, new construction senior housing development. Site plan also includes associated parking and landscaped areas.
Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@41.50955645,-81.62430056113064,14z

Counties: Cuyahoga County, Ohio

ENDANGERED SPECIES ACT SPECIES

There is a total of 3 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

MAMMALS

NAME	STATUS
Indiana Bat *Myotis sodalis* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/5949	Endangered

BIRDS

NAME	STATUS
Rufa Red Knot *Calidris canutus rufa* There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/1864	Threatened

INSECTS

NAME	STATUS
Monarch Butterfly *Danaus plexippus* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/9743	Candidate

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the EJScreen website.

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

EJ INDEXES FOR THE SELECTED LOCATION

SUPPLEMENTAL INDEXES

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low-income, percent linguistically isolated, percent less than high school education, percent unemployed, and low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION

These percentiles provide perspective on how the selected block group or buffer area compares to the entire state or nation.

*Diesel particulate matter, air toxics cancer risk, and air toxics respiratory hazard index are from the EPA's Air Toxics Data Update, which is the Agency's ongoing, comprehensive evaluation of air toxics in the United States. This effort aims to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that the air toxics data presented here provide broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. Cancer risks and hazard indices from the Air Toxics Data Update are reported to one significant figure and any additional significant figures here are due to rounding. More information on the Air Toxics Data Update can be found at: https://www.epa.gov/haps/air-toxics-data-update.

Cleveland Clinic

TAP, GREEN, GO SLOW

Did you know Cleveland Clinic utilizes no-swipe card reading technology at our parking facilities?

These are the same tap-n-go devices used throughout our hospitals for door access. The newer devices read your employee access badge with a simple tap.

How does it work?

Just TAP and hold your Cleveland Clinic ID badge to the reader.

The reader will beep twice and a GREEN light will appear when you're good to go.

Just remember to PROCEED SLOWLY as you pull into/ out of the garage or parking lot.

What's the benefit?

The touchless readers use faster, radio-frequency identification (RFID) technology and reduce wear and tear to the magnetic strip on your badge.

What if the new reader doesn't accept my card?

Press the parking lane intercom and report the issue to the operator. You can later send your badge RFID number and employee ID to **PARKING@ccf.org** to register. The RFID number consists of the seven digits, after the 6*, on the back of our badge on the bottom.

Can I still swipe?

The magnetic strip readers will be removed from parking lanes in February 2021. Please use the touchless technology to ensure your badge functions properly and you are familiar with the system.

You may also continue to purchase (one-time $15 payroll deduction) a hands-free windshield tag for locations equipped with overhead readers. Visit Parking Services in JJNb-230 or AC2 to purchase.

Questions?

Parking Services

Use of Compact Car Spaces

Compact car spaces are identified by wall signs and on the flooring surface.

Use of a compact car space requires that your vehicle – ***bumper to bumper*** – fits completely within the painted box.

If any portion of your vehicle is outside the painted box, including bumpers, it is improperly parked and is subject to enforcement. This may include immobilization devices (boot) and towing with associated fees.

Why this is important? Improperly-parked vehicles create a traffic hazard for drivers and pedestrians, restricting clear paths and forcing vehicles left of center.

In 2018, enforcement of compact car parking reduced accidents by an average of 75% in the E 89th and E 105th Street Garages.

Oversized Vehicle Information

Oversized Vehicle Parking

Located on MM (89th) 4th floor, WW (105th) 4th floor and JJN (93rd) 2nd floor, oversize vehicle areas are defined by diagonally striped spaces. Oversize spaces are designed to accommodate vehicles that often exceed the boundaries of a standard space. When the deiginated area is full, oversize vehicles are not to park on ramps. Vehicles not fully inside the designated ramp space create obstacles/hazards for drivers and caregivers walking and are subject to enforcement.

NOTE Vehicles that ***do not qualify*** as oversized vehicles include

- All Cars and Sedans
- All Minivans
- All Compact Utility Vehicles
- All Crossover Utility Vehicles

Oversize vehicles **MAY** include (**but are not limited to)**

Buick	Enclave
Ford	Expedition, Explorer, E-series vans, F-series trucks, Explorer, Flex
Chevy	Suburban, Tahoe, Silverado series trucks, Traverse, Acadia
Dodge	Durango, Ram
GMC	Yukon Series, Sierra Truck Series,
Honda	Ridgeline truck, Pilot
Mazda	CX-9
Nissan	Pathfinder, Titan truck
Subaru	Ascent
Toyota	Tundra, Highlander, Land Cruiser
Volkswagon	Atlas

(See Reverse for Compact Car Listing)

Acceptable Separation Distance (ASD) Electronic Assessment Tool

The Environmental Planning Division (EPD) has developed an electronic-based assessment tool that calculates the Acceptable Separation Distance (ASD) from stationary hazards. The ASD is the distance from above ground stationary containerized hazards of an explosive or fire prone nature, to where a HUD assisted project can be located. The ASD is consistent with the Department's standards of blast overpressure (0.5 psi-buildings) and thermal radiation (450 BTU/ft^2 - hr - people and 10,000 BTU/ft^2 - hr - buildings). Calculation of the ASD is the first step to assess site suitability for proposed HUD-assisted projects near stationary hazards. Additional guidance on ASDs is available in the Department's guidebook "Siting of HUD- Assisted Projects Near Hazardous Facilities" and the regulation 24 CFR Part 51, Subpart C, Sitting of HUD-Assisted Projects Near Hazardous Operations Handling Conventional Fuels or Chemicals of an Explosive or Flammable Nature.

Note: Tool tips, containing field specific information, have been added in this tool and may be accessed by hovering over the ASD result fields with the mouse.

ANNUAL ELECTRIC MOTOR DRIVEN FIRE PUMP TEST

PROPERTY OF: Kingsbury Towers 8925 Hough Cleveland, OH 44106
DATE: September 3, 2014 **WATER SUPPLY FROM:** City **STATIC PRESSURE:** 50PSI

FIRE PUMP SITE TEST DATA:

R.P.M.	VOLTS	AMPS	DISC P.S.I.	SUCT P.S.I.	HOSE NO.	STREAMS SIZE	PITOT P.S.I.	GPM	NET P.S.I.
3573	215,214,213	55,53,52	140	75	O	1 ¾"	0	0	65
3551	214,213,211	75,73,73	137	75	1	1 ¾"	18	376	62
3540	214,212,212	86,84,83	125	70	1	1 ¾"	32	502	55
3529	213,212,212	99,96,96	100	65	2	1 ¾"	18,18	752	35

F.P./J.P. GENERAL DATA:
F.P. STARTS: **3 automatics & 3 manuals.**
F.P. SET PTS: **80 psi start.** (by test gauge)
F.P. STOP: **Manual.**
J.P. SET PTS: **100 psi start & 140 psi stop.**
GAUGES: F.P. – **Yes**
J.P. – **None found**
F.P. AUTOMATIC AIR RELEASE VALVE: **Yes**
PUMP CASING RELIEF VALVE:
F.P./SIZE: ¾"
J.P./SIZE: **None found**
F.P. ALARMS: **Power Loss, Pump running**

PUMP ROOM DATA:
SENSING LINES PER NFPA #20: **One common line**
SYSTEM GAUGE(S): **Yes**
MAIN RELIEF VALVE: **None found**
MODEL/SIZE/RATED: **NA**
APPROVALS/SET P.T. PSI: **NA**
OPEN/ENCLOSED WASTE CONE-SIZE: **NA**
F.M. PRESSURE RECORDER: **None found**
FLOW METER: **None found**
PUMP ROOM: **Heater, lighting, & lockable.**
PUMP RM. PIPING NOTES: **6" supply, 6" discharge**

REMARKS:

1. Has one sensing line, should be separated from jockey and fire pump.
2. Needs five locks installed on control valves.
3. Needs power light bulb for controller.
4. Low suction controller bypassed.

EQUIPMENT NAMEPLATE DATA:

FIRE PUMP DATA:
MANUFACTURER: **Peerless Pump**
MODEL NO: **4ABF-10**
SERIAL NO: **462686**
DESIGN TYPE: **Horizontal split case**
APPROVALS: **None found**
RATED: **500 GPM @ 75 PSI@3450 RPM**
CHURN: **N/A**
150% POINT: **64.4 PSI**
IMPELLER DIAMETER: **7.25"**

ELECTRIC MOTOR DATA:
MANUFACTURER: **Westing House**
MODEL NO: **TUUP**
SERIAL NO: **7412**
RATED HP @ RPM: **30 HP @ 3540 RPM.**
AMPS @ VOLTS: **84.2 AMPS @ 200 VOLTS.**
PHASE & HERTZ: **3 phase & 60 hertz.**
ENCLOSURE: **Drip proof.**
SERVICE FACTOR: **1.15**
FRAME: **289TS**

Monitoring Company _____

ANNUAL ❑ SEMI-ANNUAL ❑ QUARTERLY ❑ MONTHLY ❑

Section 1: Inspections Riser # _____

A. Sprinkler System Control Valves and Isolation Valves on Backflows

1. In correct position	Open ❑	Close ❑	
2. Sealed, Locked or Tamper Switch	Sealed ❑	Locked ❑	Tamper ❑
3. Are the valves accessible	Yes ❑	No ❑	
4. Is the backflow preventer located in a pit	Yes ❑	No ❑	N/A ❑
5. Control valves location _____			

B. Sprinkler System Alarm Valves

1. Name, Model, and Year of Manufacture _____			
2. Are sprinkler gauges due for replacement or calibration	Yes ❑	No ❑	
3. Are the trim valves in the correct position	Yes ❑	No ❑	N/A ❑
4. Was 5-year maintenance performed	Yes ❑	No ❑	
5. Does the sprinkler system have a flow switch	Yes ❑	No ❑	N/A ❑
6. Does the system have	WMAG ❑	Electric Bell ❑	Horn/Strobe ❑

C. System Requirements

1. Is there the correct amount of spare sprinkler heads	Yes ❑	No ❑	N/A ❑
2. Is there a spare wrench for each type of sprinkler head	Yes ❑	No ❑	N/A ❑
3. Is there a hydraulic placard	Yes ❑	No ❑	N/A ❑
4. Is there proper signage on the sprinkler riser	Yes ❑	No ❑	N/A ❑
5. Any sprinkler piping damaged or leaking	Yes ❑	No ❑	

D. Fire Department Siamese Connection

1. What is the location of the siamese _____			
2. Do the couplings and swivels operate correctly	Yes ❑	No ❑	N/A ❑
3. Are the caps and plugs in place	Yes ❑	No ❑	N/A ❑
4. Are the gaskets in good condition	Yes ❑	No ❑	N/A ❑
5. Is there identification	Yes ❑	No ❑	N/A ❑
6. Is the automatic ball drip in place	Yes ❑	No ❑	N/A ❑

Section 2: Testing

07973

A. Sprinkler System Control Valves

1. Did the tamper switch operate — Yes ❑ No ❑ N/A ❑
2. Did the signal come in as Alarm or Trouble — Alarm ❑ Trouble ❑
3. If chain locked open, is it a city lock — Yes ❑ No ❑ N/A ❑

B. Main Drain Test — Static Residual

1. Was the water flow observed — Yes ❑ No ❑
2. Are the results comparable to last year's test — Yes ❑ No ❑ N/A ❑
3. Is the drain piped Outside or to Inside — Outside ❑ Slop Sink ❑ Floor Drain ❑

C. System Alarms

1. Did the alarm switch operate — Yes ❑ No ❑ N/A ❑
2. How long before alarm at panel Time _____
3. Was the waterflow switch tested through I.T.C. — Yes ❑ No ❑ N/A ❑
4. Did the outside alarm device operate — Yes ❑ No ❑ N/A ❑
5. Are audibles working throughout building — Yes ❑ No ❑ N/A ❑
6. Was the alarm valve by-pass trim tested — Yes ❑ No ❑ N/A ❑

D. Sprinklers

1. Fast response sprinklers in service less than 20 years — Yes ❑ No ❑ N/A ❑
   (Dry type sprinkler heads in service less than 10 years)
2. Standard sprinklers less than 50 years old — Yes ❑ No ❑ N/A ❑
   (If no, has a sample been tested every 10 years) — Yes ❑ No ❑ N/A ❑
3. Are any sprinkler heads painted, corroded or damaged — Yes ❑ No ❑ N/A ❑
4. Is there an anti-freeze loop — Yes ❑ No ❑ N/A ❑
5. What is the specific gravity _____
6. Are there any missing or damaged escutcheon plates — Yes ❑ No ❑ N/A ❑
7. Was the siamese connection tested — Yes ❑ No ❑ N/A ❑
   Pressure _____ Time _____
8. Did the system pass — Yes ❑ No ❑

2. Fire Alarm System Installation, Service, and Testing Information

Installation contractor for this equipment: Paladin Protective Systems

Address: 7680 Hub Parkway Valley View, Ohio 44125

Phone: 216-441-6500 Fax: E-mail:

Service organization for this equipment: Paladin Protective Systems

Address: 7680 Hub Parkway Valley View, Ohio 44125

Phone: 216-441-6500 Fax: E-mail:

Location of as-built drawings: with owner Location of Historical Test Reports: with owner

Location of system operation and maintenance manuals: with owner

A contract for test and inspection in accordance with NFPA standards is in effect as of

Contracted testing company:

Address:

Phone: Fax: E-mail:

Contract expires: Contract number: Frequency of routine inspections:

3. Type of Fire Alarm System or Service

NFPA 72®, Chapter Reference of System Type:

Name of organization receiving alarm signals with phone numbers *(if applicable)*:

Alarm: TYCO Phone: 1-800-289-2647

Supervisory: TYCO Phone: 1-800-289-2647

Trouble: TYCO Phone: 1-800-289-2647

Entity to which alarms are retransmitted: Phone:

Method of retransmission of alarms to that organization or location: Phone Lines

If Chapter 8, note the means of transmission from the protected premises to the central station:

☒ Digital alarm communicator ☐ McCulloh ☐ Multiplex ☐ 2-way radio ☐ 1-way radio ☐ N/A

If Chapter 9, note the type of connection: ☐ Local energy ☐ Shunt ☐ N/A

3.1 System Software

Operating system (executive) software revision level: 20.0

Site-specific software revision date: Revision completed by:

4. Signaling Line Circuits

Characteristics of signaling line circuits connected to this system (see NFPA 72®, Table 6.6.1):

Quantity: Style: Y Class: B

5. Alarm-Initiating Devices and Circuits

Characteristics of initiating device circuits connected to this system (see NFPA 72®, Table 6.5):

Quantity: 1 Style: Y Class: B

5.1 Manual Initiating Devices

5.1.1 Manual Pull Stations Number of manual pull stations: 24

Type of devices: ☒ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☐ N/A

5.2 Automatic Initiating Devices

5.2.1 Area Smoke Detectors Number of smoke detectors: 68

Type of coverage: ☒ Complete area ☐ Partial area ☐ Nonrequired partial area ☐ N/A

Type of devices: ☒ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☐ N/A

Type of smoke detector sensing technology: ☒ Ionization ☒ Photoelectric

5.2.2 Duct Smoke Detectors Number of duct smoke detectors: 1

Type of coverage:

Type of devices: ☒ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☐ N/A

Type of smoke detector sensing technology: ☐ Ionization ☒ Photoelectric

5.2.3 Heat Detectors Number of heat detectors: 3

Type of coverage: ☐ Complete area ☐ Partial area ☐ Nonrequired partial area ☐ N/A

Type of devices: ☐ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☐ N/A

5.2.4 Sprinkler Waterflow Detectors Number of waterflow detectors: 11

Type of devices: ☒ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☐ N/A

5.2.5 Alarm Verification Number of devices subject to alarm verification: 0

Alarm verification on this system is: ☒ Enabled ☐ Disabled ☐ Set for 30 seconds

6. Supervisory Signal-Initiating Devices and Circuits

6.1 Sprinkler System Number of valve supervisory switches: 15

Type of devices: ☒ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☐ N/A

6.2 Fire Pump

Type of fire pump: ☒ Electric ☐ Diesel

Type of fire pump supervisory devices: ☒ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☒ N/A

Fire Pump Functions Supervised

☒ Fire pump power ☒ Fire pump running ☐ Fire pump phase reversal ☐ Selector switch not in auto

☐ Engine or control panel trouble ☐ Low fuel

Other:

6.3 Engine-Driven Generator

Type of generator supervisory devices: ☐ Addressable ☐ Conventional ☐ Coded ☐ Transmitter ☒ N/A

☐ Engine or control panel trouble ☐ Generator running ☐ Selector switch not in auto ☐ Low fuel

Other:

7. Annunciators

7.1 Annunciator 1 ☒ Local ☐ Remote

Type: ☐ Addressable ☐ Directory ☒ Graphic ☐ N/A Location: At FACP

7.2 Annunciator 2 ☐ Local ☐ Remote

Type: ☐ Addressable ☐ Directory ☐ Graphic ☒ N/A Location:

7.3 Annunciator 3 ☐ Local ☐ Remote

Type: ☐ Addressable ☐ Directory ☐ Graphic ☒ N/A Location:

8. Alarm Notification Devices and Circuits

8.1 Emergency Voice Alarm Service

Number of single voice alarm channels: 1 Number of multiple voice alarm channels:

Number of speakers: 290 Number of speaker zones: 2

8.2 Telephone Jacks

Number of telephone jacks installed: 29 Number of telephone handsets stored on site: 6

Type of telephone system installed: ☐ Electrically powered ☐ Sound powered ☐ N/A

8.3 Nonvoice Audible System

Characteristics of notification device circuits connected to this system (see NFPA 72®, Table 6.5):

Quantity: 19 Style: Y Class: B

8.4 Types and Quantities of Nonvoice Notification Appliances Installed

Bells: With visual device: Horns: With visual device:

Chimes: With visual device: Bells: With visual device:

Visual devices without audible devices: 15 Other (describe): Speaker/Strobe: 65

9. Emergency Control Functions Activated

☐ Hold-open door releasing devices ☐ Smoke management or smoke control

☐ Door unlocking ☒ Elevator recall ☐ Other

10. System Power Supply

10.1 Primary Power

Nominal voltage: 120v Amps: 15

Overcurrent protection: Type: Circuit Breaker Amps: 20

Location (of primary supply panelboard):

Disconnecting means location:

10.2 Secondary Power

Location: Under FACP Type: Battery Nominal voltage: 24v Current rating:

Number of standby batteries: 4 Amp hour rating: (2)55

Location of emergency generator: Mech Room – 1st Floor

Location of fuel storage:

Calculated capacity of secondary power to drive the system

In standby mode: 24 Hours In alarm mode: 5 min

11. Record of System Installation

Fill out after all installation is complete and wiring has been checked for opens, shorts, ground faults, and improper branching, but before conducting operational acceptance tests.

The system has been installed in accordance with the following NFPA standards: (Note any or all that apply.)

☒ *NFPA 72®* ☒ *NFPA 70®*, Article 760

☒ Manufacturer's published instructions ☐ Other (please specify):

System deviations from referenced NFPA standards:

Signed: Printed name: Aaron Slezak Date: 9-25-14

Organization: Paladin Title: Technician Phone: 216-441-6500

12. Record of System Operation

All operational features and functions of this system were tested by or in the presence of the signer shown below, on the date shown below, and were found to be operating properly in accordance with the requirements of:

☒ *NFPA 72®* ☒ *NFPA 70®*, Article 760

☒ Manufacturer's published instructions ☐ Other (please specify):

☐ Documentation in accordance with Inspection and Testing Form (Figure 10.6.2.3 of *NFPA 72®*) is attached

Signed: Printed name: Aaron Slezak Date: 9-25-14

Organization: Paladin Title: Technician Phone: 216-441-6500

13. Certifications and Approvals

13.1 System Installation Contractor

This system as specified herein has been installed and tested according to all NFPA standards cited herein.

Signed: Printed name: Aaron Slezak Date: 9-25-14

Organization: Paladin Title: Technician Phone: 216-441-6500

13.2 System Service Contractor

This system as specified herein has been installed and tested according to all NFPA standards cited herein.

Signed: Printed name: Aaron Slezak Date: 9-25-14

Organization: Paladin Title: Technician Phone: 216-441-6500

13.3 Central Station

This system as specified herein will be monitored according to all NFPA standards cited herein.

Signed: Printed name: Date:

Organization: TYCO Title: Phone:

13.4 Property Representative

I accept this system as having been installed and tested to its specifications and all NFPA standards cited herein.

Signed: Printed name: Linda McGowan Date: 9-25-14

Organization: Millennia Housing Mgmt Title: Regional Manager Phone: 216-936-0442

13.5 Authority Having Jurisdiction

I have witnessed a satisfactory acceptance test of this system and find it to be installed and operating properly in accordance with its approved plans and specifications, its approved sequence of operations, and with all NFPA standards cited herein.

Signed: Printed name: James Ruffner Date: 25 Sept. 2014

REMARKS Building Permit # 12048434			

The acceptance of the permit herein applied for shall constitute an agreement on (my) (our) part to abide by all the conditions herein contained, and to comply with all Ordinances of the City of Cleveland, the laws of the State of Ohio, and all the rules and regulations of the State Fire Marshal, the Chief of the Division of Fire and the Board of Building Standards and Building Appeals, relating to the installation of Fire Protection, Detection or Fire System.

APPLICANT NAME	SIGNATURE OF APPLICANT	DATE
Donald L. Piazza	X	01-10-14

1. I have examined the specifications and drawings for the proposed installations and find that said installation meets with the requirements of the Division ant the Ohio Basic Building Code.

APPROVED BY	PER
X Pat Kelly Chief, Division of Fire	X Fire Prevention Bureau

2. I have examined the specifications and drawings for the proposed installations and find that said installation meets with the requirements of the Ohio Basic Building Code.

BUILDING PERMIT NO.	STATE CERTIFIED PLANS EXAMINER SIGNATURE
B- 12048434	X

Complete Application Instructions:

1. You must submit 3 sets of drawings stamped by an architect and/or certified engineer along with the completed application including Building Permit Number. The application must be filled out by a certified contractor, one licensed by the State of Ohio.
2. The drawings will then be examined by the Chief Plans Examiner. Once he/she counts the number of devices/ heads/ gallons of product, etc. he/she will then determine the fee. (See the fee schedule)
3. Once reviewing the drawings he will note any changes needed to be made. **Do not start any job without the inspector's approval.**
4. Once the drawings have been approved you will then need to submit a check or money order for the full amount of the fee to:
   City of Cleveland
   Fire Prevention Bureau
   1645 Superior Ave., E
   Cleveland, Ohio 44114
5. When the drawings have been approved you will need to send someone to our office to pick up the original permit and your stamped approved drawings.
6. After you receive the permit, call 216.664.6664 to schedule an inspection. Once the inspector comes and approves the job, the permitting process is complete.

Building Permit # 12048434			

The acceptance of the permit herein applied for shall constitute an agreement on (my) (our) part to abide by all the conditions herein contained, and to comply with all Ordinances of the City of Cleveland, the laws of the State of Ohio, and all the rules and regulations of the State Fire Marshal, the Chief of the Division of Fire and the Board of Building Standards and Building Appeals, relating to the installation of Fire Protection, Detection or Fire System.

APPLICANT NAME	SIGNATURE OF APPLICANT	DATE
Donald L. Piazza	X	01-10-14

1. I have examined the specifications and drawings for the proposed installations and find that said installation meets with the requirements of the Division ant the Ohio Basic Building Code.

APPROVED BY	PER
X Pat Kelly Chief, Division of Fire	X Fire Prevention Bureau

2. I have examined the specifications and drawings for the proposed installations and find that said installation meets with the requirements of the Ohio Basic Building Code.

BUILDING PERMIT NO.	STATE CERTIFIED PLANS EXAMINER SIGNATURE
B- 12048434	X

Complete Application Instructions:

1. You must submit 3 sets of drawings stamped by an architect and/or certified engineer along with the completed application including Building Permit Number. The application must be filled out by a certified contractor, one licensed by the State of Ohio.
2. The drawings will then be examined by the Chief Plans Examiner. Once he/she counts the number of devices/ heads/ gallons of product, etc. he/she will then determine the fee. (See the fee schedule)
3. Once reviewing the drawings he will note any changes needed to be made. **Do not start any job without the inspector's approval.**
4. Once the drawings have been approved you will then need to submit a check or money order for the full amount of the fee to:

   City of Cleveland
   Fire Prevention Bureau
   1645 Superior Ave., E
   Cleveland, Ohio 44114
5. When the drawings have been approved you will need to send someone to our office to pick up the original permit and your stamped approved drawings.
6. After you receive the permit, call 216.664.6664 to schedule an inspection. Once the inspector comes and approves the job, the permitting process is complete.

FEE $555.70

A recent inspection of the subject location by Inspector G. Washington of the Division of Fire revealed the following violations of the Cleveland Codified Ordinances:

EGRESS
- ☐ CO 381.12: Exit lights not maintained.
- ☐ CO 381.12(a): Exit is obstructed.
- ☐ CO 381.12(d): Means of egress not maintained.
- ☐ CO 3111.01: Emergency lighting inoperable.
- ☐ CO 3111.01: No emergency lighting.

EXTINGUISHERS
- ☐ CO 389.35 (e) (1): Insufficient number of extinguishers.
- ☐ CO 389.35 (d) (2): Extinguishers not mounted.
- ☐ CO 389.35 (f) (1) & (2): Extinguishers not maintained

OCCUPANCY
- ☐ CO 3105.10: There is no Certificate of Occupancy for the premises.
- ☐ CO 3105.11(d): No approval for change of use.

For the above violations, property will be referred to the Division of Building and Housing.

STANDPIPE
- ☐ CO 389.12(b): Fire Department standpipe connection is inaccessible.
- ☐ CO 389.12(g): Fire Department standpipe connections are not properly marked.
- ☐ CO 389.16(a): No records of standpipe tests.
- ☐ CO 389.17(b): Standpipe system not maintained.

HOOD SYSTEM
- ☐ CO 3101.07 Ref. NFPA 96: No hood system as required.
- ☐ CO 3101.07 Ref. NFPA 96: Hood system is inoperable or shut off.
- ☐ CO 3101.07 Ref. NFPA 96: No records indicating hood system has been tested.

MANUAL FIRE ALARM
- ☐ CO 391.15: New fire alarm system not tested.
- ☐ CO 391.16: No monthly testing of fire alarm system.
- ☐ CO 391.17: Manual fire alarm not being maintained.

AUTOMATIC FIRE ALARM AND DETECTION
- ☐ CO 391.23 (c): New automatic fire alarm not tested.
- ☐ CO 391.23(d): No monthly tests of automatic fire alarm
- ☐ CO 391.23 (e): Automatic fire alarm not being maintained

SUPPRESSION SYSTEM
- ☐ CO 389.22: There is no automatic fire suppression system.
- ☐ CO 389.28(b): Sprinkler control valves are not properly marked.
- ☐ CO 389.29(d): Fire Department sprinkler connections are not properly marked.
- ☐ CO 389.29(a) No Fire Department connection.
- ☐ CO 389.34(a): Sprinkler system is inoperable or shut off.
- ☐ CO 389.94: No records indicating sprinkler system has been tested.
- ☐ CO 389.34(a): Sprinkler system not maintained.

STORAGE of HAZARDOUS MATERIALS / PERMITS
- ☐ CO 381.05: No permits for hazardous materials. (flammable liquids, combustible liquids, compressed gases, liquefied petroleum gases, corrosive liquids, flammable solids, highly toxic materials, oxidizers, poisonous gases, radioactive material, unstable (reactive) chemicals, cryogenic liquids, fumigants, fuel gases and explosives).
- ☐ CO 381.05(c): Permit(s) revoked.

OTHER CO#: _____ **Description of Violation(s) / Comments:** Electrical Panel in Mechanical Room Obstructed

You are hereby notified to abate the above violation(s) by thirty (30) days from the date of this letter. If you are aggrieved by this order, you may file an appeal with the Board of Building Standards & Building Appeals within thirty (30) days from the date of this letter.

Should an appeal of this order be filed with the Board of Building Appeals within thirty (30) days, a copy of the appeal statement and specific grounds for appeal shall be forwarded to the Cleveland Fire Prevention Bureau.

If you have any questions, please call the Cleveland Fire Prevention Bureau, (216) 664-6664. The Bureau's FAX is (216) 664-6681.

5. Is there identification	Yes ☐	No ☐	N/A ☐
6. Are there signs of leakage from the check valve	Yes ☐	No ☐	N/A ☐
7. Is the automatic ball drip in place	Yes ☐	No ☐	N/A ☐

Section 2: Testing

06710

A. Sprinkler System Control Valves

1. Did the tamper switch operate — Yes ☐ No ☐ N/A ☐
2. Did the signal come in as Alarm or Trouble — Alarm ☐ Trouble ☐
3. If chain locked open, is it a city lock — Yes ☐ No ☐ N/A ☐

B. Main Drain Test — Static / Residual / M. Drain Test

1. Was the water flow observed — Yes ☐ No ☐ N/A ☐
2. Are the results comparable to last year's test — Yes ☐ No ☐ N/A ☐
3. Is the drain piped Outside or to Inside — Outside ☐ Slop Sink ☐

C. System Alarms

1. Did the waterflow switch operate — Yes ☐ No ☐ N/A ☐
2. How long before alarm at panel Time _____
3. Was the waterflow switch tested through I.T.C. — Yes ☐ No ☐ N/A ☐
4. Did the WMAG operate — Yes ☐ No ☐ N/A ☐
5. Did the electric bell operate — Yes ☐ No ☐ N/A ☐
6. Are audibles working throughout building — Yes ☐ No ☐ N/A ☐
7. Was the alarm valve by-pass trim tested — Yes ☐ No ☐ N/A ☐

D. Sprinklers

1. Fast response sprinklers in service less than 20 yrs — Yes ☐ No ☐ N/A ☐
   (if no, test sample now and every 10 years thereafter)
2. Standard sprinklers less than 50 years old — Yes ☐ No ☐ N/A ☐
   If no has a sample been tested every 10 years — Yes ☐ No ☐ N/A ☐
3. Is there an anti-freeze loop — Yes ☐ No ☐ N/A ☐
4. What is the specific gravity _____
5. Were the gauges checked against calibrated gauges — Yes ☐ No ☐ N/A ☐
   Or replaced — Yes ☐ No ☐ N/A ☐
6. Was the siamese connection tested — Yes ☐ No ☐ N/A ☐
   Pressure _____ Time _____
7. Did the system pass — Yes ☐ No ☐ N/A ☐

Re:	Kingsbury Tower and Townhomes 8925 Hough Avenue Cleveland, OH 44106	EMG Project No:	101802.12R-001.299

Dear Sir or Madam:

EMG is an engineering firm currently conducting a property condition survey of the above-referenced property on behalf of the property owner. As part of this process, and a requirement of U.S. Department of Housing and Urban Development (HUD), we are submitting this letter to request information specific to the property. Please provide us with the following information concerning the property:

Does the Fire Department conduct routine life-safety inspections at the property?	
If yes, what is the frequency?	
What is the date of last Fire Department inspection?	
Are there any OUTSTANDING Fire code violations? If Yes, please provide documentation describing the violation(s)	
Are there any OUTSTANDING Building code violations? **If Yes, Please provide documentation describing the violation(s)**	
Is a copy of the original C of O or Original Building Permit available to be faxed to us?	
Name of title of responding party	

This completed form and any follow-up documentation may be faxed to 410.785.6220, emailed to jberthold@emgcorp.com, or mailed to:

EMG
Attn: Matthew Anderson, Senior Engineering Consultant
222 Schilling Circle, Suite 275
Hunt Valley, Maryland 21031

If you need additional information to complete this request, please contact me by email at jberthold@emgcorp.com or by phone at 800.733.0660 x6556. Thank you for your prompt attention to this matter.

Best regards,

John Berthold IV
Technical Management Assistant

Incident #8391; @1750 Hours

Responded to a fire on 02/21/06 at the request of Battalion #1 [Ch. Viancourt]. Reported to AC1 [Ch. Ashton] and Batt. #1 upon my arrival. The fire occurred in unit #510 and it was extinguished upon my arrival. AC1 and Batt. #1 were coordinating the partial evacuation of the building along with EMS [Mark McKenny], the Red Cross [Charles McGeever] and the City Dept. of Aging [Jane Fumich]. Approximately 20 residents were transferred to Thurgood Marshal Rec. Center for temporary housing due to the extensive water damage. There were

COMMUNITY CIRCLE APTS II

8925 HOUGH AV
CLEVELAND, OH 44106

Occupancy ID:
8925HOUGHAV

other residents that found temporary housing on their own.
The fire was confined to unit #510 due to the activation of two side-wall sprinkler heads but there was extensive water damage as there is a fire pump for the building.
David Cooper [CBO - B&H] was also on site in order to inspect the condition of the building and residential units in order to determine if they were habitable. In a joint meeting with Ch. Ashton it was determined that all residential units north of the elevator bank and below the fire floor [floor #5] would be evacuated, which totaled approximately 30 units.
I met with the Property Manager Ms. Sonya White and her security service manager Mr. Larry McDonald [Citywide Protection Services; 216-214-7850]. I issued a Violation Notice [#2615] to Ms. White and cited MC Section 381.04 (a) through (e) for the following:
#1. Restore the impaired fire protection system (sprinkler system); #2. Clean up all of the water damaged areas; and #3. Maintain a FIRE WATCH for the entire building on a continuous basis. Mr. McDonald contacted additional personnel in order to provide a guard for each floor level for both security and fire watch duties.
Johnson Controls. Inc. was contacted by Ms. White in order to inspect and service the fire protection systems. Mr. Bob Mlady responded while I was on site. There were extra sprinkler heads on site in the fire pump room but none of them matched the two side-wall type that had activated in unit #510. Mr. Mlady contacted additional personnel from Johnson Control in order to assist him with the restoration of the systems. He later contacted me around 2315 hours on my cell phone and provided me with an update.
A joint team inspection will be performed with B&H on 2/22/06.

12/14/2005 200 INSPECTION - General

Inspector Notes:
12/14/05[Stanback]

Forwarded the following assignment to Lt. Redman from a referral from Ch. Brewington:

Attached is a referral from Ch. Brewington regarding impaired fire protection systems [fire sprinkler & fire alarm] at the above location. Investigate and update me with your findings. Take appropriate code enforcement actions after your investigation and update me with your findings. The contact person is Ms. White at 795-3950.

Inspections:

02/20/2008 321 REFERRAL/COMPLAINT - Fire

Inspector Notes:

02/26/2008 09:42:12 Hredman
All fire protective systems are in working order. The sprinkler head that broke in the lobby was repaired that same day. The sprinkler system and fire pump were tested on 9-21-2007. No violations were noted. Ther fire alarm panel is in normal mode. There were some exit lights that were out of service and they need to maintain records for the periodic testing of the emergency generator. see attached.

Incident #8391; @1750 Hours

Responded to a fire on 02/21/06 at the request of Battalion #1 [Ch. Viancourt]. Reported to AC1 [Ch. Ashton] and Batt. #1 upon my arrival. The fire occurred in unit #510 and it was extinguished upon my arrival. AC1 and Batt. #1 were coordinating the partial evacuation of the building along with EMS [Mark McKenny], the Red Cross [Charles McGeever] and the City Dept. of Aging [Jane Fumich]. Approximately 20 residents were transferred to Thurgood Marshal Rec. Center for temporary housing due to the extensive water damage. There were

COMMUNITY CIRCLE APTS II
8925 HOUGH AV
CLEVELAND, OH 44106

Occupancy ID:
8925HOUGHAV

other residents that found temporary housing on their own.
The fire was confined to unit #510 due to the activation of two side-wall sprinkler heads but there was extensive water damage as there is a fire pump for the building.
David Cooper [CBO - B&H] was also on site in order to inspect the condition of the building and residential units in order to determine if they were habitable. In a joint meeting with Ch. Ashton it was determined that all residential units north of the elevator bank and below the fire floor [floor #5] would be evacuated, which totaled approximately 30 units.
I met with the Property Manager Ms. Sonya White and her security service manager Mr. Larry McDonald [Citywide Protection Services; 216-214-7850]. I issued a Violation Notice [#2615] to Ms. White and cited MC Section 381.04 (a) through (e) for the following:
#1. Restore the impaired fire protection system (sprinkler system); #2. Clean up all of the water damaged areas; and #3. Maintain a FIRE WATCH for the entire building on a continuous basis. Mr. McDonald contacted additional personnel in order to provide a guard for each floor level for both security and fire watch duties.
Johnson Controls. Inc. was contacted by Ms. White in order to inspect and service the fire protection systems. Mr. Bob Mlady responded while I was on site. There were extra sprinkler heads on site in the fire pump room but none of them matched the two side-wall type that had activated in unit #510. Mr. Mlady contacted additional personnel from Johnson Control in order to assist him with the restoration of the systems. He later contacted me around 2315 hours on my cell phone and provided me with an update.
A joint team inspection will be performed with B&H on 2/22/06.

12/14/2005 200 INSPECTION - General

Inspector Notes:
12/14/05[Stanback]
Conducted inspection of building, Lt. Redman and walk all floors some issues noted, the south end exit sign needed bulbs replaced. there were a number of floors the needed to have caps replaced on standpipes. Received reports for sprinklers, standpipes, and fire pumps testing, awaiting fire alarm system testing report. Issue letter [16] .

10/04/2004 296 E.R.E.S. installation

Inspector Notes:
11/13/2006 12:22:40 jmckenna
This entry was omitted at the time of completion. Early October 2004, I signed off on application for ERES.

04/21/2004 321 REFERRAL/COMPLAINT - Fire

Inspector Notes:
04/21/2004 12:27:41 jmckenna- Referral from B-1 Ch. Brewington: Special locking arrangements did not operate properly and access to levels above ground floor was hampered. Elevator key was not available. Pump room & O.S.&Y. location need to be labeled. Assigned to Insp. Stanback.

04/21/2004 14:25:26 KStanback No special locking arrangements, ground level doors can be open from inside stairwell only. The elevator has been replaced and the proper key is in place. There will be labels identifying pump and valve room. Violation notice was issued for, no locks on shut off valves, one riser valve not functioning, and additional spare sprinkler heads needed.

RE: Kingsbury Tower, 8925 Hough Ave.

ADJUDICATION ORDER B12051897-1

Dear Applicant:

Your plans submitted on November 28, 2012, have been reviewed for compliance with the 2011 Ohio Building Code (OBC) and City of Cleveland Ordinances for the proposed alteration and renovation of an R2 facility for Millennia Housing Development, Ltd. The plans have been disapproved pending compliance with this Adjudication Order.

Plans Examiner: Richard Thomas (216) 664-4093

1. **OBC 106.1.1 (1):** Provide construction classification on the drawings for the Tower, Townhomes, and accessory structures.
2. **OBC 705.8 & 602:** Demonstrate code compliance with fire separation distances between wood shed (U Classification) and Tower structure (R2 Classification). Drawings indicate a 3 foot clearance.
3. **OBC 106.1.1 (2):** Scale is mislabeled on AS-101. Also, if 1"=20' is assumed to be correct, the scale does not match noted dimensions. Correct and resubmit.
4. **OBC 106.1.1:** Explore with the Fire Department, the potential for providing a connection at the rear parking areas between Bldg 1 and Tower and the provision for a locked gate with fire department access. Drawing AS-101.
5. **OBC 106.1.1 (15):** Verify the extent and location of existing sprinkler systems on the drawings. Verify, if any, sprinkler system extension into new community room addition.
6. **OBC 1004.3:** Post occupant load in community room per this section.
7. **OBC 1004.1.1& 508.4 (exception 3):** Community room appears to be an accessory occupancy A3 which requires a minimum occupant load of 53 persons at 15 net s.f./person. Demonstrate code compliance for egress doors (hardware, swing, exit lighting, etc.) and fire separation from surrounding R2 space.

8. **OBC 903.2.11.2:** Verify fire protection of trash rooms and trash chute.

9. **OBC 715.4.3:** Door assemblies in corridors: Suite entry door assemblies are noted as 20 minutes. Other door assemblies being replaced have not rating specified. Confirm intent and verify code compliance. Is corridor rated?

10. **OBC 1029.1:** Emergency Escape and Rescue: Provisions shall be made for emergency escape and rescue in R occupancies. Sleeping rooms below the fourth floor shall have at least one exterior emergency escape and rescue opening per this section. Demonstrate compliance or cite approved exception as outlined in the Code.

11. **ICC/ANSI A117.1 (305 & 606.2):** Verify minimum 30" access clearance is provided to the lavatory in public women's toilet.

Please review the above items and submit three copies of revised construction documents demonstrating compliance with the sections cited above, and bearing the seal of an Ohio registered design professional.

Fire Prevention Review is pending.

Pursuant to Rule 110.1 of the Ohio Building Code, you have a right to appeal from this adjudication order by filing a request within thirty days of the mailing of this order to:

City of Cleveland
Board of Building Standards and Building Appeals
601 Lakeside Avenue, Room 516
Cleveland, Ohio 44114
(216) 664-2418

You also have a right to a hearing before the Board. You have a right to be represented by legal counsel of your choice, and you may present your arguments or contentions orally or in writing. You may also present evidence and examine witnesses appearing for or against you.

Sincerely,

Tom Vanover,
Chief Building Official (Acting)

Section 2: Testing

05010

A. Sprinkler System Control Valves

1. Did the tamper switch operate	Yes ❑	No ❑	N/A ❑
2. Did the signal come in as Alarm or Trouble	Alarm ❑	Trouble ❑	
3. If chain locked open, is it a city lock	Yes ❑	No ❑	N/A ❑

B. Main Drain Test

	Static	Residual	M. Drain Test
1. Was the water flow observed	Yes ❑	No ❑	N/A ❑
2. Are the results comparable to last year's test	Yes ❑	No ❑	N/A ❑
3. Is the drain piped Outside or to Inside	Outside ❑	Slop Sink ❑	

C. System Alarms

1. Did the waterflow switch operate	Yes ❑	No ❑	N/A ❑
2. How long before alarm at panel Time _____			
3. Was the waterflow switch tested through I.T.C.	Yes ❑	No ❑	N/A ❑
4. Did the WMAG operate	Yes ❑	No ❑	N/A ❑
5. Did the electric bell operate	Yes ❑	No ❑	N/A ❑
6. Are audibles working throughout building	Yes ❑	No ❑	N/A ❑
7. Was the alarm valve by-pass trim tested	Yes ❑	No ❑	N/A ❑

D. Sprinklers

1. Fast response sprinklers in service less than 20 yrs *(if no, test sample now and every 10 years thereafter)*	Yes ❑	No ❑	N/A ❑
2. Standard sprinklers less than 50 years old	Yes ❑	No ❑	N/A ❑
If no has a sample been tested every 10 years	Yes ❑	No ❑	N/A ❑
3. Is there an anti-freeze loop	Yes ❑	No ❑	N/A ❑
4. What is the specific gravity _____			
5. Were the gauges checked against calibrated gauges	Yes ❑	No ❑	N/A ❑
Or replaced	Yes ❑	No ❑	N/A ❑
6. Was the siamese connection tested	Yes ❑	No ❑	N/A ❑
Pressure _____ Time _____			
7. Did the system pass	Yes ❑	No ❑	N/A ❑

Cleveland Division of Water
Backflow Prevention Device Test and Maintenance Report

Customer: Community Circle Apartments II / Community Circle Apartments II

Service Address: 8925 Hough Ave.

Location: Maintenance Room

Type of Device: Cleveland East DC / Fire

Manufacturer: ITT Grinnell

Size: 6" Serial #: E-8423&24

OSHA confined space entry requirements apply on **ALL** testing and repair of backflow prevention devices within a vault.

Owner's Certification:
This device has been in constant use at this location in a manner approved by the City of Cleveland, Division of Water. During the entire prescribed interval between test periods this device was not by-passed, made inoperative or removed without authorization. All defects found during the operation period or during tests of the device were corrected without delay.

Cleveland, Ohio 44106

RE: Community Circle II
Apartments
8925 Hough Ave.
Hand Delivered

Dear Ms. White:

A recent inspection of the subject location by Lieutenant Redman from the Division of Fire, revealed the following violation(s) of the Municipal Code(s) and the method(s) for correcting it / them:

1.) The jockey pump does not operate. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 20 Chapter 2 section 2-19.1, Replace the jockey pump.

2.) The Controller lights and the controller lights do not work. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-2.2.3, Replace the lights

3.) There are no gauges for the Low suction panel or the Jockey pump. M.C. 389.27b ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-5.1, Install the gauges. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-2.2.3, Install Gauges

An Equal Opportunity Employer

March 10, 2006

Ms. Sonya White
Property Manager
8925 Hough Ave
Cleveland, Ohio 44106

4.) The fire pump is not monitored by the fire alarm panel. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 20 Chapter 7 section 7-4.7 Have the fire pump connected to the fire alarm panel to indicate the following conditions:
a). The fire pump or motor is running
b). the loss of phase power.
c). Phase reversal power

5.) The low suction panel does not work. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-3.3.3. Repair the low suction panel

6). The exit lights are out of service throughout the building. M.C. 3111.01 and ref: Ohio Building code, Chapter 10, Section 1006.3. Repair or replace broken exit lights.

7). The stairways do not have the floor numbers on them. M.C. 311.01 and ref: Ohio Building Code, Chapter 10, Section 1019.1.7, Place a sign on each floor landing designating the floor level within 5 feet of the door so that it can be seen when The door is opened.

March 10, 2006

Ms. Sonya White
Property Manager
8925 Hough Ave
Cleveland, Ohio 44106

You are hereby notified to abate the above violation(s) by 30 days from the mailing date of this letter. If you are aggrieved by this order, you may file an appeal with the Board of Building Standards & Building Appeals, Room #516, City Hall within 30 days from the mailing date of this letter. If there are any questions, please call Lieutenant Redman at 664-6664.

Should an appeal of this order be filed with the Board of Building Standards & Building Appeals within 30 days, a copy of the appeal statement and specific grounds for appeal shall be forwarded to the Fire Prevention Bureau.

Sincerely,

Mark J. Scott, Captain
Fire Marshal

MJS/htr

RE: Community Circle II
Apartments
8925 Hough Ave.
Certified Mail

Dear Ms. Welker:

A recent inspection of the subject location by Lieutenant Redman from the Division of Fire, revealed the following violation(s) of the Municipal Code(s) and the method(s) for correcting it / them:

1.) The jockey pump does not operate. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 20 Chapter 2 section 2-19.1, Replace the jockey pump.

2.) The Controller lights and the controller lights do not work. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-2.2.3, Replace the lights

3.) There are no gauges for the Low suction panel or the Jockey pump. M.C. 389.27b ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-5.1, Install the gauges. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-2.2.3, Install Gauges

An Equal Opportunity Employer

March 10, 2006

Ms. Brenda Welker
Regional Property Manager
301 Oxford Valley Rd.
Suite 1801
Yardley, Pa. 19067

4.) The fire pump is not monitored by the fire alarm panel. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 20 Chapter 7 section 7-4.7 Have the fire pump connected to the fire alarm panel to indicate the following conditions:
a). The fire pump or motor is running
b). the loss of phase power.
c). Phase reversal power

5.) The low suction panel does not work. M.C. 389.27[b] ref NFPA 13 Chapter 2 section 2.2 ref NFPA 25 Chapter 5 section 5-3.3.3. Repair the low suction panel

6). The exit lights are out of service throughout the building. M.C. 3111.01 and ref: Ohio Building code, Chapter 10, Section 1006.3. Repair or replace broken exit lights.

7). The stairways do not have the floor numbers on them. M.C. 311.01 and ref: Ohio Building Code, Chapter 10, Section 1019.1.7, Place a sign on each floor landing designating the floor level within 5 feet of the door so that it can be seen when The door is opened.

March 10, 2006

Ms. Brenda Welker
Regional Property Manager
301 Oxford Valley Rd.
Suite 1801
Yardley, Pa. 19067

You are hereby notified to abate the above violation(s) by 30 days from the mailing date of this letter. If you are aggrieved by this order, you may file an appeal with the Board of Building Standards & Building Appeals, Room #516, City Hall within 30 days from the mailing date of this letter. If there are any questions, please call Lieutenant Redman at 664-6664.

Should an appeal of this order be filed with the Board of Building Standards & Building Appeals within 30 days, a copy of the appeal statement and specific grounds for appeal shall be forwarded to the Fire Prevention Bureau.

Sincerely,

Mark J. Scott, Captain
Fire Marshal

MJS/htr

Contract No.: 38470-00-01

Community: Community Circle II

AGREEMENT BETWEEN OWNER AND CONTRACTOR

THIS AGREEMENT is made and entered into by and between ADT Security Services (the "Contractor") and Community Circle II Limited (the "Owner"). Owner owns the Property known as Community Circle II located at 8925 Hough Avenue Cleveland, Ohio 44106 (the "Property"). Owner shall act through its agent, the Management Company (the "Agent"). The Owner and Contractor agree as follows:

1. SCOPE OF WORK Fire Alarm, Buzzer Intercom Installation

A. The Contractor agrees to perform the Work and services required by this Agreement including any drawings, specifications and addenda listed and/or attached hereto (collectively referred to as the "Contract Documents") in accordance with the Contract Documents. Contractor agrees to provide at its sole expense all labor, materials, services, equipment, tools, scaffolds and hoists required to fulfill its obligations and to properly execute and complete the Work as described more particularly on the attachments (the "Work") per specification(s) No.: included Exhibit(s): A,B,C,D,E,F,G,H,I,J,K,L

B. This Agreement represents the entire Agreement between the parties and contains all terms and conditions required for the proper execution and completion of the Work. The Owner or his Agent may order changes in the Work consisting of additions, deletions or other revisions. All changes in the Work shall be authorized only by writing signed by the Owner. In the absence of such signed change order, such work shall be considered to have been performed as part of the original Agreement without additional compensation.

C. Contractor shall commence work on ~~August 25~~ Sept 25 MB, 2000. Contractor shall prosecute the Work diligently and the Work is to be fully completed by ~~October 27~~ 11-1-00 MB, 2000. (Date of Final Completion). Time is of the essence.

ADT will begin installation after receiving permit from local AHJ. MB

D. In the event the Contractor fails to complete the Work by the Date of Final Completion stated in Article 1.C, then liquidated damages in the amount of (157. per day) per day shall be assessed by the Owner against the Contractor for each day or portion of a day of delay beyond the Date of Final Completion. These fixed liquidated damages are not established as a penalty but are calculated and agreed upon in advance by the Owner and the Contractor due to the uncertainty and impossibility of making a determination as to the actual and consequential damages which may be incurred by the Owner as a result of the failure on the part of the Contractor to complete the Work on time in accordance with contract requirements. The liquidated damages stated herein shall be the the exclusive measure of ONLY those damages sustained by the Owner due to breach by the Contractor of its agreement to complete timely the Work. This liquidated damages subsection shall not alter or affect adversely the Owner's rights to assess damages against the Contractor for loss resulting from causes OTHER THAN delay by the Contractor in timely completion of the Work.

2. CONTRACT SUM

A. Subject to Article 1. D, Owner agrees to pay to the Contractor for the full satisfactory performance and completion of the Work as specified or required in the Contract Documents the sum of Forty Seven Thousand Two Hundred Thirty Four and 62/100 $47,234.62. This amount (the Contract Sum) shall not be increased by any changes in labor rates, transportation charges, material costs or taxes.

Payments to be made as follows: 45% - 45% - 10%

B. Any payments due under this Agreement will be made no more than once a month and no later than the twenty-fifth (25th) day of each month for Work completed the previous month. To receive any payment, the Contractor must submit to the Owner an invoice detailing the labor, services or materials already provided for Work performed in the previous month on or before the first day of the following month. By submission of an invoice for payment, the Contractor warrants that all Work performed for Owner by the Contractor to that date is free and clear of liens, claims, security interests or encumbrances from persons or entities providing labor, materials and equipment relating to the invoiced Work. No payment shall be made for equipment or materials which have not yet been installed on the Property.

C. A sum equal to Ten Percent (10%) of the Contract Sum will be retained by the Owner. The final payment, including release of retainer, shall be paid by Owner within 30 days after final completion of the Work and its acceptance by the Owner or Agent, provided first, however, that Contractor shall have fulfilled all the obligations to be performed by Contractor under this Agreement.
Contractor's initials MB Agent's initials

D. Unless waived by Owner in writing, the Contractor agrees to provide waivers and releases of liens from the Contractor and all subcontractors and suppliers of Work under this Agreement (the "Release Documents") and any other evidence in a form satisfactory to the Owner demonstrating that all labor, materials, bills, invoices, payroll taxes of any kind and any other indebtedness incurred by the Contractor up to and including the date of invoicing have been paid in full prior to or in exchange for final payment to Contractor.

E. Owner may withhold any payment, including the retainage, to the Contractor: if there is defective Work that has not been remedied; if third parties have filed claims or liens or have threatened to file claims or liens; if the Contractor has failed to pay subcontractors for labor materials or equipment; if damage has been caused to the Owner or another contractor; if Contractor fails to submit an invoice as required by the terms of this Agreement; or if Contractor fails to carry out Work in accordance with the Contract Documents.

3. CONTRACTOR OBLIGATIONS

A. The Contractor shall supervise and direct the Work using its best skills and efforts and shall perform the Work in strict accordance with the Contract Documents. Contractor warrants that unless otherwise specified, all materials and equipment incorporated in the Work will be new and of good quality and free from faults or defects. To enable the Work to be laid out and prosecuted in an orderly and expeditious manner, Contractor shall, before commencing the Work, submit to Owner a schedule for completing the Work during the hours of 8:00 a.m. and 6:00 p.m., Monday through Friday, unless otherwise agreed to by Owner. Contractor shall at all times coordinate with Owner with respect to the scheduling, commencement and completion of the Work and perform the Work in a manner that will least disrupt residents on the Property. The Contractor shall require each subcontractor to be bound by this Agreement to the extent of the Work performed by such subcontractor. The Contractor agrees to perform the Work with due diligence and without delay. The Contractor will not delay or interfere with any Work of the Owner or any subcontractors. Contractor shall coordinate its Work with others performing work at the Property as Owner directs.

B. The Contractor shall enforce strict discipline and good order among employees of the Contractor and all other persons carrying out the Work. The Contractor shall not permit employment of unfit persons or persons not skilled in tasks assigned to them. Owner reserves the right to have the Contractor remove an employee from the premises if unfit or unskilled. If requested by Owner, all employees of the Contractor shall wear uniforms with tags or embroidery showing the name of the Contractor and the name of the employee. The Contractor shall employ labor and personnel in accordance with applicable Local, State and Federal laws.

C. The Contractor shall pay, when due, sales, consumer, use, FICA and unemployment compensation taxes and any other taxes due for the Work or portions thereof provided by the Contractor.

D. Prior to commencing the Work, the Contractor shall obtain, at its own expense, all permits and licenses and agrees to pay all royalties that may be necessary for the proper performance of this Work.

E. The Contractor shall give notices and comply with all building codes, local ordinances, laws, rules, regulations and orders of any public authority having jurisdiction over the Property.

F. The Contractor will at all times facilitate and permit the inspection of the Work by the Owner, Agent, and public authorities. The Contractor shall not be relieved of its obligations to perform the Work because of tests, inspections, or approvals required or performed by persons other than the Contractor. The Work shall not be accepted until the Owner, Agent and all public authorities have inspected and approved the Work and any certificates of occupancy and/or final inspection certificates that are required are issued.

G. The Contractor shall at all times be responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the Work. It shall take all reasonable precautions for the safety of, and shall provide all reasonable protection to prevent damage, injury or loss to (1) all employees of Contractor or any other subcontractor performing services on the Property and other persons including, but not limited to, residents or tenants of the Owner and their guests; (2) the Work and all materials and equipment used to complete the Work; and (3) other property at the site or adjacent thereto. The obligation of the Contractor to protect shall include the duty to provide and maintain at its sole expense at the Property, suitable and sufficient guards, lights, barricades and enclosures. All damage or loss to any property caused in whole or in part by the Contractor, its subcontractor or their agents, or anyone directly or indirectly employed by any of them, or by anyone for whose acts of them may be liable, shall be remedied by the Contractor. The Owner reserves the right at all times to halt Work that is being performed in an unsafe manner until Contractor rectifies same.

H. The Contractor shall at all times keep the premises and surrounding area free from accumulation of waste material or rubbish caused by its performance of the Work. Within twenty-four (24) hours from the completion of any Work, or any portion of Work, the Contractor shall remove all waste material, rubbish, tools, construction equipment, machinery and surplus materials from the Property, and shall leave the Work area broom clean or its equivalent at the end of each work day. If the Contractor fails to clean the premises, Owner may perform the clean up and the cost shall be deducted from any payment requests submitted by the Contractor. Contractor is responsible for removal and proper disposal of all waste from the Work.

I. Contractor agrees to abide by the Department of Transportation regulations (Part 382 of Title 49 of the Code of Federal Regulations), if applicable. Contractor agrees that any employee operating a motor vehicle at the direction of the Management Company or while undertaking the business of this contract is participating in a DOT mandated and approved random drug and alcohol testing program. Failure to maintain such a program in compliance with DOT regulations would be grounds for termination of this Agreement pursuant to Section 10.

J. All Contractors must execute the equal employment opportunity addendum.

K. Contractor guarantees that all the Work shall be free from defects in workmanship and materials for minimum period of 1 year from date Owner accepts the Work and promptly upon Owner's request, Contractor will correct by repair or replacements, without charge, any such defects (and any damage to other property, including without limitation the Work of other subcontractors resulting therefrom (or from the correction thereof) which may appear in the Work during that period. Additionally, materials/equipment warranty provided by the manufacturer of said materials/equipment is to be for a period of 1 year. Where any governmental bodies or agencies regulating the Owner's operations, such as the United States Department of Housing and Urban Development, require beyond said periods, the Contractor's obligations shall remain in effect through such extended period of time. If the Contractor fails to commence and to complete the repair or replacement of improper or defective Work, as specified, within a reasonable period of time as determined by the Owner, the Owner may proceed to have such Work completed by whatever method it may deem expedient and may charge the Contractor for the expense incurred.

L. The Contractor will be responsible to protect living units against the elements at the end of each working day and under no circumstances shall any living unit be left unprotected due to Work under the Agreement. In addition no occupied living unit will be without essential services, heat, light, and water at the end of each working day as a result of this Work.

M. The Contractor shall hearby indemnify and hold the Owner harmless from all losses, costs, or expenses including fines incurred by the Owner for the Contractor's failure to comply with the Federal Occupational Health and Safety Act, and like state and local requirements.

4. OWNER OBLIGATIONS

A. The Owner shall not be responsible for or assume any liability or responsibility for loss or damage to equipment or materials, tools or other personal property whether owned or leased by the Contractor, subcontractor, their agents, or anyone employed by them in the performance of the Work.

B. When Work is being performed on Owner's premises where water, power, gas, and toilet facilities are available, the Owner will furnish said utilities and facilities to the Contractor and his workmen. All scheduled uses shall be coordinated and approved by the on-site property manager. Where said utilities are not available through the Owner's in-place facility, the Contractor shall provide same at his own expense to the extent required to fulfill this Agreement.

5. CORRECTION OF WORK

The Contractor shall promptly correct at its own expense any Work that fails to conform to the requirements of the Contract Documents where such failure to conform appears during the progress of the Work. Contractor warrants and shall also promptly remedy at its own expense any defects due to faulty materials, equipment or workmanship, all within such period or periods of time as may be prescribed by law or by the terms of any applicable guarantee required by the Contract Documents. The provisions of this section apply to work done by subcontractors as well as to Work done by direct employees of the Contractor.

6. INSURANCE

A. The Contractor shall purchase from and maintain in a company or companies lawfully authorized to do business in the jurisdiction in which the Property is located such insurance as will protect the Contractor and the Owner from all claims including, but not limited to, those that may arise out of or result from operations of the Contractor under this Agreement and for which the Contractor may be legally liable whether such operations be by the Contractor or by a Subcontractor or by anyone directly or indirectly employed by any of them, or by anyone for whose acts any of them may be liable. * Insurance Coverage to be provided shall include, but not be limited to, 1. Comprehensive General Liability, 2. Workers' Compensation and Employers' Liability, and 3. Automobile Liability. Coverage written on an occurrence basis, in the amounts as follows:

1. Commercial General Liability-

X **$ 1,000,000 for contracts UNDER $ 50,000 (AIMCO)**

2. Workers' Compensation and Employers' Liability -

X **(Statutory)**
$100,000 each accident
$500,000 disease - policy limit
$100,000 disease - each employee

3. Automobile Liability -

X **$ 500,000 combined single limit (AIMCO)**

* Check required amounts. If nothing is checked the maximum insurance requirements apply for each category.

B. The Contractor shall, concurrent with the execution of this Agreement, deliver to the Owner a Certificate of Insurance in a form acceptable to the Owner evidencing the coverage set forth by this Agreement. The Certificate of Insurance will name the Owner and the Management Company as additional insured. In no circumstance shall the Contractor commence any Work without the issuance of policies for all the insurance coverage specified in this section. The Certificate of Insurance and insurance policies shall contain a provision that coverage under the insurance policy will not be canceled, non-renewed or reduced in coverage until after thirty (30) days prior written notice has been given to the Owner.

7. PREVENTION OF LIENS

The Contractor agrees to pay when due all claims of subcontractors and others for labor, materials, services or equipment for the performance of Work and to prevent the filing of any liens by mechanics or materialmen or attachments, garnishments or suits affecting title to the Property upon which the Work is performed. The Contractor agrees within fifteen (15) days after notice is mailed to the Contractor to cause any such suit or lien to be dismissed or removed from the Property and to pay all expenses for, and on behalf of the Owner, including attorney fees incurred as a result of any suit or lien to be dismissed or removed from the Property and to pay all expenses for, and on behalf of the Owner, including attorney fees incurred as a result of any suit or lien. The Contractor may, with the approval of the Owner, provide a bond in a form and substance satisfactory to the Owner to bond the Owner against any loss due to disputes with subcontractor, sub-subcontractors or any other person or entity providing labor or materials to complete the Work. The Contractor further agrees that no liens or judgments shall attach to the Property owned by the Owner by virtue of Work done by the Contractor or by any supplier, employees, materialmen or sub-subcontractor employed by him, and the Contractor warrants that all such parties shall be advised of these terms and bound by the provisions of this section. Failure to comply with this section shall constitute a default by the Contractor and entitle the Owner to terminate this Agreement or pursue other appropriate remedies at law or in equity.

8. INDEMNIFICATION

A. To the fullest extent permitted by law, the Contractor shall indemnify and hold harmless the Owner, its partners, the Management Company, and other officers, directors, controlling persons, shareholders, partners, employees and affiliates from and against any and all claims, damages, losses, costs and expenses whenever incurred including, but not limited to, reasonable attorney's fees arising out of any kind and nature whatsoever, including without limitation claims, damages, costs and expenses attributable to injury or destruction to tangible property, bodily injury, sickness, disease or death or resulting from performance of the Work or incurred by reason of a breach by Contractor of any covenant or condition contained in the Contract Documents or the inaccuracy of any warranty or representation made in the Contract Documents or in the Release Documents.

B. The indemnification obligation under this Article shall not be limited by any restriction on the amount or type of damages, compensation or benefits payable by or for the Contractor under workers or workmen's compensation acts, disability benefit acts or other employee benefit acts.

C. All provisions of this Agreement that require the Contractor to insure, defend or indemnify the Owner shall survive any termination of this Agreement.

9. OWNER LIABILITY

The Contractor shall not bring claims or lawsuits under or related to this Agreement against any principals, employees, agents, officers, directors, stockholders, controlling persons, partners or affiliates of the Owner or the Management Company. The Contractor further agrees that the sole and exclusive remedy of the Contractor for payment and/or performance of this Agreement shall be against the assets of the Owner.

10. OWNER'S RIGHT TO TERMINATE THE CONTRACT

A. Should the Contractor neglect to carry out the Work properly, correct defective Work or fail to perform any of its obligations under the Contract Documents, the Owner, after three (3) days written notice to the Contractor and its surety, if any, may without prejudice to any other remedy it may have, direct by written notice that the Contractor stop the Work, make good the deficiencies and may deduct the cost from the payment then or thereafter due to the Contractor or, at the option of the Owner, may terminate this Agreement and take possession of all materials, tools, and appliances and finish the Work by such means as the Owner sees fit. If the unpaid balance of the Contract Sum exceeds the expense of finishing the Work, such excess shall be paid to the Contractor, but if such expense exceeds the unpaid balance the Contractor shall promptly pay the difference to the Owner.

B. Notwithstanding anything in this Agreement, the Owner, at its sole discretion, may terminate this Agreement at any time without cause by giving at least ten (10) days prior written notice of such termination to the Contractor. Upon any termination of this Agreement, and subject to all the terms and provisions of the Agreement, the Contractor shall be entitled to payment at the Contract Sum for all accepted Work finished or installed. However, the Owner may retain from any monies due to the Contractor an amount sufficient to cover Contractor's obligation under any guarantee of materials and workmanship provided in the Contract Documents. Upon the expiration of these obligations, the balance of the amount, if any, shall be paid to the Contractor. The Contractor, upon termination of this Agreement, shall peaceably and quietly surrender to the Owner all premises, facilities, machinery and equipment of or belonging to the Owner or for which Owner has paid Contractor.

11. MISCELLANEOUS

A. Nothing contained in this Agreement shall be construed to create the relationship of employer and employee, principal and agent, partnership or joint venture between the parties, it being understood that the only relationship between the parties is that the Contractor is an independent contractor of the Owner. Nothing contained in this Agreement shall create any contractual or other relationship between Owner and any subcontractor or supplier.

B. The invalidity or unenforceability of any provision shall not affect or limit the validity and enforceability of any other provisions. The waiver by any party of a breach of any provision of the Agreement shall not operate or be construed as a waiver of any subsequent breach by any party. The remedies and rights of the Owner, in the event of any default by the Contractor, are cumulative and in addition to those otherwise available by law, and the expression of any specific right or remedy shall not be construed as preventing the Owner from exercising any other right or remedy it may have.

C. Notice required under this Agreement shall be in writing and sent by personal delivery, certified mail, commercial overnight courier (e.g., Federal Express) or certified mail postage prepaid return receipt requested to the parties at the addresses or set forth in this Agreement and to the Management Company Regional Office at the address set forth at the end of this Agreement, to such other addresses as any of the parties may hereafter specify in writing to the other party. Notice shall be deemed effective when received.

D. This Agreement shall be construed in accordance with the laws of the State where the Work is to be performed.

E. The Contractor shall not assign this Agreement. Nothing in this Agreement shall preclude or prohibit the Owner from assigning or transferring the whole or any part of the Agreement including the Owner's rights, benefits or obligations hereunder to any corporation, partnership or individual.

F. This Agreement and all the representations, warranties and conditions shall be binding upon and inure to the benefit of the parties and their respective heirs, executors, administrators, assignees and other successors in interest (to the extent permitted by this Agreement).

G. Whenever the context so requires, the masculine gender includes the feminine and the neuter as appropriate and visa versa, and the singular includes the plural. Caption headings are for convenience only and are not to be used to construe or interpret the Agreement.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the 9th day of August, 2000.

Incident #8391; @1750 Hours

Responded to a fire on 02/21/06 at the request of Battalion #1 [Ch. Viancourt]. Reported to AC1 [Ch. Ashton] and Batt. #1 upon my arrival. The fire occurred in unit #510 and it was extinguished upon my arrival. AC1 and Batt. #1 were coordinating the partial evacuation of the building along with EMS [Mark McKenny], the Red Cross [Charles McGeever] and the City Dept. of Aging [Jane Fumich]. Approximately 20 residents were transferred to Thurgood Marshal Rec. Center for temporary housing due to the extensive water damage. There were other residents that found temporary housing on their own.

The fire was confined to unit #510 due to the activation of two side-wall sprinkler heads but there was extensive water damage as there is a fire pump for the building.

David Cooper [CBO - B&H] was also on site in order to inspect the condition of the building and residential units in order to determine if they were habitable. In a joint meeting with Ch. Ashton it was determined that all residential units north of the elevator bank and below the fire floor [floor #5] would be evacuated, which totaled approximately 30 units.

I met with the Property Manager Ms. Sonya White and her security service manager Mr. Larry McDonald [Citywide Protection Services; 216-214-7850]. I issued a Violation Notice [#2615] to Ms. White and cited MC Section 381.04 (a) through (e) for the following:

#1. Restore the impaired fire protection system (sprinkler system); #2. Clean up all of the water damaged areas; and #3. Maintain a FIRE WATCH for the entire building on a continuous basis. Mr. McDonald contacted additional personnel in order to provide a guard for each floor level for both security and fire watch duties.

Johnson Controls. Inc. was contacted by Ms. White in order to inspect and service the fire protection systems. Mr. Bob Mlady responded while I was on site. There were extra sprinkler heads on site in the fire pump room but none of them matched the two side-wall type that had activated in unit #510. Mr. Mlady contacted additional personnel from Johnson Control in order to assist him with the restoration of the systems. He later contacted me around 2315 hours on my cell phone and provided me with an update.

A joint team inspection will be performed with B&H on 2/22/06.

Mark J. Scott, Capt.

Telephone 664-6664

Readings marked + in suction column are heads above atmosphere, those marked - are lifts. For vertical shaft pumps, convert distance from pumping water level to discharge gage to psi and treat as negative (-) suction pressure.

Plot discharge pressure and net head curves. For electric-driven pump, plot ampere curve also.

RE: Community Circle II
8925 Hough
Cleve, OH 44103

Dear Ms. White:

A recent inspection of the subject location was conducted by Inspector Stanbeck, of the Division of Fire, on the above date.

No violations were observed at that time.

If you have any questions, please call the above Inspector at the Fire Prevention Bureau, [216] 664-6664. The Bureau's FAX is [216] 664-6681.

Sincerely,

Mark J. Scott
Fire Marshal

CITY OF CLEVELAND

DEPARTMENT OF PUBLIC SAFETY
DIVISION OF FIRE

FIRE PREVENTION BUREAU

4/27/04 20

To Batt. Chief Johnny Brewington

From: Inspector Ken Stanback

Re: 8925 Hough (Community Circle II)

On 4/21/04, I had discussion with Ms. Sonya White regarding the issues identified in your referral.

1. The sprinkler had that was used to replace the open head was not the proper orientation, should have been pendent head sprinkler.

2. I explain the importance for identifying the location of pump room and valve room. She stated that it would be done.

3. It was told to me that the issue regarding the wrong elevator key has been resolved, by replacing the old key with the one from the roaming guard, and a additional one was being made.

4. I also explained your reasoning for request that a knox box be placed on premises.
The egress doors are not tied into alarm system, all the doors open from the hall side of door. A key is needed to open ground level doors from outside.

INSPECTOR: Kenneth Stanback

Abatement Order

ADDRESS 8925 Hough DATE 4-21-09 BUILDING#
BUSINESS NAME [illegible] BUSINESS PHONE [illegible] 795-5950
OWNER'S NAME Ahmed OWNER'S PHONE [illegible] 419 901 4302
OCCUPANCY TYPE: Res. CONSTRUCTION TYPE I II III IV V STORY

A recent inspection of the subject location by Inspector Stanback of the Division of Fire revealed the following violations of the Cleveland Codified Ordinances:

EGRESS
- ☐ CO 381.12: Exit lights not maintained.
- ☐ CO 381.12(a): Exit is obstructed.
- ☐ CO 381.12(d): Means of egress not maintained.
- ☐ CO 3111.01: Emergency lighting inoperable.
- ☐ CO 3111.01: No emergency lighting.

EXTINGUISHERS
- ☐ CO 389.35 (c) (1): Insufficient number of extinguishers.
- ☐ CO 389.35 (d) (2): Extinguishers not mounted.
- ☐ CO 389.35 (f) (1) & (2): Extinguishers not maintained

OCCUPANCY
- ☐ CO 3105.10: There is no Certificate of Occupancy for the premises.
- ☐ CO 3105.11(d): No approval for change of use.

For the above violations, property will be referred to the Division of Building and Housing.

STANDPIPE
- ☐ CO 389.12(b): Fire Department standpipe connection is inaccessible.
- ☐ CO 389.12(g): Fire Department standpipe connections are not properly marked.
- ☐ CO 389.16(a): No records of standpipe tests.
- ☐ CO 389.17(b): Standpipe system not maintained.

HOOD SYSTEM
- ☐ CO 3101.07 Ref. NFPA 96: No hood system as required.
- ☐ CO 3101.07 Ref. NFPA 96: Hood system is inoperable or shut off.
- ☐ CO 3101.07 Ref. NFPA 96: No records indicating hood system has been tested.

MANUAL FIRE ALARM
- ☐ CO 391.15: New fire alarm system not tested.
- ☐ CO 391.16: No monthly testing of fire alarm system.
- ☐ CO 391.17: Manual fire alarm not being maintained.

AUTOMATIC FIRE ALARM AND DETECTION
- ☐ CO 391.23 (c): New automatic fire alarm not tested.
- ☐ CO 391.23(d): No monthly tests of automatic fire alarm
- ☐ CO 391.23 (e): Automatic fire alarm not being maintained

SUPPRESSION SYSTEM
- ☐ CO 389.22: There is no automatic fire suppression system.
- ☐ CO 389.28(b): Sprinkler control valves are not properly marked.
- ☐ CO 389.29(d): Fire Department sprinkler connections are not properly marked.
- ☐ CO 389.29(a) No Fire Department connection.
- ☐ CO 389.34(a): Sprinkler system is inoperable or shut off.
- ☐ CO 389.94: No records indicating sprinkler system has been tested.
- ☐ CO 389.34(a): Sprinkler system not maintained.

STORAGE of HAZARDOUS MATERIALS / PERMITS
- ☐ CO 381.05: No permits for hazardous materials. (flammable liquids, combustible liquids, compressed gases, liquefied petroleum gases, corrosive liquids, flammable solids, highly toxic materials, oxidizers, poisonous gases, radioactive material, unstable (reactive) chemicals, cryogenic liquids, fumigants, fuel gases and explosives).
- ☐ CO 381.05(c): Permit(s) revoked.

OTHER CO#: **Description of Violation(s) / Comments:** Lock Valves Shut Off Valve inoperable / Need Spare Sprinkler Heads

You are hereby notified to abate the above violation(s) by thirty (30) days from the date of this letter. If you are aggrieved by this order, you may file an appeal with the Board of Building Standards & Building Appeals within thirty (30) days from the date of this letter.

Should an appeal of this order be filed with the Board of Building Appeals within thirty (30) days, a copy of the appeal statement and specific grounds for appeal shall be forwarded to the Cleveland Fire Prevention Bureau.

If you have any questions, please call the Cleveland Fire Prevention Bureau, (216) 664-6664. The Bureau's FAX is (216) 664-6681.

BATTALION 1 **April 21, 2004**

TO: Mark J. Scott Fire Marshall FPB

FROM: Johnny J. Brewington, BC B-1

SUBJECT: FPB REFERRAL FOR 8925 HOUGH AVENUE (Community Circle II)

I RESPECTFULLY REQUEST THAT THE FPB FOLLOW-UP ON A SPRINKLER SYSTEM ACTIVATION AT 8925 HOUGH AVENUE, COMMUNNITY CIRCLE II APARTMENTS ON APRIL 18, 2004 (INC. # 15489 @ 2250).

A SPRINKLER HEAD FOR THE TRASH COMPACTER WAS REPLACED AND THE SYSTEM RESTORED. THE PUMP ROOM DOOR AND OS&Y VALVES SHOULD BE LABEL FOR PROPER IDENTIFICATION PURPOSE.

THE WRONG ELEVATOR KEY FOR THE MANUAL OVERRIDE OPERATION WAS ONSITE. ACCESS ABOVE THE GROUND FLOOR LEVEL WAS HAMPERED BY LOCKED EGRESS SYSTEM THAT DOES NOT RELEASE WHEN THE FIRE ALARM SYSTEM IS ACTIVATED.

I AM REQUESTING THAT A KNOX BOX SYSTEM BE PLACED ON THIS PREMISE.

PLEASE ADVISE ME OF THE RESOLVE TO THIS MATTER AS SOON AS POSSIBLE.

To: Royce Security (1st, 2nd , 3rd shift)

Re: Mandatory walk-thru/training

On Wednesday February 26, 2003 at 11:30 a.m.. The service manager and the maintenance technician will conduct a complete walk-thru of the building floors 9-1. Each person on all shifts will be properly trained to operate both elevators in case of an emergency situation.

You will also be shown how direct any that may need to utilize the stairways to get from one floor to another in the event the elevators are down. We will go over all keys and familiarize yourself as to what keys are used for what. We will also go over the evacuation plan for this building in the event an emergency should occur and a evacuation is needed. Once all of these areas are completed there is a section at the bottom of this page that will require signatures from both parties.

By signing you are saying that you were shown how to or what to do in the event of emergency. And that you are familiar with procedures.

Fire Prevention Bureau

SUBJECT: ***Disposition of Referral to F.P.B.***

Referral dated: June 15, 2002
Location: 8925 Hough, Comm. Circle II Apts.

Violation or Situation Referred: Alarm system and elevator recall could not be reset, because there was no key holder available.

The answering service had the wrong phone number for the on call maintenance person. This problem was corrected.

Disposition as of: July 2, 2002

A courtesy officer is on site from 5:00 p.m. to 6:00 a.m., Monday through Sunday. The courtesy officer have keys to the alarm system and the elevator, therefore they are aware of how to control alarms, as well as, the elevators if needed.

The Bureau will advise you of any final determination, as information becomes available.

BATTALION NO. One 10-3-01 19

To: Fire Prevention Bureau

From: Chester J. Ashton, BC B-1

Subject: Access at 8925 Hough

I respectfully report that B1 responded to an alarm at 8925 Hough Ave. The alarm was on the 9th floor. Security on scene did not have any keys to reset the elevators which were at the lobby level and unable to be used. They also did not have any keys to open the stairwells at either end of the building. There were no maitenance persons on site. We had to force the door of the south stairwell to gain acess to the 9th floor apartment.

I would request that the FPB inspect this facility to resolve these issues as soon as possible.

If you have any questions, please contact me at B1. I would like to be at the facility when you make your inspection if possible.

COMMUNITY CIRCLE II

FIRE ALARM

&

EVACUATION
PROCEDURES

FOR

RESIDENTS

ALL RESIDENTS HAVE THE NEXT PAGES

THE FIRE ALARM SYSTEM

COMMUNITY CIRCLE II was designed and built with some of the most up to date and efficient fire detection and suppression equipment available. Below is a list of the major parts of this system. Take a few minutes as you walk through the halls and familiarize yourself with it.

MAIN FIRE ALARM CONTROL PANEL
Located in the lobby, it's the "brains" of the system. It is designed to constantly monitor all of the fire alarm equipment in the building.

FIRE HOSE CABINETS
Located at each end of every hallway. Contains a fire extinguisher that can be used on all types of fires.

SMOKE DETECTORS
Located on the ceiling throughout the building. They are round and white, similar to the ones in your apartment. They are also located in the trash chute, stairways, elevator shaft, mechanical rooms, office and maintenance room. These are designed to constantly monitor the air in the building and activate the alarm when smoke is detected. The detectors in your apartment monitor the air the same way but do not activate the main fire alarm.

Each apartment has one smoke detectors in it. This is located above the doorway on the living room side. The hearing impaired has a detector that will beep and flash a bright white light.

SPRINKLER HEADS
Located on the ceiling in all apartment and common areas of the building as well as the trash chute, office, mechanical and maintenance rooms. When heated above 135 degrees a seal will melt and water will spray out of the head. Each head works independently from the rest. Any water flowing through a sprinkler head will activate the main fire alarm.

FIRE ALARM PULL STATIONS
Located on the wall at both ends of every hallway the main fire alarm when pulled straight down towards the floor.

ELEVATOR LOBBY FIRE DOORS
When the fire alarm is activated, please do not use the elevators. Smoke will cause the elevators to lock and return to the first floor.

FIRE STAIRS
Located through the doors at the ends of all the hallways. These are to be used as an escape route in case of fire. They exit outside of building.

THAT IS ALL OF THE EQUIPMENT FOR THE FIRE ALARM SYSTEM. FOLLOWING IS A DESCRIPTION OF HOW IT WORKS AND WHAT YOU, THE RESIDENTS, SHOULD DO.

EVACUATION PROCEDURES

When the alarm is activated, the FIRE ALARM will emit a siren type sound until it is shut off.
One very important thing to remember - WHEN THE FIRE ALARM IS ACTIVATED — IT WILL SOUND ON ALL FLOORS. PLEASE REMAIN CALM.

If you are physically unable to go down the stairs then REMAIN IN YOUR APARTMENT. The firemen know where all of our handicapped tenants are so just remain calm and wait for them to come and get you.

Remember that the elevators are not to be used during a fire.

NOTE: THE MANAGEMENT OF COMMUNITY CIRCLE II TRIES TO MAINTAIN AN UP TO DATE LIST OF ALL RESIDENTS THAT MAY REQUIRE ASSISTANCE IN THE EVENT OF AN EVACUATION. IF YOU FEEL THAT YOU PHYSICALLY CANNOT TOLERATE WALKING THE STAIRS DURING AN EVACUATION PLEASE NOTIFY THE OFFICE AS SOON AS POSSIBLE. THIS LIST IS MADE AVAILABLE TO THE FIRE DEPARTMENT IN THE EVENT OF AN EMERGENCY.

COMMUNITY CIRCLE II

8925 HOUGH AVENUE • CLEVELAND, OHIO 44106 • TEL. (216) 795-3950

IN CASE OF FIRE (READ OFTEN)

a. Remain calm.

b. Feel door to apartment. If hot, place wet towel at the bottom of the door. Go to an open window and make your presence known.

c. If smoke is coming in the window from below, close the window and try another. If smoke coming in the window is making the situation worse, remember:

   1. If door was hot to touch, you are better off in your room.

   2. There is air to breathe between knee level and floor.

   3. Do not panic - remember help is on the way.

d. If door is not hot, open it slightly and check for smoke. If there is smoke at the ceiling and little heat, walk in a crouched position or crawl to the fire exit.

e. If the hall is filled with smoke, follow the procedure above as if door was hot to touch.

f. If exiting, close the apartment door behind you.

g. DO NOT use the elevators.

h. Know all alternate routes of safe exit, if the closest exit is blocked.

i. EMERGENCY NUMBERS:

   BUILDING MANAGMENT
   FIRE, POLICE and E.M.S.
   DOCTOR and HOSPITAL

j. Report to assigned area or alternate area of refuge. (If you are not accounted for, valuable time will be lost locating you while others may be in immediate danger.)

k. Do not re-enter the building unless the Fire Department has given permission. Report to your floor warden and do not go alone. (The absence of flame and smoke does not mean that the area is safe to enter - there may be carbon monixide in the air or structural damage not visible to the naked eye).

l. Do not search for, nor attempt to carry out, vauables or pets with you.

m. Alert others if possible.

n. Have you tested your smoke detector this week? Do you think it is located properly? Have you heard the fire alarm system tested this month? Can you hear it in your apartment with the T.V. or radio on?

o. When you have reached an area of safety, do not assume someone else has reported this fire.

p. If smoke is encountered in the stairwell, re-enter on a floor free of smoke and make your way to another smoke-free stairway.

q. Do not jump from windows.

IN CASE OF BUILDING EVACUATION
WE WILL FOLLOW FLOOR EVACUATION PLAN.
LOOK AT THE DIAGRAM AND MEMORIZE IT.

SEVERE STORMS

During a Tornado WATCH, which means that weather conditions are such that a Tornado is possible, you should begin the following procedures:

1. Locate a flashlight and turn a PORTABLE radio to a local AM/FM station for storm news.
2. Remain calm and locate all members of your family.
3. Close all windows and pull all shades.
4. Securce a blanket, towel, coat or anything you can use for protection, yet breathe through, for each member of your family.
5. Also locate your car keys and wallet: should a tornado hit, and your car is still operable after, keys could be lost in rubble and you would have no way of leaving the area for safety.

If there is a Tornado WARNING, whcih means a tornado has been sighted, you should do the following IMMEDIATLY:

1. Move to lowest floor possible.
2. In Senior's lowest floor and center halls away from glass areas.
3. Take flashlights, radio and car keys with.
4. In the hallways or rooms you go to, you should get on hands and knees and cover you head and neck with the blanket to protect any exposed skin.
5. If you live on the ground floor, go to a closet or bathroom in your unit.
6. Remain there until the storm has passed and check the people for injury.
7. Begin immediate First Aid where needed.
8. Should the building be evacuated, report to the central meeting location which is: THE COMMUNITY ROOM

After the storm has passed report any gas leaks or electrical damage. Notify your relatives of your safety. Limit calls to 1 minute each. Do Not tie up the phone lines with unnecessary calls.

During a Severe Storm, where a lot of lightning is present, you should stay away from sinks and electrical items, in case of a power surge, or lightning strikes the building. Turn off T.V.., air-conditioners and other electrical items to help prevent damage to them. Use a battery powered radio to listen to local stations for progress of the storms. Have flashlights located in case of power outage.

Abatement Order

ADDRESS _____ DATE _____ BUILDING# _____
BUSINESS NAME _____ BUSINESS PHONE _____
OWNER'S NAME _____ OWNER'S PHONE _____
OCCUPANCY TYPE: _____ CONSTRUCTION TYPE I II III IV V STORY _____

A recent inspection of the subject location by Inspector _____ of the Division of Fire revealed the following violations of the Cleveland Codified Ordinances:

EGRESS
- ☐ CO 381.12: Exit lights not maintained.
- ☐ CO 381.12(a): Exit is obstructed.
- ☐ CO 381.12(d): Means of egress not maintained.
- ☐ CO 3111.01: Emergency lighting inoperable.
- ☐ CO 3111.01: No emergency lighting.

EXTINGUISHERS
- ☐ CO 389.35 (c) (1): Insufficient number of extinguishers.
- ☐ CO 389.35 (d) (2): Extinguishers not mounted.
- ☐ CO 389.35 (f) (1) & (2): Extinguishers not maintained

OCCUPANCY
- ☐ CO 3105.10: There is no Certificate of Occupancy for the premises.
- ☐ CO 3105.11(d): No approval for change of use.

For the above violations, property will be referred to the Division of Building and Housing.

STANDPIPE
- ☐ CO 389.12(b): Fire Department standpipe connection is inaccessible.
- ☐ CO 389.12(g): Fire Department standpipe connections are not properly marked.
- ☐ CO 389.16(a): No records of standpipe tests.
- ☐ CO 389.17(b): Standpipe system not maintained.

HOOD SYSTEM
- ☐ CO 3101.07 Ref. NFPA 96: No hood system as required.
- ☐ CO 3101.07 Ref. NFPA 96: Hood system is inoperable or shut off.
- ☐ CO 3101.07 Ref. NFPA 96: No records indicating hood system has been tested.

MANUAL FIRE ALARM
- ☐ CO 391.15: New fire alarm system not tested.
- ☐ CO 391.16: No monthly testing of fire alarm system.
- ☐ CO 391.17: Manual fire alarm not being maintained.

AUTOMATIC FIRE ALARM AND DETECTION
- ☐ CO 391.23 (c): New automatic fire alarm not tested.
- ☐ CO 391.23(d): No monthly tests of automatic fire alarm
- ☐ CO 391.23 (e): Automatic fire alarm not being maintained

SUPPRESSION SYSTEM
- ☐ CO 389.22: There is no automatic fire suppression system.
- ☐ CO 389.28(b): Sprinkler control valves are not properly marked.
- ☐ CO 389.29(d): Fire Department sprinkler connections are not properly marked.
- ☐ CO 389.29(a) No Fire Department connection.
- ☐ CO 389.34(a): Sprinkler system is inoperable or shut off.
- ☐ CO 389.94: No records indicating sprinkler system has been tested.
- ☐ CO 389.34(a): Sprinkler system not maintained.

STORAGE of HAZARDOUS MATERIALS / PERMITS
- ☐ CO 381.05: No permits for hazardous materials. (flammable liquids, combustible liquids, compressed gases, liquefied petroleum gases, corrosive liquids, flammable solids, highly toxic materials, oxidizers, poisonous gases, radioactive material, unstable (reactive) chemicals, cryogenic liquids, fumigants, fuel gases and explosives).
- ☐ CO 381.05(c): Permit(s) revoked.

OTHER CO#: _____ **Description of Violation(s) / Comments:** _____

You are hereby notified to abate the above violation(s) by thirty (30) days from the date of this letter. If you are aggrieved by this order, you may file an appeal with the Board of Building Standards & Building Appeals within thirty (30) days from the date of this letter.

Should an appeal of this order be filed with the Board of Building Appeals within thirty (30) days, a copy of the appeal statement and specific grounds for appeal shall be forwarded to the Cleveland Fire Prevention Bureau.

If you have any questions, please call the Cleveland Fire Prevention Bureau, (216) 664-6664. The Bureau's FAX is (216) 664-6681.

Mr. Lee Peterson
City of Cleveland
Inspector/Legislative Officer
Fire Prevention Bureau
Division of Fire
1645 Superior Ave.
Cleveland, OH 44114

Dear Mr. Peterson:

The Fire Department was called to Community Circle II for the Alarm System. The concern was that no one was here to shut off alarms.

The answering service had the wrong phone number for the on call maintenance person. This problem was corrected. We confirmed that the answering service has the correct contact number for all on call persons.

Also, a Courtesy Officer is on site from 5:00 p.m. to 6:00 a.m. Monday through Sunday. The Courtesy Officer has keys to alarm system and the elevator therefore they are aware of how to control alarms as well as the elevators if needed.

If you have any questions regarding this matter please contact me at 216-759-3950.

Sincerely,

Debbie Stewart
Sr. Community Manager

Automatic Sprinkler Systems

General Information

Date: 3-5-02 Inspector: MICHAEL O'HARA JIM VEBANEK System: SPRINKLER

Location:

General

System designation

Building COMMUNITY CIRCLE II

Location of sprinkler valve

Type of sprinkler system ☒ Wet ☐ Dry ☐ Deluge ☐ Preaction

Make and model of sprinkler valve

Is building fully sprinklered? ☒ Yes ☐ No

Is entire sprinkler system in service? ☒ Yes ☐ No

Has sprinkler system been modified since last inspection? ☐ Yes ☒ No

Valves

How are valves supervised? ☐ Seated ☒ Locked ☐ Tamper switch

Are valves indentified with signs? ☐ Yes ☒ No

Water Supply (See Chapter 9 of this manual.)

When was last water supply test made?

Are reservoirs, tanks, or pressure tanks in good condition? ☐ Yes ☒ No

Pumps (See Chapter 8 of this manual.)

Is fire pump ☐ Diesel ☒ Electric ☐ Gasoline ☐ None?

When was pump last inspected? SAME DAY 3-5-02

Is pump in good condition? ☒ Yes ☐ No

Fire Department Connections

Location REAR OF BLDG

Are identification signs provided? ☐ Yes ☐ No

Wet Systems

Is building adequately heated? ☒ Yes ☐ No

Is system hydraulically calculated? ☐ Yes ☐ No

If yes, is hydraulic information sign provided at valve? ☐ Yes ☐ No

Dry Systems

Is dry pipe valve in heated room? ☐ Yes ☐ No

Does heated room have low-temperature alarm? ☐ Yes ☐ No

Deluge System (See Chapter 1 of this manual for discussion of detection systems.)

Preaction System (See Chapter 1 of this manual for discussion of detection systems.)

Automatic Sprinkler Systems

Annual Inspection and Tests

Date: 3-5-02 **Inspector:** MICKEY O'HAIRE JIM WEBBER **System:**

Location: COMMUNITY CIRCLE II

Y = Satisfactory N = Unsatisfactory (explain on reverse) N/A = Not applicable	
General Condition Inspect sprinklers, sprinkler piping, pipe, hangers, and seismic braces to make sure they are in good condition.	Y
Verify supply of spare sprinklers.	Y
Freezing Before freezing weather, inspect building to assure exterior wall openings will not expose sprinkler piping to freezing temperatures.	Y
Test Antifreeze Wet pipe systems with antifreeze solution should have the solution checked for proper freeze level. Record freezing point.	N/A
Maintain Valves Valves should be maintained, including exercising each valve and lubricating each valve stem.	Y
Clean Strainers Shut the water supply valve and remove the strainer for thorough cleaning.	N/A
Dry Pipe System Trip test the dry pipe valve. Record the time from opening the inspector's test valve until the dry pipe valve trips.	N/A
Internally inspect dry pipe valve.	N/A
Test air pressure maintenance device.	N/A
Inspect/test low-temperature alarm in valve room (if provided).	N/A
Preaction Sprinkler System Trip test the preaction system. (Refer to manufacturer's instructions.)	N/A
Internally inspect preaction valve.	
Test automatic air pressure maintenance device (if provided) at time of trip test.	
Inspect/test low-temperature alarm in valve room (if provided).	
Deluge Sprinkler System Trip test the deluge system. (Refer to manufacturer's instructions.)	N/A
Record time from activation of detector until water is discharged.	
Check to see that water discharge pattern is adequate.	
Record water pressure at hydraulically most remote sprinkler.	
Record water pressure at deluge valve.	
Internally inspect deluge valve.	
Inspect/test low-temperature alarm (if provided).	
Cooking Equipment Sprinklers Replace sprinklers with fusible links.	N/A

FORM 7-B

Standpipe and Hose Systems

Standpipe Hydrostatic and Flow Test

Date: 3-5-02 **Inspector:** MICKEY SHARP JIM LABANIK **System:** _____

Location: COMMUNITY CIRCLE II

Standpipe System _____

Initial Test Pressure Record the hydrostatic test pressure at the start of the test. Test pressure should be 200 psi (13.8 bar) or 50 psi (3.4 bar) above normal pressure if normal pressure exceeds 150 psi (10.3 bar).	
Start Time Record the time at the start of the test after the test pressure is reached.	
End Time Record the time at the conclusion of the hydrostatic test. The system should hold the pressure for at least 2 hours.	
End Test Pressure Record the hydrostatic pressure at the conclusion of the test.	

Flow Test NORTH STAND PIPE

Flow water from the hydraulically most remote standpipe outlet.

Record:

Static pressure: 130 psi (bar)

Nozzle diameter: 13/4 in. (cm)

Flow: 502 gpm (L/min)

Residual pressure: _____ psi (bar)

Pitot pressure: 32 psi (bar)

Note: The minimum flow should be 500 gpm (1893 L/min) at 100 psi (6.9 bar) residual pressure for Class I or III systems and 100 gpm (379 L/min) at 65 psi (4.5 bar) for Class II systems.

Notes _____

SOUTH STAND PIPE

FORM 7-F

Standpipe and Hose Systems

Annual Inspection and Maintenance

Date: _____ **Inspector:** _____ **System:** _____

Location: _____

Hose Outlet Identify hose outlet location.	Top Floor
Check Nozzles Test hose nozzles to confirm: Waterway clear of obstructions	✓
No damage to tip	✓
Full operation of adjustments	✓
Proper operation of shutoff	✓
No missing parts	✓
Thread gasket in good condition	✓
If nozzles are in good condition, note "OK" in block. If not, see that corrections are made and briefly describe actions taken.	
Lubricate Swing-Out Racks Lubricate swing-out racks with graphite to assure they operate properly. Record "OK" in block if no problems are found.	
Rerack Hose Remove and rerack hose so that different parts of hose are located at bends. Check gaskets for deterioration and replace if necessary.	
Visually Inspect Dry Piping Visually inspect all accessible piping for damage and corrosion. If piping is in good condition, note "OK" in block. If not, see that corrections are made and briefly describe actions taken.	
Conduct Main Drain Test See Chapter 2 of this manual for conduct of main drain test.

CERTIFIED MAIL

Dear Lieutenant Jenkins:

This is in response to the letter dated April 10, 2001 from Captain Mark Scott, Fire Marshall in regards to the maintenance records for the sprinkler system, fire pump and wet standpipe system.

Enclosed you will find the records for the above mentioned items that have recently been conducted on our property. You should find everything in order.

If you have any questions or need further clarification, please don't hesitate to call me at (216) 795-3950.

Sincerely,

Cassandra Bell

CERTIFIED MAIL

Dear Lieutenant Jenkins:

This is in response to the letter dated April 10, 2001 from Captain Mark Scott, Fire Marshall in regards to the maintenance records for the sprinkler system, fire pump and wet standpipe system.

Enclosed you will find the records for the above mentioned items that have recently been conducted on our property. You should find everything in order.

If you have any questions or need further clarification, please don't hesitate to call me at (216) 795-3950.

Sincerely,

Cassandra Bell

Address: 8925 HOUGH AVE CLEVELAND OH 44106

Rep. of Protected Prop. (name/phone) CASANDRA BELL / 795-3950

Authority Having Jurisdiction: X Robert Ryan

Address/Phone Number X 1640 SUPERIOR AV. 216 664 6669

Type(s) of System or Service

_____ NFPA 72, chapter 3 - local: If alarm is transmitted to location(s) off premises, list where received:

_____ NFPA 72, Chapter 3 - Emergency Voice/Alarm Service

Quantity of Voice/alarm channels: _____ Single: _____ Multiple: _____

Quantity of speakers installed: _____ Quantity of speakers zones: _____

Quantity of telephone jacks included in system: _____

_____ NFPA 72, Chapter 4 - Auxiliary

Indicate type of connection Local energy: _____ Shunt: _____ Parallel telephone: _____

Location and telephone number of receipt of signals: _____

_____ NFPA 72, Chapter 4 - Remote Stationz

Alarm: _____ Supervisory: _____

_____ NFPA 72, Chapter 4 - Proprietary: If alarms are transmitted to public fire service communications center or others, indicate location and telephone number of the organization receiving alarm: _____

Indicate how alarm is transmitted: _____

X NFPA 72, Chapter 4 - Central Station

The Prime Contractor: **ADT Security Services, Inc.**

Central Station Location: MADISON HGTS ILL.

Fundamentals of Fire Alarm Systems

Means of transmission of signals from the protected premises to the central station:

_____ McCullon _____ Muliplex _____ One-Way Radio X Digital Alarm Communicator

_____ Two-Way Radio _____ Others _____

Means of transmission of alarms to the public fire service communications center:

(a) _____ (b) _____

System Location: MAINT OFFICE ROOM 1ST FLOOR

Fundamentals of Fire Alarm Systems (cont.)

	Organization Name/Phone	Representative Name/Phone
Installer	ADT SECURITY	SOUTH EAST SECURITY 1-888-420-8580
Supplier	ADT SECURITY	"
Service Organization:	ADT SECURITY.	"

Location of Record (As-Built) Drawings: ~~[illegible]~~ MAINT. ROOM TN PANEL

Location of Owners Manuals: MAINT ROOM TN PANEL

Location of Test Reports: _____

A contract, dated 11-29, for test and inspection in accordance with NFPA standard(s) No(s), dated 11-29, is in effect.

Record of System Installation

(Fill out after installation is complete and wiring checked for opens, shorts, ground faults, and improper branching, but prior to conducting of operational acceptance tests.)

This system has been installed in accordance with the NFPA standards as shown below, was inspected by _____ on 11-29. Includes the devises shown below, and has been in service since 11-15-00

x NFPA 72. Chapters (1 3 4 5 6 7) (Circle all that apply)

x NFPA 70. National Electrical Code. Article 760: X Manufacturer's Instructions _____ Other (specify): _____

Signed: [illegible] Date: 11-29-00

Organization: SOUTH EAST SECURITY (ADT)

Record of System Operation (Complete after operational acceptance test)

All operational features and functions of this system were tested by _____ on _____ found to be operating properly in accordance with the requirements of:

X NFPA 72. Chapters (1 3 4 5 6 7) (Circle all that apply)

_____ NFPA 70. National Electrical Code. Article 760: _____ Manufacturer's Instructions X Other (specify): _____

Signed: x _____ Date: x _____

Organization: x _____

Alarm - initiating Devises and Circuits (use blanks to indicate quantity of devises)

MANUAL

(a) 22 Manual Stations _____ Noncoded, Activating _____ Transmitters, _____ Coded

(b) _____ Combination Manual Fire Alarm and Guard's Tour Coded Stations

AUTOMATIC

Coverage types: x Complete _____ Partial

(a) 54 Smoke Detectors _____ Ion X Photo

(b) _____ Duct Detectors _____ Ion _____ Photo

(c) _____ Heat Detectors _____ FT _____ RR _____ FT/RR _____ RC

(d) 10 Sprinkler Waterflow Switches: _____ Transmitters X Noncoded, Activating _____ Coded

(e) _____ Other (list): _____

ADT

Supervisory Signal - Initiating Devises and circuits (use blanks to indicate quantity of devises)

GUARDS TOUR

(a) _____ Coded Stations

(b) _____ Noncoded Stations, Activating _____ Transmitters

(c) _____ Compulsory Guard Tour Comprised of

_____ Transmitter Stations and

_____ Intermediate Stations

Note: Combination devises recorded under 4(b) and 5(a).

SPRINKLER SYSTEM

(a) _____ Coded Valve Supervisory Signaling Attachments

Valve Supervisory Switches, Activating

_____ Transmitters

(b) _____ Building Temperature Points

(c) _____ Site Water Temperature Points

(d) _____ Site Water Supply Level Points

Re: Traction Elevator Modernization

Pat:

We propose to modernize the existing elevator equipment in accordance with the plans and specifications. This quotation is based upon the following:

Modernization of elevator controls, motor generator, hoist motor, drive, governor, door operator, door hardware and landing equipment for 2 elevators.

PRICE: One hundred fifty seven thousand four hundred and five -and 00/100 Dollars- $157,405.

A 33% down payment is required to order equipment.

Should this proposal meet with your approval, please execute one (1) copy and return same to the address listed at the top of this proposal.

Manufacturing Lead Times: **12 Weeks** Installation Time: **15 Weeks**

This proposal is submitted for acceptance within **Thirty (30)** days from date executed by us.

This proposal, together with the terms and conditions printed on the back hereof and which are expressly made a part of this proposal and agreed to, when signed and accepted by the Purchaser and approved by an officer or an authorized representative of Dover Elevator Company shall constitute exclusively and entirely the contract between the parties and all prior representation or agreements, whether written or verbal, not incorporated herein, are superseded. No changes in or additions to this agreement will be recognized unless made in writing and properly executed by both parties.

Respectfully submitted,

DOVER ELEVATOR COMPANY

PURCHASE ORDER NUMBER (If required): _____

Form DC•64•E 10/97

Scope of Work

I. Machine Room

1. Controller: Replace existing controller with new TAC 50 microprocessor elevator controller. New controller includes all operations required by current elevator codes and ADA guidelines. The T IV controller provides smoother starts and stops, improved leveling, and quicker door response time.

2. Motor Generator Drive: Remove and dispose.

3. Hoist Motor: Remove and replace with new AC motor.

4. Drive: Replace with new VVVF Drive. The Dover VVVF drive is a high performance vector controlled, pulse width modulated AC motor drive system. The torque and speed are controlled precisely with fast response during acceleration, high speed, deceleration and leveling for an excellent ride. The Dover VVVF drive operated at a high power factor, typically 95%, regardless of the speed and load of the elevator. This means there is less current demand from the building AC supply.

5. Governor: Replace existing governor and governor rope with new.

6. Wiring: Supply new wiring and travel cord as needed.

II Hoistway

1. Leveling system: Install new tape leveling system to interface with controller.

2. Wiring / Conduit: Supply new hoistway wiring and travel cords as needed. All new wiring will conform to National Electric Code and ANSI A17.1 requirements.

III Door Operator

1. Door Operator: Replace existing door operator with new Dover door operator.

2. Hatch Door Equipment: Refurbish door interlocks, door tracks, door hangers and door closers. Reuse exiting hatch doors, frames, and sills.

3. Door Protection: Retain existing infrared safety edge.

IV Signal Fixtures

1. Car Signals:

a. Car Station: Reuse existing car station.

b. Car Riding Lantern: Replace existing with new.

c. Fire service fixtures: Install updated fire service fixture in side wall.

2. Hall Stations: Reuse existing hall call stations.

V **Ceiling grid:** Replace existing ceiling grid with new.

VI **Door Frames:** Replace existing aluminum door framing with new.

This proposal is subject to the following conditions and clarifications.

1. DOVER ELEVATOR STRONGLY RECOMMENDS THAT THE OWNER CONTACT THEIR STATE OF OHIO ELEVATOR INSPECTOR TO DETERMINE WHAT BUILDING UPGRADES WILL BE REQUIRED TO MEET CURRENT ELEVATOR CODES. ANY WORK DEEMED NECESSARY BY THE INSPECTOR AND NOT LISTED ABOVE IS NOT INCLUDED IN THIS PROPOSAL. PLEASE CONSULT THE ENCLOSED CODE CHECKLIST FOR ITEMS WHICH MAYBE IN QUESTION. Items in question include:

   a. Venting of hoistway to the outside air.
   b. Sump pit, sump pump, and non-combustible pit cover.
   c. Additional lighting in elevator machine room.
   d. Any piping or wiring unrelated to the elevator that may be in the machine room or hoistway.

2. The following items need to be provided by others and are not included in our proposal:

   a. Smoke sensors in each elevator lobby and the elevator machine room. Smoke sensors need to be wired back the elevator controller.
   b. Heating and air-conditioning in the machine room to maintain a temperature of 50° to 90° F.
   c. Self-closing, self-locking B-label machine room door.

3. If it is required to name the contractor, owner, architect, or others as additional insured it is with the understanding that the additional insured coverage shall not include for the acts, omissions or neglects of the additional insured.

4. It is expressly understood that we are not obligated to accept a contract at the quoted price, unless a mutually satisfactory job schedule can be established prior to the execution of a contract.

5. No addenda are included in our proposal.

6. This proposal is contingent upon Dover Elevator Company's contract department reviewing and approving the final contract document.

7. This proposal will become part of the contract for the elevator work.

8. We must have a change order signed by an authorized representative of your company in order to proceed with any additional work beyond the contract scope.

9. Our price will remain effective for thirty (30) days from the date offered if a time is not specified in the specifications.

10. This proposal does not include the Davis Bacon wage rates which requires that all employees working on this project be paid elevator mechanic scale.

11. Our proposal is based on one (1) elevator inspection. If a second inspection is required due to General Contractor or Owner violations, an additional fee of $800.00 will be charged for the inspection and labor to perform. **Thyssen Dover Elevator, Central Region, will perform work per *the approved contract.* The unit(s) shall not be released for use until all code requirements are satisfied, and the approval of the responsible inspection authority has been obtained.**

12. Includes NEMA 1 fixtures and controls.

13. Elevator electrical disconnect fuse size must be per Dover Elevator requirements. If battery operated lowering is provided per specification, a mechanical auxiliary contact shall be installed on the electrical disconnect switch for elevator. The auxiliary contact shall be configured as single pole single throw at 1AMP, 110 volt AC, and shall be open when the disconnect switch is in the open position. If a shunt trip circuit breaker is provided, an auxiliary contact shall be installed on the circuit breaker.

14. The telephone and/or communication system is not included in our proposal.

15. If the elevator is used for construction, protection must be provided by other trades and Dover Elevator's temporary acceptance must be signed, which includes an additional charge of $150.00 per week per elevator for hydraulic elevators and $200.00 per week per elevator for traction elevators to provide maintenance and warranty extension. If an elevator operator is required, the cost will be $124.00 per hour on regular time, and $248.00 per hour for overtime.

16. If additional work is required beyond the contract scope, our cost will be $208.00 per team hour on regular time and $416.00 per team hour for overtime.

17. Dover Elevator will perform its own cleaning on the jobsite. We will not accept any additional cleaning cost. If our cleaning is not adequate, we must be notified in writing so we may take corrective action.

Respectfully submitted,

Lou Cozza

OCCUPANCY/USE R-2 ELEVATOR

BUILDING TYPE I, II, III, IV, A, B, C DESCRIPTION Elevator Recall

CERTIFICATE OF OCCUPANCY DATE R-2 Elevator

REFERENCE City #-4758 4759 PERMIT NUMBER L-300729 L-300725

RESULT OF INVESTIGATION One elevator is out of service due to a modnernization job. The new elevator is currently out of service due to contractual disagreement between mgmt. co. and Dover Elevator. Dover Elevator Co. is switching recall fire service back to old elevator today, 4-9-01. Elevator recall will be left on old elevator system untill contractual agreement is resolved. Once this has been cleared up the recall system will be switched to new elevator and the old elevator will be taken out of service for modernization. When old elevator is completed both units will be on recall fire service. Please feel free to contact me if any clarification is necessary. 1, Thomas R. Tullar
Elevator Inspector

RE: 8925 Hough Ave.
Community Circle II Apts.
CERTIFIED MAIL

Dear Ms. Bell:

A recent inspection of the subject location by Lieutenant Jenkins, of the Division of Fire, revealed the following violation(s) of the Municipal Code(s) and the method(s) for correcting them:

1. There are no maintenance records for the sprinkler and fire pump systems. Municipal Code 389.34(a)(b)(c). Submit proper maintenance records for these water-based systems to the Cleveland Fire Prevention Bureau, attention Lieutenant Jenkins.

2. There are no maintenance records for the wet standpipe system. Municipal Code 389.16(a). Submit maintenance records for the wet standpipe system to the Cleveland Fire Prevention Bureau, attention Lieutenant Jenkins.

You are hereby notified to abate the above violation(s) by 30 days from the date of this letter. If you are aggrieved by this order, you may file an appeal with the Board of Building Standards & Building Appeals, Room #516, City Hall within 30 days from the date of this letter. ***If there are any questions, please call Lieutenant Jenkins at 664-6664.***

Should an appeal of this order be filed with the Board of Building Standards & Building Appeals within 30 days, a copy of the appeal statement and specific grounds for appeal shall be forwarded to the Fire Prevention Bureau.

Sincerely,

Mark J. Scott, Captain
Fire Marshal

SUBJECT F.P.B. Referral - Life Safety Hazard

SIR:

I respectfully submit that I am referring the Community Circle Apts. located at 8925 Hough Ave. to the F.P.B. for life safety hazard violations. The violations are as follows:

1) Fire doors to exterior in smoke towers on 1st floor tied shut with rope.
2) Fire doors on individual floors to interior in smoke towers unmarked with floor designation.
3) Heavy storage in front of main electrical panel and shut-offs.

Building maintenance was notified of violations but I am not confident that corrections will be made.

Signed,
Anthony P. Luke, Lt

RE: 8925 Hough Avenue

Dear Madam:

A recent inspection of the subject location by Inspector Cleveland, of the Division of Fire, revealed the following violation of the Municipal Code and the method for correcting it:

1. There is no documentation of a sprinkler inspection, servicing and testing. Municipal Code 381.04(b). Have the sprinkler system inspected, scrviced and tested by a certified sprinklcr contractor and forward documentation to Inspector Cleveland.

You are hereby notified to abate the above violation(s) by thirty (30) days from the date of this letter. If you are aggrieved by this order, you may file an appeal with the Board of Building Standards & Building Appeals, Room 516, City Hall, within thirty (30) days from the date of this letter.

Should an appeal of this Order be filed with the Board of Building Standards & Building Appeals within thirty (30) days, a copy of the appeal statement and specific grounds for appeal shall be forwarded to the Fire Prevention Bureau.

If you have any questions, please call Inspector Cleveland at the Cleveland Fire Prevention Bureau, [216] 664-6664. The Bureau's FAX is [216] 664-6681.

Sincerely,

Mark J. Scott, Captain
Fire Marshal

Linda K. Page, Director

September 7, 1989

Community Circle III
8925 Hough Ave.
Cleveland, Ohio 44106

Dear Tank Owner:

It has come to our attention that you are the owner of an underground storage tank(s) and that you may / may not have registered these tanks with the State Fire Marshal. According to the Administrative Code section 1301:7-7-35(c), you are required to register your underground storage tanks (UST's) if they were not excluded by the regulation. You can find a listing of excluded tanks on the back of the application, which is also included in this package.

Remember, you must:

1. Submit the new registration as soon as possible, since the initial deadline was January 31, 1989;

2. Submit a signed registration application for each separate facility; and,

3. Submit a fee of $20.00 per tank, payable to the State Fire Marshal, to accompany the application.

If you have already completed this form, please submit a copy to our office. If you have any questions, please call (614) 752-8200.

Sincerely,

Gregory Jay White

DIVISION OF FIRE

FIRE PREVENTION BUREAU

FILE

5-17-99

ADDRESS 8925 Hough
Circle II Apts.

A REINSPECTION OF THE ABOVE LOCATION

HAS REVEALED THE FOLLOWING: The sprinkler system has not been tested. Patricia Jackson states that the contractor has been waiting to find out what form was needed. She contacted the contractor and he was informed that the system should be inspected, tested and maintained according to NFPA 25.

Mrs. Jackson stated that the contractor would perform the work this week.

FAILURES AND RECOMENDATIONS ENCOUNTERED DURING TEST

1) SYSTEM DOES NOT HAVE STANDBY BATTERIES.

2) SYSTEM TROUBLE SOUNDER DOES NOT FUNCTION, REPLACEMENT PARTS NOT AVAILABLE. REPLACEMENT ADVISED.

3) PRIMARY RECALL FLOORS 2-9 WORKING PROPERLY, NO ALTERNATE FLOOR-1 INSTALLED. ALSO RECALL SMOKES NOT TIED TO SYTEM FOR SUPERVISION.

4) SYSTEM NOT TIED TO MONOTORING SYSTEM.

5) FOUND SEVERAL SPRINKLER VALVES NOT CHAINED OPEN. MUST BE SECURED OR SUPERVISED BY FIRE PANEL.

Acceptable Separation Distance (ASD) Electronic Assessment Tool

The Environmental Planning Division (EPD) has developed an electronic-based assessment tool that calculates the Acceptable Separation Distance (ASD) from stationary hazards. The ASD is the distance from above ground stationary containerized hazards of an explosive or fire prone nature, to where a HUD assisted project can be located. The ASD is consistent with the Department's standards of blast overpressure (0.5 psi-buildings) and thermal radiation (450 BTU/ft^2 - hr - people and 10,000 BTU/ft^2 - hr - buildings). Calculation of the ASD is the first step to assess site suitability for proposed HUD-assisted projects near stationary hazards. Additional guidance on ASDs is available in the Department's guidebook "Siting of HUD- Assisted Projects Near Hazardous Facilities" and the regulation 24 CFR Part 51, Subpart C, Sitting of HUD-Assisted Projects Near Hazardous Operations Handling Conventional Fuels or Chemicals of an Explosive or Flammable Nature.

Note: Tool tips, containing field specific information, have been added in this tool and may be accessed by hovering over the ASD result fields with the mouse.

Acceptable Separation Distance Assessment Tool

Is the container above ground?	**Yes:** ☑ **No:** ☐
Is the container under pressure?	**Yes:** ☐ **No:** ☑
Does the container hold a cryogenic liquified gas?	**Yes:** ☐ **No:** ☐
Is the container diked?	**Yes:** ☐ **No:** ☑
What is the volume (gal) of the container?	1850
What is the Diked Area Length (ft)?	
What is the Diked Area Width (ft)?	
Calculate Acceptable Separation Distance	
Diked Area (sqft)	
ASD for Blast Over Pressure (ASDBOP)	

ASD for Blast Over Pressure (ASDBOP)	
ASD for Thermal Radiation for People (ASDPPU)	357.36
ASD for Thermal Radiation for Buildings (ASDBPU)	66.82
ASD for Thermal Radiation for People (ASDPNPD)	
ASD for Thermal Radiation for Buildings (ASDBNPD)

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 3/18/2025 at 12:07 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

HISTORIC PRESERVATION

OHIO HISTORIC PRESERVATION OFFICE:
RESOURCE PROTECTION AND REVIEW

Section 106 Review - Project Summary Form

For projects requiring a license from the Federal Communications Commission, please use FCC Forms 620 or 621. DO NOT USE THIS FORM.

SECTION 1: GENERAL PROJECT INFORMATION

All contact information provided must include the name, address and phone number of the person listed. Email addresses should also be included, if available. Please refer to the Instructions or contact an OHPO reviewer (mailto:Section106@ohiohistory.org) if you need help completing this Form. Unless otherwise requested, we will contact the

Date: **7/3/2025**

Name/Affiliation of person submitting form: **Jeffrey Nagle, Project Historian, Mannik & Smith Group**

Mailing Address: **20600 Chagrin Blvd. Suite 500, Shaker Heights, Ohio 44122**

Phone/Fax/Email: **301-412-6365 / jnagle@manniksmithgroup.com**

person submitting this Form with questions or comments about this project.

A. Project Info:

1. This Form provides information about:
   New Project Submittal:
   YES NO

   Additional information relating to previously submitted project:
   YES **NO**

   OHPO/RPR Serial Number from previous submission:

2. Project Name (if applicable): **Hough Senior Independent Living**

3. Internal tracking or reference number used by Federal Agency, consultant, and/or applicant to identify this project (if applicable): **2300437.0029**

B. Project Address or vicinity: **8910 Hough Avenue**

C. City/Township: **Cleveland**

D. County: **Cuyahoga**

E. Federal Agency and Agency Contact. *If you do not know the federal agency involved in your project, please contact the party asking you to apply for Section 106 Review, not OHPO, for this information. HUD Entitlement Communities acting under delegated environmental review authority should list their own contact information.*

Housing & Urban Development

F. Type of Federal Assistance. *List all known federal sources of federal funding, approvals, and permits to avoid repeated reviews.*

HOME funds

G. State Agency and Contact Person (if applicable):

Ohio Housing Finance Agency
Rachel Nelson
Project Administration Section Chief
2600 Corporate Exchange Dr., Suite 300
Columbus, OH 43231
Ph: 614-644-7592
Fax: 614-644-5393
RNelson@ohiohome.org

H. Type of State Assistance:

I. Is this project being submitted at the direction of a state agency **solely** under Ohio Revised Code 149.53 or at the direction of a State Agency? *Answering yes to this question means that you are sure that no federal funding, permits or approvals will be used for any part of your project, and that you are seeking comments only under ORC 149.53.*

YES **NO**

J. Public Involvement- Describe how the public has been/will be informed about this project and its potential to affect historic properties. Please summarize how they will have an opportunity to provide comments about any effects to historic properties. (This step is required for all projects under 36 CFR § 800.2):

K. Please list other consulting parties that you have contacted/will contact about this project, such as Indian Tribes, Certified Local Governments, local officials, property owners, or preservation groups. (See 36 CFR § 800.2 for more information about involving other consulting parties). Please summarize how they will have an opportunity to provide comments: On June 4, 2025, the Ohio Department of Development sent letters to the following tribes requesting comment on the project: the Delaware Nation, the Eastern Shawnee Tribe of Oklahoma, the Forest County Potawatomi Community, the Hannahville Indian Community, the Little Traverse Bay Bands of Odawa Indians, the Miami Tribe of Oklahoma, the Ottawa Tribe of Oklahoma, the Seneca Nation of Indians, the Seneca-Cayuga Nation, and the Wyandotte Nation. To date, none of the tribes have responded.

SECTION 2: PROJECT DESCRIPTION AND AREA OF POTENTIAL EFFECTS (APE)

Provide a description of your project, its site, and geographical information. You will also describe your project's Area of Potential Effects (APE). Please refer to the Instructions or contact an OHPO reviewer if you need help with developing the APE or completing this form.

For challenging projects, provide as much information as possible in all sections, and then check the box in Section 5.A. to ask OHPO to offer preliminary comments or make recommendations about how to proceed with your project consultation. This is recommended if your project involves effects to significant historic properties or if there may be challenging procedural issues related to your project. Please note that providing information to complete all Sections will still be required and that asking OHPO for preliminary comments may tend to delay completion of the review process for some projects.

A. Does this project involve any Ground-Disturbing activity: **YES** NO
(If **Yes**, you must complete all of Section 2.A. If **No**, proceed directly to Section 2. B.)

1. General description of width, length and depth of proposed ground disturbing activity:
   The main part of the Project Area runs approximately 245 feet east to west and approximately 165 feet north to south at the southeastern corner of Hough Avenue and 89th Street, with a southeastern portion approximately 42 feet north to south extending approximately 130 feet east to 90th Street. Depth of ground disturbing activity will be concomitant to the foundation of a three-story structure without basement.

2. Narrative description of previous land use and past ground disturbances, if known:
   By the time the first detailed maps of the area were created at the end of the nineteenth century, the Project Area was in use as a multi-story apartment building with storefronts below. The Project Area continued to fill in; by 1936, three multi-story apartment buildings were present in the Project Area along Hough and three single-family houses present to the south, two on 89th and one on 90th, along with their outbuildings. The area remained densely urban into the 1970s, when two of the apartment buildings at the corner of Hough and 89th and a house along 89th were razed. Another apartment building along Hough in the northeast part of the Project Area was razed around 2011, and a house at the southwest corner at the Project Area was razed in 2018.

3. Narrative description of current land use and conditions:
   The Project Area is currently vacant, with grass and light tree cover.

4. Does the landowner know of any archaeological resources found on the property?
   YES **NO** If yes, please describe:

B. Submit the exact project site location on a USGS 7.5-minute topographic quadrangle map for all projects. Map sections, photocopies of map sections, and online versions of USGS maps are acceptable as long as the location is clearly marked. Show the project's Area of Potential Effects (APE). It should be clearly distinguished from other features shown on the map:

1. USGS Quad Map Name:
   Cleveland East
2. Township/City/Village Name:

Cleveland

C. Provide a street-level map indicating the location of the project site; road names must be identified and legible. Your map must show the exact location of the boundaries for the project site. Show the project's Area of Potential Effects (APE). It should be clearly distinguished from other features shown on the map: **See Figure 2**

D. Provide a verbal description of the APE, including a discussion of how the APE will include areas with the potential for direct and indirect effects from the project. Explain the steps taken to identify the project's APE, and your justification for the specific boundaries chosen:

The northwest corner of the APE is at the northwest corner of the Thurgood Marshall Recreation Center. It continues east to Kingsbury Tower, then turns south and proceeds east along the unnamed alley north of Hough to the northeast corner of 9001 Hough. It turns south and proceeds along the eastern property line of properties along E. 90th to Amesbury Ave, then continues further south to the southeast corner of 1789 E. 90th. It turns west and, jogging slightly north at 90th to proceed west along the southern boundary of 1782 E. 90th. It follows this line to the alley known as E. 88th Place, then proceeds north to Hough, then turns west and, at E. 86th, turns north to the starting point.

The APE includes the vacant parcel consisting the Project Area as well as surrounding residential, commercial, and institutional properties within view of the proposed new construction.

E. Provide a detailed description of the project. This is a critical part of your submission. Your description should be prepared for a cold reader who may not be an expert in this type of project. The information provided must help support your analysis of effects to historic properties, not other types of project impacts. Do not simply include copies of environmental documents or other types of specialized project reports. If there are multiple project alternatives, you should include information about all alternatives that are still under active consideration:

The Hough Senior Independent Living is a new construction senior housing development consisting of an approximately 47,000 square foot, multi-family 3-story apartment building with fifty-five (55) one-bedroom units, located in the Hough neighborhood on Cleveland's east side, between East 89th Street and East 90th Street (hereinafter referred to as the "Site"). Hough Senior Independent Living will provide a welcoming environment that is close in proximity to transportation, amenities, and medical services, including the Cleveland Clinic and University Hospitals, in the City of Cleveland. Common areas for the development will include a community room, pantry/kitchen, laundry rooms, lobby/lounge, outdoor patio, elevator, management office, and mailbox area, along with back-of-house support spaces. CHN Housing Partners will be the developer, owner, property manager, and supportive service provider for Hough Senior Independent Living.

SECTION 3: IDENTIFICATION OF HISTORIC PROPERTIES

Describe whether there are historic properties located within your project APE. To make that determination, use information generated from your own Background Research and Field Survey. Then choose one of the following options to report your findings. Please refer to the Instructions and/or contact an OHPO reviewer if you are unsure about how to identify historic properties for your project.

If you read the Instructions and you're still confused as to which reporting option best fits your project, or you are not sure if your project needs a survey, you may choose to skip this

section, but provide as much supporting documentation as possible in all other Sections, then check the box in Section 5.A. to request preliminary comments from OHPO. After reviewing the information provided, OHPO will then offer comments as to which reporting option is best suited to document historic properties for your project. Please note that providing information to complete this Section will still be required and that asking OHPO for preliminary comments may tend to delay completion of the review process for some projects.

Recording the Results of Background Research and Field Survey:

A. **Summary of discussions and/or consultation with OHPO** about this project that demonstrates how the Agency Official and OHPO have agreed that no Field Survey was necessary for this project (typically due to extreme ground disturbance or other special circumstances). Please **attach copies** of emails/correspondence that document this agreement. You must explain how the project's potential to affect both archaeological and historic resources were considered.

B. **A table that includes the minimum information** listed in the OHPO Section 106 Documentation Table (which is generally equivalent to the information found on an inventory form). This information must be printed and mailed with the Project Summary Form. To provide sufficient information to complete this Section, you must also include summary observations from your field survey, background research and eligibility determinations for each property that was evaluated in the project APE.

C. **OHI (Ohio Historic Inventory) or OAI (Ohio Archaeological Inventory) forms**- New or updated inventory forms may be prepared using the OHI pdf form with data population capabilities, the Internet IForm, or typed on archival quality inventory forms. To provide sufficient information to complete this Section, you must include summary observations from your field survey and background research. You must also include eligibility determinations for each property that was evaluated in the project APE

D. **A historic or archaeological survey report** prepared by a qualified consultant that meets professional standards. The survey report should meet the Secretary of the Interior's Standards and Guidelines for Identification and OHPO Archaeological Guidelines. You may also include new inventory forms with your survey, or update previous inventory forms. To complete this section, your survey report must include summary observations from your field survey, background research and eligibility determinations for each property that was evaluated within the APE.

E. **Project Findings**. Based on the conclusions you reached in completing Section 3, please choose one finding for your project. There are (mark one):

Historic Properties Present in the APE: The APE includes six properties that contribute to the East 89th Street National Register District: the Frank Finley House at 1762 E. 89th, the William Goodhue House at 1768 E. 89th, the Ernest Meyer House at 1769 E. 89th, the Emilie Reich House at 1772 E. 89th, Havyn Apartments at 1780 E. 89th, and the Bolton Manor Apartments at 1781 E. 89th. All are listed under Criterion C. One other property, 8812 Hough, is listed to the Ohio Historic Inventorry but has lost historic context through alteration, replacement of materials, and loss of setting and is unlikely to be found eligible for listing to the NRHP. No other properties are likely to be found eligible under Criteria A, B, or C. The area is unlikely to contribute to knowledge under Criterion D.

No Historic Properties Present in the APE:

SECTION 4: SUPPORTING DOCUMENTATION

This information must be provided for all projects.

A. Photographs must be keyed to a street-level map, and should be included as attachments to this application. Please label all forms, tables and CDs with the date of your submission and project name, as identified in Section 1. You must present enough documentation to clearly show existing conditions at your project site and convey details about the buildings, structures or sites that are described in your submission. Faxed or photocopied photographs are not acceptable. See Instructions for more info about photo submissions or 36 CFR § 800.11 for federal documentation standards.
    1. Provide photos of the entire project site and take photos to/from historic properties from/towards your project site to support your determination of effect in Section 5.
    2. Provide current photos of all buildings/structures/sites described.
B. Project plan, specifications, site drawings and any other media presentation that conveys detailed information about your project and its potential to affect historic properties.
C. Copies or summaries of any comments provided by consulting parties or the public.

SECTION 5: DETERMINATION OF EFFECT

A. **Request Preliminary Comments.** For challenging projects, provide as much information as possible in previous sections and ask OHPO to offer preliminary comments or make recommendations about how to proceed with your project consultation. This is recommended if your project involves effects to significant historic properties, if the public has concerns about your project's potential to affect historic properties, or if there may be challenging procedural issues related to your project. Please be aware that providing information in all Sections will still be required and that asking OHPO for preliminary comments may tend to delay completion of the review process for some projects.

    1. We request preliminary comments from OHPO about this project:
       YES **NO**

    2. Please specify as clearly as possible the particular issues that you would like OHPO to examine for your project (for example- help with developing an APE, addressing the concerns of consulting parties, survey methodology, etc.):

B. **Determination of Effect.** If you believe that you have gathered enough information to conclude the Section 106 process, you may be ready to make a determination of effect and ask OHPO for concurrence, while considering public comments. Please select and mark one of the following determinations, then explain the basis for your decision on an attached sheet of paper:

No historic properties will be affected based on 36 CFR § 800.4(d) (1). Please explain how you made this determination:

No Adverse Effect [36 CFR § 800.5(b)] on historic properties. This finding cannot be used if there are no historic properties present in your project APE. Please explain why the Criteria of Adverse Effect, [36 CFR Part 800.5(a) (1)], were found not to be applicable for your project: **The undertaking will have direct visual effect on six properties contributing to a National Register Historic District through the construction of a three-story apartment building at the southeast corner of Hough and E. 89th. The Project Area is currently a vacant lot,**

but its vacancy postdates both the period of significance for the district and, largely, the listing of the district; the razing of existing multi-story apartment buildings along Hough has contributed to some loss of context in setting for the district already. The undertaking is unlikely to further impact the setting. Additional visual and sound impacts will be temporary in nature and limited to the construction of the building.

Adverse Effect [36 CFR § 800.5(d) (2)] on historic properties. Please explain why the criteria of adverse effect, [36 CFR Part 800.5(a) (1)], were found to be applicable to your project. You may also include an explanation of how these adverse effects might be avoided, reduced or mitigated:

Please send completed form and supporting documentation to our office through the section106@ohiohistory.org e-mail address. Note that file size is limited to 30 MB. The Ohio SHPO has a federally mandated review time of 30 calendar day. To check your submission was received and logged in for our review, please visit https://www.ohiohistory.org/preserve/state-historic-preservation-office/hpreviews/section-106-project-status.

RE: Section 106 Review
Hough Senior Independent Living
Project Number: 2300437.0029
Location: 8910 Hough Avenue, Cleveland, Cuyahoga County, Ohio

Dear Mr. Nagle:

This letter is in response to the correspondence received on July 3, 2025. The comments of the Ohio State Historic Preservation Office (SHPO) are made in accordance with the provisions of Section 106 of the National Historic Preservation Act of 1966, as amended (54 U.S.C. 306108 [36 CFR 800]).

The Ohio Housing Finance Agency is proposing to use HOME funds through the U.S. Department of Housing and Urban Development. The proposed undertaking includes the new construction of a 47,000 square foot multi-family 3-story senior housing development with fifty-five (55) one-bedroom units. You have requested the comments of SHPO regarding the effects of the proposed undertaking on historic properties.

A check of our records indicates that this property is not listed in the National Register of Historic Places or included in the Ohio Historic Inventory. It is our opinion that it does not meet the minimum criteria for inclusion in the National Register of Historic Places. However, our records indicate that the Area of Potential Effect overlaps the boundaries of the National Register listed East 89th Street Historic District (NR Ref #88000678) (hereinafter referred to as the "historic district"). Based on the information submitted, the proposed project will not have a direct impact on contributing resources within the boundaries of the historic district. The SHPO recommends that consideration should be taken during construction to avoid any temporary effects on the historic district, including staging equipment, materials, and soil stockpiling near the property. Following this, it is the SHPO's opinion that this project, as proposed, will have no effect on historic properties.

No further coordination is required for this project unless the scope of work changes or archaeological remains are discovered during the course of project construction. In such a situation, this office should be contacted as required by 36 CFR § 800.13.

If you have any questions concerning this review, please contact me at jmorneau@ohiohistory.org.

Thank you for your cooperation.

Sincerely,

JoLayne S. Morneau
Architecture Development Reviews Manager
State Historic Preservation Office

cc: Jasmin Walton, ODOD

"Please be advised that this is a Section 106 decision. This review decision may not extend to other SHPO programs."

Re: Hough Senior Independent Living
8900 Hough Avenue
Cleveland, Cuyahoga County

Dear Lora Nuckolls,

The Ohio Department of Development is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the Ohio Department of Development has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The Ohio Department of Development will conduct a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize or mitigate potential adverse effects.

A request to the Ohio State Historic Preservation Office Online Mapping System revealed the project is in the vicinity of six properties dating to the early twentieth century listed to a National Register of Historic Places district, none with recorded significant tribal association. There are no sites known to the Ohio SHPO to have significant tribal association in the project area, area of potential effects, or within a one-mile study radius.

To meet project timeframes, if you would like to be a consulting party on this project, can you please let us know of your interest within 30 days? If you have any initial concerns with impacts of the project on religious or cultural properties, can you please note them in your response?

Enclosed is a map that shows the project area and, if applicable, an additional area of potential indirect effects.

The project consists of a new construction senior housing development consisting of an approximately 47,000 square foot, multi-family 3-story apartment building with fifty-five (55) one-bedroom units, located in the Hough neighborhood on Cleveland's east side, between East 89th Street and East 90th Street. Hough Senior Independent Living will provide a welcoming environment that is close in proximity to transportation, amenities, and medical services, including the Cleveland Clinic and University Hospitals, in the City of Cleveland. Common areas for the development will include a community room, pantry/kitchen, laundry rooms, lobby/lounge, outdoor patio, elevator, management office, and mailbox area, along with back-of-house support spaces.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, can you please inform us? If you do wish to consult, can you please include in your reply the name and contact information for the tribe's principal representative in the consultation? Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Sincerely,

Jennifer Griffin, Division Compliance Manager
Community Services Division

Hi Luke,

Thank you for your response. We will add language in the standard mitigation section of the ERR stating:
"In the event an Inadvertent Discovery (ID) occurs at any phase of a project or undertaking as defined, and human remains, or archaeological materials are exposed as a result of project activities, work should cease immediately, and the Tribe(s) must be included with the SHPO in any consultation regarding treatment and disposition of the find."

Please let us know if you have any other questions or comments.

Pursuant to consultation under Section 106 of the National Historic Preservation Act (1966 as amended) the Forest County Potawatomi Community (FCPC), a Federally Recognized Native American Tribe, reserves the right to comment on Federal undertakings, as defined under the act.

The Tribal Historic Preservation Office (THPO) staff has reviewed the information you provided for the project. Upon review of site data and supplemental cultural history within our Office, the FCPC THPO is pleased to offer a finding of No Historic Properties affected of significance to the FCPC, however, **we do wish to remain as a consulting party for this project.**

As a standard caveat sent with each proposed project reviewed by the FCPC THPO, the following applies. In the event an Inadvertent Discovery (ID) occurs at any phase of a project or undertaking as defined, and human remains or archaeological materials are exposed as a result of project activities, work should cease immediately, and the Tribe(s) must be included with the SHPO in any consultation regarding treatment and disposition of the find.

Thank you for protecting cultural and historic properties and if you have any questions or concerns, please contact me at the email or number listed below.

To meet project timeframes, if you would like to be a consulting party on this project, can you please let us know of your interest within 30 days? If you have any initial concerns with impacts of the project on religious or cultural properties, can you please note them in your response?

Enclosed is a map that shows the project area and, if applicable, an additional area of potential indirect effects.

The project consists of a new construction senior housing development consisting of an approximately 47,000 square foot, multi-family 3-story apartment building with fifty-five (55) one-bedroom units, located in the Hough neighborhood on Cleveland's east side, between East 89th Street and East 90th Street. Hough Senior Independent Living will provide a welcoming environment that is close in proximity to transportation, amenities, and medical services, including the Cleveland Clinic and University Hospitals, in the City of Cleveland. Common areas for the development will include a community room, pantry/kitchen, laundry rooms, lobby/lounge, outdoor patio, elevator, management office, and mailbox area, along with back-of-house support spaces.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, can you please inform us? If you do wish to consult, can you please include in your reply the name and contact information for the tribe's principal representative in the consultation? Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Sincerely,

Jennifer Griffin, Division Compliance Manager
Community Services Division

Logan York
Miami Tribe of Oklahoma
P.O Box. 1326
Miami, OK – 74355

Re: Hough Senior Independent Living
8900 Hough Avenue
Cleveland, Cuyahoga County

Dear Logan York,

The Ohio Department of Development is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the Ohio Department of Development has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The Ohio Department of Development will conduct a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize or mitigate potential adverse effects.

A request to the Ohio State Historic Preservation Office Online Mapping System revealed the project is in the vicinity of six properties dating to the early twentieth century listed to a National Register of Historic Places district, none with recorded significant tribal association. There are no sites known to the Ohio SHPO to have significant tribal association in the project area, area of potential effects, or within a one-mile study radius.

To meet project timeframes, if you would like to be a consulting party on this project, can you please let us know of your interest within 30 days? If you have any initial concerns with impacts of the project on religious or cultural properties, can you please note them in your response?

Enclosed is a map that shows the project area and, if applicable, an additional area of potential indirect effects.

The project consists of a new construction senior housing development consisting of an approximately 47,000 square foot, multi-family 3-story apartment building with fifty-five (55) one-bedroom units, located in the Hough neighborhood on Cleveland's east side, between East 89th Street and East 90th Street. Hough Senior Independent Living will provide a welcoming environment that is close in proximity to transportation, amenities, and medical services, including the Cleveland Clinic and University Hospitals, in the City of Cleveland. Common areas for the development will include a community room, pantry/kitchen, laundry rooms, lobby/lounge, outdoor patio, elevator, management office, and mailbox area, along with back-of-house support spaces.

NOISE

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the **Day/Night Noise Level Calculator Electronic Assessment Tool Overview (/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/)**.

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

DNL Calculator

Site ID	2300437- Hough Senior
Record Date	05/28/2025
User's Name	Claire Cerne

Vehicle DNL	46	36	48
Calculate Road #1 DNL	50	Reset	

Add Road Source | Add Rail Source

Airport Noise Level	
Loud Impulse Sounds?	○ **Yes** ◉ **No**

Combined DNL for all Road and Rail sources	**50**
Combined DNL including Airport	**N/A**
Site DNL with Loud Impulse Sound	

Calculate Reset

Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative**: Cancel the project at this location
- **Other Reasonable Alternatives**: Choose an alternate site
- **Mitigation**
  - **Contact your Field or Regional Environmental Officer (/programs/environmental-review/hud-environmental-staff-contacts/)**
  - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
  - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
  - Incorporate natural or man-made barriers. See ***The Noise Guidebook (/resource/313/hud-noise-guidebook/)***
  - Construct noise barrier. See the **Barrier Performance Module (/programs/environmental-review/bpm-calculator/)**

Instructions

2024 Design and Construction Features Form

Project Name	Hough Senior Independent Living	Project Number	24-0055

Instructions

1. The architectural entity with whom the owner and developer contracted with to provide architectural services will complete the form and obtain all required signatures for the certifications.
2. The project applicant will submit the completed and signed form with the proposal application.
3. If funded, the project applicant will complete and submit the form again at final application with all changes from what was submitted at proposal application clearly identified.
4. A copy of the final, completed form must also be included in the 80% percent plan sets, copied onto the page(s) following the cover sheet, submitted at final application.

Both a signed PDF and the excel file are required for submission.

All communications related to the architectural review, including submission of architectural plans, must be sent to arch@ohiohome.org

Provide an answer for all sections, do not skip or leave blank any question. Use the "Not Applicable" (N/A) option if a question does not apply to your project. Use the following color-code to determine your response type:

- Unrestricted answer
- Drop-down or other restricted answer. Do not leave blank, select N/A.
- Formula, auto-populate, or other locked cell
- Formula, auto-populate, blank, or other unlocked cell where overriding the formula is allowable but very unlikely

Submission Requirements Checklist

Prelim.	Final	
☑	☑	**The completed, signed Certification.**
☑	☑	**The completed excel file of the DCF form.**
☑	☑	**Scope of Work form.** *(must also be completed at 8609)*
☐	☐	**Exception Request form(s), if applicable.**
	☐	**Asbestos, mold, lead-based paint considerations as required.**
	☐	**Items required to be completed per Phase I or II Environmental Site Assessment, or per applicable Environmental Review performed by OHFA.**
		Drawings/Plans, which must include all of the following:
☑	☑	Cover sheet with name of development, development address, development team, drawing index, code information, and table indicating unit schedule (including accessible, adaptable and sensory impaired units), types and sizes
☑	☑	Site plan
		Including adjacent parcel information (e.g. zoning, roads, railroad tracks, etc.)
		☑ clearly show the context of the neighborhood that the property will exist
		All site details, and parking data and layouts
☑	☑	Landscape intent
	☐	Demolition Plan
☐	☐	Historic features (adaptive reuse & historic rehabs) *including description at preliminary and plans at final*
☑	☑	Dimensioned floor plans with *preliminary including room designations and proposed finishes*
☑	☑	Exterior elevations with material notations
	☑	Interior elevations with material notations (casework, PGB and MR gypsum board locations, etc.)
☑		Schematic Drawings and/or specifications for HVAC, plumbing, and electrical or similar items included in the scope of work.
☑	☑	Wall sections (if applicable)
	☑	Structure (if applicable)
	☑	Finishes and schedules
	☑	Details
	☑	Mechanical Plans *[recommended to submit schematic or description of mechanical at preliminary submission]*

Drawings must have a dimensioned plumbing plan and control points located for rough-in site verification. All pipes-through-floor and the walls they are intended to be located within must be dimensioned relative to the foundation where they must align with walls and/or islands above.

OHFA strongly encourages a surveyor to locate wall and through-slab pipe penetrations. Foundation over dig must be filled with insulation or forms and then back filled

Prelim.	Final	
☑	☑	**Electronic format (pdf)**

Single PDF file for drawings including all site plans, dimensioned floor plans, elevations, wall sections, structure, finishes, details and mechanical plans.

Separate PDF file for specifications. *(no hard copy)*

☑ **Electronic format (AutoCAD)**

Dimensioned floor plans only, submitted in DXF or DWG AutoCAD R-14 format.

- Required to include the project architect's polylines used for the area calculations as required by BOMA.
- If drawings are externally referenced (xref), submissions must be bound (xbind) prior to creating files for OHFA.
- Proprietary authorship information such as title blocks, Architecture seals, etc. should be removed.
- DXF should be generated from the base file and not a plan sheet file.

☑ ☑ **Hard copy**

Full set of architectural plans, 11"x17" scaled to fit. **Full-size architectural plans will be rejected.**

- Do not submit printed set of specifications set with the drawings

Project Narrative

Hough Senior Independent Living is a new construction senior housing development consisting of a single, approximately 47,000 square foot, multi-family 3-story apartment building with fifty-five (55) one-bedroom units, located in the Hough neighborhood on Cleveland's east side. Hough Senior Independent Living will provide a welcoming environment that is close in proximity to transportation, amenities, and medical services, including the Cleveland Clinic and University Hospitals, in the City of Cleveland.

Common areas for the development will include a community room, pantry/kitchen, laundry rooms, lobby/lounge, outdoor patio, elevator, management office, and mailbox area, along with back-of-house support spaces. CHN Housing Partners will be the developer, owner, property manager, and supportive service provider for Hough Senior Independent Living.

Design Exception Request Summary

Total Number of Design Exceptions Requested: 0

Provide the total number of exceptions for each category.

0 New Construction:

	Non-OHFA Requirement		Special Consideration		Supply Chain Issues

0 Rehabilitation or Adaptive Reuse:

	Universal Design		Accessibility		Replace Items with 75%+ RUL
	Durable Materials - Exterior		Main Entry		Outdoor Recreational Features
	Sidewalks		Durable Materials - Interior		Major Building Components
	Common Areas		Elevators		Interior Doors
	Floor Coverings		Unit Sizes		Bedroom Sizes
	Bathrooms		Kitchen & Appliances		Laundry Facilities
	Supply Chain Issues		Other:		

List of Exceptions Requested:

Summarize each exception requested with a short phrase (1-5 words each).

Wage Rate Requirements

If federal or state funds are utilized in the proposed development, select any regulations that apply to the proposed development.

☐ **Davis Bacon and related acts:**
Davis Bacon Act prevailing wage provisions apply to contractors and subcontractors performing on federally funded or assisted contracts in excess of $2,000 for construction, alteration or repair (including painting and decorating of public buildings or public works).

☐ **Ohio Prevailing Wage:**
Ohio's prevailing wage laws apply to all public improvements financed in whole or in part by public funds when the total overal project cost is fairely estimated to be more than $200,000 for new construction or $60,000 for reconstruction, enlargement, alteration, repair, remodeling, renovation, or painting.

☑ **HUD Section 3 Requirements:**
HUD Section 3 is a provision of the Housing and Urban Development (HUD) Act of 1968 requiring that recipients of certain HUD financial assistance, to the greatest extent feasible, provide job training, employment, and contracting opportunities for low- or very low-income residents in connection with projects and public works.

☐ **None of the above are applicable**

Sustainability

Are all energy efficiency requirements as stated in the **Ohio Building Code or Residential Code?**

☑ **Yes.** Development will meet all energy efficiency requirements as stated in the Ohio Building Code or Residential Code.
☐ **No.**

Third Party Certification selected:

Must specify full name of certification being sought. Exception requests must clearly articulate why the selected certification is equivalent or better to the three certifications.

☐ Enterprise Green Communities Certification or EGC Plus Certification
☑ LEED Residential - Silver Level Certification or higher — LEED Silver
☐ National Green Building Standard (NGBS) - Silver Level Certification or higher
With Energy Star Homes or Energy Star MFNC compliance verified by a HERS rater
☐ Exception for: *list the certification being selected.*

HERS Rater (organization): Sol Design and Consulting — Phone: 513-455-8228 — Email: samyogr@solconsults.com

Amenities & Scope of Work Summary

2024 Design and Construction Features Form

Project Name	Hough Senior Independent Living	Project Number	24-0055

Amenities

Amenities listed below are not required, and any amenities that are part of the project design must be identified below. Those required for competitive criteria are identified separately.

☐ Athletic Field	☐ Counseling Room(s)	☐ Indoor Play Area	☑ Security Gate(s)
☐ Basketball Court	☑ Covered Mailboxes	☑ Laundry Room(s)	☑ Service Coordinator Office
☑ Bike Racks	☐ Day Care	☐ Media/Library Room	☐ Splash Pads
☑ Bicycle Storage	☐ Dog Park(s)	☐ Outdoor Exercise Area	☐ Swimming Pool
☐ Clubhouse	☐ Exercise Room(s)	☑ Patio(s)	☐ Water Features
☐ Community Building	☐ Exterior Tenant Storage	☐ Playground Area(s)	☐ Walking Paths
☑ Community Room(s)	☐ Garage(s)	☐ Raised Garden Beds	☐ Wellness Center
☐ Computer Room(s)	☑ Gazebo/Pavilion	☐ Security Alarm System	

List any additional features that are included to benefit the population being served.

Covered outdoor space.

Design-Related Competitive Criteria *(for 9% LIHTC)*

Select the items below that the development is seeking competitive points for under the 2024 QAP.

☐ Property-wide Wi-Fi (no cost to residents)	☑ A minimum 400 sqft. Outdoor patio area for residents that is at least 50% covered
☐ Energy Star-certified washer and dryer in all units	☐ An outdoor playground area *(new affordability - general & preserved affordability)*
☑ Energy Star-certified dishwasher in all units	☐ Roll-in showers in at least 50% of the total units *(new affordability - senior)*
☐ Exercise Room	

Scope of Work Summary

Must also submit the Scope of Work Excel Workbook, available under the forms of the program webpage.

Provide an overview of the proposed improvements to be made involving site design, building design, mechanical and electrical systems and building components including building exterior, interior, and life safety items.

Site Design
- 6' high decorative metal perimeter fence and 6' high board-on-board fence to secure site and asphalt parking lot. 2 lots include 42 total parking spaces with the primary lot secured with decorative metal drive gates and boulevard entrance.
- Concrete sidewalks connecting all exterior building access to public right-of-way where indicated.
- Concrete patio and walks at designated outdoor recreation area. Outdoor areas of 400 SF minimum with minimum 200 SF of covered dedicated shelter space.

Building Design
- New construction 3-story, apartment building with wood framed walls at slab-on-grade areas and upper floors. Engineered wood truss floor structure. Exterior finish materials will include brick veneer, cast stone trim, vinyl siding and fiber cement siding.
- Exterior windows will be vinyl, single-hung and fixed sash, Energy Star certified with insulated glazing.
- Building will consist of 55 one-bedroom apartments, six of which will be ICC A117.1 type A wheelchair accessible with 2 typical units that will receive features for vision and hearing impaired persons.
- Building's occupancy is R-2 (Residential) as categorized by the Ohio Building Code.
- Ground floor areas include community room and kitchen, public toilet rooms, property manager and resident services offices, mail box area and back-of-house and

Address any issues raised in the Phase I Environmental Site Assessment (ESA) report(s) in the space provided below. Include information for all single-site and scattered-site proposals, as required by applicable program funding guidelines.

Per the potential RECs identified regarding a former dry cleaners on the property, as well as filling stations on adjacent properties, the development team will engage a consultant in a Limited Phase II Investigation to verify current status.

Additional Scope Information for Rehabs & Adaptive Reuse

For any developments involving acquisition and rehabilitation or adaptive reuse, provide a narrative describing the history of improvements made to the building(s) and/or units.

N/A

For any developments proposing adaptive reuse or rehabilitation with historic tax credits, specify any restrictions or requirements that will be used to determine compliance with the Ohio Historic Preservation Tax Credit and/or Federal Historic Preservation Tax Credit programs.

Development Details & Floor Area Details

2024 Design and Construction Features Form

Project Name	Hough Senior Independent Living	Project Number	24-0055

Development Details

Number of sites:	1
Site Acreage:	1.25
Number of residential buildings:	1
Number of accessory buildings:	0
Total Number of units:	55
Low-income Units:	55
Date built:	

For proposals involving acquisition/rehabilitation or adaptive reuse, please specify the year the building(s) were originally constructed. For multiple building proposals, a range of dates may be provided.

Date first occupied:

Year development was or will be occupied. For multiple building proposals or scattered site projects, a range of dates may be provided.

Number of buildings that includes commerical space: 0

Number of Units:	
efficiency	0
one-bedroom	55
two bedroom	0
three-bedroom	0
four bedroom	0

List detrimental land uses sufficiently close to impair residents' use. Include remedy addressing the land use.

List building/zoning variances, and identify if requested, pending or received:

N/A

Floor Area Details

Total Number of Low Income Units	55

Space	GSF	Notes
Gross Square Footage of all Buildings	49,179	Measures from exterior face of exterior building; includes structured exterior spaces (stair, balcony, portico).
Commercial Space Condominium Areas	0	Legally separate space under control of another program or condominimized legal separation.
Commercial Areas and Fee-Driven Space	0	Includes spaces for which residents must pay a fee for use/access (garages, storage, etc.)
Market Rate Unit Area	0	Must include lofts, mezzanine and restricted headroom areas
Low Income Unit Area	34,616	Must include lofts, mezzanine and restricted headroom areas
Manager's Unit Area	0	Must include lofts, mezzanine and restricted headroom areas
Common Area (Public)	3,130	Public restrooms, community rooms, libaries, offices, meeting rooms, kitchens, car canopy, portico, fitness rooms, laundry, mailboxes.
Common Area (Circulation)	6,657	Public hallways, stairways, and corridors to residential units.
Dedicated Program Space	161	Counseling space, wellness and health clinic, day care centers, etc.
Limited Common Area (Private)	0	Exterior spaces with access only through residential unit, i.e. balcony/porch/deck (patios without roof are not included).
Support	2,974	Electrical, mechanical, elevator room, sprinkler room, janitorial, trash, maintenance, storage that is not for tenant use, free-standing maintenance buildings.
Tenant Storage	0	Tenant storage outside of unit.
Major Vertical Penetrations	1,641	Includes duct shafts, stair shaft, elevator shaft, space open to below
Structured Parking/Garage	0	Attached or detached garage that residents do not pay a fee for.
Basement	0	Includes spaces with a minimum of 7' clear head height. Spaces less than 7' clear head space are crawl spaces per RCO 305.
TOTALS		
Non Low-income Floor Area	0	Commercial Space Condo Areas + Commercial Areas + Market Rate Unit Area
Low Income Floor Area	41,273	LI Unit Area + Common Area (Circulation) + Limited Common Area (Private) + Tenant Storage
% Common Area	19.90%	Common Area (Public) + Common Area (Circulation) / Gross Square Footage
Net Rentable Square Footage	49,179	Gross Square Footage - Non Low-Income Floor Area
Average net Rentable SQFT per LI Unit	894.1636364	Net Rentable Square Footage / Total Number of Low-Income Units

Accessibility Information

2024 Design and Construction Features Form

Project Name	Hough Senior Independent Living	Project Number	24-0055

Adaptability & Accessibility

All developments must comply with all accessibility requirements as outlined in the Ohio Building Code, chapter 4101:1-11 for the design and construction of accessible project features, including site, common areas and units.

- ☑ Yes, the project will comply with the accessibility requirements as outlined in the Ohio Building Code.
- ☐ No.

Verify that the project will be designed and constructed to meet the requirements of the Fair Housing Act and that all units, other than the accessible units, will be designed and constructed as ANSI Type B units.

- ☑ Yes, the project will be designed and constructed to meet the requirements of the Fair Housing Act and all units, other than the accessible units, will be designed and constructed as ANSI Type B units.
- ☐ No.

504 Accessibility

All developments receiving OHFA funding must meet the accessibility requirements of Section 504. Identify the implementing standard the development will utilize to demonstrate compliance with Section 504 requirements (select one)

- ☐ Uniform Federal Accessibility Standards (UFAS)
- ☐ 2010 ADA Standards for Accessible Design under Title II of the ADA, except for certain specific identified provisions, as detailed in HUD's Notice on "Instructions for use of alternative accessibility standard," published in the Federal Register on May 23, 2014 ("Deeming Notice").
- ☑ An equivalent standard as defined in HUD's Deeming Notice (such as ICC/ANSI A117.1-2009 with ICB/OCB), specify: ICC A117.1-2017

	Required	Provided
504 Mobility Units*:	6	6
504 Sensory Units:	2	2

Number of accessible parking spaces: 4

** Providing twice the number that is federally mandated under Section 504 as accessible for persons with mobility disabilities. To calculate the number of 504-mobility units needed to meet this threshold standard, first multiply the total number of units by 5%, roundup to the nearest whole unit, and multiply the result by two.*

Exception(s) Reqested for technical infeasibility of full compliance with 504 accessibility. (adaptive reuse or rehabilitation only)

- ☐ Yes. Number of non-conforming accessible units: Reason:
- ☑ No.
- ☐ N/A.

OHIO HOUSING FINANCE AGENCY

Universal Design Information

2024 Design and Construction Features Form

Project Name	Hough Senior Independent Living	Project Number	24-0055

Universal Design Components

Select all of the below items that will be included in the development. Refer to the Design and Architectural Standards that are effective at the time application. Mandatory items are marked with an **R**; please identify "exception" under "page or note" if an exception was requested for the item. Exceptions for mandatory items must include two non-mandatory items.

Additionally, specify the architectural page reference, or if it will be covered by a general/universal plan note, mark "Note".

Entry

Included?	Page or Note	Item
R	A-030	36"-wide (minimum) entry door
		- On rehab/adaptative reuse only, not required on all units if infeasibility can be proven
R	A-030, Specs	Entry door with lever-style handle
R	A-601 to A-604	For primary entrance, minimum 5' x 5' level clear space inside and outside entry door
R	A-200 to A-203, E-100	Adequate non-glare lighting at walkways, accessible routes, and exterior spaces
R	A-200s, E-100s	Adequate lighting both inside and outside the building and unit entrance
R	A-300	High visibility address numbers (both building and exterior units)
R	A-300, A-301	Overhead weather protection at entrances
		- On rehab/adaptative reuse only, not required on all units if infeasibility can be proven
☑	A-601 to A-604	Built-in shelf/bench/ledge located outside the door
☐		Nonslip surfaces on walkways and entryways
☐		Primary unit entry with an accessible/dual peephole and backlit doorbell
☐		Door locks that are easy to operate, such as keyless locks with remote control or keypad
☐		No-step entry (1/2" or less threshold) at main entrance

Interior Stairs and Hallways

Included?	Page or Note	Item
R	A-200 to A-203, E-300s	Adequate lighting to illuminate all stairway(s), landings, and hallway(s)
R	A-601 to A-604	Hallways with a minimum width of 42"
R	A-800s	Anti-slip strips on front edge of steps in color-contrast material
☐		Color contrast between stair treads and risers
☑	A-450, A-451	Handrails on both sides of interior stairs

Interior Doors

Included?	Page or Note	Item
R	A-030, A-601 to A-604	34"-wide (minimum) doors leading to habitable room, allowing for a 32" minimum clearance
R	A-030, Specs	Lever-style door hardware on all interior doors
R	A-800s	Interior maximum door threshold of ¼ inch beveled or flush
☐		Pocket doors with easy-to-grip handles

Faucets

Included?	Page or Note	Item
R	P-301	Anti-scald faucets with lever handle for all sinks, bathtubs, and showers
R	P-301	Pressure balanced faucets

Electrical

Included?	Page or Note	Item
R	M-301	Thermostat and control panels that are easy to read and simple to operate
R	E-501	Rocker, touch light, or hands-free switches
R	E-401, E-402	Extra electrical outlets (for medical equipment or rechargeable items, etc.) placed 18" to 24" above finished floor (bedroom only)
☐		Lighted switches visible in the dark
☐		Switched outlets for lamps, etc. to be turned on with wall switch
☐		Electrical outlets, phone jacks, and data ports at least 18" above finished floor
☑	M-301, E-501	Light switches between 44"-48" above finished floor; thermostats no more than 48" above finished floor
☐		Clear access space of 30" by 48" in front of switches, outlets, and controls
☐		Audible and visual alarms for smoke/fire/carbon monoxide in all code-required accessible areas and all units

Universal Design Information

2024 Design and Construction Features Form

Project Name	Hough Senior Independent Living	Project Number	24-0055

Bathrooms

Included?	Page or Note	Item
R	A-700	Countertops with beveled/radiused corners. Outside corners are suggested to be a two-inch corner radius, waterfall edge with oneinch radius, o
R	A-601 to A-604, P-301	Adjustable-height showerhead (articulated arm or similar) or hand-held showerhead with flexible hose and easily operable controls
R	E-401, E-402	Non-glare lighting at vanities
☑	A-601 to A-604	A full- or half-bath on the main floor with clear floor space of 30" x 48"
☑	E-401, E-402	Overhead light fixture in tub/shower
☐		Mirror(s) placed for both standing and sitting, such as a full-length or tilting mirror
☐	A-601 to A-604	Toilet centered at least 18" from any side wall, tub, or cabinet
☐		In at least one bathroom per unit, including the following: - Low-threshold or curbless shower at least 5' x 3' OR ADA bathtub with seat - Clear knee space (at least 27" high) under sink. May be open knee space or achieved by means of removable vanity or fold-back or self-storing doors. Pipe protection panels must be provided to prevent contact with hot or sharp surfaces. - Grab bars, or wall-blocking for future installation of grab bars, in tub/shower, and toilet. Grab bars must be properly anchored and supported.

Kitchens

Included?	Page or Note	Item
R	A-601 to A-604	At least 15" clear space/"landing zone" on each side of stove and sink, and at least one side of refrigerator. This is countertop clear space and may be shared with another appliance and/or required work surface if applicable.
R	A-601 to A-604	Loop handles on drawers and cabinets
R	E-401, E-402	Non-glare task lighting to illuminate sink, stove, and work areas
☑	A-601 to A-604	Adjustable height shelves in wall cabinets
☐		Base cabinets with pull out drawers
☐		Pull-out work surface near the oven, refrigerator and/or microwave
☐		Visual contrast at front edge of countertop or between the countertop and the cabinets
☐		Side-by-side refrigerator-freezer
☑	A-601 to A-604, Spec	Cooktop/range with front or side-mounted controls (senior units only)
☐		Extra outlets for small appliances, electronics, etc.
☑	A-601 to A-604	Clear knee space (at least 27" high) under sink, counters, and/or cook tops. If under sink, pipes must have protection and may not be in the required knee space. May be open knee space or achieved by means of removable base cabinets or fold-back or self-storing doors.

Closets

Included?	Page or Note	Item
☑	E-401, E-402	Area is well-lit with a switch located outside the space
☑	A-601 to A-604	Doors and handles that are easy to operate. No bi-fold or accordion-type doors
☐		Adjustable-height shelving and/or closet rods OR clothes rods installed at multiple heights
☐		Pull out-shelves, rollout cabinets, and other easy to access storage components

Certifications

2024 Design and Construction Features Form

Project Name	Hough Senior Independent Living	Project Number	24-0055

Certifications

We represent, warrant and certify to OHFA that the following does and will apply to the proposed development:

The Development will be designed and constructed to meet the requirements of all applicable laws, codes, program guidelines, as well as the OHFA Design and Architectural Standards and specific features applicable to the project as outlined in this form. This includes any and all local, state, or federal accessibility laws that currently exist and apply to the project. Any additional cost of construction required for the Development to be in compliance with any of these laws has been included in the development budget.

By signing this document, the owner, architect, and general contractor certify that the plans, specifications, and features submitted as part of this application will become a minimum standard for the proposed development. This hereby becomes a binding agreement for the actual construction intent if the development is awarded OHFA funding.By signing this document, the owner, architect, and general contractor certify that the plans, specifications, and features submitted as part of this application will become a minimum standard for the proposed development. This hereby becomes a binding agreement for the actual construction intent if the development is awarded OHFA funding.

OHFA does not take responsibility for design, construction, and plan review or any other municipal or building department review or approval and in no way does this agreement supersede any requirement by such jurisdictions.

OHFA reserves the right to verify compliance with agreed-upon features including durability of materials, accessibility, universal design, green building requirements and energy efficiency components.

1. Architect or Professional Engineer

I certify that the plans, specifications, and scope of work for the Development meet, and will continue to meet, any and all requirements including those set forth in this form, the OHFA Design and Architectural Standards, and all other applicable laws, codes, program guidelines or policy documents.

I understand that I am contractually obligated to know the federal, state and local accessibility laws applicable to the Development and have applied them accordingly. To the best of my professional knowledge and belief, I agree that the Development as designed is in compliance with all applicable federal, state and local housing and accessibility laws and regulations.

Authorized Signatory	Date: 17-Sep-24
Brian Grambort Print Name (Authorized Signatory)	Associate Title
Hiti, DiFrancesco and Siebold, Inc. Organization	1215574 Registration Number

2. General Contractor

I certify that I have reviewed the plans, specifications, and scope of work for the Development and that the Development will be constructed in accordance with any and all requirements as set forth in this form, the OHFA Design and Architectural Standards, and all other applicable laws, codes, program guidelines or policy documents.

I understand that I am obligated to know the federal, state and local accessibility laws applicable to the Development and will build the project accordingly.

Authorized Signatory	Date
Mark E. Whipkey Print Name (Authorized Signatory)	Chief of Asset Management Title
CHN Housing Partners Organization	

3. Owner

I certify that I have reviewed the plans, specifications, and scope of work for the Development and that the Development shall be constructed in accordance with any and all requirements as set forth in this form, OHFA Design and Architectural Standards, and all other applicable laws, codes, program guidelines or policy documents.

The undersigned understands that any deviations from federal and state accessibility requirements are the responsibility of the Owner and, as such, Owner is responsible for such deviations.

Further, if for any reason, the features are not constructed in accordance with the requirements set forth above, the undersigned understands that OHFA may revoke or recapture the Development's funding and/or limit or prohibit the future participation of the undersigned, any subsidiaries or related entities in OHFA programs.

© 2024 Hiti, DiFrancesco and Siebold, Inc.

GYPSUM BOARD NOTES

1. AT FIRE RESISTANCE RATED ASSEMBLIES PROVIDE TYPE X OR TYPE C AS REQUIRED BY FIRE RESISTANCE RATED ASSEMBLY TO ACHIEVE FIRE RESISTANCE RATING LISTED.
2. PROVIDE 5/8" FIBERGLASS FACED TILE BACKER BOARD WHERE WALL TILE IS INDICATED TO OCCUR. SEE SPECIFICATIONS FOR ADDITIONAL INFORMATION.
3. PROVIDE FIBERGLASS FACED 5/8" TYPE X GYPSUM BOARD IN TALL JANITOR CLOSETS. PROVIDE LEVEL 5 FINISH WHERE PAITN FINISH IS INDICATED
4. PAPERLESS GYPSUM BOARD TYPE SHALL BE USED AT MINIMUM IN THE FOLLOWING LOCATIONS:

   A. SHOWER WALLS WHERE THE PGB WILL NOT HAVE AN EXPOSED FINISH EXCEPT 6 INCHES BEYOND SHOWER AND TUB JAMBS (FLOOR TO TOP OF TUB SURROUND OR 6 INCHES ABOVE SHOWER NIPPLE AND THIS MAY BE CASED WITH WATER AND ROT-RESISTANT TRIM)

   B. BEHIND TOILETS AND THE SPACE BETWEEN A TUB/SHOWER ENCLOSURE AND TO THE TOP OF TOILET TANKS MUST BE COVERED AS IT IS A HIGH FAILURE POINT SPECIFICALLY COVERED BY PGB

GENERAL PARTITION NOTES

1. WHERE RATED ASSEMBLIES ARE INDICATED TO OCCUR, SEE REFERENCED FIRE TEST DESIGNATIONS FOR ASSEMBLY AND INSTALLATION REQUIREMENTS.
2. FIRE PARTITIONS: WHERE PARTITION IS INDICATED TO BE A FIRE PARTITION THE WALL ASSEMBLY SHALL EXTEND TO THE UNDERSIDE OF THE FIRE RESISTANCE RATED FLOOR CEILING ASSEMBLY AND/OR TO UNDERSIDE OF FLOOR/ROOF SHEATHING AS INDICATED. (DRAFT STOPPING OF ROOF TRUSS SHALL BE AS SHOWN ON ATTIC PLAN. DRAFT STOPPING OF FLOOR STRUCTURE SHALL OCCUR AT UNIT PERIMETERS).
3. FIRE BARRIER: WHERE PARTITION IS INDICATED TO BE A FIRE BARRIER THE WALL ASSEMBLY SHALL EXTEND THROUGH THE FRAMED CONCEALED SPACE TO THE UNDERSIDE OF THE ROOF AND/OR FLOOR SHEATHING UNLESS SPECIFICALLY DETAILED OTHERWISE.
4. FIRE STOP ALL DEVICES AND PENETRATIONS OCCURRING IN FIRE RESISTANCE RATED ASSEMBLIES. SEE TYPICAL FIRE STOPPING DETAILS, ELECTRICAL, MECHANICAL, AND PLUMBING DRAWINGS AND SPECIFICATIONS.
5. SEAL ALL PERIMETERS OF ALL RATED WALL ASSEMBLIES WITH FIRE RESISTANCE RATED JOINT ASSEMBLY. VERIFY NO GAPS OR VOIDS OCCUR.
6. WHERE FIRE RESISTANCE RATED WALL ASSEMBLIES OCCUR BEHIND FIBERGLASS SHOWERS, BATHTUBS, AND BATHTUB SURROUNDS IN APARTMENT UNITS. MAINTAIN CONTINUITY OF GYPSUM BOARD BY RUNNING CONTINUOUS BEHIND SHOWER. (USE MOISTURE RESISTANT TYPE). PROVIDE SHOWER MFR'S TRIMS DESIGNED TO CONCEAL INSTALLATION FLANGES OR PROVIDE ADDITIONAL LAYER ABOVE AND TO SIDES OF SHOWER SURROUNDS AS NEEDED TO COVER INSTALLATION FLANGES.
7. SEAL ALL UNIT PERIMETER DEMISING AND EXTERIOR FRAMING IN ACCORDANCE WITH THE SUSTAINABILITY SPECIFICATION REQUIREMENTS TO PASS BLOWER DOOR TESTING.
8. SEE STRUCTURAL DRAWINGS FOR SHEAR WALL AND BEARING WALLS LOCATIONS. PROVIDE FRAMING AND CONNECTION DETAILS PER STRUCTURAL DRAWINGS.

FIREBLOCKING/DRAFTSTOPPING GENERAL NOTES:

1. FIREBLOCKING SHALL CONSIST OF THE FOLLOWING:
   - 1.1. 2 INCH NOMINAL LUMBER
   - 1.2. ONE THICKNESS OF .75 INCH PARTICLEBOARD (OR WOOD STRUCTURAL PANELS) WITH JOINTS BACKED BY .719 INCH IN MATERIAL
   - 1.3. .5 INCH OF GYPSUM BOARD
   - 1.4. .25 INCH OF CEMENT BASED MILLBOARD
   - 1.5. BATTS OR BLANKETS OF MINERAL WOOD, OR MINERAL FIBER
2. FIREBLOCKING SHALL MINIMALLY BE PROVIDED IN THE FOLLOW LOCATIONS:
   - 2.1. CONCEALED SPACES OF STUD WALLS AND PARTITIONS, FURRED SPACES, AND PARALLEL ROWS OF STUDS OR STAGGERED STUDS AS FOLLOWS:
     - 2.1.1. VERTICALLY AT THE CEILING AND FLOOR LEVELS.
     - 2.1.2. HORIZONTALLY AT INTERVALS NOT EXCEEDING 10 FEET.
   - 2.2. INTERCONNECTIONS BETWEEN CONCEALED VERTICAL STUD WALL OR PARTITION SPACES AND CONCEALED HORIZONTAL SPACES CREATED BY AN ASSEMBLY OF FLOOR JOISTS OR TRUSSES, AND BETWEEN CONCEALED VERTICAL AND HORIZONTAL SPACES SUCH AS OCCUR AT SOFFITS, DROP CEILINGS, COVE CEILINGS AND SIMILAR LOCATIONS.
   - 2.3. CONCEALED SPACES BETWEEN STAIR STRINGERS AT THE TOP AND BOTTOM OF THE RUN.
   - 2.4. FLOOR PENETRATIONS CONTAINED AND LOCATED WITHIN THE CAVITY OF A WALL.
   - 2.5. ANNULAR SPACE AROUND VENTS, PIPES, DUCTS, AT CEILINGS AND FLOOR LEVELS.
   - 2.6. WITHIN CONCEALED SPACES OF EXTERIOR WALL COVERINGS AND OTHER EXTERIOR ARCHITECTURAL ELEMENTS WHERE ERECTED WITH COMBUSTIBLE FRAMES. FIREBLOCKING SHALL BE INSTALLED AT MAX INTERVALS OF 20 FEET IN EITHER DIRECTION WITH NO CONCEALED SPACE EXCEEDING 100 SF. WHERE WOOD FURRING STRIPS ARE USED, THEY SHALL BE OF APPROVED WOOD OF NATURAL DECAY RESISTANCE OR PRESERVATIVE-TREATED WOOD. IF NON-CONTINUOUS, SUCH ELEMENTS SHALL HAVE CLOSED ENDS, WITH NOT LESS THAN 4 INCHES OF SEPARATION BETWEEN SECTIONS.
3. PROVIDE DRAFTSTOPPING CONSISTING OF THE FOLLOWING:
   - 3.1. .5 INCH GYPSUM BOARD
   - 3.2. .375 INCH WOOD STRUCTURAL PANEL
   - 3.3. .375 INCH PARTICLE BOARD
   - 3.4. 1 INCH NOMINAL LUMBER
   - 3.5. CEMENT FIBERBOARD
   - 3.6. BATTS OR BLANKETS OF MINERAL WOOL OR GLASS FIBER OR OTHER MATERIAL ADEQUATELY SUPPORTED
4. PROVIDE DRAFTSTOPPING IN THE FOLLOWING LOCATIONS:
   - 4.1. IN FLOOR/CEILING ASSEMBLES ABOVE AND IN LINE WITH DWELLING UNIT SEPARATIONS
   - 4.2. IN ROOF/CEILING ASSEMBLIES AS INDICATED ON A-104 ROOF PLAN.

FLOOR PLAN KEYNOTES

1. PROVIDE WOOD HANDRAIL ON CHAIR RAIL. SEE TYPICAL DETAILS ON A-700. SEE FINISH SCHEDULE FOR ADDITIONAL INFORMATION
2. CHAIR RAIL EXTEND THROUGHOUT COMMON AREAS.SEE TYPICAL DETAILS ON A-700. SEE FINISH SCHEDULE FOR ADDITIONAL INFORMATION
3. DOUBLE STUD WALL

GENERAL NOTES

1. ALL EXTERIOR DIMENSIONS ARE TO EXTERIOR FACE OF STUDS OR MASONRY
2. ALL INTERIOR DIMENSIONS ARE TO FACE OF FINISH MATERIAL
3. COORDINATE SIZE AND LOCATION OF MECHANICAL AND ELECTRICAL EQUIPMENT, ROUTING OF UTILITIES, PADS, PENETRATIONS, AND SUPPORTS BETWEEN ARCHITECTURAL, MECHANICAL, PLUMBING, AND ELECTRICAL DRAWINGS
4. SLOPE FLOORS TO DRAINS AT 1/8" PER FOOT
5. BUILDING SHALL BE EQUIPPED WITH AN AUTOMATIC SPRINKLER SYSTEM THROUGHOUT IN ACCORDANCE WITH NFPA 13R WITH WHITE CONCEALED HEAD IN PUBLIC SPACES AND RESIDENT UNITS. SIDE WALL HEADS TO BE WHITE RECESSED.
6. SEE ENLARGED RESIDENT UNIT PLANS FOR TYPICAL UNIT DIMENSIONS.
7. WHERE SYMBOL IS INDICATED, PROVIDE ACCESSIBLE UNIT.
8. WHERE SYMBOL IS INDICATED, PROVIDE FEATURES FOR RESIDENTS WITH AUDIO/VISUAL IMPAIRMENTS. REFERENCE ELECTRICAL DRAWINGS FOR ADDITIONAL INFORMATION.
9. STRUCTURAL STEEL SHALL BE INDIVIDUALLY ENCASED IN 1 HR RATED CONSTRUCTION, U.N.O.
10. CONTRACTOR SHALL DESIGN AND PROVIDE A COMPLETE PASSIVE RADON MITIGATION - SUB-SLAB DEPRESSURIZATION (SSD) SYSTEM, AND PERFORM PRE-OCCUPANCY TESTING FOR RADON GAS. SYSTEM SHALL BE DESIGNED WITH CAPABILITIES TO CONVERT TO AN ACTIVE SYSTEM IF TESTING DETERMINES IT IS REQUIRED. SYSTEM SHALL BE DESIGNED AND INSTALLED TO COMPLY WITH APPLICABLE PROCEDURES IDENTIFIED IN APPLICABLE FEDERAL, STATE, AND LOCAL RULES AND REGULATIONS INCLUDING, BUT NOT LIMITED TO OHIO REVISED CODE SECTION 3723.02. CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING NECESSARY PERMITS AND APPROVALS FOR RELATED WORK AND FACILITIES. REFER TO SPECIFICATION 312113 'RADON MITIGATION' FOR ADDITIONAL REQUIREMENTS.
11. ALL EXTERIOR WINDOW DIMENSIONS ARE TO CENTERLINE OF WINDOW ROUGH OPENINGS. SEE WINDOW TYPES FOR ROUGH OPENINGS.
12. PROVIDE CONCRETE EQUIPMENT PADS. SEE MEP DRAWINGS FOR EQUIPMENT, LOCATIONS, AND SIZES. COORDINATE WITH MEP CONTRACTORS.

   - 1.5. BATTS OR BLANKETS OF MINERAL WOOD, OR MINERAL FIBER
2. FIREBLOCKING SHALL MINIMALLY BE PROVIDED IN THE FOLLOW LOCATIONS:
   - 2.1. CONCEALED SPACES OF STUD WALLS AND PARTITIONS, FURRED SPACES, AND PARALLEL ROWS OF STUDS OR STAGGERED STUDS AS FOLLOWS:
     - 2.1.1. VERTICALLY AT THE CEILING AND FLOOR LEVELS.
     - 2.1.2. HORIZONTALLY AT INTERVALS NOT EXCEEDING 10 FEET.
   - 2.2. INTERCONNECTIONS BETWEEN CONCEALED VERTICAL STUD WALL OR PARTITION SPACES AND CONCEALED HORIZONTAL SPACES CREATED BY AN ASSEMBLY OF FLOOR JOISTS OR TRUSSES, AND BETWEEN CONCEALED VERTICAL AND HORIZONTAL SPACES SUCH AS OCCUR AT SOFFITS, DROP CEILINGS, COVE CEILINGS AND SIMILAR LOCATIONS.
   - 2.3. CONCEALED SPACES BETWEEN STAIR STRINGERS AT THE TOP AND BOTTOM OF THE RUN.
   - 2.4. FLOOR PENETRATIONS CONTAINED AND LOCATED WITHIN THE CAVITY OF A WALL.
   - 2.5. ANNULAR SPACE AROUND VENTS, PIPES, DUCTS, AT CEILINGS AND FLOOR LEVELS.
   - 2.6. WITHIN CONCEALED SPACES OF EXTERIOR WALL COVERINGS AND OTHER EXTERIOR ARCHITECTURAL ELEMENTS WHERE ERECTED WITH COMBUSTIBLE FRAMES. FIREBLOCKING SHALL BE INSTALLED AT MAX INTERVALS OF 20 FEET IN EITHER DIRECTION WITH NO CONCEALED SPACE EXCEEDING 100 SF. WHERE WOOD FURRING STRIPS ARE USED, THEY SHALL BE OF APPROVED WOOD OF NATURAL DECAY RESISTANCE OR PRESERVATIVE-TREATED WOOD. IF NON-CONTINUOUS, SUCH ELEMENTS SHALL HAVE CLOSED ENDS, WITH NOT LESS THAN 4 INCHES OF SEPARATION BETWEEN SECTIONS.
3. PROVIDE DRAFTSTOPPING CONSISTING OF THE FOLLOWING:
   - 3.1. .5 INCH GYPSUM BOARD
   - 3.2. .375 INCH WOOD STRUCTURAL PANEL
   - 3.3. .375 INCH PARTICLE BOARD
   - 3.4. 1 INCH NOMINAL LUMBER
   - 3.5. CEMENT FIBERBOARD
   - 3.6. BATTS OR BLANKETS OF MINERAL WOOL OR GLASS FIBER OR OTHER MATERIAL ADEQUATELY SUPPORTED
4. PROVIDE DRAFTSTOPPING IN THE FOLLOWING LOCATIONS:
   - 4.1. IN FLOOR/CEILING ASSEMBLES ABOVE AND IN LINE WITH DWELLING UNIT SEPARATIONS
   - 4.2. IN ROOF/CEILING ASSEMBLIES AS INDICATED ON A-104 ROOF PLAN.

FLOOR PLAN KEYNOTES

1. PROVIDE WOOD HANDRAIL ON CHAIR RAIL. SEE TYPICAL DETAILS ON A-700. SEE FINISH SCHEDULE FOR ADDITIONAL INFORMATION
2. CHAIR RAIL EXTEND THROUGHOUT COMMON AREAS.SEE TYPICAL DETAILS ON A-700. SEE FINISH SCHEDULE FOR ADDITIONAL INFORMATION
3. DOUBLE STUD WALL

GENERAL NOTES

1. ALL EXTERIOR DIMENSIONS ARE TO EXTERIOR FACE OF STUDS OR MASONRY
2. ALL INTERIOR DIMENSIONS ARE TO FACE OF FINISH MATERIAL
3. COORDINATE SIZE AND LOCATION OF MECHANICAL AND ELECTRICAL EQUIPMENT, ROUTING OF UTILITIES, PADS, PENETRATIONS, AND SUPPORTS BETWEEN ARCHITECTURAL, MECHANICAL, PLUMBING, AND ELECTRICAL DRAWINGS
4. SLOPE FLOORS TO DRAINS AT 1/8" PER FOOT
5. BUILDING SHALL BE EQUIPPED WITH AN AUTOMATIC SPRINKLER SYSTEM THROUGHOUT IN ACCORDANCE WITH NFPA 13R WITH WHITE CONCEALED HEAD IN PUBLIC SPACES AND RESIDENT UNITS. SIDE WALL HEADS TO BE WHITE RECESSED.
6. SEE ENLARGED RESIDENT UNIT PLANS FOR TYPICAL UNIT DIMENSIONS.
7. WHERE SYMBOL IS INDICATED, PROVIDE ACCESSIBLE UNIT.
8. WHERE SYMBOL IS INDICATED, PROVIDE FEATURES FOR RESIDENTS WITH AUDIO/VISUAL IMPAIRMENTS. REFERENCE ELECTRICAL DRAWINGS FOR ADDITIONAL INFORMATION.
9. STRUCTURAL STEEL SHALL BE INDIVIDUALLY ENCASED IN 1 HR RATED CONSTRUCTION, U.N.O.
10. CONTRACTOR SHALL DESIGN AND PROVIDE A COMPLETE PASSIVE RADON MITIGATION - SUB-SLAB DEPRESSURIZATION (SSD) SYSTEM, AND PERFORM PRE-OCCUPANCY TESTING FOR RADON GAS. SYSTEM SHALL BE DESIGNED WITH CAPABILITIES TO CONVERT TO AN ACTIVE SYSTEM IF TESTING DETERMINES IT IS REQUIRED. SYSTEM SHALL BE DESIGNED AND INSTALLED TO COMPLY WITH APPLICABLE PROCEDURES IDENTIFIED IN APPLICABLE FEDERAL, STATE, AND LOCAL RULES AND REGULATIONS INCLUDING, BUT NOT LIMITED TO OHIO REVISED CODE SECTION 3723.02. CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING NECESSARY PERMITS AND APPROVALS FOR RELATED WORK AND FACILITIES. REFER TO SPECIFICATION 312113 'RADON MITIGATION' FOR ADDITIONAL REQUIREMENTS.
11. ALL EXTERIOR WINDOW DIMENSIONS ARE TO CENTERLINE OF WINDOW ROUGH OPENINGS. SEE WINDOW TYPES FOR ROUGH OPENINGS.
12. PROVIDE CONCRETE EQUIPMENT PADS. SEE MEP DRAWINGS FOR EQUIPMENT, LOCATIONS, AND SIZES. COORDINATE WITH MEP CONTRACTORS.

GENERAL ROOF PLAN NOTES:

1. PROVIDE RIDGE VENTS AT STEEP SLOPE RIDGES INDICATED. STOP RIDGE VENTS 12" FROM ENDS OF RIDGES OR EXTERIOR WALLS AND AT ATTIC DRAFT STOPPING PARTITIONS.

2. PROVIDE METAL VALLEY FLASHING AT ALL VALLEYS AND MTL DRIP EDGE TRIMS AT GABLE END CONDITIONS. PROVIDE 6" GUTTERS AND 3"X4" SMOOTH SQUARE DOWN SPOUTS.

3. PROVIDE ICE AND WATER GUARD IN ALL VALLEYS, ROOF EDGE PERIMETER EXTENDING 24" MIN. INWARD FROM INTERIOR FACE OF EXTERIOR WALL MEASURED HORIZONTALLY AND AT ALL ROOF TO WALL LOCATIONS.

4. SEE ROOFING AND FLASHING SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

5. MEP ROOF PENETRATIONS AND ROOF MTD EQUIPMENT MAY NOT ALL BE SHOWN. SEE MEP DRAWINGS FOR ROOF PENETRATION AND EQUIPMENT LOCATIONS. PROVIDE FLASHING, SLEEVES, AND INSULATED CURBS AS RECOMMENDED BY EQUIPMENT AND ROOFNG MANUFACTURERS' WRITTEN RECOMMENDATIONS AND DETAILS. PAINT ALL EXPOSED VENTS, DUCTS, PIPE AND EQUIPMENT.

6. PROVIDE CRICKETS AT ALL ROOF MOUNTED EQUIPMENT, CURBS, OBSTRUCTIONS AND PENETRATIONS TO MAINTAIN ROOF DRAINAGE

7. PROVIDE CONNECT ROOF DRAINS TO STORM WATER MANAGEMENT SYSTEM VIA RAIN CONDUCTORS THROUGH BUILDING. OVERFLOW DRAINS SHALL ROUTE TO THE FIRST FLOOR EXTERIOR OF THE BUILDING AND BE PROVIDED WITH LAMB'S TONGUE NOZZLES.

8. CONNECT GUTTERS AND DOWNSPOUTS TO STORM WATER MANAGEMENT SYSTEM VIA PVC BOOTS AT PERIMETER OF BUILDING.

9. PROVIDE MINIMUM SLOPE OF 1/4" PER FOOT AT LOW SLOPED ROOF. PROVIDE TAPERED INSULATION AS NEEDED TO ACHIEVE SLOPES TO DRAIN

GENERAL ATTIC PLAN NOTES:

1. INSTALL DRAFTSTOPPING IN ATTIC AT LOCATIONS INDICATED ON ROOF PLAN. DRAFTSTOP PARTITION TO BE 3/4" PLYWD ON ONE SIDE OF 2X FRAMING. PANEL TO PANEL JOINTS TO BE TREATED WITH 3/4" PLYWD BACKERS LAPPING PANELS BY 2" MIN EACH SIDE.

2. NEW ATTIC ACCESS DOOR PANELS PROVIDED WITH PLATFORM FRAMING INSIDE ATTIC AS NOTED ON 1D/A400

3.REVIEW ATTIC VENTILATION CALCULATIONS AND DO NOT INSTALL MORE RIDGE/HIP VENTS THAN SPECIFIED IF THE ADDITIONAL VENTING WOULD MAKE THE NET FREE VENT AREA (NFVA) AT THE TOP VENT GREATER THAN THE NET FREE VENT AREA AT THE SOFFIT VENTS.

ATTIC PLAN LEGEND

ATTIC DRAFT STOPPING PARTITION. ALIGN WITH UNIT DEMISING WALLS, CORRIDOR WALLS AND PARTITIONS AT THE THIRD FLOOR.

ATTIC DRAFT STOP ACCESS DOOR. PROVIDE A 1 HOUR FIRE RATED DOORS AT FIRE BARRIERS WHERE '1HR IS INDICATED.

ATTIC ACCESS DOOR - 1 HOUR FIRE RATED UPSWINGS 20X30 DOOR. COORDINATE POSITION WITH CEILING BELOW.

4B ENLARGED REFLECTIVE CEILING PLAN UNIT TYPE 'A'
3/8" = 1'-0"

2B ENLARGED FLOOR PLAN UNIT TYPE 'A'
3/8" = 1'-0"

3C TYPICAL INTERIOR ELEVATION - TYPE 'A' UNIT KITCHEN
3/8" = 1'-0"

3D TYPICAL INTERIOR ELEVATION - TYPE 'A' UNIT BATHROOM
3/8" = 1'-0"

GENERAL NOTES:

1. SEE BUILDING FLOOR PLANS AND ELEVATIONS FOR WINDOW LOCATIONS AND QUANTITY AND TYPE.

2. EXTEND FINISH FLOORING WALL TO WALL (RUN UNDER CABINETS AND APPLIANCES)

3. AT TYPE B-AV UNITS, PROVIDE THE FOLLOWING:
   - VISUAL ALARMS THAT COMPLY WITH UFAS 4.28.4
   - OUTLET ADJACENT TO THE PHONE OUTLET FOR THE TELECOMMUNICATIONS DEVICE FOR THE DEAF (TDD)
   - DOOR BELL HARD WIRED TO A FLASHING LIGHT SIGNAL
   - UNIT SMOKE DETECTION SHALL HAVE BOTH AUDIBLE AND VISUAL NOTIFICATION PER ANSI A117.1
   - FIRE ALARM WIRING SHALL BE EXTENDED TO A POINT WITHIN THE UNIT IN THE VICINITY OF THE UNIT SMOKE DETECTION SYSTEM
   - PEEP HOLE IN UNIT ENTRY DOOR
4. UNITS ARE TO RECEIVE HIGH VISIBILITY SIGNAGE THAT DISPLAYS THE UNIT NUMBER.

5. ALL UNITS ARE TO RECEIVE ANTI-SCALD AND PRESSURE BALANCED FAUCETS WITH LEVER HANDLES FOR ALL SINKS, BATH TUBS, AND SHOWERS, SEE PLUMBING DWGS.

6. PROVIDE THERMOSTAT AND CONTROL PANELS THAT ARE EASY TO READ AND SIMPLE TO OPERATE, SEE MECHANICAL AND ELECTRICAL DWGS.

7. PROVIDE MULTIPLE CLOTHING RODS INSTALLED AT MULTIPLE HEIGHT IN THE ENTRY CLOSET AND BEDROOMS CLOSETS.

8. PROVIDE BLOCKING AT GRAB BARS AND SHOWER SEATS

REFLECTED CEILING PLAN LEGEND

- LED 6" SURFACE MOUNT FIXTURE DOWNLIGHT
- LED 8" SURFACE MOUNTED LED SHOWER DOWNLIGHT
- LED 18" SURFACE MOUNTED LED DOWNLIGHT
- 4' LINEAR LOW PROFILE FLUSH MOUNTED LED FIXTURE
- LED 24" LONG MODERN SLIM VANITY. CENTERED ON LAVATORY AND MIRROR. SEE INTERIOR ELEVATIONS
- SURFACE MTD LED STRIP FIXTURE ABOVE DOOR
- 12" LED UNDERCABINET LIGHT
- EXHAUST FAN (SEE MECH DWGS)
- GYPSUM BOARD FLOOR/ROOF CEILING ASSEMBLY - EXPOSED AS CEILING
- 5/8" GYPSUM DROPPED CEILING AND/OR SOFFIT ON LIGHT GAUGE MTL FRAMING AND/OR DRYWALL SUSPENSION SYSTEM (FLOOR CLNG/ ROOF CLNG ASSEMBLY OCCURS ABOVE)

NOTES:

1. WHERE LIGHTING LOCATION ARE NOT PROVIDED THEY SHALL BE CENTERED IN THE ROOM.
2. ALL UNIT LIGHT FIXTURES ARE TO BE NON-GLARE LED FIXTURES

RESIDENTIAL APPLIANCES

- (A) ELECTRIC FREESTANDING RANGE
- (B) MTL GREASE SHIELD
- (C) RANGE HOOD. SEE MECHANICAL & ELECTRICAL DRAWINGS FOR ADDITIONAL REQUIREMENTS. AT MOBILITY UNITS, RANGE HOOD IS TO BE WIRED TO A WALL SWITCH
- (D1) DISHWASHER

PROJECT NO.: 2024.15

TITLE:
ENLARGED UNIT PLANS & ELEVATIONS (1BR-TYPE C)

DRAWING NUMBER:
A-602

© 2024 Hiti, DiFrancesco and Siebold, Inc.

5C ENLARGED FLOOR PLAN UNIT TYPE 'D' - MOBILITY UNIT
3/8" = 1'-0"

3A TYPICAL INTERIOR ELEVATION -TYPE 'D' MOBILITY UNIT BATHROOM
3/8" = 1'-0"

3B TYPICAL INTERIOR ELEVATION -TYPE 'D' MOBILITY UNIT KITCHEN
3/8" = 1'-0"

GENERAL NOTES:

1. SEE BUILDING FLOOR PLANS AND ELEVATIONS FOR WINDOW LOCATIONS AND QUANTITY AND TYPE.

2. EXTEND FINISH FLOORING WALL TO WALL (RUN UNDER CABINETS AND APPLIANCES)

3. AT TYPE B-AV UNITS, PROVIDE THE FOLLOWING:
   - VISUAL ALARMS THAT COMPLY WITH UFAS 4.28.4
   - OUTLET ADJACENT TO THE PHONE OUTLET FOR THE TELECOMMUNICATIONS DEVICE FOR THE DEAF (TDD)
   - DOOR BELL HARD WIRED TO A FLASHING LIGHT SIGNAL
   - UNIT SMOKE DETECTION SHALL HAVE BOTH AUDIBLE AND VISUAL NOTIFICATION PER ANSI A117.1
   - FIRE ALARM WIRING SHALL BE EXTENDED TO A POINT WITHIN THE UNIT IN THE VICINITY OF THE UNIT SMOKE DETECTION SYSTEM
   - PEEP HOLE IN UNIT ENTRY DOOR
4. UNITS ARE TO RECEIVE HIGH VISIBILITY SIGNAGE THAT DISPLAYS THE UNIT NUMBER.

5. ALL UNITS ARE TO RECEIVE ANTI-SCALD AND PRESSURE BALANCED FAUCETS WITH LEVER HANDLES FOR ALL SINKS, BATH TUBS, AND SHOWERS, SEE PLUMBING DWGS.

6. PROVIDE THERMOSTAT AND CONTROL PANELS THAT ARE EASY TO READ AND SIMPLE TO OPERATE, SEE MECHANICAL AND ELECTRICAL DWGS.

7. PROVIDE MULTIPLE CLOTHING RODS INSTALLED AT MULTIPLE HEIGHT IN THE ENTRY CLOSET AND BEDROOMS CLOSETS.

8. PROVIDE BLOCKING AT GRAB BARS AND SHOWER SEATS

RESIDENTIAL APPLIANCES

- (A) ELECTRIC FREESTANDING RANGE
- (B) MTL GREASE SHIELD
- (C) RANGE HOOD. SEE MECHANICAL & ELECTRICAL DRAWINGS FOR ADDITIONAL REQUIREMENTS. AT MOBILITY UNITS, RANGE HOOD IS TO BE WIRED TO A WALL SWITCH
- (D1) DISHWASHER
- (D2) DISHWASHER(MOBILITY UNITS)
- (E) 28" ENERGY STAR REFRIG/FREEZER

TOILET ACCESSORIES

- U1 TOILET PAPER DISPENSER
- U2A 24" GRAB BAR
- U2B 42" GRAB BAR
- U2C 36" GRAB BAR
- U3 FRAME-LESS MIRROR
- U5 ROBE HOOK
- U6 TOWEL BAR

REFLECTED CEILING PLAN LEGEND

- LED 6" SURFACE MOUNT FIXTURE DOWNLIGHT
- LED 8" SURFACE MOUNTED LED SHOWER DOWNLIGHT
- LED 18" SURFACE MOUNTED LED DOWNLIGHT
- 4' LINEAR LOW PROFILE FLUSH MOUNTED LED FIXTURE
- LED 24" LONG MODERN SLIM VANITY. CENTERED ON LAVATORY AND MIRROR. SEE INTERIOR ELEVATIONS
- SURFACE MTD LED STRIP FIXTURE ABOVE DOOR
- 12" LED UNDERCABINET LIGHT
- EXHAUST FAN (SEE MECH DWGS)
- GYPSUM BOARD FLOOR/ROOF CEILING ASSEMBLY - EXPOSED AS CEILING
- 5/8" GYPSUM DROPPED CEILING AND/OR SOFFIT ON LIGHT GAUGE MTL FRAMING AND/OR DRYWALL SUSPENSION SYSTEM (FLOOR CLNG/ ROOF CLNG ASSEMBLY OCCURS ABOVE)

NOTES:
1. WHERE LIGHTING LOCATION ARE NOT PROVIDED THEY SHALL BE CENTERED IN THE ROOM.
2. ALL UNIT LIGHT FIXTURES ARE TO BE NON-GLARE LED FIXTURES

FINISH SCHEDULE REMARKS

1. ACCENT PAINT TO OCCUR FULL HEIGHT ON RESIDENT ENTRY NICHE BACK WALL ABOVE AND BELOW CHAIR RAIL. PNT-11 ON 1ST FLOOR, PNT-12 ON 2ND FLOOR, AND PNT-13 ON 3RD FLOOR.
2. FULL HEIGHT WALL PROTECTION TO OCCUR SURROUNDING ELEVATOR, SEE FINISH FLOOR PLAN FOR LOCATIONS. OUTSIDE CORNERS TO RECEIVE FULL HEIGHT CORNER GUARDS. NO CHAIR RAIL TO BE INSTALLED.
3. ACCENT PAINT TO OCCUR, SEE FINISH PLAN FOR LOCATION.
4. 4' WIDE, FULL HEIGHT FRP TO BE INSTALLED AT CORNER WHERE FLOOR SINK IS INSTALLED. ALL FRP CAPS AND TRIMS TO BE PROVIDED. REMAINDER OF WALL TO RECEIVE PNT.
5. FULL HEIGHT PWT TO BE INSTALLED ON SINK/TOILET WALL. 4' HIGH WAINSCOT OF PWT TO BE INSTALLED ON ALL OTHER WALLS WITH PNT ABOVE.
6. FULL HEIGHT FRP TO BE INSTALLED ON ALL WALLS. ALL CAPS AND TRIMS TO BE PROVIDED AS NEEDED. CAULK FRP AT TRASH CHUTE(S).
7. RESIDENT UNIT MECHANICAL CLOSETS ON FIRST FLOOR TO HAVE SEALED CONCRETE (SC) FLOORING. UPPER FLOOR CLOSETS TO RECEIVE LVP-1.
8. ACCENT INSET OF LVP-3 TO OCCUR, SEE FINISH FLOOR PLAN FOR SIZING AND LOCATIONS.
9. STAIR TREADS TO RECEIVE RBST-1. LANDINGS ADJACENT TO CORRIDORS TO RECEIVE LVP-2. INTERMEDIATE LANDINGS TO RECEIVE RBT-1.
10. FULL HEIGHT PWT-2 TO BE INSTALLED ON WALL BEHIND DRINKING FOUNTAIN. NO RWB SHALL BE INSTALLED WHERE TILE IS INSTALLED, SEAL PWT TO FLOOR.
11. 6" INTEGRAL FLASH COVED SHEET VINYL BASE INCLUDING TOP CAP.

MILLWORK GENERAL NOTES:

1. ALL CABINETRY TO INCLUDE KICK PLATE IN MATCHING FINISH AS BASE CABINET. SHOEMOULDING TO BE INSTALLED ON KICK PLATE.
2. ALL BACK AND SIDE SPLASHES TO MATCH COUNTERTOP MATERIAL.
3. ALL CABINETRY PULLS TO BE BERENSON CONTEMPORARY ADVANTAGE ONE 96CM, FINISH: TBD.

WP-4	WALL PROTECTION, MANUF: ACROVYN, STYLE: RIGID .040" WALL COVERING, COLOR: TBD	

GENERAL NOTES

1. ALL UNIT LIGHT FIXTURES ARE TO BE NON-GLARE LED FIXTURES.
2. ALL GROUT TO BE TEC POWER GROUT.
3. ACCENT WALL AND FLOORING FINISHES INDICATED ON FINISH PLANS IN A-800 SERIES. ALL OTHER FINISHES NOTED IN THE FINISH SCHEDULE.
4. TYPICAL GYPSUM BOARD CEILINGS AND SOFFITS TO BE PAINTED WITH FLAT PAINT UNLESS OTHERWISE NOTED.
5. ACCESS PANELS TO BE PAINTED THE SAME COLOR AS THE SURFACE IN WHICH THEY OCCUR.
6. SUBMIT COLOR SAMPLES FOR ALL ELECTRICAL DEVICES AND COVER PLATES FOR ARCHITECTS SELECTION.
7. ALL FINISHES TO BE INSTALLED ACCORDING TO MANUFACTURER'S WRITTEN INSTRUCTIONS.
8. ELEVATOR CAB FINISHES TO BE SELECTED BY ARCHITECT FROM STANDARD OFFERING.
9. WALL TILE TO HAVE SCHLUTER TRIMS AT OUTSIDE CORNER, WHERE THE BASE MEETS RESILIENT FLOORING, AND WHERE TILE TRANSITIONS TO PAINTED GYP BD. ARCHITECT TO SELECT COLOR AND PROFILE.
10. FLOORING IN CLOSETS TO BE THE SAME AS THE ROOM THAT IT OCCURS IN UNLESS OTHERWISE NOTED.
11. ALL TRANSITIONS BETWEEN DIFFERENT TYPES OF FLOOR FINISHES TO HAVE TRANSTIONS INSTALLED TO CREATE FLUSH CONDITION.
12. FLOORING TRANSITIONS BETWEEN ROOMS ARE TO OCCUR UNDERNEATH THE DOOR. IF THERE IS NOT A DOOR THEN TO OCCUR IN THE CENTER OF THE OPENING.
13. ALL SHEET VINYL FLOORING IS TO HAVE WELDED SEAMS.
14. ALL BATHROOMS, KITCHENS, AND OTHER WET AREAS TO RECIEVE PAINT WITH A SEMI GLOSS FINISH, UNO.
15. SEAMS ARE NOT TO OCCUR AT DRAIN LOCATIONS.
16. HAND RAIL, CHAIR RAIL, AND DOOR TRIM IN COMMON AREAS TO BE PAINTED PNT-21.
17. ALL DOORS AND TRIM IN RESIDENT UNITS TO BE PAINTED PNT-20.
18. HOLLOW METAL DOORS AND DOOR TRIM THAT OCCURS WITH HOLLOW METAL DOORS IS TO BE PAINTED PNT-9.
19. USE APPROPRIATE PAINTS AND PRIMERS WHERE BLOCK MASONRY WALLS ARE TO BE PAINTED.
20. ALL PRODUCTS THAT ARE PART OF A TILE INSTALLATION SYSTEM ARE TO BE FROM THE SAME MANUFACTURER.
21. CORNER GUARDS TO BE INSTALLED ON ALL COMMON AREA OUTSIDE CORNERS FROM TOP OF WALL BASE TO UNDERSIDE OF CHAIR RAIL OR 4'-0" AFF.
22. CORNER GUARDS TO BE INSTALLED ON ALL ACCESSIBLE RESIDENT UNIT OUTSIDE OCRNERS FROM TOP OF WALL BASE TO 4'-0" AFF.
23. ALL INTERIOR FINISHES TO HAVE CLASS A FIRE RATING.
24. PROVIDE RBST AT ALL STAIRS AND INTERMEDIATE RISERS.
25. WINDOW SILLS TO BE SSM-2.
26. ALL RESIDENT ENTRY NICHES TO HAVE ACCENT PAINT ABOVE AND BELOW CHAIR RAIL. ACCENT PAINTS VARY PER FLOOR, SEE FINISH LEGEND FOR COLOR PER FLOOR.
27. PROVIDE SEAMING DIAGRAMS FOR ALL FLOORING MATERIALS.
28. WHERE FRP & IFRK ARE TO BE INSTALLED, INSTALL FULL HEIGHT FROM TOP OF WALL BASE, INCLUDE ALL TRIM PIECES.
29. WALL PROTECTION TO OCCUR BELOW CHAIR RAIL. WALL PROTECTION VARIES PER FLOOR, SEE FINISH LEGEND FOR COLOR PER FLOOR.
30. SEE TYPICAL RESIDENT ROOM FINISH PLAN ON A-801. LVP TO BE INSTALLED PARALLEL TO THE COORDIOR DOOR OPENING.
31. STAIRWELL STRINGERS AND HANDRAIL TO BE PAINTED PNT-18.
32. WALL PROTECTION TO OCCUR UNDER CHAIR RAIL UNO.

CODES AND STANDARDS

1. New construction has been designed to, and shall be constructed in accordance with the following building codes and standards:
   - A. 2024 Ohio Building Code (OBC 2024)
   - B. 2024 Ohio Existing Building Code (OEBC 2024)
   - C. City of Cleveland, Ohio, Code of Ordinances
   - D. ASCE 7-16, Minimum Design Loads and Associated Criteria for Buildings and Other Structures
2. Unless explicitly modified in the Contract Drawings and Specifications, the Contractor shall comply with provisions of:
   - A. ACI 301-20, Specifications for Structural Concrete
   - B. ACI 318-19, Building Code Requirements for Structural Concrete
   - C. TMS 402-16, Building Code Requirements for Masonry Structures
   - D. TMS 602-16, Specification for Masonry Structures
   - E. AISC 360-16, Specification for Structural Steel Buildings
   - F. AWS D1.1-15, Structural Welding Code - Steel
   - G. AWC NDS-2018, National Design Specification (NDS) for Wood Construction with 2018 Supplement
   - H. AWC SDWPS-21, Special Design Provisions for Wind and Seismic
   - I. TPI 1-2014, National Design Standard for Metal-plate-connected Wood Truss Construction
   - J. APA PDS-20, Panel Design Specification

DESIGN LOADS

Floor live load (unless otherwise noted)

Public Rooms & Corridors Serving Them	100 psf (1) (2)
Stairs & Exits	100 psf
Private Rooms & Corridors Serving Them	40 psf

(1) Live Loads are reduced per OBC section 1607.12 to a maximum reduction of 40%
(2) Plus 15 psf partition allowance, unreduced (OBC 1607.5)

Roof loads

Roof live load	psf
Rain Intensity (OBC Figure 1611.1)	i = in/hr
Rain Load (OBC 1611.1) ponded water	psf min.
	not critical (3) (4)
	OR xxx psf (3) (4)
Ponding Instability (OBC 1611.2)	not critical (5)

(3) Architect has provided scuppers and/or secondary drainage system
(4) Assumes primary drainage is blocked and rain accumulates to depth of overflow (see Architect's detail) at 62.4 pcf

Roof snow load data

Minimum roof snow load (City of Cleveland)	30 psf
Ground snow load (OBC 1608.2)	p_g = psf
Flat-roof snow load (ASCE 7, 7.3)	p_f = psf (6)
Minimum snow load (ASCE 7, 7.3.4)	p_m = psf
Rain-on-snow surcharge (ASCE 7, 7.10)	psf
Snow exposure factor (ASCE 7, Table 7.3-1)	C_e =
Snow importance factor (ASCE 7, Table 1.5-2)	I_s =
Thermal factor (ASCE 7, Table 7.3-2)	C_t =
Slope Factor (ASCE 7, Figure 7.4-1)	C_s =

(6) Increased for snow buildup / unbalanced per ASCE 7, 7.6 to 7.9

Wind design data

Minimum wind load	20 psf
Ultimate design wind speed (OBC Figure 1609.3)	V_{ult} = mph
Nominal design wind speed (OBC 1609.3.1)	V_{asd} = mph
Risk category (OBC, Table 1604.5)	
Exposure category (OBC 1609.4)	
Internal pressure coefficient (ASCE 7, Table 26.13-1)	GCpi = ±
Components and Cladding	
Effective Wind Area	ft^2 (7)
Zone 1 (Roof Interior)	+XX.X, -XX.X psf
Zone 1' (Roof Interior)	+XX.X, -XX.X psf
Zone 2 (Roof Edge)	+XX.X, -XX.X psf
Zone 3 (Roof Corner)	+XX.X, -XX.X psf
Zone 4 (Wall Interior)	+XX.X, -XX.X psf
Zone 5 (Wall Corner)	+XX.X, -XX.X psf

(+) Indicates pressure acting toward the surface
(-) Indicates pressure acting away from the surface
Edge and corner zones are defined as areas within X'-X" of edge or corners

Uplift on canopies and overhangs	psf

(7) Components and cladding engineer may calculate wind loads based on actual effective wind area per ASCE 7

Earthquake design data

Risk category (OBC, Table 1604.5)	
Seismic importance factor (ASCE 7, Table 1.5-2)	I_e =
Mapped spectral response acceleration parameters	
Short period	S_s = 0. g
1-second period	S_1 = 0. g
Site class (per Geotechnical Report)	
Design spectral response acceleration parameters	
Short period	S_{ds} = 0. g
1-second period	S_{d1} = 0. g
Seismic design category	
Basic seismic-force-resisting system (ASCE 7, Table 12.2-1)	
A. to H. and text	
1. to X. and text	
Design base shear (ASCE 7, 12.8-1)	V = Kips
Seismic response coefficient (ASCE 7, 12.8-2)	C_s =
Response modification factor (ASCE 7, Table 12.2-1)	R =
Analysis procedure	Equivalent lateral force procedure

DESIGN STRESSES

Concrete minimum compressive strength in 28 days:	
Footings	f'_c = 3,000 psi
Interior slabs on grade	f'_c = 4,000 psi
Structural concrete subject to freezing and thawing	f'_c = 5,000 psi
Reinforcing bars (ASTM A615, Grade 60)	F_y = 60,000 psi
Welded wire reinforcement (ASTM A1064)	F_y = 70,000 psi
Structural steel W, WT and S shapes (ASTM A992 or ASTM A572/50)	F_y = 50,000 psi
Structural steel other shapes (ASTM A36)	F_y = 36,000 psi
Anchor rods (ASTM F1554, Grade 55 weldable)	F_y = 55,000 psi
Hollow structural sections (ASTM A500, Grade C)	
Rectangular	F_y = 50,000 psi
Masonry	f'_m = 2,000 psi
Load-bearing CMU (ASTM C55 or C90)	
Mortar (ASTM C270)	Type M or S
Grout (ASTM C476)	3,000 psi
Soil bearing pressure for foundations	
(Engineer note: describe bearing strata)	psf

GENERAL

1. All new construction shall comply with the Contract Documents and the Building Code.
2. Typical details and general notes apply to all parts of the work except where specifically detailed or unless otherwise noted.
3. The structural drawings illustrate structural members. Refer to architectural, mechanical, and electrical drawings for non-structural items which require special provisions during the construction of the structural members.
4. Drawings are not to be scaled.
5. Refer to architectural plans for floor depressions, openings, slopes, drains, curbs, pads, embedded items, non-bearing partitions, etc. Refer to mechanical and electrical plans for sleeves, openings, and hangers for pipes, ducts, and equipment.
6. No pipes or ducts shall be embedded into structural members unless so shown on the plans or approved by the Engineer.
7. The Contractor shall verify and be responsible for all dimensions and conditions which impact the work. Field verify sizes, elevations, hole locations, etc., prior to fabrication.
8. The Contractor shall carefully review the drawings to identify the scope of work required, visit the site to relate the scope of work to existing conditions and determine the extent to which those conditions and physical surroundings will impact the work.
9. Locate existing underground utilities in areas of construction. Coordinate with utility companies for any shut-off requirements of still active lines.
10. The Contractor shall resolve any conflicts on the drawings or in the specifications with the Architect/Engineer before proceeding with the work.
11. Any deviation, modification, or substitution from the approved set of structural drawings shall be submitted to the Owner, Architect, and Engineer for review/approval prior to its use or inclusion on the shop drawings.
12. The Contractor shall provide all necessary shores, braces, and guys required to support all loads to which the building structure and components, soils, other structures, and utilities may be subjected during construction. Shoring systems shall be designed, signed, and sealed by a professional engineer licensed in the jurisdiction where the project is located.
13. The Contractor shall provide means, method, techniques, sequence, and procedure of construction as required.
14. The Contractor shall protect all work, materials, and equipment from damage and shall provide proper storage facilities for materials and equipment during construction.
15. Site visits performed by the Architect/Engineer do not constitute inspections of means and methods of construction performed by the Contractor.
16. Structural observations performed by the Architect/Engineer during construction are not the continuous and special inspection services and do not waive the responsibility for the inspections required of the Building Department Inspector or the testing agency. Observations also do not guarantee the Contractor's performance and shall not be considered as supervision of construction.
17. The Contractor shall review shop drawings for completeness and compliance with contract documents. The Contractor shall stamp shop drawings prior to submission to the Architect and Engineer.
18. Review of the shop drawings by the Architect's Engineers shall not be construed as an authorization to deviate from the Contract Documents.
19. Shop drawings will not be processed if they are incomplete, lack coordination with relevant portion of contract documents, lack calculations if required, or if deviations, modifications, and substitutions are indicated without prior written approval from the Architect/Engineer.
20. Existing conditions as shown on these plans are for reference only. The Contractor is required to field verify all existing conditions prior to construction.

FOUNDATIONS AND SLABS ON GROUND

1. Ground supported building components including foundations, slabs-on-grade, foundation walls, and retaining walls are designed in accordance with recommendations provided in the Geotechnical Report prepared by _____, Geotechnical Engineers, dated _____. The Geotechnical Report is provided for reference as the source of information used to design ground supported building components. The Structural Engineer is not responsible or liable for the accuracy of information presented in the Geotechnical Report.
2. Footings: Elevations given are to top of footings and grade beams.
3. Slab on ground, ramps and steps: Slab elevations given are to top of structural slab. See Architect's drawings for layout of ramps and steps.
4. All footings must be supported on undisturbed soil capable of achieving the design soil bearing pressure without appreciable settlement. Where additional excavation is required to attain the design bearing pressure, backfill the overexcavated area with CLSM or lean concrete up to the design bearing elevation.
5. Controlled Low Strength Material (CLSM) shall meet the following requirements, unless specifically stated in the Geotechnical Report:
   - A. Unit weight between 90 pcf and 120 pcf per ASTM D6023.
   - B. Flowability of a minimum of 8" per ASTM D6103.
   - C. Unconfined compression strength = 200 psi per ASTM D4832.
   - D. CLSM shall be protected and not loaded until meeting ASTM D6024.
6. Provide (2) #5 minimum continuous in all footings directly under masonry walls.
7. Unless otherwise noted, compact all engineered fills to 95% of the maximum dry density per ASTM D1557 Modified Proctor Method.
8. In granular soils (sands and gravel) the soil shall be mechanically tamped to a hard surface immediately prior to placing footing.
9. Existing foundations:
   - A. Existing foundations shown on drawings are approximate. Exact conditions must be verified at time of construction.
   - B. When new footings meet existing footings, they shall be stepped at a ratio of 2 horizontal to 1 vertical.
   - C. Unless otherwise noted, new footings shall not bear below existing footings.
10. Before backfill, all walls must be adequately braced. For backfill requirements, see specifications and/or geotechnical report.
11. Provide a minimum of (4) #5 vertical bars and #3@12" on center horizontal ties for concrete piers under columns or beams.
12. Bearing into shale: elevations given are approximate and shall be adjusted to suit field conditions.
13. When excavations approach the ground water level, the water level shall be lowered by an acceptable dewatering system so that the water level is maintained continuously a minimum of 2'-0" below the excavation.
14. Shale containing pyrites must be protected as indicated on the drawings or in the project specifications.
15. The bottom of foundations shall be protected against freezing until backfill or other permanent protective cover is in place.

CONCRETE CONSTRUCTION

1. All concrete construction shall be in accordance with the latest Building Code Requirements for Structural Concrete ACI 318 and ACI Detailing Manual, except that construction and removal of forms and reshoring shall be inspected by the Contractor's engineer.
2. Reinforcing steel shall have the following minimum coverage in accordance with the following table. Place bars as near to the concrete surface as these minima permit wherever possible, unless noted otherwise:

Concrete Exposure	Member	Reinforcement	Specified cover, in.
Cast against and permanently in contact with ground	All	All	3
Exposed to weather or in contact with ground	All	No. 6 through No. 18 bars	2
		No. 5 bar and smaller	1 1/2
Not exposed to weather or in contact with ground	Slabs, joists and walls	No. 14 and No. 18 bars	1 1/2
		No. 11 bar and smaller	3/4
	Beams, columns, pedestals, and tension ties	Primary reinforcement, stirrups, ties, spirals, and hoops	1 1/2

3. Welded wire reinforcement for slabs on ground shall have a minimum top coverage of 1" and a maximum top coverage of 1 1/2", unless otherwise noted. Reinforcement shall be positively supported and maintained in this position during placement of concrete.
4. Furnish bar supports where necessary during construction.
5. Provide plastic-coated (not plastic-tipped) or stainless steel chairs in all concrete exposed to view in completed structure.
6. Provide pipe sleeves and inserts in concrete work where required. See architectural and mechanical drawings.
7. Unless noted otherwise, provide the following minimum reinforcing:
   - A. Slabs on ground, slabs on deck, and toppings (2" minimum): 6x6-W1.4xW1.4 welded wire reinforcement in flat sheets.
8. Construction joints shall be positioned so as not to change the structural design requirements. Framed floors and roofs shall have construction joints so that the ratio of length to width of a single pour shall not exceed 2. The location and size of all construction joints shall be approved by the Engineer. Submit proposed pour layout for Engineer's review and approval two weeks prior to placing concrete.
9. Welding of reinforcing bars (including tack welding) is not permitted without permission of Engineer in writing. Where and when permitted, welded rebars shall comply with ASTM A706 (F_y=60 ksi) and welding shall conform to AWS D1.4. Welding shall be performed by certified welders.
10. Provide horizontal keyways in construction joints in beams, joists, supported slabs, walls, and wall footings; minimum 1 1/2" depth with height equal to one-third of member depth, unless otherwise shown or noted.
11. Unless noted otherwise in project specifications or drawings, all exposed concrete subjected to freezing and thawing shall have a minimum cement content of 610 pounds per yard, a maximum water/cement ratio of 0.40, and 6%±1.5% of entrained air.
12. At footing corners, innermost reinforcing shall have 1'-0" long hook at far face. For outer reinforcing, provide corner bars with lap length of 36 bar diameters (2'-0" minimum).
13. Provide foundation dowels for all walls, piers, and columns same size and spacing as vertical steel.
14. All bars interrupted by structural steel shall extend to within 1" of structural steel flange or web and have a 90° hook unless otherwise shown.
15. Drawings show typical reinforcing conditions. Contractor shall prepare detailed placement drawings of all conditions showing quantity, spacing, sizes, clearances, laps, intersections, and coverage required by the structural details, applicable code, and trade standards. Contractor shall notify reinforcing inspector of any adjustments from typical conditions which are proposed in placement drawings to facilitate field placement of reinforcing steel and concrete.
16. Bar bends shall be made cold. Bars shall not be bent after any portion of the bar is encased in concrete.
17. Splices (grade 60 deformed bars):
   - A. Lap all compression splices 30 bar diameters of the larger bar.
   - B. Lap all tension splices in accordance with the following tables. Provide Class B Tension Lap Splices unless otherwise noted.
   - C. Increase tension or compression splice lengths by the following factors. Increases are Cumulative:
     1. Epoxy-coated with clear cover less than 3 bar diameters or clear spacing less than 6 bar diameters: 1.5
     2. Epoxy-coated other bars: 1.2
   - D. Top bars are defined as horizontal bars with more than 12" of fresh concrete below.

Bar Size	Class B Tension Lap Splice					
	f'_c = 3,000 psi		f'_c = 4,000 psi		f'_c = 5,000 psi	
	Top	Other	Top	Other	Top	Other
#3	28"	22"	24"	19"	22"	17"

MASONRY CONSTRUCTION

1. Masonry walls shown on structural drawings have been designed in accordance with TMS 402, Building Code Requirements for Masonry Structures.
2. Masonry walls shall be constructed in accordance with TMS 602, Specifications for Masonry Structures, and the project specifications.
3. Determine compressive strength of masonry (f'm) by the unit strength method (Article 1.4.B.2 of TMS 602).
   - A. Mortar shall meet the Property Specifications' requirements of ASTM C270, and shall be field tested according to ASTM C780.
   - B. The strength of grout shall be determined by tests in accordance with ASTM C1019.
4. Intersecting walls shall be anchored by one of the following methods (does not apply at control joints or where non-load-bearing partitions abut bearing walls):
   - A. Fifty percent of the units at the intersection shall be laid in an overlapping masonry bonding pattern, with alternate units having a bearing of not less than 3" on the unit below.
   - B. Walls shall be tied by galvanized steel straps 1 1/2" x 1/4" x 24" with 2" bend at 90° each end. Grout straps solid into cores of block at 24" maximum vertical spacing.
5. Corners of bearing walls shall be built in running bond.
6. Provide corner bars in bond beams at wall intersections and corners to match bond beam reinforcing.
7. Provide a minimum of 8" of solid masonry under the bearing ends of loose lintels.
8. Unless otherwise noted, provide galvanized ladder type joint reinforcement at 16" on center vertically per ASTM A951.
9. Welding of reinforcing bars (including tack welding) is not permitted without permission of Engineer in writing.
10. Provide shop drawings which indicate size, spacing, bending details, and type of all reinforcing bars placed in masonry walls.
11. Wall reinforcing shall be held in position during grouting.
12. For bars at face of wall, maintain 1/2" clearance from inside face of CMU to reinforcing.
13. Provide bond beam with (1) #4 continuous reinforcing bar at sill of all openings, unless otherwise noted.
14. Splices:
   - A. Lap all splices in accordance with the following table.
   - B. Increase splice length by 50% for epoxy-coated reinforcing.

Bar Size	Reinforcing Centered in Wall Nominal Wall Width					Reinforcing at Face 2" cover
	f'_m = 2,000 psi					
	6"	8"	10"	12"	16"

LOOSE LINTEL SCHEDULE

1. Interior lintels shall be shop painted. Lintels exposed to weather shall be 3/8" minimum thickness and hot-dip galvanized.
2. Bottom plates in beam/plate assemblies shall be 1/2" less in width than the supported masonry wall. Stop end of bottom plates 1/2" from edge of opening.
3. Weld bottom plates to lintels with continuous fillet welds (exterior side).
4. Steel lintels and lintel plates in exterior walls shall be fabricated, followed by hot-dip galvanizing of the complete assembly.
5. Lintels shall have minimum bearing at each end of 1" per foot of opening (6" minimum) except as detailed.
6. Lintels shall have 8" minimum solid masonry below bearing points and shall extend beyond the full bearing area.
7. Lintel bearing plates shall be held back 1/2" minimum from face of masonry at opening. Provide flexible caulk between lintel and masonry at this location. Match mortar color.
8. The following schedules apply to all non-bearing masonry walls and to bearing walls where lintels are not indicated on the structural drawings. See drawings for other lintels in bearing walls.
   - A. For 4", 8", 12", and 16" walls, provide one angle for each 4" of masonry wall thickness with 3 1/2" leg horizontal as follows:

Span Limits	Angle Size
0'-0" to 4'-0"	L3 x 3 1/2 x 1/4
4'-1" to 5'-6"	L4 x 3 1/2 x 5/16
5'-7" to 7'-6"	L5 x 3 1/2 x 5/16
7'-7" to 9'-6"	L6 x 3 1/2 x 3/8

STEEL CONSTRUCTION

1. Steel detailing, fabrication, and erection shall conform to the AISC Specification for Structural Steel Buildings and Code of Standard Practice, and the AWS Structural Welding Code.
2. Stresses occurring during fabrication, shipment, and erection shall be temporary and not excessive. Stresses at all times shall be less than design and allowable stresses. The full design and load-carrying capacity of the steel work shall not be impaired due to fabrication, shipment, or erection procedures. Throughout the complete process, the stability of all individual members and assemblies shall be maintained.
3. The Contractor shall be responsible for the control of all erection procedures and sequences with relation to temperature differentials and weld shrinkage.
4. All additional steel required for erection purposes shall be provided at no additional cost and shall be removed unless approved by the Owner in writing.
5. Connections - welded or high strength bolted:
   - A. Bolts shall be ASTM F3125 and shall be installed in accordance with "Specifications for Structural Joints Using High-Strength Bolts".
   - B. Provide slip critical bolts for all moment connections, wind connections, hangers, and other connections as noted on drawings.
   - C. Provide bearing type connections with thread included in the shear plane for all connections other than slip critical connections.
   - D. Provide hardened washers under nuts at all high-strength bolts, except where plate washers are used per AISC Specifications.
   - E. Unless snug tight connections are noted on the drawings as being permitted, all bolts should be tightened to full pretensioning load.
   - F. Use standard holes with the following exceptions: oversize holes are permitted when bolts are loaded in tension; short slotted holes are permitted for shear loading perpendicular to the slot.
   - G. Provide beveled washers on all connections to sloping flanges of I sections and channels where slope exceeds 1:20.
   - H. Where minimum AISC fillet weld thickness requirement exceeds welds shown on details, or weld size is not specified, provide minimum AISC weld.
   - I. The length of connection shall not be less than one-half of the T distance of the beam web.
   - J. Where reaction is noted, develop same. Where not noted, for non-composite beams, connections shall develop one-half of the total uniform load capacity of the beam; for composite beams, see table listed in typical details.
6. Welding electrodes shall be E70XX except where other electrodes are required for compatibility with material being welded.
7. All slip connections shall be provided with a means of preventing the nuts from unthreading.
8. Shop drawings are required and shall note type of electrodes, size of all welds, and type and size of all bolts. Shop drawings shall be prepared under the supervision of a professional engineer licensed in the jurisdiction where the project is located.
9. Primer, see specifications.
10. Beams bearing on masonry shall have angle wall anchors and bear a minimum of 8" onto the wall. Masonry shall be built tightly around beam unless otherwise noted.
11. See all contract drawings for miscellaneous steel requirements.
12. All shop and field welding shall be performed by a recently certified welder.
13. All welding and high strength bolting must be inspected by a qualified testing laboratory. Laboratory shall be approved by the Architect and/or Engineer.
14. At column base plates, provide a minimum of 1" grout with (4) 3/4" diameter anchor bolts with 1'-0" embedment.
15. At roof beam bearing plates, provide a minimum of 3/4" grout with (2) 3/4" diameter anchor bolts with 1'-0" embedment.
16. Provide 1/4" closure plates at all open ends of HSS members.
17. Miscellaneous hanging loads such as stair stringers, pipes, mechanical units, etc., supported by steel members shall be applied in such a manner that no torsional forces are induced in the steel members, i.e., loads shall pass through the centerline of wide flange sections and through the shear center of channels.

POST-INSTALLED ANCHORS

1. Anchorage to hardened concrete or masonry shall include torque controlled expansion anchors and adhesive anchors of size, number and spacing as shown on the drawings.
2. All anchors shall be installed in accordance with the Manufacturer's Printed Installation Instructions (MPII).
3. Existing reinforcing bars in the concrete or masonry may conflict with specific anchor locations. Reinforcing bars shall not be cut unless specifically noted on the drawings or approved by the Engineer of Record. The contractor shall review the structural drawings and shall locate the position of reinforcing bars in the vicinity of the anchors, by ground penetrating radar (GPR), x-ray, or other means.
4. Anchors shall be installed in holes drilled with a rotary impact hammer drill. Core drilling of holes is not permitted. Holes and anchor shall be thoroughly cleaned per the MPII prior to installation of the anchor.
5. Stainless steel anchors shall be used at all exterior locations and where specifically noted on the drawings.
6. Remove and replace misplaced or malfunctioning anchors. Patch failed anchor locations with high-strength non-shrink, non-metallic grout.
7. Installed adhesive anchors shall be securely held in-place to prevent displacement while the adhesive cures.
8. All anchors supporting structural elements shall be enclosed with a fire-resistance-rated envelope or protected by approved fire-resistance rated materials.
9. Quality Control:
   - A. All anchors shall be periodically inspected to meet the requirements of MPII and the ICC-ES ESR report for the product.
   - B. All anchor installers shall be trained by the manufacturer or manufacturer's representative for each individual product being installed.
10. Submittals:
    - A. Technical product literature, highlighting each anchor and size to be used on the project.
    - B. Manufacturer's Printed Installation Instructions (MPII) for each anchor type.
    - C. Engineering Design Data: For each substitution request, provide calculations substantiating specified design requirements, sealed by a professional engineer licensed in the jurisdiction where project is located.
11. Where a specific type of anchorage is indicated on the drawings, substitution for a different type of anchorage shall meet the requirements of ACI 355.2 Category 1 or ACI 355.4 Category 1 for anchorage into concrete or shall have an ICC-ES ESR report for anchorage into masonry. Substitution shall not be permitted without prior written approval of the Engineer of Record.
12. Anchors to hardened concrete shall be supplied as an entire system and shall be as follows:
    - A. Torque Controlled Anchors (Expansion Anchors) in cracked and un-cracked concrete as indicated on the drawings shall be Hilti KWIK Bolt TZ2 Expansion Anchor (ICC-ES Evaluation Report: ESR# 4266).
    - B. Adhesive anchors in cracked and un-cracked concrete indicated on the drawings shall be Hilti HIT-HY 200 V3 Safe Set Adhesive Anchoring System (ICC-ES Evaluation Report: ESR# 4868). The following anchor rods shall be used with the system:
      1. Reinforcing bar meeting the requirements of ASTM A615/A706 Grade 60.
      2. All-threaded rod shall be Hilti HIT-Z rods.
13. Requirements and design parameters of post-installed anchors into hardened concrete:
    - A. Concrete shall have a minimum compressive strength of 2,500 psi and a minimum age of 21-days at the time of installation for adhesive anchors and 7-days for expansion anchors.
    - B. Concrete temperature at the time of installation of adhesive anchors shall be a minimum of 50ºF.
    - C. Concrete may be water saturated or dry; water filled holes shall not be allowed.
    - D. Embedment depth and anchor projection shall be as detailed on the drawings. Unless otherwise noted, minimum embedment depths, spacing, and edge distance shall be by the table below.
14. Anchors into masonry shall be supplied as an entire system and shall be as follows:
    - A. Torque Controlled Expansion Anchors (Expansion Anchors) in solid or grout filled masonry as indicated on the drawings shall be Hilti KWIK Bolt TZ2 Expansion Anchor (ICC-ES Evaluation Report: ESR# 4561).
    - B. Adhesive anchors in hollow, solid or grout filled masonry as indicated on the drawings shall be Hilti HIT-HY 270 Hybrid for Masonry Construction (ICC-ES Evaluation Report: ESR# 4143). Screen tubes shall be used for all connections to hollow masonry. The following anchor rods shall be used with the system:
      1. All-threaded rod shall be Hilti HAS-E rod.
      2. Stainless steel anchor rods shall be AISI Type 304 or 316.
15. Requirements and design parameters of post-installed anchors into masonry:
    - A. Masonry grout shall have a minimum compressive strength of 2,000 psi and a minimum age of 21-days at the time of installation for adhesive anchors and 7-days for expansion anchors.
    - B. Masonry temperature at the time of installation of adhesive anchors shall be between 41ºF, and 104ºF.
    - C. Masonry may be water saturated or dry; water filled holes shall not be allowed.
    - D. Embedment depth and anchor projection shall be as detailed on the drawings. Unless otherwise noted, minimum embedment depths, spacing, and edge distance shall be by the table below.

Post-installed Concrete Anchors

WOOD CONSTRUCTION

1. Framing plans are schematic; see architectural drawings for dimensions.
2. Wood stress grades:
   - A. Structural Sawn Lumber: (Spruce-Pine-Fir No.1/No.2)
     - F_b = 875 psi F_c = 425 psi
     - F_t = 450 psi $F_{c\perp}$ = 1,150 psi
     - F_v = 135 psi E = 1.4 x 10E6 psi
     - G = 0.42 E_{min} = 510,000 psi
   - B. Laminated Strand Lumber (LSL):
     - F_b = 1,700 psi F_t = 1,075 psi
     - E = 1.3 x 10E6 psi F_c = 710 psi
     - F_v = 425 psi $F_{c\perp}$ = 1,835 psi
   - C. Laminated Veneer Lumber (LVL):
     - F_b = 2,600 psi F_t = 1,555 psi
     - E = 2.0 x 10E6 psi F_c = 750 psi
     - F_v = 285 psi $F_{c\perp}$ = 2,510 psi
   - D. Parallel Strand Lumber (PSL):
     - F_b = 2,400 psi F_t = 1,755 psi
     - E = 1.8 x 10E6 psi F_c = 545 psi
     - F_v = 190 psi $F_{c\perp}$ = 2,500 psi
3. Construction shall conform to the National Design Specification (NDS) for Wood Construction.
4. See drawings for headers at bearing walls.
5. Studs in bearing and shear walls shall be 2x6 spaced at 16" on center maximum, unless otherwise noted.
6. Sheathing on bearing walls, exterior walls, and shear walls shall be lapped on a common stud or top and bottom plate.
7. Cutting of joists and beams for pipes shall not be permitted without the approval of the Engineer.
8. Bolts shall conform to ASTM A307 with 1/16" oversized holes. Standard plain washers shall be used on all bearings of heads and nuts against wood, unless otherwise noted.
9. All metal fasteners, connectors or other hardware exposed to weather or in direct contact with preservation treated lumber shall be stainless steel, or have galvanized coating (per ASTM A123 or A153)
10. Unless otherwise noted, wood sills shall be anchored with 5/8" diameter anchor rods with 12" embedment spaced at 4'-0" on center maximum with a minimum of two bolts per sill. Bolts shall be ASTM A307 with washers.
11. Double plates shall lap a minimum of 4'-0" at splices and be nailed with no less than (8) 16d nails except as otherwise noted or shown. All cuts in plates shall occur over a bearing.
12. At double plates, provide 16d nails at 16" on center unless noted otherwise.
13. Holes in wood sills or plates of shear and bearing walls shall be placed in the center of the piece and shall be no larger in diameter than one-third the width of the sill or plate. Notching is not allowed. Holes larger than noted above may be bored into the sill provided the sill is considered cut at the holes and anchor bolts are placed at each side of the holes.
14. Horizontal bridging for stud walls shall be installed in all walls and partitions where studs are greater than 8'-0" in height.
15. At stud walls intersecting with concrete or masonry walls, the end stud shall be bolted to the concrete or masonry wall with 1/2" diameter sleeve anchors at 4'-0" on center.
16. Joist hangers, sheet metal framing clips and angles, straps, etc. shall be as manufactured by the Simpson Company or other approved.
17. Ceiling joists with no attic live load:

Span Limits	Joist Size
0'-0" to 8'-0"	2 x 4 at 16" on center
8'-1" to 14'-0"	2 x 6 at 16" on center
14'-1" to 20'-0"	2 x 8 at 16" on center

18. Headers over openings in non-bearing walls (provide 3 members for 2 x 6 walls):

Span Limits	Header Size
0'-0" to 4'-0"	(2) 2 x 4
4'-1" to 6'-0"	(2) 2 x 6
6'-1" to 10'-0"	(2) 2 x 8
10'-1" to 12'-0"	(2) 2 x 10

19. Stud walls supporting wood beams or headers shall have posts under bearing. Provide one 2x stud at each end of wood beam or header for every 2'-8" of beam or header span, unless otherwise noted. Depth of post to match depth of the stud wall.

SHOP-FABRICATED WOOD TRUSS CONSTRUCTION

1. Trusses to be designed in accordance with ANSI/TPI 1 "National Design Standard for Metal Plate Connected Wood Truss Construction".
2. Truss manufacturer shall be an approved fabricator per Section 1704.2.5.1 of the Building Code.
3. Framing plans are schematic; see architectural drawings for dimensions, work points, overhangs, etc.
4. Trusses are to be spaced at 24" on center maximum. Web arrangement is to be the manufacturer's standard unless otherwise noted on drawings. Coordinate web arrangement with architectural and mechanical drawings.
5. Cutting of trusses for pipes, conduits, or other utilities shall not be permitted without the approval of the Engineer and must be in accordance with the manufacturer's requirements. Obtain approval in writing before proceeding. Notching of members is not allowed.
6. All connections shall be of galvanized steel and shall comply with the ANSI/TPI National Design Standard for Metal Plate Connected Wood Truss Construction. Trusses exposed to weather shall have connections of type 304 stainless steel.
7. Trusses shall be designed under the supervision of a professional engineer licensed in the jurisdiction where project is located.
8. All truss-to-truss connections shall be by truss manufacturer.
9. Do not install roof sheathing below piggyback trusses. Truss manufacturer shall indicate top chord blocking for the lower truss and piggyback attachment details.
10. Lower gable end trusses for construction of outrigger framing.
11. Truss manufacturer shall supply the following information for approval prior to fabrication:
    - A. Truss configuration, including span, pitch, and spacing of panel points, including piggyback, truss-to-truss, and falsework framing.
    - B. Species, stress grade, and nominal size of lumber used.
    - C. Design dead and live loads, including panel point loads and reactions.
    - D. Calculations of member axial forces and flexural stresses, including the design for combined loading, as applicable.
    - E. Joint and splice connection design and details.
    - F. Drawings to indicate truss layout, configuration, and permanent individual truss member restraint/bracing.
    - G. Calculations sealed by a professional engineer licensed in the jurisdiction where project is located.
    - H. Relevant sections of the Building Component Safety Information (BCSI) publications.
    - I. All referenced standard industry details.
12. Verify that supports are ready to receive trusses.
13. Install members level and plumb and within tolerances of ANSI/TPI 1.
14. Temporary bracing shall be provided as indicated in the latest Building Component Safety Information (BCSI).
15. Permanent/individual truss member restraint shall be installed as required by the truss manufacturer. Restraint/bracing shall follow BCSI-B3 - "Permanent restraint/bracing of chords and web members", unless the truss manufacturer specifies more stringent requirements.
16. The truss manufacturer shall provide design and details of temporary installation restraint/bracing and permanent individual truss member/restraint bracing for all trusses with clear spans 60 feet or greater. Calculations and drawings shall be sealed by a professional engineer licensed in the jurisdiction where the project is located.
17. Provide header/girder trusses at roof openings. Coordinate locations with architectural and mechanical drawings.
18. Frame openings between trusses with visually graded lumber.
19. See Design Loads section for required snow, wind and seismic design criteria. See below for minimum design loads (in addition to weight of truss) and maximum deflections, unless otherwise noted.
20. Roof trusses:
    - A. Top Chord
      - Dead Load ---------- 15 psf
      - Live Load ---------- 30 psf
    - B. Bottom Chord
      - Dead Load ---------- 10 psf
      - Live Load (non-concurrent w/ roof LL) ------ 20 psf
    - C. Deflection
      - 50% Dead Load + 100% Live Load --------- L/360, 3/4" max.
21. Floor trusses:
    - A. Top Chord
      - Dead Load ---------- 25 psf
      - Live Load ---------- As noted
    - B. Bottom Chord
      - Dead Load ---------- 5 psf
      - Live Load ---------- 0 psf
    - C. Deflection
      - Live Load ---------- L/480
      - Total Load ---------- L/360

STRUCTURAL TESTING AND SPECIAL INSPECTIONS

Structural testing and special inspections are required. The owner shall engage a qualified independent testing agency to conduct structural testing and special inspections. Special inspectors shall be employed or retained by the approved testing agency and have the recommended experience and certifications as summarized in Appendix C of the current International Code Counsel (ICC) Special Inspection Manual. The testing agency may employ or retain multiple special inspectors with differing areas of expertise as required for the project.

Structural observations performed by the Architect/Enginere during construction are not special inspection services and do not waive the responsibility of the inspections required of the Building Department Inspector or the testing agency. Obersavations by the Architect/Engineer do not guarantee the Contractor's performance and shall not be considered as supervision of construction.

At or before project completion, the qualified testing agency shall submit a written summary statement indicating that applicable structural testing and special inspections have been completed. The written summary statement shall clearly identify non-compliant test and inspection results. The written summary statement shall be sealed by the testing agencies supervising professional engineer and be submitted to the owner, building official, and design professionals. The required testing and inspections are indicated in the following table.

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Soils: Foundation Bearing & Engineered Fill Placement				
Verify materials below shallow foundations are adequate to achieve the design bearing capacity.	Periodic	Geotechnical Report	N/A	
Verify excavations are extended to proper depth and have reached proper material.	Periodic	Geotechnical Report	N/A	
Perform classification and testing of compacted fill materials.	Periodic	Geotechnical Report	N/A	
Verify use of proper materials, densities and lift thicknesses during placement and compaction of compacted fill.	Continuous	Geotechnical Report	N/A	
Prior to placement of compacted fill, observe subgrade and verify that site has been prepared properly.	Periodic	Geotechnical Report	N/A	
Verify all requirements of geotechnical report are met.	Periodic	Geotechnical Report	N/A	
Controlled Low-Strength Material (CLSM) Placement				
Verify excavations are extended to proper depth and have reached proper material.	Periodic	Geotechnical Report	N/A	
Verify materials below CLSM are adequate to achieve the design bearing capacity.	Periodic	Geotechnical Report	N/A	
Sample fresh CLSM: One composite sample shall include four 6" diameter cylinders for strength, one flowability test, one air content test, and one unit weight test.	Obtain composite samples not less than once a day, nor less than once for each 150 cy.	ASTM D 5971	1803.5.9	
Obtain test cylinders of CLSM.	One set of four 6" diameter cylinders for each composite sample.	ASTM D 4832	1803.5.9	
Perform slump / flowability tests of CLSM.	One test at point of discharge for each composite sample.	ASTM D 6103	1803.5.9	
Perform air content tests of CLSM.	One test at point of discharge for each composite sample.	ASTM D6023	1803.5.9	
Determine the unit weight of fresh CLSM.	One test at point of discharge for each composite sample.	ASTM D6023	1803.5.9	
Laboratory test CLSM cylinders for compressive strength.	Two specimen tested at 7 days, two specimens tested at 28 days.	ASTM D 4832	1803.5.9	
Field test CLSM for suitability of load application.	Periodic	ASTM D 6024	1803.5.9	

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Cast-In-Place Concrete				
Inspect reinforcing steel including prestressing tendons: a. Verify reinforcing bar grade. b. Verify reinforcing bars are free of dirt, excessive rust, and damage. c. Verify reinforcing bars are adequately tied, chaired, and supported to prevent displacement during concrete placement. d. Verify proper clear distances between bars and to surfaces of concrete. e. Verify reinforcing bar size and placement. f. Verify bar laps for proper length and stagger. g. Verify mechanical splices placement and attachment. h. Verify epoxy or galvanized coating and coating damage is repaired.	Periodic - Prior to each pour.	ACI 318: Ch 20, 25.2, 25.3, 26.1-26.6.3	1908.4	
Inspection of reinforcing steel welding: a. Verify weldabilty of reinforcing steel. b. Verify proper electrodes and storage of electrodes. c. Verify proper joint preparation. d. Inspect single- pass fillet welds, maximum 5/16". e. Inspect all other welds. f. Review welder certifications for both fabricator's shop staff and field erectors.	Periodic Periodic Continuous Periodic Continuous Each welder	AWS D1.4 ACI 318: 26.6.4		
Inspect embedments, bolts, headed bolts, and headed studs to be installed in concrete prior to and during concrete placement.	Periodic	ACI 318: 17.8.2	N/A	
Verify use of required mix design: a. Verify mixer truck trip ticket conforms to approved mix design. b. Verify that total water added to mix on site does not exceed that allowed by the concrete mix design. c. Verify that concrete quality is indicative of adequate mixing time, consistency, and relevant time limits.	Periodic - Prior to each pour.	ACI 318: 26.4.3 ACI 301	1904.1 1904.2 1908.2 1908.3	
Inspect formwork for cleanliness, shape, location and dimensions of the concrete member being formed.	Periodic - Prior to each pour.	ACI 318: 26.11.1.2(b)	N/A	
Inspect concrete and shotcrete placement for proper application techniques, including proper consolidation, reinforcement remains at proper location, and conveyance and depositing avoid segregation and contamination.	Continuous	ACI 318: 26.5	1908.6 1908.7 1908.8	
Sample fresh concrete:	Obtain one composite sample of each class of concrete placed each day shall be taken not less than once a day, nor less than once for each 150 cy. of concrete nor less than once for each 5,000 sqft. of surface area for slabs or walls. If the total volume of concrete is such that frequency of testing required would provide less than five composite samples for a given class of concrete, tests shall be made from at least five randomly selected batches (per ASTM D3665) or from each batch if fewer than five batches are used.	ACI 318: 26.4 ASTM C 172	1908.10	A composite sample shall consist of the following: five 4" diameter cylinders, or four 6" diameter cylinders.
Obtain test cylinders of concrete.	One set of five 4" diameter cylinders or four 6" diameter cylinders for each composite sample.	ACI 318: 26.12 ASTM C 31	N/A	Cast additional cylinders at contractor's request and expense for field cured specimens to determine shoring removal, early strength for post-tensioning, etc.
Obtain grout cubes for deferred placed concrete toppings	One set of three 2" molded-cube for each composite sample.	ASTM C 109	N/A	
Perform slump tests.	One test at point of discharge for each composite sample.	ASTM C 143	N/A	
Perform air content tests.	One test at point of discharge for each composite sample.	ASTM C 231, pressure method for normalweight concrete; ASTM C 173, volumetric method for lightweight concrete	N/A	
Determine the temperature of fresh concrete.	One test for each composite sample, and test hourly and when air temperature is below 40°F or when above 80°F.	ASTM C 1064	N/A	
Determine the unit weight of fresh lightweight concrete.	One test at point of discharge for each composite sample of lightweight concrete.	ASTM C567	N/A	
Review and inspect cold weather concrete procedures and placement.	Periodic - Prior to each pour.	ACI 306.1 ACI 318 26.5.4		
Review and inspect hot weather concrete procedures and placement.	Periodic - Prior to each pour.	ACI 305.1 ACI 318 26.5.5		
Inspect for maintenance of specified curing temperature and techniques.	Periodic - After each pour.	ACI 318: 26.5.3-26.5.5	1908.9	
Laboratory test concrete cylinders for compressive strength.	One specimen tested at 7 days, two specimens tested at 28 days, and one specimen retained in reserve for later testing if required.	ACI 318: 26.12 ASTM C 39	N/A	Three specimens shall be tested at 28 days if using 4" diameter cylinders. Test additional cylinders at contractor's request and expense.
Laboratory test concrete cubes for compressive strength for deferred placement toppings.	Test one set of three specimens at 28 days.	ASTM C 109	N/A	
Inspect anchors post- installed into hardened concrete a. Adhesive anchors installed in horizontally or upwardly inclined orientations to resist sustained tension loads. b. All other Mechanical anchors and adhesive anchors not defined in a.	Continuous Periodic	ACI 318: 17.8.2.4 ACI 318: 17.8.2	N/A	
Measure & report floor slab levelness (F_L) and flatness (F_F) for shored, non-cambered, and non-inclined surfaces.	Measure all floors within 24 hours of finishing.	ACI 117 4.8.5 ASTM E1155	N/A	
Measure & report floor slab flatness for cambered, unshored, and inclined surfaces.	Measure the gap under a freestanding (unleveled) 10 ft. straightedge.	ACI 117: 4.8.6	N/A	
Deferred placement floor toppings shall be tested for delamination by dragging a steel chain over the surface.	All floor areas after 28 days.	N/A	N/A	

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency		Referenced Standard	BC Reference	Additional Notes
Masonry					
Masonry Level of Inspection: Level 3 shall be used for Risk Category IV. See general notes for Risk Category.	**Level 2**	**Level 3**			
Verify compliance with approved submittals.	Periodic	Periodic	TMS 602: Art. 1.5	N/A	
Verification of f'_m and f'_{AAC} prior to construction.	Periodic	Periodic	TMS 602: Art. 1.4B	N/A	
Verify slump flow and VSI for self-consolidating grout delivered to the site.	Continuous	Continuous	TMS 602: Art. 1.5, 1.6.3	N/A	
Verification of f'_m and f'_{AAC} for every 5,000 sq. ft. of masonry.	N/A	Periodic	TMS 602: Art. 1.4B	N/A	
Verify proportions of materials as delivered for premixed or preblended mortar, and grout.	N/A	Periodic	TMS 602: Art. 1.4B	N/A	
As masonry construction begins, the following shall be verified to ensure compliance:					
Verify proportions of site-prepared mortar.	Periodic	Periodic	TMS 602: Art. 2.1, 2.6A, 2.6C	N/A	
Verify grade, type, and size of reinforcement, connectors, and anchor bolts.	Periodic	Periodic	TMS 602: Art. 3.4, 3.6A	N/A	
Verify properties of thin-bed mortar for AAC masonry	Continuous	Continuous	TMS 602: Art. 2.1 C.1	N/A	
Verify sample panel construction	Periodic	Continuous	TMS 602: Art. 1.6 D	N/A	
Prior to grouting, the following shall be verified to ensure compliance:					
Verify grout space is clean.	Periodic	Continuous	TMS 602: Art. 3.2 D, 3.2 F	N/A	
Verify placement of reinforcement, connectors, and anchor bolts.	Periodic	Continuous	TMS 602: Art. 3.2 E, 3.4	N/A	
Verify proportions of site-prepared grout.	Periodic	Periodic	TMS 602: Art. 2.6 B	N/A	
During construction the inspection program shall verify:					
Materials and procedures with the approved submittals	Periodic	Periodic	TMS 602: Art. 1.5	N/A	
Placement of masonry units and mortar joint construction	Periodic	Periodic	TMS 602: Art. 3.3 B	N/A	
Size and locations of structural members	Periodic	Periodic	TMS 602: Art. 3.3 F	N/A	
Type, size, and location of reinforcement and anchors, including other details of anchorage of masonry to structural members, frames, or other construction	Periodic	Continuous	TMS 402: Sec. 1.2.1 (e), 6.2.1, 6.3.1	N/A	
Verify welding of reinforcing bars.	Continuous	Continuous	TMS 402: Sec. 6.1.6.1.2	N/A	
Verify preparation, construction and protection of masonry during cold weather (temperature below 40°F)	Periodic	Periodic	TMS 602: Art. 1.8C	N/A	
Verify preparation, construction and protection of masonry during hot weather (temperature above 90°F)	Periodic	Periodic	TMS 602: Art. 1.8D	N/A	
Verify placement of grout and grouting procedures	Continuous	Continuous	TMS 602: Art. 3.5	N/A	
Verify placement of AAC masonry units and construction of thin-bed mortar joints	Continuous	Continuous	TMS 602: Art. 3.3 B.9, 3.3 F.1.b	N/A	
Observe preparation of grout specimens, mortar specimens and/or prisms.	Periodic	Continuous	TMS 602: Art. 1.4 B.2.a.3, 1.4 b.2.b.3, 1.4 B.2.c.3, 1.4 B.3, 1.4 B.4	N/A

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Structural Steel				
Inspection Tasks Prior to Welding:		AISC 360 Table N5.4-1	2204.1	
Welder qualification records and continuity records	Observe	AISC 360 Section N5.4		
Verify procedure specifications (WPS) available	Perform	AISC 360 Section N5.4		
Manufacturer certifications for welding consumables available	Perform	AISC 360 Section N5.4		
Material identification (type/grade)	Observe	AISC 360 Section N5.4		
Welder identification system	Observe	AISC 360 Section N5.4		
Fit up of groove welds and CJP welds of HSS joints (including joint geometry) a. Joint preparation b. Dimensions (alignment, root opening, root face, bevel) c. Cleanliness (condition of steel surface) d. Tacking (tack weld quality and location) e. Backing type and fit (if applicable)	Observe	AISC 360 Section N5.4		
Configuration and finish of access holes	Observe	AISC 360 Section N5.4		
Fit up of fillet welds a. Dimensions (alignment,gaps at root) b. Cleanliness (condition of steel surface) c. Tacking (tack weld quality and location)	Observe			
Inspection Tasks During Welding:		AISC 360 Table N5.4-2	2204.1	
Control and handling of welding consumables a. Packing b. Exposure control	Observe	AISC 360 Section N5.4		
No welding over cracked tack welds	Observe	AISC 360 Section N5.4		
Environmental conditions a. Wind speed within limits b. Precipitation and temperature	Observe	AISC 360 Section N5.4		
WPS followed a. Settings on welding equipment b. Travel speed c. Selected welding material d. Shielding gas type/flow rate e. Preheat applied f. Interpass temperature maintained g. Proper position (F,V,H,OH)	Observe	AISC 360 Section N5.4		
Welding techniques a. Interpass and final cleaning b. Each pass within profile limitations c. Each pass meets quality requirements	Observe	AISC 360 Section N5.4		
Inspection Tasks After Welding:		AISC 360 Table N5.4-3	2204.1	
Welds cleaned	Observe	AISC 360 Section N5.4		
Size,length and location of welds	Perform	AISC 360 Section N5.4		
Welds meet visual acceptance criteria a. Crack prohibition b. Weld/base-metal fusion c. Crater cross section d. Weld profiles e. Weld size f. Undercut g. Porosity	Perform	AISC 360 Section N5.4		
Arc strikes	Perform	AISC 360 Section N5.4		
k-Area (When welding of doubler plate, continuity plates or stiffeners in k-area, visually inspect the weld k-area for crack with in 3 in.)	Perform	AISC 360 Section N5.4		
Weld access holes in rolled heavy shapes and built-up heavy shapes (visually inspect the weld access hole for cracks)	Perform	AISC 360 Section N5.4		
Backing removed and weld tabs removed (if required)	Perform	AISC 360 Section N5.4		
Repair activities	Perform	AISC 360 Section N5.4		
Document acceptance or rejection of welded joint or member	Perform	AISC 360 Section N5.4		
No prohibited welds have been added without the approval of the EOR	Observe	AISC 360 Section N5.4		
Inspection of Welding in Field and in Non AISC Certified Shops: a. Complete joint penetration groove welds subject to transversely applied tension loading in butt, T and corner joints with materials 5/16 inches or thicker. b. Welder qualifications.	Test 100% of welds by ultrasonic testing for risk category III or IV. Test 10% of welds by ultrasonic testing for risk category II.	AISC 360 Section N5.5		All welds subject to non-destructive testing shall also meet visual acceptance criteria per AWS Table 6.1.
Inspection Tasks Prior to Bolting:		AISC 360 Table N5.6-1	2204.2	
Manufacturer's certifications available for fastener materials	Perform	AISC 360 Section N5.6		
Fasteners marked in accordance with ASTM requirements	Observe	AISC 360 Section N5.6		
Correct fasteners selected for the joint detail (grade, type, bolt length if threads are to be excluded from shear plane)	Observe	AISC 360 Section N5.6		
Correct bolting procedure selected for joint detail	Observe	AISC 360 Section N5.6		
Connecting elements, including the appropriate faying surface condition and hole preparation, if specified, meet applicable requirements	Observe	AISC 360 Section N5.6		
Pre-Installation verification testing by installation personnel observed and documented for fastener assemblies and methods used	Observe	AISC 360 Section N5.6		
Protected storage provided for bolts,nuts washers and other fastener components	Observe	AISC 360 Section N5.6		
Inspection Tasks During Bolting:		AISC 360 Table N5.6-2	2204.2	
Fastener assemblies, of suitable condition, placed in all holes and washers (if required) are positioned as required	Observe	AISC 360 Section N5.6		
Joint brought to the snug- tight condition prior to the pretensioning operation	Observe	AISC 360 Section N5.6		
Fastener component not turned by the wrench prevented from rotating	Observe	AISC 360 Section N5.6		
Fasteners are pretensioned in accordance with the RCSC specification, progressing systematically from the most rigid point toward the free edges	Observe	AISC 360 Section N5.6 AISC 348		
Inspection Tasks After Bolting:		AISC 360 Table N5.6-3	2204.2	
Document acceptance or rejection of bolted connections	Perform	AISC 360 Section N5.6		
Inspection of Steel Frame: a. Verify installation of all members. b. Verify proper application of details to each joint and connection. c. Verify bracing and stiffening of framing members. d. Verify members and detail critical to frame stability.	Perform	AISC 360 Section N5.8		
Verify Material Grade of Structural Steel: a. Verify identification markings conform to AISC 360 for materials specified in the approved construction documents. b. Manufacturer's certificate of compliance required.	Observe	AISC 360 Section N5.8		
Inspection of anchor rods and other embedments supporting structural steel: a. Verify the diameter, grade, type and length of anchor rod or embedded item b. Verify the extent or depth of embedment into concrete prior to placement of concrete.	Observe	AISC 360 Section N5.8		
Inspection of Welding and Bolting in AISC Certified Shop: a. Review Fabricator's Certificate of Compliance for certified fabricators shop.	Once for Each Fabricator	AISC 360 Section N6	1704.2	

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Wood Construction				
Review manufacturer's Certificate of Compliance for certified fabricators.	Once per manufacturer.	N/A	1704.2	Shop inspection is required if the manufacturer is not certified.
Verify temporary installation restraint/bracing and permanent individual truss member restraint/bracing.	Continuous for truss spans greater than 60'-0"	N/A	1705.5.2	
Verify drag struts, braces, and shear wall strapping, hold-downs, end posts, sheathing thickness, attachment size, quantity, and pattern.	Continuous	N/A	1705.5.1

ROOF FRAMING PLAN

3/32" = 1'-0"

NOTES:

1. ROOF ELEVATION = 31'-8 7/8" = REFERENCE ELEVATION (0'-0").
2. TOP OF SHEATHING = (-0'-1") UNLESS OTHERWISE NOTED.
3. TOP OF WOOD BEAMS, JOISTS, TRUSSES ARE AT BOTTOM OF SHEATHING, UNLESS OTHERWISE NOTED.
4. WOOD POSTS NOTED ON PLAN ARE BELOW, UNLESS OTHERWISE NOTED. SEE ROOF FRAMING PLAN FOR POSTS ABOVE.
5. COORDINATE LOCATION AND SIZE OF ALL FLOOR OPENINGS WITH ARCHITECTURAL AND MECHANICAL DRAWINGS.
6. EXTERIOR DIMENSIONS ARE TO FACE OF SHEATHING OR CMU. SEE ARCHITECTURAL FOR WALL CONSTRUCTION.
7. PROVIDE TEMPORARY EXPANSION JOINTS IN FLOOR SHEATHING AS REQUIRED. SEE TYPICAL DETAIL.
8. SEE STUD WALL SCHEDULE FOR SIZE, SPACING, AND SPECIES.

LEGEND:

RD- 5/8	5/8" APA RATED SHEATHING. SEE DETAILS FOR ADDITIONAL INFORMATION.
RT-1	METAL-PLATE CONNECTED WOOD TRUSSES AT 24" O.C. SEE GENERAL NOTES FOR MORE INFORMATION.
SW-X	WOOD-FRAMED SHEAR WALL. SEE SCHEDULE AND DETAILS FOR ADDITIONAL INFORMATION.
WB-X	WOOD BEAM. SEE SCHEDULE AND DETAILS.
(X) 2xX	2x WOOD POST - SEE SCHEDULE.
SCP-XX	STRUCTURAL COMPOSITE POST - SEE SCHEDULE.
T.G.	TRUSS GIRDER.
HT	HIP TRUSS

3RD FLOOR EXTERIOR AND BEARING WALL HEADER SCHEDULE

ROUGH OPENING	HEADER SIZE	JACK STUDS	KING STUDS	COMMENTS
< 4'-0"	(3) 2x8	(2) 2x6	(1) 2x6	
< 5'-0"	(3) 2x10	(2) 2x6	(2) 2x6	

NOTES:

1. JACK AND KING STUD DEPTHS TO MATCH TYPICAL WALL STUDS, U.O.N.
2. PROVIDE SOLID BLOCKING ABOVE HEADER TO MATCH KING STUDS ABOVE.
3. PROVIDE STUD PACKS AT FLOOR FRAMING, PACKS TO MATCH WIDTH OF POST ABOVE.
4. DOUBLE RIM BOARD SHALL NOT BE SPLICED OVER OPENINGS.
5. WHERE DOUBLE RIM BOARD OCCURS, KING STUDS TO EXTEND TO UNDERSIDE OF DOUBLE TOP PLATE AT EACH END OF OPENINGS.
6. WHERE INTERIOR OPENING IS ADJACENT TO SHEAR WALL END POST, THE HEADER SHALL FRAME DIRECTLY INTO THE SHEAR WALL END POST WITH A SIMPSON 'HUC210-3-SDS' FACE-MOUNT HANGER.

ELEVATOR ROOF FRAMING PLAN

3/32" = 1'-0"

NOTES:

1. ELEVATOR ROOF ELEVATION = 43'-6 7/8" = REFERENCE ELEVATION (0'-0").
2. TOP OF STEEL = (-0'-4") UNLESS OTHERWISE NOTED.
3. COORDINATE LOCATION AND SIZE OF ALL FLOOR OPENINGS WITH ARCHITECTURAL AND MECHANICAL DRAWINGS.
4. EXTERIOR DIMENSIONS ARE TO FACE OF SHEATHING OR CMU. SEE ARCHITECTURAL FOR WALL CONSTRUCTION.

CONSTRUCTION JOINT

SAWED CONTRACTION JOINT

NOTES:
1. CONTRACTION JOINTS SHALL BE INSTALLED IN SLABS ON GROUND AT A MAXIMUM SPACING IN FEET OF 3 TIMES THE SLAB THICKNESS IN INCHES IN EACH DIRECTION (15'-0" MAXIMUM) BY EITHER OF THE METHODS SHOWN. MAXIMUM LENGTH OF ANY SLAB ON GROUND POUR TO BE 50'-0" BETWEEN CONSTRUCTION JOINTS. THIS SPACING OF JOINTS SHALL APPLY UNLESS SPECIFICALLY SHOWN OTHERWISE ON DRAWINGS.
2. REINFORCING TO BE DISCONTINUOUS THROUGH CONSTRUCTION JOINTS.

AT DISCONTINUOUS JOINTS

AT INSIDE CORNERS

SLAB REINFORCING DETAILS

STEEL COLUMN, PIER AND FOOTING DETAIL

NOTE:
IF DIRECT PENETRATION OF PIPE IS REQUIRED IN LIEU OF SLEEVE, PROVIDE 2" COMPRESSIBLE FILLER, PLACED UNIFORMLY AROUND PIPE.

FOOTING REINFORCING DETAIL FOR PENETRATIONS OR SLEEVES

TYPICAL STEPPED FOOTING DETAIL

(2 LAYERS OF REINFORCING)

TYPICAL STEPPED FOOTING DETAIL

(1 LAYER OF REINFORCING)

NOTES:
1. SLAB TO BE 5" MINIMUM (INCLUDING FORM) REINFORCED WITH #4@8" O.C. BOTTOM AND #4@12" O.C. TEMPERATURE. FORM TO BE CORRUGATED GALVANIZED STEEL FORM DECK (GAUGE AS REQUIRED TO SUPPORT WET WEIGHT OF CONCRETE PLUS CONSTRUCTION LOADS. MAXIMUM DEFLECTION OF DECK TO BE 1/240 OF THE SPAN.).
2. SEE ARCHITECTURAL DRAWINGS FOR DIMENSIONS, SLOPE AND DEPRESSION OF SLAB.

FROST FREE SLAB DETAIL

INFLUENCE ZONE

NOTE: PROVIDE CONCRETE PROTECTION AROUND UTILITY LINE WHEN LINE IS WITHIN FOOTING INFLUENCE ZONE. SEE DETAIL ABOVE FOR INFLUENCE ZONE DEFINITION

FOOTING DETAIL WITH UTILITY LINES BELOW

NOTES:
1. SILL ANGLE BY ELEVATOR MANUFACTURER. GENERAL OR CONCRETE CONTRACTOR TO PROVIDE MEANS OF ATTACHMENT TO STRUCTURE.
2. WHEN REQUIRED, PLACE AFTER ELEVATOR EQUIPMENT IS INSTALLED. COORDINATE WITH ELEVATOR MANUFACTURER.
3. SLOPE ELEVATOR PIT SLAB TO SUMP.

ELEVATOR PIT DETAIL

NEW CONSTRUCTION

EXISTING CONSTRUCTION

NOTES:
1. BASE SLAB PREPARATION:
   A. NEW: CLEAN & WET SLAB PRIOR TO POURING PAD.
   B. EXISTING: CLEAN & ROUGHEN SLAB AND APPLY BONDING AGENT PER MANUFACTURER'S WRITTEN DIRECTIONS.
2. CONCRETE MIX:
   SAME CONCRETE AS USED ELSEWHERE ON PROJECT BUT NOT LESS THAN, 3,000 PSI (MAX 4" SLUMP).
3. CURING - CURE FOR 7 DAYS BY EITHER OF THE FOLLOWING METHODS:
   A. COVER W/ BURLAP & KEEP CONTINUOUSLY WET.
   B. COVER W/ 6 MIL. VISQUEEN. TAPE TO BASE SLAB AND ALL JOINTS.

TYPICAL MOMENT CONNECTION DETAIL - BEAM TO COLUMN FLANGE (WELDED)

TYPICAL MOMENT CONNECTION DETAIL - BEAM TO GIRDER

MOMENT CONNECTION NOTES:

1. THIS BUILDING HAS BEEN DESIGNED UNDER THE AISC 360-05 SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS (ALLOWABLE STRENGTH DESIGN) WITH FULLY RESTRAINED (FR) MOMENT CONNECTIONS.
2. THE DESIGN OF MOMENT CONNECTIONS, INCLUDING ANY REQUIRED BEAM OR COLUMN REINFORCING, IS THE RESPONSIBILITY OF THE STRUCTURAL STEEL FABRICATOR. SUPPORTING CALCULATIONS, SEALED BY A PROFESSIONAL ENGINEER LICENSED IN THE JURISDICTION WHERE THE PROJECT IS LOCATED, SHALL BE SUBMITTED FOR REVIEW AND APPROVAL 2 WEEKS PRIOR TO THE CREATION/SUBMISSION OF SHOP DRAWINGS.
3. THE (UNFACTORED) DESIGN MOMENTS FOR THESE CONNECTIONS ARE INDICATED. WHERE NOT INDICATED, MOMENT CONNECTIONS SHALL DEVELOP THE FULL FLEXURAL CAPACITY OF THE BEAM.
4. AT CANTILEVERED MOMENT CONDITIONS, DESIGN MOMENTS SHALL BE ASSUMED TO ACT IN OPPOSITE DIRECTIONS ON EACH SIDE OF THE SUPPORT.
5. FOR MOMENT CONNECTIONS TO COLUMNS, DESIGN MOMENTS SHALL BE ASSUMED TO ACT IN THE SAME DIRECTION ON EACH SIDE OF THE COLUMN FOR COLUMN PANEL ZONE SHEAR CHECKS. DESIGN MOMENTS SHALL BE ASSUMED TO ACT IN OPPOSITE DIRECTIONS ON EACH SIDE OF THE COLUMN FOR COLUMN STIFFENER CHECKS.
6. UNLESS SPECIFICALLY NOTED TO BE A SLIP-CRITICAL JOINT, BOLTED MOMENT CONNECTIONS SHALL MEET THE REQUIREMENTS OF FULLY PRETENSIONED JOINTS. BOLTED MOMENT CONNECTIONS MAY BE PROPORTIONED AS BEARING-TYPE CONNECTIONS.
7. FOR BEARING-TYPE MOMENT CONNECTIONS, OVERSIZED HOLES OR SLOTS PARALLEL TO THE LINE OF FORCE ARE NOT PERMITTED UNLESS MOMENT CONNECTIONS ARE PROPORTIONED AS SLIP-CRITICAL ON THE BASIS OF SLIP AS A STRENGTH LIMIT STATE.
8. THE SHEAR PORTION OF MOMENT CONNECTION JOINTS SHALL BE DESIGNED FOR THE SHEAR VALUES INDICATED, OR AS DEFINED IN THE STEEL CONSTRUCTION GENERAL NOTES. SHEAR CONNECTIONS THAT ARE PART OF A MOMENT CONNECITON JOINT MAY BE PROPORTIONED AS BEARING-TYPE CONNECTIONS.

NOTES:

1. GROUT TO BE 5000 psi MIN., NON-SHRINK, NON-METALLIC.
2. LEVELING PLATES OR LEVELING NUTS CAN BE USED AT CONTRACTOR'S DISCRETION.
3. SEE COLUMN SCHEDULE FOR BASE PLATE AND ANCHOR RODS.

NOTES:
1. AT APPLICATIONS (NOT LISTED IN THIS SCHEDULE) WHERE 16d COMMON NAILS ARE DESIGNATED, THE INSTALLER MAY SUBSTITUTE 16d COMMON NAILS WITH 3" x 0.131" NAILS GIVEN ONE OF THE FOLLOWING CRITERIA ARE FOLLOWED:
   A. THE QUANTITY OF 3" x 0.131" NAILS EQUALS 1.5x THE QUANTITY OF 16d COMMON NAILS LISTED.
   B. THE SPACING OF 3" x 0.131" NAILS EQUALS 0.67x THE SPACING OF THE 16d COMMON NAILS LISTED.
2. ALL HANGER CONNECTIONS LISTED IN THE PROJECT WERE DESIGNED FOR FULL CAPACITIES LISTED BY THE MANUFACTURER. REDUCED NAIL LENGTHS AND DIAMETERS AT CONNECTIONS SHALL NOT BE USED UNLESS APPROVED.

UPLIFT ANCHOR SCHEDULE

STRAP OR TIE DESIGNATION	SIZE	COMMENTS
MITEK RT7A	510 LBS	
MITEK (2) RT7A	1,020 LBS	2 1/2" MIN. THICKNESS OF FRAMING...
SIMPSON H2.5A	535 LBS	UPLIFT CAPACITY REDUCED TO 260 LBS WHEN 1 1/2 ;PMG FASTEMER IS USED
SIMPSON (2) H2.5A	1,070 LBS	2 1/2" MIN. THICKNESS OF FRAMING...
SIMPSON TSP	875 LBS	3" LONG FASTENERS TO TOP PLATE
SIMPSON (2) TSP	1,750 LBS	2 1/2" MIN. THICKNESS OF FRAMING...

1. UPLIFT CAPACITIES ASSUME SPRUCE-PINE-FIR NO. 1/NO. 2 OCCURS AT TOP PLATE AND AT FRAMING MEMBER.
2. UPLIFT CAPACITIES FACTOR A DURATION FACTOR (6) OF 1.6 AND SHALL NOT BE INCREASED.
3. UPLIFT CAPACITIES ASSUME ANCHORAGE TO DOUBLE TOP PLATE. REDUCTIONS MAY OCCUR AT SINGLE PLY NAILER.

UPLIFT SCHEDULE NOTES:
1. FASTENER SIZE AND LENGTHS ARE PER MANUFACTURER'S SPECIFICATIONS.
2. THE ENGINEER SHALL BE NOTIFIED IF UPLIFT VALUES EXCEED THE MAXIMUM UPLIFT CAPACITY GIVEN IN THIS TABLE.

SECTION X-X
WOOD BEAM TOP POST

ATS ANCHOR TO WOOD BEAM DETAIL

POST INSTALL ATS ANCHOR TO FOUNDATION DETAIL

TYPICAL DRAG STRUT DETAIL

TYPICAL MULTI-STORY SHEAR WALL FRAMING ELEVATION

SHEAR WALL SCHEDULE NOTES:

1. ALL LUMBER FOR SHEAR WALLS, INCLUDING BOTTOM PLATE, BLOCKING, BRIDGING, STUDS, TOP PLATES, ETC. SHALL BE SPRUCE-PINE-FIR NO. 1/NO. 2 UNLESS OTHERWISE NOTED.
2. ALL NAILS FROM SHEATHING INTO STUDS ARE TO BE 8d (0.131"ø) COMMON WIRE NAILS WITH A 1 3/8" MINIMUM PENETRATION.
3. WHERE MULTIPLE 2x END POSTS ARE SPECIFIED, PLIES SHALL BE FACE NAILED TOGETHER WITH (2) 16d (0.162"ø) COMMON WIRE NAILS AT 6" O.C.
4. WHERE STUD EDGE NAILING OCCURS WITH 10d NAILS AT ANY SPACING, OR 8d NAILS AT SPACING LESS THAN 3" O.C., STUDS AND BOTTOM PLATE SHALL BE 3x MEMBERS OR DOUBLE 2x MEMBERS FACE NAILED (2) 16d (0.162"ø) COMMON WIRE NAILS AT 6" O.C.

SIMPSON STRONG-ROD ANCHOR TIEDOWN SYSTEM (ATS) NOTES:

1. ATS IS AN ASSEMBLAGE OF STEEL COMPONENTS, WHICH INCLUDE RODS, PLATES, COUPLER NUTS, TAKE-UP DEVICES AND NUTS. NO SUBSTITUTION OF PIECES IS PERMITTED WITHOUT WRITTEN APPROVAL OF THE ENGINEER OF RECORD.
2. FOLLOW ALL COMPONENT MANUFACTURER'S INSTALLATION INSTRUCTIONS.
3. DO NOT WELD TO ANY ATS ASSEMBLAGE COMPONENTS UNLESS SPECIFICALLY SHOWN ON THE STRUCTURAL DRAWINGS.
4. THE MAXIMUM CUT OF PLUMB OF STRONG-ROD SHALL BE 2" FROM FLOOR TO FLOOR.
5. FULLY ENGAGE EACH ROD INTO THE SPECIFIED COUPLING NUT OR TAKE UP THE DEVICE UNTIL EACH ROD CAN BE SEEN FULLY IN THE WITNESS HOLES.
6. INSTALL NUTS AND ISOLATOR NUTS SNUG TIGHT, PLUS AN ADDITIONAL 1/2 TURN.
7. NO SPLICE IN TOP PLATE IS PERMITTED WITHIN 8" OF EDGE OF STRONG-ROD TAKE UP DEVICE.
8. SOLID BLOCKING IS REQUIRED AT FLOOR ASSEMBLIES TO MATCH THE STUD QUANTITY, SIZE AND SPECIES OF THE END POST BELOW.
9. END POSTS COMPRISE OF A MINIMUM OF (4) STUDS. ASYMMETRIC STUD PLACEMENT HAS BEEN DESIGNED. PROVIDE (2) STUDS AT END OF SHEAR WALL, AND BALANCE OF STUDS ON OTHER SIDE OF STRONG ROD.
10. SHEAR WALL EDGE NAILING SHALL OCCUR ON EACH OF THE (2) STUDS ON EACH SIDE OF THE STRONG-ROD. NAILING TO ADDITIONAL STUDS OF THE END POSTS SHALL BE AT 12" O.C.

ALTERNATE TIEDOWN SYSTEM NOTES:

1. AN ALTERNATE TIEDOWN SYSTEM MAY BE INSTALLED IN LIEU OF THE SIMPSON ATS SYSTEM, GIVEN SEALED CALCULATIONS CAN BE PROVIDED (FOR REVIEW BY THE ENGINEER) BASED ON THE FOLLOWING ALLOWABLE (ASD) CUMULATIVE TENSION LOADS (KIPS) AND CRITERIA:

CUMULATIVE TENSION LOAD (KIPS) PER LEVEL				
WALL	4TH	3RD	2ND	1ST
SW-1	5.0	8.0	12.0	16.0
SW-1A	7.0	13.0	19.0	-

SHOP DRAWING SCHEDULE

SUBMITTAL	NOTES ON SUBMISSION	RESPONSIBLE PARTY
MEP COORDINATION DRAWINGS – SHEETMETAL HVAC EQUIPMENT PLUMBING PIPING SPRINKLER PIPING CONDUIT, PANELS & J-BOXES CRITICAL STRUCTURAL...	DRAWN TO SCALE, SHOWING AT MINIMUM ELEVATIONS, ACCESS AND SERVICE CLEARANCES, STRUCTURAL AND ELECTRICAL (LIGHTING AND CONDUIT) MEMBERS FOR COORDINATION, ACCESS PANELS AND ANY POTENTIAL COORDINATION ISSUES THAT NEED TO BE ADDRESSED.	MECHANICAL CONTRACTOR ELECTRICAL CONTRACTOR PLUMBING CONTRACTOR SPRINKLER CONTRACTOR GENERAL CONTRACTOR
PLUMBING FIXTURES AND EQUIPMENT	TO BE SUBMITTED IN ONE COMBINED PACKAGE (NOT INDIVIDUAL FIXTURE COMPONENTS) WITH FIXTURES INDIVIDUALLY LABELED AS INDICATED IN THE DRAWING DOCUMENTS.	PLUMBING CONTRACTOR
PLUMBING PIPING AND INSULATION MATERIALS	MARKED WITH EQUIPMENT OR FIXTURE TAGS AND APPLICABLE SPECIFICATION FOR REFERENCE. PROVIDE INSOLATION THICKNESS.	PLUMBING CONTRACTOR

NOTES:

1. PREPARE SUBMITTALS AS PDF PACKAGE, INCORPORATING COMPLETE INFORMATION INTO EACH PDF FILE. NAME PDF FILE WITH SUBMITTAL NUMBER. ALL SUBMITTALS FOR A GROUP OF FIXTURES SHALL BE PROVIDED IN A SINGLE REVIEWABLE DOCUMENT, NOT MULTIPLE PACKAGES, FOR REVIEW.
2. EACH SUBMITTAL SHALL BE PROVIDED WITH A COVER IDENTIFYING THE FOLLOWING:...
   a. NAME OF THE JOB
   b. LOCATION OF THE JOB, ADDRESS, CITY AND STATE.
   c. NAME AND ADDRESS OF THE COMPANY ISSUING THE SUBMITTAL.
   d. DATE OF THE SUBMITTAL
   e. GENERAL CONTRACTOR'S REVIEW AND APPROVAL STAMP
3. SHOP DRAWINGS WILL NOT BE REVIEWED BY THE ENGINEER UNLESS THE GC'S APPROVAL IS NOTED AND COVER SHEET WITH ITEMS INDICATED ABOVE ARE COMPLETE. CATALOG CUT SHEETS THAT DO NOT IDENTIFY SPECIFIC ITEMS WILL NOT BE REVIEWED. DO NOT START WORK OR FABRICATION UNTIL SHOP DRAWINGS HAVE BEEN REVIEWED BY THE ENGINEER AND RETURNED TO THE CONTRACTOR.
4. THE CONTRACTOR IS RESPONSIBLE TO HIGHLIGHT (IN BOLD TEXT OR HIGHLIGHTED COLOR) TO THE DESIGN TEAM ANY DIFFERENCES IN PERFORMANCE, DIMENSION, WEIGHT, POWER REQUIREMENTS, ACCESS ETC. BETWEEN THE BASIS OF DESIGN OR SCHEDULED EQUIPMENT AND THE SUBMITTED EQUIPMENT.
5. SUBMITTALS WILL BE REVIEWED ONLY FOR GENERAL COMPLIANCE WITH THE CONTRACT DOCUMENTS AND NOT FOR DIMENSIONS, SERVICE, ACCESS OR QUANTITIES. THE DESIGN TEAM WILL MAKE EVERY EFFORT TO DETECT AND NOTE ERRORS, OMISSIONS, AND/OR INACCURACIES IN SUBMITTED SHOP DRAWINGS, BUT THE FAILURE TO DETECT ERRORS, OMISSIONS, AND/OR INACCURACIES SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR THE PROPER AND COMPLETE PERFORMANCE, APPLICATION AND INSTALLATION IN ACCORDANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS. THE SUBMITTAL REVIEW SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR PURCHASE OF ANY ITEM IN FULL COMPLIANCE WITH THE CONTRACT DOCUMENTS OR ITS COMPLETE AND PROPER INSTALLATION AND PERFORMANCE.
6. EACH CONTRACTOR MUST CHECK THE APPLICATION OF THEIR SUBMITTED EQUIPMENT AND CERTIFY AT TIME OF SHOP DRAWING SUBMITTAL THAT THE EQUIPMENT OR PRODUCT SPECIFIED HAS BEEN PROPERLY APPLIED AND CAN BE INSTALLED, SERVICED, AND MAINTAINED WHERE INDICATED ON THE DRAWINGS. ADVISE THE ENGINEER IN WRITING WITH SUBMITTAL DRAWINGS OF ANY POTENTIAL PROBLEMS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY FIELD CHANGES THAT MIGHT BE NECESSARY BECAUSE OF PHYSICAL CHARACTERISTICS OF EQUIPMENT THAT HAVE NOT BEEN CALLED TO THE ENGINEER'S ATTENTION AT THE TIME OF SUBMITTAL.
7. IF SUBSTITUTIONS ARE SUBMITTED, NOTIFY ALL OTHER CONTRACTORS, SUBCONTRACTORS, ETC., AFFECTED BY THE SUBSTITUTION AND FULLY COORDINATE WITH THEM. ANY ADDITIONAL COSTS RESULTING FROM SUBSTITUTION, WHETHER BY THIS CONTRACTOR OR OTHERS, SHALL BE THE RESPONSIBILITY OF AND PAID FOR BY THE SUBSTITUTING CONTRACTOR. SUBMITTED AND REVIEWED SHOP DRAWINGS DO NOT ABSOLVE THIS CONTRACTOR FROM THIS RESPONSIBILITY.

DESIGN CRITERIA

1. Applicable Building Codes
   A. Building: Ohio Building Code 2024
      a. Construction classification type: TYPE VA
      b. Primary use and occupancy classification:
         • Residential: Groups R-2
   B. Mechanical: Ohio Mechanical Code 2024
   C. Plumbing: Ohio Plumbing Code 2024
   D. Fire Protection: Ohio Fire Code 2024
      A. Fully suppressed with wet sprinkler system.
   E. Electrical: National Electric Code 2024
   F. Energy: ASHRAE 90.1 - 2019
   G. Gas: Ohio Fuel Gas Code 2024
   H. NFPA: latest edition 13R
   I. Local Building Code and Revisions.
2. ASHRAE Design Requirements
   A. Heating/Cooling Loads
      a. Heating
         • Outside air temperatures: 1.0 degrees F DB (ASHRAE 99.6%).
      b. Cooling
         • Outside air temperatures: 86.3 degrees F DB / 72.4 degrees F WB (ASHRAE 99%).
   B. Building Design
      a. ASHRAE and Energy Code guidelines.
      b. Indoor relative humidity at 50 percent RH for cooling loads only.
         • Humidity is not being controlled or maintained in the heating or cooling equipment modes.

GENERAL

1. The term General Contractor (GC), as used in these documents, refers to the Contractor / Construction Manager in responsible charge of the project in terms of coordination, scheduling, subcontractor coordination, etc. This term refers to, but is not limited to, General Contractor, Construction Manager, Design Build Contractor, Prime Contractor, etc. The term is referencing the entity that coordinates the work of other trades.
2. These drawings are diagrammatic and indicate the general extent of the work. The contractor shall be responsible for the coordination and proper installation of all mechanical systems. The contractor shall provide all necessary offsets and fittings which may be required due to space constraints or other conditions.
3. The mechanical systems or its modifications are designed to be a complete operating system and stable after the building or its modifications are fully completed. It is solely the contractor's responsibility to determine construction, installation, and programming procedures and sequences to have a complete and working system and to insure the safety of the construction personnel, public, building and its component parts, and adjacent buildings and properties. This includes the addition of whatever temporary or permanent bracing, etc. that may be necessary to brace new or existing construction, walls, and framing to remain so that the structure is braced for construction loads, etc. and that no horizontal or vertical settlement or any damage occurs to the adjacent new or permanent supports and bracing that are installed. Design of these supports shall be provided by the contractor. Provide all materials, labor, equipment, and accessories required to furnish and install the systems identified in specifications and drawings.
4. It is the contractor's responsibility to enforce all applicable safety codes and regulations during all phases of construction.
5. Construction loads shall not exceed structural design live loads. The contractor shall be responsible for all design required to support construction equipment used in constructing this project. Verify and coordinate with structural drawings.
6. The contractor shall perform all construction for the project in a manner and sequence that are based on accepted industry standards that recognize the interaction of the components that comprise the systems, without causing distress, unanticipated movements or irregular load paths as a result of the construction means and methods employed.
7. The contractor shall provide all miscellaneous supporting steel, etc. for the proper installation of all mechanical systems.
8. Before fabrication and/or installing any work, contractor shall see that it does not interfere with clearance required for finish on beams, columns, pilasters, walls, or other structural or architectural members, as shown on architectural drawings. If any work is so installed and it later develops that architectural design cannot be followed, contractor shall, at his own expense, make such changes in his work as architect may direct to permit completion of architectural work in accordance with plans and specifications.
9. All piping shall be protected as required by the applicable Mechanical, Plumbing, Fire Protection and Building Codes: " General Regulations" and other Code Chapters.
10. Pipes passing through or under walls shall be protected from breakage. Pipes passing through studs, joist, rafters or similar members less than 1-1/2" from the nearest edge of the members shall be protected by steel shield plates.
11. Piping shall be installed to prevent strains and stresses that exceed the structural strength of the pipe. Where necessary, provisions shall be made to protect piping from the damage resulting from pipe expansion and contraction and structural/soil settlement. Expansion joint fittings shall be used where necessary to provide for expansion and contraction of the pipes. Sleeved openings shall be sized appropriately to accommodate pipe movement and structural/soil settlement. Expansion joint fittings shall be of the typical material suitable for use with the type of piping in which fittings are installed. At a minimum install rubber mechanical joint couplings or CSA-certified expansion joints on all vertical piping at every other floor of the building and rigidly support the stack pipe on alternating floors to direct any movement into the appropriate expansion compensator. Design of these expansion fittings shall be provided by the contractor. Any analysis which requires additional support or expansion detailing shall be shared with the mechanical design professional and any stresses or point loads created by the engineered system shall be shared with the structural designer for review.
12. Install additional offsets on piping or ductwork where required to obtain maximum headroom or to avoid conflict with other work without additional cost to owner.
13. Report any interferences between work under this division and that of any other contractors to architect as soon as they are discovered. Architect will determine which equipment shall be relocated, regardless of which was first installed, and his decision shall be final.
14. The contractor shall coordinate floor, wall, and roof penetrations, louver sizes, etc. with general trades.
15. Principal openings on these drawings through the framing are shown on the structural drawings. The mechanical contractor shall examine the structural and mechanical drawings for the required openings and shall verify size and location of all openings with the general contractor. General contractor shall provide all openings required through the framing by the mechanical, electrical, plumbing, or other trades, whether or not shown on the structural drawings. Any deviation from the openings shown on the structural drawings shall be brought to the engineer's attention for review.
16. All mechanical and electrical work: Ductwork, plumbing, piping, wiring, lighting, etc. and all architectural items that need to be removed during the modification of or reinforcing of, existing structure shall be replaced in kind by the respective contractor. The contractors shall keep all existing systems in operation during the construction phase of the project.
17. All contractors are required to examine the drawings and specifications carefully, visit the site and fully inform themselves as to all existing conditions and limitations, prior to agreeing to perform the work. Failure to visit the site and familiarize themselves with the existing conditions and limitations will in no way relieve the contractor from furnishing any materials or performing any work in accordance with drawings and specification without additional cost to the owner to have a complete and working system.
18. Details labeled "Typical Details" or "Typical" on drawings apply to situations occurring on the whole project that are the same or similar to those specifically detailed. Such details apply whether or not details are referenced at each location on drawings. Notify engineer for clarifications regarding applicability of "Typical Details".
19. Work and coordinate these drawings with architectural, civil, structural, mechanical, plumbing, fire protection, electrical, and technology drawings.
20. Do not scale drawings.
21. Any discrepancies between mechanical and architectural drawings shall be brought to the attention of the architect and mechanical engineer.
22. Should any of the general notes conflict with any details or instructions on plans, or in the specifications, the strictest provision shall govern.
23. Shop drawings and submittals
    A. Shop drawings and submittals shall be checked and coordinated with other materials and contracts by the general, mechanical and electrical contractors and shop drawings and submittals shall bear the prime contractor's review stamp with the checker's initials before being submitted to the architect for approval.
    B. When the contractor has been authorized to use the architect and engineer's drawings as construction coordination drawings, the contractor must remove all title blocks, professional seals and any other references to the architect and engineer from those drawings. The contractors name and title shall be placed on the drawings.
    C. Where voltage, amp draw, dimensions and elevations of existing construction could affect the new construction, it is the contractor's responsibility to make field verifications and measurements in time for their incorporation into the shop drawings.
24. Refer to architectural and electrical reflected ceiling plans for exact location of light fixtures. Contractors to coordinate locations of lighting, speakers, air diffusers, grilles, sprinkler heads and the like, with reflected ceiling lay-outs as required and directed by the architect.
25. Ductwork or piping shall not be located over the top of any electrical panels or equipment.
26. Contractor shall include in his bid all cutting, trenching, and patching associated with the installation of this projects work.
24. Cutting, Patching and Drilling
    A. All cutting and patching of the building construction floor for this work shall be by this contractor unless shown on architectural drawings and confirmed as to size and location prior to new construction. Cutting shall be in a neat and workmanlike manner.
    B. Neatly saw cut all rectangular openings, set sleeve through opening, and finish patch or provide trim flange around opening.
    C. Neatly saw cut floors and patch floor to match existing, including floor covering.
    D. Contractor shall field verify slab-on-grade or supported floor construction type prior to cutting. Under no circumstances shall this contractor cut a floor thicker than 4 inches, a structural floor slab, whether on grade or supported, without prior written approval from the architect. If floor slab indicated to be cut on mechanical plans is found to be structural in nature, do not cut. Contact architect immediately for further directions.
    E. Core drill and sleeve all round openings.
    F. Do not cut any structural components without architect's written approval, including, but not limited to roof joists, columns, floor joists, beams, girders, structural floor slabs, rebar, etc.
    G. Patch, and finish to match adjacent areas that have been cut, damaged or modified as a result of the installation of the mechanical systems. Fire-stop all penetrations of fire rated construction in a code approved manner.
    H. All contractors shall confirm with owner, prior to bid, times available for noise producing work such as cutting and core drilling of floors, walls, etc. as well as times for work which requires access into adjoining tenant spaces. Include any premium time in bid.
    I. Exact location of roof top air conditioning units shall be approved by the structural engineer. Mechanical contractor shall furnish and install all supplemental support steel for equipment and roof penetrations after approval of structural engineer.
    J. The mechanical contractor shall coordinate work with the general contractor prior to construction. The mechanical contractor shall provide information regarding openings in walls, floors, etc., concrete equipment pads and foundations to the general contractor. If the mechanical contractor fails to comply with this request, or if incorrect information is given, the necessary cutting and patching will be performed by the general contractor at the mechanical contractor's expense.
    K. All openings required for this branch of work shall be accomplished in time to be incorporated in, and be compatible with the construction program; otherwise this contractor shall be responsible and pay for all changes made necessary for his failure to do so. Pipe holes in floors and walls shall be core drilled if not sleeved during construction.
    L. Existing slabs shall be core drilled at reentrant corners of new floor openings to prevent overcutting.
25. Refer to mechanical, plumbing, fire protection, and electrical plans for location of mechanical, plumbing, and electrical equipment. Coordinate location of disconnect switch associated with each piece of mechanical and plumbing equipment with electrical contractor.
26. Installation requirements for all HVAC, plumbing, and fire protection systems shall be reviewed and coordinated with all other trades involved prior to rough-in. Give equipment shop drawings from installer/supplier/contractor equipment, as required, for review and coordination to all other trades involved. Contact architect/engineer with any discrepancies found between construction drawings and equipment being furnished prior to rough-in.
27. The contractor shall furnish all access panels or doors in hard ceilings and walls with a size as required for servicing and testing, for equipment, valves and/or devices furnished under this contract. The general contractor shall install access panels. The contractor shall coordinate the size and location of each access panel with the architect and general contractor prior to rough-in.
28. Firestopping
    A. The contractor shall review all architectural drawings for type of walls, fire ratings, & firestopping details and shall provide all fire dampers and firestopping required for these walls whether shown or not on the mechanical plans.
    B. All penetrations through fire rated walls associated with the installation shall be sleeved and fire-stopped using a UL approved method. UL approved method shall meet or exceed fire rating of structure being penetrated. Reference architectural plans for fire rated structures. If shown, reference architectural, mechanical and electrical drawings for penetration details.
    C. All openings through fire rated walls, floors, and/or roofs for ductwork, piping, conduit, etc., shall be fire sealed with a calcium salicate, silicone "RTV" foam, "3M" fire rated sealants, Hilti Firestop Systems, or approved equal to maintain the intended fire rating and associated UL ratings as recommended by the architect and/or sealant manufacturer.
    D. All fire stopping sealants shall be thixotropic so as not so slump or sag and shall be trowelable. Fire stopping sealants shall be intumescent and shall be free of asbestos, halogens, and volatile solvents.
    E. Fire stopping materials shall be classified in the Underwriters Laboratories (UL) fire resistance directory or listed in the Warnock Hersey International Directory.
29. All equipment and devices for this project must be UL listed. Devices, equipment, systems shall be installed per National Electrical Code requirements and manufacturer's instructions.
30. All conduit and cabling shall be properly supported as required by the National Electrical Code. For existing installations, the contractor shall be responsible to replace and/or rework existing conduit and/or cabling that is not in compliance with this requirement.
31. All materials and work in the return air plenum shall be approved for plenum rated application in accordance to the current building code. Where open wiring methods for low voltage systems is permitted by the contract documents and local authority, the conductor insulation must be plenum rated.
32. Shop Areas and Material Storage
    A. No plumbing or mechanical trade is permitted to use as shop working area, any concrete slab that is to receive metallic waterproofing, asphalt tile, plastic tile, etc., except by express permission of the architect.
    B. The contractor shall make provisions for the delivery and safe storage of his materials and equipment in coordination with the work of others. Materials and equipment shall be delivered at such stages of the work as will expedite the work as a whole and shall be marked and stored in such a way as to be easily checked and inspected. The arrival and placing of large equipment items shall be scheduled early enough to permit entry and setting when there is no restriction or problem due to size and weight.
33. Temporary Heat
    A. The HVAC contractor under this division shall set up temporary heat and other services as may be required and/or requested by the general contractor. See "General Conditions" and "Special Conditions." This contractor shall pay expenses resulting from temporary heat and services used solely by him.

EXCAVATING / BACKFILLING

1. The contractor shall familiarize himself with the survey and the geotechnical investigation report before starting construction. All underground work shall be in accordance with the recommendations of the geotechnical report except where noted otherwise on drawings or specifications.
2. All building pad preparation and patching shall follow the recommendations of the geotechnical report and the structural drawings and architectural drawings (uno).
3. All objectionable materials encountered are to be removed from excavated areas of the site per the geotechnical report.
4. If unstable subgrade sectors cannot be stabilized by excavation and re-compaction, then crushed stone or similar coarse aggregate materials shall be rolled into the subgrade until a firm subgrade reaction is achieved.
5. The geotechnical engineer shall determine on site or off site imported material that can be used for engineered fill. All fill material shall be approved by the geotechnical engineer.
6. The proposed engineered fill materials are to be placed in lifts not exceeding eight (8) inches in loose measured thickness. Each lift is to be compacted as follows:
   A. Slab on grade: Minimum of 95 percent maximum density by ASTM D698.
7. All fill materials shall be free of organic contaminations and other deleterious matter.
8. For back fill against basement walls, retaining walls, footings, etc., place in 8 inch thick layers, with each lift compacted at near optimum moisture content, until a minimum in place density of 95 percent of the maximum density as determined by ASTM D698 is achieved.
9. All soil surrounding and under footing shall be protected from frost action and freezing during the course of construction.
10. Notify structural engineer of any unusual soil conditions that are in variance with the geotechnical report.

CONCRETE PADS

1. This contractor shall provide to the general contractor, dimensions for the concrete foundations or bases under all equipment that rests on floors in mechanical equipment rooms or outside on grade. He shall follow drawings and/or manufacturer's literature with regard to design and construction of same. In the absence of more specific information, either on drawings or manufacturer's literature, the bases shall be level, shall have a minimum height above finished floor of 4 inches and extend 3 inches beyond the skids, feet or bed plate of the item of equipment.
2. Concrete pedestals and/or saddles for support of piping and/or tanks shall be designed to withstand stresses to which they may be subjected and to distribute properly the load and impact over building areas.
3. Concrete shall be a of mix producing compressive strength after 28 days of 3,000 psi minimum reinforcing and bolts shall be provided as required and work shall be done in accordance with applicable articles covering concrete work.
4. Space approximately 1 inch thick between bottom of equipment and top of concrete foundation or base which remains after shimming, shall be filled completely with grouting. Grout shall be made up with sand and cement designed for the purpose which does not shrink on setting up. Exposed surface of grouting shall be finished to make a neat appearance.

SHOP DRAWING SCHEDULE

SUBMITTAL	NOTES ON SUBMISSION	RESPONSIBLE PARTY
MEP COORDINATION DRAWINGS – SHEETMETAL HVAC EQUIPMENT PLUMBING PIPING SPRINKLER PIPING CONDUIT, PANELS & J-BOXES CRITICAL STRUCTURAL...	DRAWN TO SCALE, SHOWING AT MINIMUM ELEVATIONS, ACCESS AND SERVICE CLEARANCES, STRUCTURAL AND ELECTRICAL (LIGHTING AND CONDUIT) MEMBERS FOR COORDINATION, ACCESS PANELS AND ANY POTENTIAL COORDINATION ISSUES THAT NEED TO BE ADDRESSED.	MECHANICAL CONTRACTOR ELECTRICAL CONTRACTOR PLUMBING CONTRACTOR SPRINKLER CONTRACTOR GENERAL CONTRACTOR
MECHANICAL EQUIPMENT	MARKED WITH EQUIPMENT TAGS AND NOTE ALL REQUIRED OPERATING CHARACTERISTICS, DIMENSIONS, AND SERVICE CLEARANCES FOR EACH ITEM.	MECHANICAL CONTRACTOR
MECHANICAL PIPING AND INSULATION MATERIALS	MARKED WITH APPLICABLE SPECIFICATION SECTION FOR REFERENCE. PROVIDE INSOLATION THICKNESS.	MECHANICAL CONTRACTOR
HVAC CONTROLS	SHALL INCLUDE CONTROL DRAWINGS, SEQUENCE OF OPERATIONS AND POINTS LIST WHERE APPLICABLE.	HVAC CONTROLS CONTRACTOR

NOTES:

1. PREPARE SUBMITTALS AS PDF PACKAGE, INCORPORATING COMPLETE INFORMATION INTO EACH PDF FILE. NAME PDF FILE WITH SUBMITTAL NUMBER. ALL SUBMITTALS FOR A GROUP OF FIXTURES SHALL BE PROVIDED IN A SINGLE REVIEWABLE DOCUMENT, NOT MULTIPLE PACKAGES, FOR REVIEW.
2. EACH SUBMITTAL SHALL BE PROVIDED WITH A COVER IDENTIFYING THE FOLLOWING:...
   a. NAME OF THE JOB
   b. LOCATION OF THE JOB, ADDRESS, CITY AND STATE.
   c. NAME AND ADDRESS OF THE COMPANY ISSUING THE SUBMITTAL.
   d. DATE OF THE SUBMITTAL
   e. GENERAL CONTRACTOR'S REVIEW AND APPROVAL STAMP
3. SHOP DRAWINGS WILL NOT BE REVIEWED BY THE ENGINEER UNLESS THE GC'S APPROVAL IS NOTED AND COVER SHEET WITH ITEMS INDICATED ABOVE ARE COMPLETE. CATALOG CUT SHEETS THAT DO NOT IDENTIFY SPECIFIC ITEMS WILL NOT BE REVIEWED. DO NOT START WORK OR FABRICATION UNTIL SHOP DRAWINGS HAVE BEEN REVIEWED BY THE ENGINEER AND RETURNED TO THE CONTRACTOR.
4. THE CONTRACTOR IS RESPONSIBLE TO HIGHLIGHT (IN BOLD TEXT OR HIGHLIGHTED COLOR) TO THE DESIGN TEAM ANY DIFFERENCES IN PERFORMANCE, DIMENSION, WEIGHT, POWER REQUIREMENTS, ACCESS ETC. BETWEEN THE BASIS OF DESIGN OR SCHEDULED EQUIPMENT AND THE SUBMITTED EQUIPMENT.
5. SUBMITTALS WILL BE REVIEWED ONLY FOR GENERAL COMPLIANCE WITH THE CONTRACT DOCUMENTS AND NOT FOR DIMENSIONS, SERVICE, ACCESS OR QUANTITIES. THE DESIGN TEAM WILL MAKE EVERY EFFORT TO DETECT AND NOTE ERRORS, OMISSIONS, AND/OR INACCURACIES IN SUBMITTED SHOP DRAWINGS, BUT THE FAILURE TO DETECT ERRORS, OMISSIONS, AND/OR INACCURACIES SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR THE PROPER AND COMPLETE PERFORMANCE, APPLICATION AND INSTALLATION IN ACCORDANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS. THE SUBMITTAL REVIEW SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR PURCHASE OF ANY ITEM IN FULL COMPLIANCE WITH THE CONTRACT DOCUMENTS OR ITS COMPLETE AND PROPER INSTALLATION AND PERFORMANCE.
6. EACH CONTRACTOR MUST CHECK THE APPLICATION OF THEIR SUBMITTED EQUIPMENT AND CERTIFY AT TIME OF SHOP DRAWING SUBMITTAL THAT THE EQUIPMENT OR PRODUCT SPECIFIED HAS BEEN PROPERLY APPLIED AND CAN BE INSTALLED, SERVICED, AND MAINTAINED WHERE INDICATED ON THE DRAWINGS. ADVISE THE ENGINEER IN WRITING WITH SUBMITTAL DRAWINGS OF ANY POTENTIAL PROBLEMS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY FIELD CHANGES THAT MIGHT BE NECESSARY BECAUSE OF PHYSICAL CHARACTERISTICS OF EQUIPMENT THAT HAVE NOT BEEN CALLED TO THE ENGINEER'S ATTENTION AT THE TIME OF SUBMITTAL.
7. IF SUBSTITUTIONS ARE SUBMITTED, NOTIFY ALL OTHER CONTRACTORS, SUBCONTRACTORS, ETC., AFFECTED BY THE SUBSTITUTION AND FULLY COORDINATE WITH THEM. ANY ADDITIONAL COSTS RESULTING FROM SUBSTITUTION, WHETHER BY THIS CONTRACTOR OR OTHERS, SHALL BE THE RESPONSIBILITY OF AND PAID FOR BY THE SUBSTITUTING CONTRACTOR. SUBMITTED AND REVIEWED SHOP DRAWINGS DO NOT ABSOLVE THIS CONTRACTOR FROM THIS RESPONSIBILITY.

MECHANICAL LEGEND

ROOMS OR AREAS SHOWN SHADED ON THIS PLAN, WITH THE FOLLOWING SHADING TYPE ARE DEDICATED FOR A SPECIFIC USE. EXAMPLES INCLUDE ELECTRICAL ROOMS, TECHNOLOGY/DATA CLOSETS, EXIT STAIRWELLS, AND ELEVATOR EQUIPMENT ROOMS. UNDER NO CIRCUMSTANCES SHALL PIPING, DUCTWORK, OR EQUIPMENT BE INSTALLED IN OR ROUTED THROUGH THESE ROOMS OR AREAS EXCEPT FOR BRANCH PIPING OR DUCTWORK SPECIFICALLY SERVING THE ROOM OR AREA. DEDICATED SPACE SHALL EXTEND VERTICALLY FROM FLOOR TO STRUCTURAL CEILING.

S1 — DUCT-TYPE SMOKE DETECTOR WITH REMOTE TEST STATION AND AUXILIARY RELAY FURNISHED AND WIRED BY ELECTRICAL CONTRACTOR; INSTALLED IN DUCTWORK BY MECHANICAL CONTRACTOR PER CODE. COORDINATE EXACT LOCATION WITH MECHANICAL CONTRACTOR AND MANUFACTURER. PROVIDE CONDUIT AND WIRING NECESSARY TO SHUT DOWN HVAC UNIT UPON ACTIVATION OF SMOKE DETECTOR.

T / AC-1 — THERMOSTAT, MOUNT 48" AFF, UNLESS OTHERWISE NOTED

POINT OF CONNECTION

FOR ALL IN UNIT SPACES DURING INSTALLATION, SEAL ALL PERMANENT DUCTS AND VENTS TO MINIMIZE CONTAMINATION FROM CONSTRUCTION. REMOVE SEALS AFTER ALL PHASES OF CONSTRUCTION ARE COMPLETE AND FLUSH THE SPACE WITH FRESH AIR. SEE SPECIFICATIONS FOR DETAILED INSTRUCTIONS.

ALL DUCTS AND DUCT BOOTS TO BE SEALED AT ALL JOINTS, CORNERS, SEAMS, AND CONNECTIONS, OR AT INTERFACES WITH ANOTHER MATERIAL.

ALL HEATING, COOLING, AND VENTILATION SYSTEMS TO BE COMMISSIONED BY A TECHNICIAN WITH NORTH AMERICAN TECHNICIAN EXCELLENCE CERTIFICATION, HVAC CONTRACTOR CREDENTIALED BY AN EPA-RECOGNIZED HVAC QUALITY INSTALLATION TRAINING AND OVERSIGHT ORGANIZATION.

DESIGN CRITERIA

1. Applicable Building Codes
   A. Building: Ohio Building Code 2024
      a. Construction classification type: TYPE VA
      b. Primary use and occupancy classification:
         - Residential: Groups R-2
   B. Mechanical: Ohio Mechanical Code 2024
   C. Plumbing: Ohio Plumbing Code 2024
   D. Fire Protection: Ohio Fire Code 2024
      A. Fully suppressed with wet sprinkler system.
   E. Electrical: National Electric Code 2024
   F. Energy: ASHRAE 90.1 - 2019
   G. Gas: Ohio Fuel Gas Code 2024
   H. NFPA: latest edition 13R
   I. Local Building Code and Revisions.
2. ASHRAE Design Requirements
   A. Heating/Cooling Loads
      a. Heating
         - Outside air temperatures: 1.0 degrees F DB (ASHRAE 99.6%).
      b. Cooling
         - Outside air temperatures: 86.3 degrees F DB / 72.4 degrees F WB (ASHRAE 99%).
   B. Building Design
      a. ASHRAE and Energy Code guidelines.
      b. Indoor relative humidity at 50 percent RH for cooling loads only.
         - Humidity is not being controlled or maintained in the heating or cooling equipment modes.
3. Design Ventilation
   A. Use State of Ohio Code.
   B. See Ventilation Schedule on drawings.

GENERAL

1. The term General Contractor (GC), as used in these documents, refers to the Contractor / Construction Manager in responsible charge of the project in terms of coordination, scheduling, subcontractor coordination, etc. This term refers to, but is not limited to, General Contractor, Construction Manager, Design Build Contractor, Prime Contractor, etc. The term is referencing the entity that coordinates the work of other trades.
2. These drawings are diagrammatic and indicate the general extent of the work. The contractor shall be responsible for the coordination and proper installation of all mechanical systems. The contractor shall provide all necessary offsets and fittings which may be required due to space constraints or other conditions.
3. The mechanical systems or its modifications are designed to be a complete operating system and stable after the building or its modifications are fully completed. It is solely the contractor's responsibility to determine construction, installation, and programming procedures and sequences to have a complete and working system and to insure the safety of the construction personnel, public, building and its component parts, and adjacent buildings and properties. This includes the addition of whatever temporary or permanent bracing, etc. that may be necessary to brace new or existing construction, walls, and framing to remain so that the structure is braced for construction loads, etc. and that no horizontal or vertical settlement or any damage occurs to the adjacent new or permanent supports and bracing that are installed. Design of these supports shall be provided by the contractor. Provide all materials, labor, equipment, and accessories required to furnish and install the systems identified in specifications and drawings.
4. It is the contractor's responsibility to enforce all applicable safety codes and regulations during all phases of construction.
5. Construction loads shall not exceed structural design live loads. The contractor shall be responsible for all design required to support construction equipment used in constructing this project. Verify and coordinate with structural drawings.
6. The contractor shall perform all construction for the project in a manner and sequence that are based on accepted industry standards that recognize the interaction of the components that comprise the systems, without causing distress, unanticipated movements or irregular load paths as a result of the construction means and methods employed.
7. The contractor shall provide all miscellaneous supporting steel, etc. for the proper installation of all mechanical systems.
8. Before fabrication and/or installing any work, contractor shall see that it does not interfere with clearance required for finish on beams, columns, pilasters, walls, or other structural or architectural members, as shown on architectural drawings. If any work is so installed and it later develops that architectural design cannot be followed, contractor shall, at his own expense, make such changes in his work as architect may direct to permit completion of architectural work in accordance with plans and specifications.
9. All piping shall be protected as required by the applicable Mechanical, Plumbing, Fire Protection and Building Codes: " General Regulations" and other Code Chapters.
10. Pipes passing through or under walls shall be protected from breakage. Pipes passing through studs, joist, rafters or similar members less than 1-1/2" from the nearest edge of the members shall be protected by steel shield plates.
11. Piping shall be installed to prevent strains and stresses that exceed the structural strength of the pipe. Where necessary, provisions shall be made to protect piping from the damage resulting from pipe expansion and contraction and structural/soil settlement. Expansion joint fittings shall be used where necessary to provide for expansion and contraction of the pipes. Sleeved openings shall be sized appropriately to accommodate pipe movement and structural/soil settlement. Expansion joint fittings shall be of the typical material suitable for use with the type of piping in which fittings are installed. At a minimum install rubber mechanical joint couplings or CSA-certified expansion joints on all vertical piping at every other floor of the building and rigidly support the stack pipe on alternating floors to direct any movement into the appropriate expansion compensator. Design of these expansion fittings shall be provided by the contractor. Any analysis which requires additional support or expansion detailing shall be shared with the mechanical design professional and any stresses or point loads created by the engineered system shall be shared with the structural designer for review.
12. Install additional offsets on piping or ductwork where required to obtain maximum headroom or to avoid conflict with other work without additional cost to owner.
13. Report any interferences between work under this division and that of any other contractors to architect as soon as they are discovered. Architect will determine which equipment shall be relocated, regardless of which was first installed, and his decision shall be final.
14. The contractor shall coordinate floor, wall, and roof penetrations, louver sizes, etc. with general trades.
15. Principal openings on these drawings through the framing are shown on the structural drawings. The mechanical contractor shall examine the structural and mechanical drawings for the required openings and shall verify size and location of all openings with the general contractor. General contractor shall provide all openings required through the framing by the mechanical, electrical, plumbing, or other trades, whether or not shown on the structural drawings. Any deviation from the openings shown on the structural drawings shall be brought to the engineer's attention for review.
16. All mechanical and electrical work: Ductwork, plumbing, piping, wiring, lighting, etc. and all architectural items that need to be removed during the modification of or reinforcing of, existing structure shall be replaced in kind by the respective contractor. The contractors shall keep all existing systems in operation during the construction phase of the project.
17. All contractors are required to examine the drawings and specifications carefully, visit the site and fully inform themselves as to all existing conditions and limitations, prior to agreeing to perform the work. Failure to visit the site and familiarize themselves with the existing conditions and limitations will in no way relieve the contractor from furnishing any materials or performing any work in accordance with drawings and specification without additional cost to the owner to have a complete and working system.
18. Details labeled "Typical Details" or "Typical" on drawings apply to situations occurring on the whole project that are the same or similar to those specifically detailed. Such details apply whether or not details are referenced at each location on drawings. Notify engineer for clarifications regarding applicability of "Typical Details".
19. Work and coordinate these drawings with architectural, civil, structural, mechanical, plumbing, fire protection, electrical, and technology drawings.
20. Do not scale drawings.
21. Any discrepancies between mechanical and architectural drawings shall be brought to the attention of the architect and mechanical engineer.
22. Should any of the general notes conflict with any details or instructions on plans, or in the specifications, the strictest provision shall govern.
23. Shop drawings and submittals
    A. Shop drawings and submittals shall be checked and coordinated with other materials and contracts by the general, mechanical and electrical contractors and shop drawings and submittals shall bear the prime contractor's review stamp with the checker's initials before being submitted to the architect for approval.
    B. When the contractor has been authorized to use the architect and engineer's drawings as construction coordination drawings, the contractor must remove all title blocks, professional seals and any other references to the architect and engineer from those drawings. The contractors name and title shall be placed on the drawings.
    C. Where voltage, amp draw, dimensions and elevations of existing construction could affect the new construction, it is the contractor's responsibility to make field verifications and measurements in time for their incorporation into the shop drawings.
24. Refer to architectural and electrical reflected ceiling plans for exact location of light fixtures. Contractors to coordinate locations of lighting, speakers, air diffusers, grilles, sprinkler heads and the like, with reflected ceiling lay-outs as required and directed by the architect.
25. Ductwork or piping shall not be located over the top of any electrical panels or equipment.
26. Contractor shall include in his bid all cutting, trenching, and patching associated with the installation of this projects work.
24. Cutting, Patching and Drilling
    A. All cutting and patching of the building construction required for this work shall be by this contractor unless shown on architectural drawings and confirmed as to size and location prior to new construction. Cutting shall be in a neat and workmanlike manner.
    B. Neatly saw cut all rectangular openings, set sleeve through opening, and finish patch or provide trim flange around opening.
    C. Neatly saw cut floors and patch floor to match existing, including floor covering.
    D. Contractor shall field verify slab-on-grade or supported floor construction type prior to cutting. Under no circumstances shall this contractor cut a floor thicker than 4 inches, a structural floor slab, whether on grade or supported, without prior written approval from the architect. If floor slab indicated to be cut on mechanical plans is found to be structural in nature, do not cut. Contact architect immediately for further directions.
    E. Core drill and sleeve all round openings.
    F. Do not cut any structural components without architect's written approval, including, but not limited to roof joists, columns, floor joists, beams, girders, structural floor slabs, rebar, etc.
    G. Patch, and finish to match adjacent areas that have been cut, damaged or modified as a result of the installation of the mechanical systems. Fire-stop all penetrations of fire rated construction in a code approved manner.
    H. All contractors shall confirm with owner, prior to bid, times available for noise producing work such as cutting and core drilling of floors, walls, etc. as well as times for work which requires access into adjoining tenant spaces. Include any premium time in bid.
    I. Exact location of roof top air conditioning units shall be approved by the structural engineer. Mechanical contractor shall furnish and install all supplemental support steel for equipment and roof penetrations after approval of structural engineer.
    J. The mechanical contractor shall coordinate work with the general contractor prior to construction. The mechanical contractor shall provide information regarding openings in walls, floors, etc., concrete equipment pads and foundations to the general contractor. If the mechanical contractor fails to comply with this request, or if incorrect information is given, the necessary cutting and patching will be performed by the general contractor at the mechanical contractor's expense.
    K. All openings required for this branch of work shall be accomplished in time to be incorporated in, and be compatible with the construction program; otherwise this contractor shall be responsible and pay for all changes made necessary for his failure to do so. Pipe holes in floors and walls shall be core drilled if not sleeved during construction.
    L. Existing slabs shall be core drilled at reentrant corners of new floor openings to prevent overcutting.
25. Refer to mechanical, plumbing, fire protection, and electrical plans for location of mechanical, plumbing, and electrical equipment. Coordinate location of disconnect switch associated with each piece of mechanical and plumbing equipment with electrical contractor.
26. Installation requirements for all HVAC, plumbing, and fire protection systems shall be reviewed and coordinated with all other trades involved prior to rough-in. Give equipment shop drawings from installer/supplier/contractor equipment, as required, for review and coordination to all other trades involved. Contact architect/engineer with any discrepancies found between construction drawings and equipment being furnished prior to rough-in.
27. The contractor shall furnish all access panels or doors in hard ceilings and walls with a size as required for servicing and testing, for equipment, valves and/or devices furnished under this contract. The general contractor shall install access panels. The contractor shall coordinate the size and location of each access panel with the architect and general contractor prior to rough-in.
28. Firestopping
    A. The contractor shall review all architectural drawings for type of walls, fire ratings, & firestopping details and shall provide all fire dampers and firestopping required for these walls whether shown or not on the mechanical plans.
    B. All penetrations through fire rated walls associated with the installation shall be sleeved and fire-stopped using a UL approved method. UL approved method shall meet or exceed fire rating of structure being penetrated. Reference architectural plans for fire rated structures. If shown, reference architectural, mechanical and electrical drawings for penetration details.
    C. All openings through fire rated walls, floors, and/or roofs for ductwork, piping, conduit, etc., shall be fire sealed with a calcium salicate, silicone "RTV" foam, "3M" fire rated sealants, Hilti Firestop Systems, or approved equal to maintain the intended fire rating and associated UL ratings as recommended by the architect and/or sealant manufacturer.
    D. All fire stopping sealants shall be thixotropic so as not so slump or sag and shall be trowelable. Fire stopping sealants shall be intumescent and shall be free of asbestos, halogens, and volatile solvents.
    E. Fire stopping materials shall be classified in the Underwriters Laboratories (UL) fire resistance directory or listed in the Warnock Hersey International Directory.
29. All equipment and devices for this project must be UL listed. Devices, equipment, systems shall be installed per National Electrical Code requirements and manufacturer's instructions.
30. All conduit and cabling shall be properly supported as required by the National Electrical Code. For existing installations, the contractor shall be responsible to replace and/or rework existing conduit and/or cabling that is not in compliance with this requirement.
31. All materials and work in the return air plenum shall be approved for plenum rated application in accordance to the current building code. Where open wiring methods for low voltage systems is permitted by the contract documents and local authority, the conductor insulation must be plenum rated.
32. Shop Areas and Material Storage
    A. No plumbing or mechanical trade is permitted to use as shop working area, any concrete slab that is to receive metallic waterproofing, asphalt tile, plastic tile, etc., except by express permission of the architect.
    B. The contractor shall make provisions for the delivery and safe storage of his materials and equipment in coordination with the work of others. Materials and equipment shall be delivered at such stages of the work as will expedite the work as a whole and shall be marked and stored in such a way as to be easily checked and inspected. The arrival and placing of large equipment items shall be scheduled early enough to permit entry and setting when there is no restriction or problem due to size and weight.
33. Temporary Heat
    A. The HVAC contractor under this division shall set up temporary heat and other services as may be required and/or requested by the general contractor. See "General Conditions" and "Special Conditions." This contractor shall pay expenses resulting from temporary heat and services used solely by him.

EXCAVATING / BACKFILLING

1. The contractor shall familiarize himself with the survey and the geotechnical investigation report before starting construction. All underground work shall be in accordance with the recommendations of the geotechnical report except where noted otherwise on drawings or specifications.
2. All building pad preparation and patching shall follow the recommendations of the geotechnical report and the structural drawings and architectural drawings (uno).
3. All objectionable materials encountered are to be removed from excavated areas of the site per the geotechnical report.
4. If unstable subgrade sectors cannot be stabilized by excavation and re-compaction, then crushed stone or similar coarse aggregate materials shall be rolled into the subgrade until a firm subgrade reaction is achieved.
5. The geotechnical engineer shall determine on site or off site imported material that can be used for engineered fill. All fill material shall be approved by the geotechnical engineer.
6. The proposed engineered fill materials are to be placed in lifts not exceeding eight (8) inches in loose measured thickness. Each lift is to be compacted as follows:
   A. Slab on grade: Minimum of 95 percent maximum density by ASTM D698.
7. All fill materials shall be free of organic contaminations and other deleterious matter.
8. For back fill against basement walls, retaining walls, footings, etc., place in 8 inch thick layers, with each lift compacted at near optimum moisture content, until a minimum in place density of 95 percent of the maximum density as determined by ASTM D698 is achieved.
9. All soil surrounding and under footing shall be protected from frost action and freezing during the course of construction.
10. Notify structural engineer of any unusual soil conditions that are in variance with the geotechnical report.

CONCRETE PADS

1. This contractor shall provide to the general contractor, dimensions for the concrete foundations or bases under all equipment that rests on floors in mechanical equipment rooms or outside on grade. He shall follow drawings and/or manufacturer's literature with regard to design and construction of same. In the absence of more specific information, either on drawings or manufacturer's literature, the bases shall be level, shall have a minimum height above finished floor of 4 inches and extend 3 inches beyond the skids, feet or bed plate of the item of equipment.
2. Concrete pedestals and/or saddles for support of piping and/or tanks shall be designed to withstand stresses to which they may be subjected and to distribute properly the load and impact over building areas.
3. Concrete shall be a of mix producing compressive strength after 28 days of 3,000 psi minimum reinforcing and bolts shall be provided as required and work shall be done in accordance with applicable articles covering concrete work.
4. Space approximately 1 inch thick between bottom of equipment and top of concrete foundation or base which remains after shimming, shall be filled completely with grouting. Grout shall be made up with sand and cement designed for the purpose which does not shrink on setting up. Exposed surface of grouting shall be finished to make a neat appearance.

DUCT MATERIAL, LINING, AND INSULATION SCHEDULE

TYPE NO.	DESCRIPTION	SMACNA PRESSURE CLASSIFICATION	DUCT MATERIAL	INSULATION	REMARKS
GENERAL DUCTWORK:					
1	SUPPLY AIR	RECTANGULAR - 2" ROUND - 4"	GALVANIZED STEEL (SPIRAL WHERE EXPOSED TO VIEW)	1" THICK INTERNAL LINING TO 10' DOWNSTREAM OF EQUIPMENT, EXTERNAL FIELD APPLIED 1" THICK FLEXIBLE INSULATION WHERE NOT INTERNALLY LINED. (INTERNALLY LINED WHERE EXPOSED TO VIEW)	1, 4
2	RETURN AIR	2"	GALVANIZED STEEL	1" THICK INTERNAL LINING WITHIN 10' OF EQUIPMENT	2,4
3	EXHAUST AIR	2"	GALVANIZED STEEL	1/2" THICK INTERNAL LINING TO 10' UPSTREAM OF ROOF FAN	2,3,4
4	OUTSIDE AIR	4"	GALVANIZED STEEL	EXTERNAL FIELD APPLIED 2" THICK FLEXIBLE INSULATION	2,3,6

GENERAL NOTE:
- DUCTWORK SHALL BE CONSTRUCTED & INSULATED AS NOTED IN THIS SCHEDULE. SEE SPECIFICATIONS FOR ADDITIONAL INFORMATION, FOR ANY DUCTS NOT LISTED IN SCHEDULE, AND FOR DUCT CONNECTION THAT REQUIRE A HIGHER PRESSURE AND BETTER INSULATION VALUE.
- INSULATE EQUIPMENT (DUCT FURNACE, ETC.), THAT IS NOT INSULATED BY THE MANUFACTURE WITH INSULATION SHOWN IN SCHEDULE ABOVE FOR DUCTWORK.

REMARKS:
1. ALL EXPOSED SUPPLY AND RETURN DUCTWORK SHALL BE PAINTED A COLOR SELECTED BY THE ARCHITECT.
2. SIZES OF INTERNALLY LINED DUCTWORK INDICATED ON THE PLANS ARE INSIDE CLEAR DIMENSIONS.
3. INSULATE ALL DUCTWORK BETWEEN MOTOR OPERATED DAMPERS (MOD) AND BUILDING ENVELOPE (ROOF LINE OR EXTERIOR WALL).
4. DUCTWORK EXPOSED TO EXTERIOR (OUTDOOR) TEMPERATURES EITHER IN UNCONDITIONAL SPACE OR OUTSIDE SHALL BE WRAPPED WITH A MINIMUM 2" THICK FIBERGLASS INSULATION. DUCTS EXPOSED TO WEATHER SHALL BE WRAPPED WITH VENTURECLAD ALUMINUM FACING.

VIBRATION ISOLATION SCHEDULE

EQUIPMENT TYPE	HP AND OTHER	RPM	FLOOR SPAN UP TO 20 FT: BASE TYPE	ISOLATOR TYPE	MIN. DEFLECTION (IN.)	REMARKS
CENTRIFUGAL FANS						
UP TO 22 IN. DIAMETER	ALL	ALL	B	1	0.75	1,2
HEAT PUMPS, FAN-COILS, AND CEILING HUNG COMPUTER ROOM AC UNITS						
ALL	ALL	ALL	A	1	0.75	
CONDENSING UNITS						
ALL	ALL	ALL	A	2	0.75	

BASE TYPES:
A. NO BASE, ISOLATORS ATTACHED DIRECTLY TO EQUIPMENT
B. STRUCTURAL STEEL RAILS OR BASE

ISOLATOR TYPES:
1. SPRING FLOOR ISOLATOR OR HANGER
2. RESTRAINED SPRING ISOLATOR

REMARKS:
1. TO LIMIT UNDESIRABLE MOVEMENT, THRUST RESTRAINTS (TYPE 5) ARE REQUIRED FOR ALL CEILING-SUSPENDED AND FLOOR-MOUNTED UNITS OPERATING AT 2 IN. OF WATER OR MORE TOTAL STATIC PRESSURE.
2. CONSIDER THE FOLLOWING WHEN SELECTING ISOLATION SYSTEMS FOR FANS AND AIR-HANDLING EQUIPMENT:
   A. FANS WITH WHEEL DIAMETERS OF 22 IN. AND LESS AND ALL FANS OPERATING AT SPEEDS UP TO 300 RPM DO NOT GENERATE LARGE VIBRATORY FORCES. FOR FANS OPERATING UNDER 300 RPM, SELECT ISOLATOR DEFLECTION SO THE ISOLATOR NATURAL FREQUENCY IS 40% OR LESS THAN THE FAN SPEED. FOR EXAMPLE, FOR A FAN OPERATING AT 275 RPM, 0.4 x 275 = 110 RPM. THEREFORE, AN ISOLATOR NATURAL FREQUENCY OF 110 RPM OR LOWER IS REQUIRED. THIS CAN BE ACCOMPLISHED WITH A 3 IN. DEFLECTION ISOLATOR (TYPE 3).
   B. FLEXIBLE DUCT CONNECTORS SHOULD BE INSTALLED AT THE INTAKE AND DISCHARGE OF ALL FANS AND AIR-HANDLING EQUIPMENT TO REDUCE VIBRATION TRANSMISSION TO AIR DUCT STRUCTURES.
   C. INERTIA BASES (TYPE C) ARE RECOMMENDED FOR ALL CLASS 2 AND 3 FANS AND AIR-HANDLING EQUIPMENT BECAUSE EXTRA MASS ALLOWS THE USE OF STIFFER SPRINGS, WHICH LIMIT HEAVING MOVEMENTS.
   D. THRUST RESTRAINTS (TYPE 5) THAT INCORPORATE THE SAME DEFLECTION AS ISOLATORS SHOULD BE USED FOR ALL FAN HEADS, ALL SUSPENDED FANS, AND ALL BASE-MOUNTED AND SUSPENDED AIR-HANDLING EQUIPMENT OPERATING AT 2 IN. TOTAL OR MORE STATIC PRESSURE. RESTRAINT MOVEMENT ADJUSTMENT MUST BE MADE UNDER NORMAL OPERATIONAL STATIC PRESSURES.

PART 1 - VERTICAL DUCTS

MAXIMUM SIDE OF RECTANGULAR DUCT	METAL STRAP OR ANGLE BRACKET	MAXIMUM DIAMETER OF ROUND DUCTS	STRAPS
24"	1" x 1/8" (STRAP)[1]	10"	0.047" (NO. 18 GAGE) GALVANIZED STEEL 2" WIDE[1]
36"	1" x 1" x 1/8" ANGLE[1]	20"	0.058" (NO. 18 GAGE) GALVANIZED STEEL 2" WIDE[1]

PART 2 - HORIZONTAL DUCTS

18"	1" x 18 GAGE[2]	10"	SAME GAGE AS GALVANIZED STEEL DUCT. 1" WIDE OR (NO. 18 GAGE GALVANIZED STEEL WIRE) ON 10' CENTERS
30"	1" x 18 GAGE[2]		

NOTES:
1. SPACED VERTICALLY NOT MORE THAN 12 FEET ON CENTERS
2. SPACED HORIZONTALLY NOT MORE THAN 10 FEET ON CENTERS

3. PROVIDE FAN WITH CEILING RADIATION DAMPER.
4. FAN SHALL BE ENERGY STAR RATED.
5. FAN SHALL HAVE TWO-SPEED OPERATION AND RUN CONTINUOUSLY AT LOW SPEED, WALL SWITCH TO INITIATE HIGH SPEED OPERATION. WALL SWITCH PROVIDED AND WIRED BY E.C.
6. FAN SHALL BE CONTROLLED BY WALL SWITCH.
7. FAN SHALL BE CONTROLLED WITH INTEGRAL SPEED CONTROLLER.
8. FAN SHALL OPERATE CONTINUOUSLY DURING OCCUPIED HOURS.

GENERAL NOTES:

1. THESE DRAWINGS ARE DIAGRAMMATIC AND INDICATE THE GENERAL EXTENT OF WORK. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE COORDINATION AND PROPER INSTALLATION OF ALL FIRE PROTECTION SYSTEMS.
2. THE CONTRACTOR SHALL PROVIDE ALL MISCELLANEOUS SUPPORTING STEEL ETC. FOR THE PROPER INSTALLATION OF ALL FIRE PROTECTION SYSTEMS.
3. THE CONTRACTOR SHALL COORDINATE FLOOR, WALL AND ROOF PENETRATIONS WITH THE GENERAL TRADES CONTRACTOR.
4. PIPING SHALL NOT BE LOCATED OVER THE TOP OF ANY ELECTRICAL PANELS OR EQUIPMENT.
5. THE CONTRACTOR SHALL COORDINATE THE LOCATION OF SPRINKLER HEADS WITH THE ARCHITECTURAL REFLECTED CEILING PLANS. ALL SPRINKLER HEADS ARE TO BE LOCATED IN THE CENTER OF CEILING TILES IN LAY-IN AREAS UNLESS OTHERWISE INDICATED.
6. PROVIDE GUARDS FOR SPRINKLERS IN STORAGE OR HAZARDOUS AREAS.
7. SPRINKLER HEADS ARE SHOWN FOR COORDINATION ONLY. A REGISTERED SPRINKLER CONTRACTOR SHALL BE RESPONSIBLE FOR FINAL DESIGN AND INSTALLATION OF COMPLETE SPRINKLER SYSTEM ALL IN ACCORDANCE WITH NFPA-13R AND LOCAL FIRE PREVENTION AUTHORITY. REFER TO ARCHITECTURAL CEILING DEVICE PLAN TO LOCATE SPRINKLER HEADS.
8. FIRE PROTECTION CONTRACTOR SHALL VERIFY EXACT LOCATION OF ALL OBSTRUCTIONS INCLUDING: PIPING, STRUCTURAL STEEL, CONDUIT, DUCTWORK, EQUIPMENT AND MISCELLANEOUS ITEMS BEFORE INSTALLATION OF SPRINKLER SYSTEM TO AVOID INTERFERENCES.
9. FABRICATION, ERECTION AND TESTING OF ALL PIPING SYSTEMS SHALL BE IN ACCORDANCE WITH OWNERS' GENERAL REQUIREMENTS, NFPA-13R AND LOCAL CODE & AUTHORITIES.
10. FIRE PROTECTION CONTRACTOR SHALL MAKE ALL DRAWINGS, SUBMITTALS, TEST CERTIFICATE SUBMITTALS AND PAY ALL REQUIRED FEES TO THE OWNERS INSURING AGENT AND LOCAL AUTHORITIES FOR REQUIRED PERMITS.
11. FIRE SPRINKLER SYSTEM TO PROVIDE COVERAGE BELOW CEILINGS IN ALL AREAS PER THE STATE AND LOCAL FIRE MARSHALL.
12. CONTRACTOR TO PROVIDE SHOP DRAWINGS AND CALCULATIONS FOR BUILDING DEPARTMENT APPROVAL PRIOR TO INSTALLATION OF SPRINKLER SYSTEM. FIRE SPRINKLER SYSTEM TO MEET REQUIREMENTS OF OWNER, NFPA-13R, THE STATE AND LOCAL FIRE MARSHALL OR WHICHEVER IS MORE STRINGENT.
13. FIRE PROTECTION PLANS (SPRINKLER DRAWINGS) MUST BE ENGINEERED AND WET SEALED BY A LICENSED REGISTERED FIRE PROTECTION CONTRACTOR IN THE LOCAL JURISDICTION.
14. ALL PIPE, FITTINGS, VALVES, HANGER MATERIAL, ALARM DEVICES, AND SPRINKLER DEVICES SHALL BE INSTALLED PER NFPA-13R AND LOCAL CODE REQUIREMENTS.
15. TESTING OF THE SPRINKLER SYSTEM SHALL CONFORM WITH NFPA-13R REQUIREMENTS.
16. ALL PIPE 2" AND SMALLER SHALL BE SCHEDULE 40 WITH SCREWED CAST IRON FITTINGS.
17. ALL PIPE 2-1/2" AND LARGER SHALL BE SCHEDULE 10 WITH GROOVED FITTINGS AND GROOVED RIGID COUPLINGS.
18. ALARMS SHALL BE INSTALLED PER LOCAL CODE REQUIREMENTS.
19. FIRE CAULK ALL PENETRATIONS THROUGH FIRE RATED ASSEMBLIES.

THIS DRAWINGS IS FOR REFERENCE ONLY. FIRE PROTECTION CONTRACTOR FOR THIS PROJECT SHALL PROVIDE FULLY DETAILED SPRINKLER PLANS AND CALCULATIONS.

APPROVAL IS CONTINGENT UPON LOCAL FIRE MARSHAL AND OWNER'S INSURANCE UNDERWRITER'S APPROVAL.

SHOP DRAWING SCHEDULE

SUBMITTAL	NOTES ON SUBMISSION	RESPONSIBLE PARTY
MEP COORDINATION DRAWINGS – SHEETMETAL HVAC EQUIPMENT PLUMBING PIPING SPRINKLER PIPING CONDUIT, PANELS & J-BOXES CRITICAL STRUCTURAL....	DRAWN TO SCALE, SHOWING AT MINIMUM ELEVATIONS, ACCESS AND SERVICE CLEARANCES, STRUCTURAL AND ELECTRICAL (LIGHTING AND CONDUIT) MEMBERS FOR COORDINATION, ACCESS PANELS AND ANY POTENTIAL COORDINATION ISSUES THAT NEED TO BE ADDRESSED.	MECHANICAL CONTRACTOR ELECTRICAL CONTRACTOR PLUMBING CONTRACTOR SPRINKLER CONTRACTOR GENERAL CONTRACTOR
SPRINKLER SHOP DRAWINGS	DRAWN TO SCALE, SHOWING AT MINIMUM ELEVATIONS WITH ALL HEAD LOCATIONS AND TYPES NOTED. PROVIDE HYDRAULIC CALCULATIONS FOR REVIEW.	SPRINKLER CONTRACTOR

NOTES:
1. PREPARE SUBMITTALS AS PDF PACKAGE, INCORPORATING COMPLETE INFORMATION INTO EACH PDF FILE. NAME PDF FILE WITH SUBMITTAL NUMBER. ALL SUBMITTALS FOR A GROUP OF FIXTURES SHALL BE PROVIDED IN A SINGLE REVIEWABLE DOCUMENT, NOT MULTIPLE PACKAGES, FOR REVIEW.
2. EACH SUBMITTAL SHALL BE PROVIDED WITH A COVER IDENTIFYING THE FOLLOWING:...
   a. NAME OF THE JOB
   b. LOCATION OF THE JOB, ADDRESS, CITY AND STATE.
   c. NAME AND ADDRESS OF THE COMPANY ISSUING THE SUBMITTAL.
   d. DATE OF THE SUBMITTAL
   e. GENERAL CONTRACTOR'S REVIEW AND APPROVAL STAMP
3. SHOP DRAWINGS WILL NOT BE REVIEWED BY THE ENGINEER UNLESS THE GC'S APPROVAL IS NOTED AND COVER SHEET WITH ITEMS INDICATED ABOVE ARE COMPLETE. CATALOG CUT SHEETS THAT DO NOT IDENTIFY SPECIFIC ITEMS WILL NOT BE REVIEWED. DO NOT START WORK OR FABRICATION UNTIL SHOP DRAWINGS HAVE BEEN REVIEWED BY THE ENGINEER AND RETURNED TO THE CONTRACTOR.
4. THE CONTRACTOR IS RESPONSIBLE TO HIGHLIGHT (IN BOLD TEXT OR HIGHLIGHTED COLOR) TO THE DESIGN TEAM ANY DIFFERENCES IN PERFORMANCE, DIMENSION, WEIGHT, POWER REQUIREMENTS, ACCESS ETC. BETWEEN THE BASIS OF DESIGN OR SCHEDULED EQUIPMENT AND THE SUBMITTED EQUIPMENT.
5. SUBMITTALS WILL BE REVIEWED ONLY FOR GENERAL COMPLIANCE WITH THE CONTRACT DOCUMENTS AND NOT FOR DIMENSIONS, SERVICE, ACCESS OR QUANTITIES. THE DESIGN TEAM WILL MAKE EVERY EFFORT TO DETECT AND NOTE ERRORS, OMISSIONS, AND/OR INACCURACIES IN SUBMITTED SHOP DRAWINGS, BUT THE FAILURE TO DETECT ERRORS, OMISSIONS, AND/OR INACCURACIES SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR THE PROPER AND COMPLETE PERFORMANCE, APPLICATION AND INSTALLATION IN ACCORDANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS. THE SUBMITTAL REVIEW SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR PURCHASE OF ANY ITEM IN FULL COMPLIANCE WITH THE CONTRACT DOCUMENTS OR ITS COMPLETE AND PROPER INSTALLATION AND PERFORMANCE.
6. EACH CONTRACTOR MUST CHECK THE APPLICATION OF THEIR SUBMITTED EQUIPMENT AND CERTIFY AT TIME OF SHOP DRAWING SUBMITTAL THAT THE EQUIPMENT OR PRODUCT SPECIFIED HAS BEEN PROPERLY APPLIED AND CAN BE INSTALLED, SERVICED, AND MAINTAINED WHERE INDICATED ON THE DRAWINGS. ADVISE THE ENGINEER IN WRITING WITH SUBMITTAL DRAWINGS OF ANY POTENTIAL PROBLEMS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY FIELD CHANGES THAT MIGHT BE NECESSARY BECAUSE OF PHYSICAL CHARACTERISTICS OF EQUIPMENT THAT HAVE NOT BEEN CALLED TO THE ENGINEER'S ATTENTION AT THE TIME OF SUBMITTAL.
7. IF SUBSTITUTIONS ARE SUBMITTED, NOTIFY ALL OTHER CONTRACTORS, SUBCONTRACTORS, ETC., AFFECTED BY THE SUBSTITUTION AND FULLY COORDINATE WITH THEM. ANY ADDITIONAL COSTS RESULTING FROM SUBSTITUTION, WHETHER BY THIS CONTRACTOR OR OTHERS, SHALL BE THE RESPONSIBILITY OF AND PAID FOR BY THE SUBSTITUTING CONTRACTOR. SUBMITTED AND REVIEWED SHOP DRAWINGS DO NOT ABSOLVE THIS CONTRACTOR FROM THIS RESPONSIBILITY.

CODED NOTES: (#)

1. SLEEVE AND SEAL THROUGH FLOOR.
2. FDC WITH SIGN READING "AUTO-SPRK". VERIFY MOUNTING HEIGHT WITH FIRE DEPARTMENT.
3. 1/2" AUTO BALL DRIP
4. UL-LISTED ALARM CHECK VALVE.
5. INCOMING FIRE PROTECTION WATER SUPPLY. FIRE PROTECTION WATER SERVICE SIZE TO BE DETERMINED BY FIRE PROTECTION CONTRACTOR BY HYDRAULIC CALCULATIONS PRIOR TO START OF WORK.
6. INTERIOR AND EXTERIOR BELL/HORN STROBE.
7. FLOW SWITCH WIRED BY EC.
8. TO FIRE PROTECTION SYSTEM.
9. SYSTEM DRAIN PIPED THROUGH EXTERIOR WALL AND TURNED DOWN 45° TO SPLASH BLOCK.
10. SPARE SPRINKLER HEAD CABINET WITH SPRINKLER HEAD WRENCH, SUPPLIED PER NFPA.
11. CHECK VALVE.
12. DOUBLE CHECK DETECTOR ASSEMBLY BACKFLOW PREVENTER WITH TAMPER SWITCH ON SHUT-OFF VALVES.
13. TEST & DRAIN VALVE WITH SIGHT GLASS. SIGN INDICATING FIRE INSPECTOR'S TEST SHALL BE PROVIDED.
14. NORMALLY CLOSED VALVE ON BYPASS USED FOR FORWARD FLOW TESTING OF BACKFLOW PREVENTER.

DESIGNER NOTE: ONLY REQUIRED IF SPRINKLER SYSTEM DOES NOT HAVE MEANS TO PROVIDE SYSTEM DEMAND FLOW. STANDPIPE HOSE VALVES AND/OR FIRE PUMP TEST HEADER ACCEPTABLE MEANS TO PROVIDE FULL FLOW.

NOTE:
FLOW & TAMPER SWITCHES TO BE PROVIDED & INSTALLED BY FPC, WIRED BY EC AT EACH RISER. VERIFY REQUIREMENTS PRIOR TO START OF WORK.

NOTE:
FIRE DEPARTMENT CONNECTION LOCATION AND TYPE TO BE APPROVED BY LOCAL FIRE MARSHAL. FINISH TO BE APPROVED BY ARCHITECT.

WIRELESS SITE LIGHTING CONTROL DIAGRAM

nLIGHT AIR SYSTEM NOTES:

1. nLIGHT IS SHOWN AS THE BASIS OF DESIGN. REFER TO SPECIFICATIONS FOR ADDITIONAL INFORMATION AND OTHER ACCEPTABLE MANUFACTURERS. IF ANY OF THE OTHER ACCEPTABLE MANUFACTURERS ARE USED, NOTE THAT THEIR EXACT REQUIREMENTS, COMPONENTS AND WIRING WILL LIKELY DIFFER AND THE CONTRACTOR IS RESPONSIBLE TO PROVIDE A COMPLETE, OPERATIONAL SYSTEM EQUIVALENT TO THAT SHOWN.
2. WIRING DIAGRAMS ARE DIAGRAMMATIC AND SHOWN FOR REFERENCE ONLY. REFER TO MANUFACTURER'S WIRING DIAGRAMS FOR ALL REQUIRED COMPONENTS AND WIRING.
3. INSTALL LOW VOLTAGE WIRING IN 3/4" CONDUIT (MIN.).
4. REFER TO MANUFACTURER'S LATEST LITERATURE FOR REQUIRED WIRING SIZES. INCREASE AS REQUIRED FOR VOLTAGE DROP.
5. MOUNT POWER PACK IN DEEP JUNCTION BOX IF REQUIRED PER LOCAL AHJ. LOCATE POWER PACKS ABOVE ACCESSIBLE CEILING (NOT SHOWN ON PLANS).
6. LOW VOLTAGE WIRING IS NOT SHOWN ON PLANS AND NOT ALL LINE VOLTAGE WIRING IS SHOWN ON PLANS. PROVIDE ALL REQUIRED LINE AND LOW VOLTAGE WIRING FOR A COMPLETE, FUNCTIONAL SYSTEM.
7. INITIAL NETWORKED NLIGHT AIR DEVICES SHOULD BE LOCATED WITHIN 100 FEET OF AN NLIGHT AIR ADAPTER IN INDOOR APPLICATIONS, UNLESS A SITE SURVEY HAS BEEN DONE TO CONFIRM OTHERWISE.
8. FOR MAXIMUM RANGE, THE NLIGHT AIR ADAPTER, WHICH IS USED FOR NETWORK COMMUNICATION, SHOULD BE MOUNTED IN AN OPEN INDOOR AREA (SUCH AS A CORRIDOR) AND SHOULD NOT BE LOCATED IN AN ENCLOSED SPACE (SUCH AS AN ELECTRICAL CLOSET).
9. A MAXIMUM 1,000-FOOT, LINE-OF-SIGHT DISTANCE SHOULD BE USED FOR OUTDOOR APPLICATIONS WHERE LINE OF SIGHT IS AVAILABLE BETWEEN THE NLIGHT AIR ADAPTER AND DEVICES RECEIVING AN INITIAL BROADCAST.
10. AN NLIGHT ECLYPSE WITH CONNECTED NLIGHT AIR ADAPTER CAN SUPPORT 750 DEVICES TOTAL. STANDALONE NLIGHT AIR GROUPS CAN CONTAIN UP TO 128 NLIGHT AIR DEVICES, AND ALL DEVICES SHOULD BE LOCATED WITHIN A MAXIMUM OF 1,000 FEET CLEAR LINE-OF-SIGHT OF EACH DEVICE WITHIN THE GROUP.
11. NLIGHT AIR DEVICES MUST BE PROGRAMMED THROUGH THE CLARITY PRO MOBILE APPLICATION BEFORE THEY CAN BE CONTROLLED OR NETWORKED TO AN NLIGHT ECLYPSE WITH CORRESPONDING NLIGHT AIR ADAPTER.

ELECTRICAL SITE PLAN

1" = 20'-0"

NOTES:

1. 3500 P.S.I. MIN. 28 DAY COMPRESSIVE STRENGTH CONCRETE WITH GRADE 60 REINFORCING STEEL.
2. IF WATER IS PRESENT IN HOLE, REMOVE BEFORE POURING CONCRETE.
3. FOUNDATION EXCAVATION SHALL BE BY 24" AUGER IN UNDISTURBED OR PROPERLY COMPACTED FILL PER SPECIFICATIONS. USE TEMPORARY SLEEVE IF REQUIRED.
4. FOUNDATION SHALL HAVE A MINIMUM ALLOWABLE END BEARING OF 2000 P.S.F. (TO BE VERIFIED BY ON-SITE GEOTECH). INCREASE BASE DEPTH AS REQUIRED.
5. THIS POLE BASE DETAIL MUST BE REVIEWED AND APPROVED BY THE STRUCTURAL ENGINEER PRIOR TO INSTALLATION.

POLE BASE DETAIL- TYPE SA34

N.T.S.

BOLLARD DETAIL

N.T.S.

NOTES:

1. SPLICES SHALL BE AVOIDED WHERE POSSIBLE. WHERE REQUIRED, SPLICES SHALL BE MADE WITH WATERPROOF CONNECTORS.
2. CONCRETE ENCASEMENT TO BE 3,000 PSI MINIMUM.
3. DO NOT LOCATE BOXES IN HIGH VOLUME TRAFFIC APPLICATIONS.
4. COMPACT SOIL AROUND BOX TO MANUFACTURERS RECOMMENDATIONS.
5. THIS DETAIL IS INTENDED TO SHOW GENERAL DESIGN INTENT ONLY. THE ELECTRICAL CONTRACTOR MUST VERIFY ALL INSTALLATION REQUIREMENTS WITH THE MANUFACTURER PRIOR TO THE BIDDING AND INSTALL ALL BOXES ACCORDINGLY.

IN-GRADE PULL/JUNCTION BOX DETAIL

N.T.S.

SITE PLAN GENERAL NOTES:

1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION.
2. REFERENCE MECHANICAL, PLUMBING, FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL WORK WITH OTHER TRADES.
3. WHERE THE UTILITY TRANSFORMER, SWITCHING AND/OR METERING EQUIPMENT SHALL BE INSTALLED PAD-MOUNTED IN OR NEAR A PAVED AREA ACCESSIBLE TO VEHICULAR TRAFFIC, THE ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL CONCRETE FILLED BOLLARDS AROUND ALL SUCH ELECTRICAL EQUIPMENT. PROVIDE BOLLARDS AT ALL ACCESSIBLE CORNERS OF EQUIPMENT WITH ADDITIONAL BOLLARDS IN BETWEEN AS REQUIRED FOR A MAXIMUM SPACING OF 4'-0" O.C. VERIFY EXACT LOCATION OF BOLLARDS WITH ENGINEER PRIOR TO INSTALLATION. MAINTAIN ALL REQUIRED CLEARANCE AND ACCESS REQUIREMENTS PER POWER COMPANY, CODE AND LOCAL AUTHORITY HAVING JURISDICTION. REFER TO DETAIL ON THIS SHEET.
4. MINIMUM UNDERGROUND CONDUIT SIZE SHALL BE 1 INCH, UNLESS OTHERWISE INDICATED.
5. TELEPHONE, DATA, CABLE TV, AND ELECTRIC SERVICE DUCT BANKS SHALL BE INSTALLED PER RESPECTIVE UTILITY COMPANY'S REQUIREMENTS.
6. CAP ALL SPARE OR EMPTY CONDUIT STUBS AND MARK ENDS WITH IRON PINS.
7. PROVIDE PULL-WIRE IN ALL DUCT BANKS.
8. PROVIDE METALLIC MARKING TAPE OVER ALL DUCT BANKS.
9. TOP OF ELECTRICAL UNDERGROUND DUCT BANKS SHALL BE A MINIMUM OF 36" BELOW FINISHED GRADE. TOP OF TELEPHONE, DATA, CABLE TV (COMMUNICATIONS) UNDERGROUND DUCT BANKS SHALL BE A MINIMUM OF 24" BELOW FINISHED GRADE, UNLESS OTHERWISE REQUIRED BY RESPECTIVE UTILITY COMPANIES.
10. CONCRETE ENCASE DUCT BANKS AND/OR CONDUIT WHERE ROUTED UNDER DRIVEWAYS, ROADWAYS OR PARKING AREAS.
11. COORDINATE ROUTING AND INSTALLATION OF PROPOSED ELECTRIC PRIMARY, ELECTRIC SECONDARY, AND COMMUNICATION DUCT BANKS. WHERE DUCT BANKS CROSS PATHS MAKE NECESSARY ADJUSTMENTS TO BURIAL DEPTH AND DUCT BANK CONFIGURATION TO MAINTAIN CODE REQUIRED DEPTHS FROM TOP OF DUCT BANK TO FINISHED GRADE.
12. WHERE NEW UNDERGROUND CONDUITS ARE INDICATED CROSSING EXISTING WALKWAYS, DRIVEWAYS, OR ROADWAYS, THIS CONTRACTOR SHALL PROVIDE AN ALTERNATE PRICE TO OWNER TO BORE CONDUITS UNDER EXISTING CONDITIONS IN LIEU OF CUTTING AND PATCHING.
13. WHERE NEW WORK IS TO BE PERFORMED IN EXISTING AREAS TO REMAIN, THE CONTRACTORS SHALL RETURN THE EXISTING AREAS BACK TO ITS ORIGINAL CONDITIONS.
14. CONTRACTOR SHALL OBTAIN THE SERVICES OF A LICENSED SURVEYOR TO IDENTIFY, COORDINATE AND RECORD EXACT LOCATIONS OF UNDERGROUND UTILITIES. RECORD DRAWINGS (HARD COPIES AND ELECTRONIC CAD FILES) SHALL BE PROVIDED TO OWNER.
15. REFERENCE CIVIL UTILITY PLANS FOR SITE UTILITY DESIGN INFORMATION. COORDINATE WORK WITH OTHER TRADES.
16. ALL TRENCHING AND BACKFILLING ASSOCIATED WITH ELECTRICAL WORK SHALL BE INCLUDED IN THE ELECTRICAL CONTRACTORS BID.
17. WHERE DEVICES AND EQUIPMENT ARE SUBJECT TO WATER AND OR MOISTURE, THE DEVICE OR ASSOCIATED CIRCUIT SHALL BE GFI PROTECTED. EQUIPMENT ENCLOSURES SHALL BE NEMA 3R RATED AT A MINIMUM.
18. REFERENCE SITE ELECTRICAL NOTES, ON THIS SHEET.
19. COORDINATE FINAL LOCATION OF ALL ELECTRICAL DEVICES AND EQUIPMENT WITHIN LANDSCAPED AND HARDSCAPED AREAS WITH ARCHITECT AND LANDSCAPE/HARDSCAPE ARCHITECT DRAWINGS PRIOR TO INSTALLATION.
20. REFER TO ONE-LINE DIAGRAM ON SHEET E-602 FOR CONDUIT SIZES AND QUANTITIES ASSOCIATED WITH THE UNDERGROUND PRIMARY AND SECONDARY SERVICE LATERAL DUCT BANKS.
21. ALL CONDUIT IN UNDERGROUND DUCT BANKS SHALL BE SUPPORTED WITH BASE AND INTERMEDIATE DUCT SPACERS.

SITE LOW VOLTAGE/TECHNOLOGY SYSTEM PATHWAY REQUIREMENTS:

1. CONDUIT RUNS FOR UNDERGROUND DUCT BANKS MAY EXTEND 300 FEET (MAX) BEFORE A PULL BOX, HAND HOLE OR MANHOLE IS REQUIRED.
2. PROVIDE PULL BOX, HAND HOLE OR MANHOLE AFTER EVERY TWO (2) 90 DEGREE BENDS OR 180 DEGREES OF BENDS, INCLUDING OFFSETS.
3. BENDS TO BE LONG-SWEEP BENDS, BUT IN NO CASE SHALL A BEND BE LESS THAN 10 TIMES OUTSIDE DIAMETER OF CONDUIT.
4. ALL 90 DEGREE BENDS TO BE EITHER PVC CONCRETE ENCASED OR GALVANIZED RIGID STEEL.
5. SLOPE CONDUITS AWAY FROM BUILDING TOWARD MANHOLE OR HAND HOLE.
6. PVC DUCT SHALL STOP 5 FEET FROM CONCRETE MANHOLE AND TRANSITION TO RIGID GALVANIZED STEEL CONDUIT TO PENETRATE MANHOLE. ALTERNATIVELY, IF PVC CONDUIT PROCEEDS TO MANHOLE, CONCRETE DUCT SHALL BE PINNED WITH REBAR TO MANHOLE FACE TO PREVENT SHEARING OR SEPARATION OF DUCT FROM MANHOLE.
7. CONCRETE DUCT ENCASING CONDUIT SHALL BE PINNED TO FOUNDATION WALL TO PREVENT SHEARING.
8. WHERE SMALLER HAND HOLES ARE USED, CONCRETE AND PINNING ARE NOT REQUIRED.
9. FLEXIBLE NONMETALLIC INNERDUCT AND FITTINGS SHALL BE USED;
   A. TO SEGMENT CONDUITS
   B. AS PROTECTION TO FIBER OPTIC CABLES WHEN INSTALLED IN CABLE TRAY OR BUILDING STRUCTURE.
   C. AS PROTECTION TO FIBER OPTIC CABLES WITHIN MDF AND TRS
10. INNERDUCT SHALL EXTEND TO EQUIPMENT RACKS AT SYSTEM ENDPOINTS.
11. WHERE NOT INSTALLED IN CONTINUOUS LENGTH, SPLICE INNERDUCT SEGMENTS USING COUPLINGS DESIGNED FOR THAT PURPOSE.
12. EMPTY INNERDUCT SHALL BE EQUIPPED WITH PULL CORD AND CAPPED AT BOTH ENDS. PULL CORD TO EXTEND BEYOND CAP FOR ACCESSIBILITY. PULL CORD TO BE LABELED AT EACH END.

CODED NOTES: (#)

1. WIRE SIZE TO RUN THROUGH ENTIRE LENGTH OF CIRCUIT.

SITE ELECTRICAL NOTES

1. EXACT LOCATIONS OF PARKING LOT LIGHTING FIXTURES SHALL BE COORDINATED WITH APPROVED ARCHITECTURAL SITE PLAN AND PARKING LOT LAYOUT.
2. ALL LIGHTING FIXTURES PROJECTING TOWARD ADJACENT RESIDENTIAL AREAS MUST BE PROPERLY SHIELDED TO PREVENT LIGHT SOURCE FROM EXTENDING INTO THIS AREA.
3. THE LUMINAIRE MANUFACTURER SHALL PROVIDE COMPUTER GENERATED POINT BY POINT FOOTCANDLE CALCULATIONS ALONG WITH THEIR SHOP DRAWINGS SUBMITTAL. THE FORMAT OF THIS POINT BY POINT CALCULATION SHALL BE IN THE FORM OF AN OVERLAY OF THE ENTIRE PARKING AREA WITH CALCULATED POINTS 25 FEET ON CENTER.
4. ALL SITE LIGHTING POLES SHALL BE DESIGNED TO WITHSTAND WIND LOADS SPECIFIED BY THE APPLICABLE BUILDING CODES AND / OR LOCAL JURISDICTION.
5. ELECTRICAL CONTRACTOR SHALL INSTALL EACH LIGHTING POLE PLUMB AND TRUE. ELECTRICAL CONTRACTOR SHALL PROVIDE NECESSARY LEVELING SHIMS.
6. ELECTRICAL CONTRACTOR SHALL BACKFILL ALL ELECTRICAL TRENCHES USING CLEAN FILL MATERIAL FREE OF ORGANIC CONTAMINATIONS AND OTHER DELETERIOUS MATTER. PLACE BACKFILL MATERIAL IN 8" THICK LAYERS WITH EACH LIFT COMPACTED AT NEAR OPTIMUM MOISTURE CONTENT . COMPACT LIFTS TO ACHIEVE A MINIMUM IN PLACE DENSITY OF 95% OF THE MAXIMUM DENSITY AS DETERMINED BY ASTM D698.
7. ELECTRICAL CONTRACTOR SHALL COORDINATE LOCATION OF EASEMENTS, UNDERGROUND UTILITIES, AND DRAINAGE PRIOR TO TRENCHING OR AUGERING FOR POLE BASE (TYPICAL).

FIRST FLOOR LIGHTING PLAN

3/32" = 1'-0"

LIGHTING PLAN GENERAL NOTES:

1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION. COORDINATE LIGHT FIXTURE LOCATIONS AND MOUNTING OPTIONS WITH CEILING TYPE BEING INSTALLED.
2. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER MEP DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATION WITH ARCHITECTURAL DRAWINGS.
3. REFERENCE MECHANICAL, PLUMBING, FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL CONDUIT, WIRE, LIGHT FIXTURE AND EQUIPMENT LOCATIONS WITH MECHANICAL, PLUMBING AND FIRE PROTECTION EQUIPMENT.
4. WHERE EMERGENCY AND EXIT FIXTURES WITH AN INTEGRAL BATTERY PACK ARE USED, WIRE FIXTURES AHEAD OF ALL SWITCHING ON CIRCUIT INDICATED. EMERGENCY BATTERY BALLAST'S ASSOCIATED WITH THE LIGHT FIXTURES SHALL BE WIRED FOR SWITCHED OPERATION, UNLESS INDICATED OTHERWISE. PROVIDE AN ADDITIONAL HOT WIRE TO EMERGENCY BALLAST FOR SWITCHED OPERATION.
5. LIGHT FIXTURES DESIGNATED AS NIGHT LIGHTS (NL) SHALL BE WIRED FOR 24 HOUR OPERATION (NON-SWITCHED).
6. FURNISH AND INSTALL OCCUPANCY SENSORS PER MANUFACTURER'S RECOMMENDATIONS. COORDINATE WITH THE G.C., OWNER AND/OR OWNER'S REPRESENTATIVE TO COMMISSION AND ADJUST THE SETTINGS OF EACH SENSOR.
7. PROVIDE TEMPORARY POWER AND TEMPORARY EMERGENCY, EXIT AND GENERAL LIGHTING FOR ALL AREAS OF CONSTRUCTION AS REQUIRED. COORDINATE REQUIREMENTS WITH GENERAL CONTRACTOR.
8. REFERENCE LIGHTING CONTROL DETAILS AND NOTES, DRAWINGS E-502 THRU E-503.

CODED NOTES: (#)

1. REFERENCE ENLARGED UNIT PLANS ON E4 SERIES DRAWINGS FOR ELECTRICAL WORK WITHIN DWELLING UNIT.
2. STAIRWELL LIGHT FIXTURES TO BE CONTROLLED BY INTEGRAL OCCUPANCY SENSOR. REFER TO FIXTURE SCHEDULE ON SHEET E-502 FOR MORE INFORMATION.
3. EXTERIOR LIGHTING / EXTERIOR SIGNAGE CONTROLLED VIA PHOTOCELL AND TIME OF DAY THROUGH #LIGHT LIGHTING CONTROL SYSTEM. E.C. SHALL PROVIDE ALL COMPONENTS REQUIRED FOR INTERCONNECTION OF FIXTURE TO LIGHTING CONTROL SYSTEM. REFER TO LIGHTING CONTROL DIAGRAM "X" ON SHEET E-502.

LIGHTING FIXTURE TAG LEGEND

XX / XX — DETAIL/DIAGRAM CALL-OUT. TOP TEXT INDICATES DESIGNATION OF DETAIL OR DIAGRAM . BOTTOM TEXT INDICATES SHEET LOCATION OF DETAIL OR DIAGRAM .

SHADING OF REPRESENTATIVE GENERAL LIGHTING FIXTURE SYMBOLS BELOW INDICATE FIXTURE POWERED FROM EMERGENCY BATTERY PACK UPON LOSS OF NORMAL POWER AND/OR FIXTURE OPERATES AS A NIGHT LIGHT (NOT CONTROLLED). FIRST FLOOR POWER PLAN

3/32" = 1'-0"

POWER PLAN GENERAL NOTES:

1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION. COORDINATE FLOOR BOX AND DEVICE LOCATIONS WITH SYSTEMS FURNITURE AND EQUIPMENT BEING PROVIDED OTHERS.
2. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER MEP DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATIONS WITH ARCHITECTURAL DRAWINGS. REFERENCE ARCHITECTURAL ELEVATIONS AND TYPICAL DEVICE MOUNTING DETAILS AND NOTES.
3. REFERENCE MECHANICAL, PLUMBING, FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL CONDUIT, WIRE, LIGHT FIXTURES AND EQUIPMENT LOCATIONS WITH MECHANICAL, PLUMBING AND FIRE PROTECTION EQUIPMENT.
4. REFER TO "T" SERIES DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ROUGH-IN LOCATIONS PRIOR TO INSTALLATION.
5. PRIOR TO ROUGH-IN, COORDINATE EXACT POWER REQUIREMENTS AND LOW VOLTAGE ROUGH-IN REQUIREMENTS FOR EQUIPMENT AND SYSTEMS FURNISHED BY THE OWNER.
6. NEW CONDUIT/RACEWAY BEING INSTALLED SHALL BE CONCEALED WITHIN NEW CONSTRUCTION. WHEN THERE IS NO AVAILABLE OPTION BUT TO SURFACE MOUNT A VISIBLE CONDUIT/ RACEWAY, CONSULT ARCHITECT/ENGINEER FOR APPROVAL PRIOR TO INSTALLATION.
7. PROVIDE TEMPORARY POWER AND TEMPORARY EMERGENCY, EXIT AND GENERAL LIGHTING FOR AREAS OF CONSTRUCTION, AS REQUIRED.

CODED NOTES: (#)

1. REFERENCE ENLARGED UNIT PLANS ON E4 SERIES DRAWINGS FOR ELECTRICAL WORK WITHIN DWELLING UNIT.
2. PROPOSED LOCATION OF TECHNOLOGY CENTRAL WIRING PANEL WITHIN DWELLING UNIT.
3. TRASH COMPACTOR. PROVIDE POWER AND CONTROL WIRING PER MANUFACTURER'S INSTRUCTIONS. VERIFY RATINGS PRIOR TO ROUGH-IN. BASIS OF DESIGN: 5HP, 208V, 3Ø.
4. OVERHEAD DOOR MOTOR. PROVIDE POWER AND CONTROL WIRING PER MANUFACTURER'S INSTRUCTIONS. VERIFY RATINGS PRIOR TO ROUGH-IN. BASIS OF DESIGN: 1HP, 208V, 3Ø
5. PROVIDE 120V POWER AT JUNCTION BOX ABOVE ACCESSIBLE CEILING FOR POWER TO DOOR HARDWARE. COORDINATE REQUIREMENTS AND LOCATIONS WITH SECURITY VENDOR PRIOR TO ROUGH-IN.
6. SPACE ALLOWED FOR SOLAR PV EQUIPMENT, DESIGNED BY OTHERS. REFER TO SOLAR SOLAR PHOTOVOLTAIC VENDER DRAWINGS. PROVIDE AND INSTALL SETS OF (2) 2" CONDUITS FROM THIS LOCATION TO 3RD FLOOR PULL BOX ON SHEET E-203. VERIFY CONDUIT SIZE AND QTY PRIOR TO ROUGH-IN.

2 E-201 ENLARGED KITCHEN POWER PLAN

1/4" = 1'-0"

KITCHEN ELECTRICAL NOTES:

1. ALL COVERPLATES IN KITCHEN AREA SHALL BE WHITE.
2. ALL ELECTRICAL WORK FOR FOOD SERVICE EQUIPMENT SHALL BE COMPLETELY INTERWIRED BY ELECTRICAL CONTRACTOR. FINAL CONNECTIONS TO EQUIPMENT JUNCTION BOX OR PULL BOX, AND ALL ELECTRICAL WORK FROM PANEL BOARDS, TO BE BY THE ELECTRICAL CONTRACTOR.
3. THE ELECTRICAL CONTRACTOR SHALL PROVIDE ALL ROUGH-IN AND FINAL CONNECTION TO THE FOOD SERVICE EQUIPMENT. ALL WORK TO BE IN COMPLIANCE WITH ALL NATIONAL, STATE AND LOCAL CODES APPLICABLE.
4. VERIFY OUTLET RATING AND CONFIGURATION WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN.
5. VERIFY EXACT LOCATION AND MOUNTING HEIGHTS OF ALL OUTLETS WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN.
6. ELECTRICAL CONTRACTOR TO FURNISH AND INSTALL ALL PLUGS AND CORDS REQUIRED. ALL CORDS SHALL BE NEMA RATED AND UL APPROVED FOR MANUFACTURER AND EQUIPMENT.
7. ELECTRICAL CONTRACTOR TO FURNISH AND INSTALL ALL JUNCTION BOXES, PVC OR METAL CONDUIT, CONVENIENCE OUTLETS WITH COVERS, SWITCHES CONNECTORS, CONTROLS, AND OTHER ACCESSORIES THAT ARE NOT AN INTEGRAL PART OF THE FOOD SERVICE EQUIPMENT AS REQUIRED TO MAKE FINAL CONNECTIONS TO THE FOOD SERVICE EQUIPMENT FOR A COMPLETE AND FUNCTIONAL OPERATION MEETING ALL APPLICABLE NATIONAL, STATE, AND LOCAL CODES AND ORDINANCES.
8. ELECTRICAL CONTRACTOR TO FURNISH AND INSTALL ALL DISCONNECTS OR CIRCUIT BREAKERS AS REQUIRED BY CODES FOR EACH CONNECTION. COORDINATE LOCATION WITH THE KITCHEN EQUIPMENT CONTRACTOR.
9. ALL SINGLE-PHASE RECEPTACLES RATED 150 VOLTS TO GROUND OR LESS, 50 AMPERES OR LESS AND THREE PHASE RECEPTACLES RATED 150 VOLTS TO GROUND OR LESS, 100 AMPERES OR LESS INSTALLED IN THE KITCHEN AREA SHALL HAVE GROUND-FAULT CIRCUIT-INTERRUPTER PROTECTION FOR PERSONNEL PER N.E.C. 210-8(B). WHERE DEVICE IS READILY ACCESSIBLE, THE DEVICE SHALL BE PROVIDED WITH INTEGRAL GROUND FAULT PROTECTION. WHERE THE DEVICE IS NOT READILY ACCESSIBLE AND/OR NOT AVAILABLE WITH INTEGRAL GROUND FAULT PROTECTION, THE BRANCH CIRCUIT BREAKER SERVING THE DEVICE(S) SHALL BE GROUND FAULT TYPE.

FIRST FLOOR SYSTEMS PLAN

3/32" = 1'-0"

SYSTEMS PLAN GENERAL NOTES:

1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION. COORDINATE DEVICE LOCATIONS WITH FURNITURE AND EQUIPMENT BEING PROVIDED.
2. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER MEP DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATIONS WITH DIMENSIONS INDICATED ON ARCHITECTURAL DRAWINGS. REFERENCE ARCHITECTURAL ELEVATIONS AND TYPICAL DEVICE MOUNTING DETAILS AND NOTES.
3. REFERENCE MECHANICAL, PLUMBING AND FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL CONDUIT, WIRE, LIGHT FIXTURES, DEVICES AND EQUIPMENT LOCATIONS WITH MECHANICAL, PLUMBING AND FIRE PROTECTION EQUIPMENT.
4. PRIOR TO ROUGH-IN, COORDINATE EXACT POWER REQUIREMENTS AND LOW VOLTAGE ROUGH-IN REQUIREMENTS FOR ALL EQUIPMENT AND SYSTEMS BEING FURNISHED BY OWNER AND OTHER TRADES.
5. REFERENCE FIRE ALARM SYSTEM DETAILS, DIAGRAMS AND NOTES, SHEET E-504.
6. REFER TO MECHANICAL DRAWINGS FOR EXACT LOCATIONS OF THERMOSTATS AND SENSORS. E.C. SHALL PROVIDE CONDUIT AND ROUGH-IN AS REQUIRED BY M.C..

CODED NOTES: (E)

1. REFERENCE ENLARGED UNIT PLANS ON E4 SERIES DRAWINGS FOR ELECTRICAL WORK WITHIN DWELLING UNIT.
2. POWER SUPPLIED FROM RESPECTIVE DWELLING UNIT LOAD CENTER PANEL. CONTROL BRANCH CIRCUIT WITHIN BUILDING AND WALL CONSTRUCTION. REFERENCE MECHANICAL EQUIPMENT ELECTRICAL CONNECTION SCHEDULE.
3. EXTERIOR AND INTERIOR SPRINKLER ALARM BELL FURNISHED AND INSTALLED BY FIRE PROTECTION CONTRACTOR, WIRED BY E.C. COORDINATE EXACT LOCATION AND ELECTRICAL REQUIERMENTS PRIOR TO ROUGH-IN.
4. VERIFY EXACT QUANTITY AND LOCATION WITH FIRE PROTECTION CONTRACTOR.
5. COORDINATE TRASH CHUTE INSTALLATION REQUIREMENTS WITH G.C. REFERENCE TRASH CHUTE SHOP DRAWINGS FOR INTERCONNECTION OF TRASH CHUTE SYSTEM TO BUILDING FIRE ALARM SYSTEM AS REQUIRED. E.C. TO PROVIDE ALL WORK AS REQUIRED.
6. LOCATE ADJACENT TO HVAC EQUIPMENT'S FIRST SUPPLY DIFFUSER. COORDINATE WITH M.C. ASSOCIATED UNIT SHALL BE SHUT DOWN UPON DETECTION OF CARBON MONOXIDE WITH TROUBLE ALARM AT FACP. VERIFY REQUIREMENTS WITH AHJ.

SYMBOL	DESCRIPTION
HI	PUSH BUTTON FOR THE (HEARING IMPAIRED) DOOR ALARM ACTIVATING FLASHING LIGHT IN ROOM.
HI	HEARING IMPAIRED LOW VOLTAGE FLASHING AMBER STROBE LOCATED ABOVE DOOR SHALL FLASH WHEN ACTIVATED BY PUSH BUTTON AT HALLWAY DOOR.
HI	DOOR ALARM CONTROL SWITCH FOR TURNING ANNUNCIATOR SYSTEM ON OR OFF.

VERIFY ALL HEARING IMPAIRED ROOM LOCATIONS WITH ARCHITECTURAL DRAWINGS. PROVIDE DOOR ANNUNCIATOR SYSTEM FOR EACH UNIT.

- ACCESSIBLE UNITS (PER ARCHITECT): U-104, U-122, U-211, U-218, U-311, U-318, U-411, U-418
- HEARING IMPAIRED UNITS (PER ARCHITECT): U-XXX

HEARING IMPAIRED DOOR ANNUNCIATOR SYSTEM DETAIL NOTES:

STOBE:
THE EDWARDS #89STR ADAPTA BEACON SERIES IS A BRIGHT 150 CANDELA, LOW CURRENT, STROBE FOR INDOOR USE. THE STROBE HAS BEEN DESIGNED FOR FLUSH MOUNTING. THE LAMP IS RATED AT 1,000 HOURS. THE HOUSING IS GRAY THERMOPLASTIC. THE LENS IS CLEAR. THE STROBE MOUNTS TO A STANDARD SINGLE GANG, 2" DEEP BOX VIA SPECIAL (SUPPLIED) MOUNTING PLATE.

TRANSFORMER:
TRANSFORMER HAS GROUNDING WIRE, PRE-STRIPPED PIGTAILS, AND SCREW TERMINAL CONNECTIONS ON THE SECONDARY. PRIMARY VOLTAGE IS 120V AC, AND THE SECONDARY VOLTAGE IS 24V AC. IT CAN BE MOUNTED TO PLASTIC OR METAL BACK BOXES. CAN ALSO BE USED WITH THE EDWARDS #593 MOUNTING PLATE FOR ENCLOSED MOUNTING IN A STANDARD TWO GANG OUTLET BOX.

PUSH BUTTON AND PLATE:
THE PUSH BUTTON IS MOMENTARY CONTACT TYPE AND IS FASTENED TO A STAINLESS STEEL PLATE DESIGNED FOR MOUNTING TO A SINGLE GANG BOX. THE PLATE IS 2 3/4" WIDE AND 4 1/2" HIGH. THE TEXT ON THE PLATE ABOVE THE PUSH BUTTON READS: ROOM FOR HANDICAPPED. THE TEXT BELOW THE PUSH BUTTON READS: PLEASE DEPRESS BUTTON FOR 5 SECONDS.

DOOR ALARM CONTROL SWITCH:
A STANDARD WHITE COLORED SINGLE POLE TOGGLE SWITCH TO BE USED FOR TURNING THE HEARING IMPAIRED ANNUNCIATOR SYSTEM ON OR OFF INSIDE THE GUEST ROOM. IT SHALL BE LOCATED ADJACENT TO THE DOOR AND LOCATED WITHIN THE ROOM. THE COVER PLATE SHALL BE ETCHED WITH THE FOLLOWING TEXT: "HEARING IMPAIRED DOOR ALARM CONTROL"

HEARING IMPAIRED DOOR ANNUNCIATOR SYSTEM DETAIL

MECHANICAL CIRCUIT SCHEDULE - ENLARGED UNIT ROOMS														
MARK		VOLTS	PH	KVA	MCA	FAN (IF APPLICABLE) HP	FLA	PANEL-CIRCUIT	OCP AMPS	POLES	TYPE	DISC. BY	CONNECTION	FEEDER SIZE	COMMENTS

VTHP	A	208 V	1	6.24	30.0					2					

UNIT PLAN GENERAL NOTES:

1. WHEN POSSIBLE, GANG SWITCHES, RECEPTACLES OR COMBINATION OF BOTH UNDER ONE COVERPLATE.
2. REFERENCE ARCHITECTURAL DETAILS, SECTIONS AND PLANS FOR MOUNTING LOCATIONS AND INSTALLATION REQUIREMENTS OF DEVICES AND LIGHT FIXTURES.
3. PLANS ARE DIAGRAMMATIC, THE INSTALLATION OF RECEPTACLES SHALL COMPLY WITH THE NEC SPACING REQUIREMENTS. FOR UNITS DESIGNATED AS ADA ACCESSIBLE OR HEARING IMPAIRED, DEVICES WITHIN UNITS SHALL COMPLY WITH ADA REQUIREMENTS FOR DEVICE LOCATIONS AND MOUNTING HEIGHTS. REFERENCE ARCHITECTURAL PLANS FOR QUANTITY AND LOCATION OF ADA AND HEARING IMPAIRED UNIT.
4. COORDINATE EXACT LOCATION OF DEVICES SERVING APPLIANCES BEING FURNISHED. MOUNT DEVICE AT LOCATION AS REQUIRED BY MANUFACTURER'S INSTRUCTIONS.
5. ALL RECEPTACLES IN DWELLING UNIT SHALL BE ARC-FAULT PROTECTED, EXCEPT AS STATED BY NEC 210.12 (BATHROOMS). FURNISH AND INSTALL ARC-FAULT BREAKERS FOR ALL DWELLING UNIT RECEPTACLE AND LIGHTING CIRCUITS.
6. ALL RECEPTACLES IN DWELLING UNITS SHALL BE TAMPER RESISTANT RATED.
7. ALL TELEPHONE/DATA/CATV CABLING HOMERUNS FROM DEVICE TO DWELLING UNIT HALL CLOSET STRUCTURED MEDIA ENCLOSURE SHALL BE WITHIN 1"CONDUIT, UNLESS OTHERWISE NOTED.
8. MINIMUM WIRE SIZE SHALL BE #12 AWG. MINIMUM DEVICE RATING SHALL BE 20A.
9. FOR DWELLING UNITS IDENTIFIED ON ARCHITECTURAL PLANS AS BEING ADA ACCESSIBLE AND/OR HEARING IMPAIRED UNITS, PROVIDE FIRE ALARM AND SINGLE STATION DEVICES WITH VISUAL NOTIFICATION DEVICES AS REQUIRED BY CODE, FIRE ALARM VISUAL NOTIFICATION DEVICES IN BATHROOMS AS REQUIRED BY CODE. PROVIDE VISUAL NOTIFICATION DOORBELL/ENTRY SYSTEM, PER DETAIL ON THIS SHEET.
10. SMOKE DETECTORS AND HORN/STROBES FOR SLEEPING AREAS SHALL UTILIZE A LOW FREQUENCY SOUNDER WITH A 520HZ(+/-10%) SQUARE WAVE IN COMPLIANCE WITH NFPA 72 SECTION 18.4.5.
11. REFER TO MECHANICAL DRAWINGS FOR EXACT LOCATIONS OF THERMOSTATS AND SENSORS. E.C. SHALL PROVIDE CONDUIT AND ROUGH-IN AS REQUIRED BY M.C..

UNIT PLAN CODED NOTES: #

1. POWER BRANCH WIRING TO EQUIPMENT SUPPLIED FROM RESPECTIVE UNIT PANEL. VERIFY EQUIPMENT LOCATION, DESIGNATION AND ELECTRICAL RATINGS WITH MECHANICAL DRAWINGS AND CONTRACTOR. INSTALLATION PER MANUFACTURER'S INSTRUCTIONS.
2. FACTORY PAINT LOAD CENTER & TECHNOLOGY PANEL COVER TO BE WHITE. COORDINATE COLOR SELECTION AND SHEEN WITH ARCHITECT PRIOR TO ORDERING. E.C. TO COORDINATE DEPTH OF WALL WITH G.C. TO ACCOMMODATE RECESSED PANEL. RECESSED PANEL SHALL BE MOUNTED SO THAT TOP-MOST OVERCURRENT DEVICE IS NO MORE THAN 48" A.F.F. COMPLY WITH ALL NEC AND ADA REQUIREMENTS.
3. EACH TELEPHONE, DATA, AND CABLE TV OUTLET, LOCATED WITHIN DWELLING UNITS, SHALL BE RUN AS OPEN CABLING CONCEALED WITHIN WALLS TO THE STRUCTURED MEDIA ENCLOSURE LOCATED IN THE BEDROOM CLOSET OF EACH RESPECTIVE UNIT. STUB 1" ENT CONDUIT FROM THE STRUCTURED MEDIA ENCLOSURE IN THE BEDROOM TO THE RESPECTIVE MDF/IDF FOR COMMUNICATIONS CABLING INSTALLATION. ALL CABLING IS TO TERMINATE IN THE STRUCTURED MEDIA ENCLOSURE. REFER TO TECHNOLOGY DRAWINGS T-202, T-304.
4. FOR TYPE "A" ADA UNITS, E.C. SHALL PROVIDE ADA RANGE HOOD CONTROLS LOCATED ABOVE COUNTERTOP. REFERENCE ARCHITECTURAL ELEVATIONS AND APPLIANCE SPECIFICATIONS FOR ADDITIONAL INFORMATION. VERIFY LOCATION PRIOR TO ROUGH-IN.
5. THE BATHROOM EXHAUST FAN SHALL BE CONNECTED TO AN UNSWITCHED LIGHTING CIRCUIT. THE EXHAUST FAN IS A 2-SPEED HI-LOW FAN THAT SHALL OPERATE CONTINUOUSLY ON LOW SPEED. WHEN THE EXHAUST FAN SWITCH IS FLIPPED ON THE "ON" POSITION, THE FAN IS TO OPERATE AT ITS HIGH SPEED. WHEN THE EXHAUST FAN IS IN THE "OFF" POSITION, THE FAN WILL OPERATE AT ITS LOW SPEED. FURNISH AND INSTALL SWITCHING DEVICE TO COMPLY WITH THE ABOVE OPERATIONAL REQUIREMENTS AND EXHAUST FAN MANUFACTURER'S WIRING DIAGRAMS. COORDINATE REQUIREMENTS WITH MECHANICAL CONTRACTOR AND CONFIRM MAKE AND MODEL OF EXHAUST FAN BEING FURNISHED FOR THIS PROJECT.
6. CIRCUIT COMBINATION SMOKE / CO DETECTOR TO UNIT LIGHTING CIRCUIT. ALL SMOKE / CO DETECTORS WITHIN UNIT TO BE INTERCONNECTED PER MANUFACTURER'S INSTRUCTIONS.
7. RECEPTACLE FURNISHED AND INSTALLED BY E.C. SHALL BE SURGE PROTECTION STYLE, MOUNTED WITHIN TECHNOLOGY PANEL

"DECORA"-STYLE DEVICES AND FACEPLATES SHALL BE FURNISHED AND INSTALLED WITHIN DWELLING UNITS. COLOR/FINISH OF DEVICES AND FACEPLATES AS REQUIRED BY ARCHITECT.

REPRESENTATIVE UNIT TYPES GENERAL NOTE:
THE ENLARGED DWELLING UNIT PLANS SHOWN ON THIS DRAWING ARE REPRESENTATIVE OF THE PROJECT'S UNIT TYPES. WHERE VARIATIONS OCCUR WITHIN A SPECIFIC SPACE OR UNIT TYPE THAT ARE NOT CAPTURED BY THE REPRESENTATIVE ENLARGED DWELLING UNIT PLANS, FURNISH AND INSTALL ALL NECESSARY LABOR AND MATERIALS TO COMPLY WITH NEC DEVICE SPACING REQUIREMENTS AND ALSO MAINTAIN THE CONSISTENCY BETWEEN SIMILAR SPACE AND UNIT TYPES. SUBMIT COORDINATED INSTALLATION DRAWINGS SHOWING PROPOSED LOCATION OF DEVICES AND EQUIPMENT AS WELL AS ASSOCIATED BRANCH WIRING FOR DESIGN TEAM'S REVIEW AND COMMENT PRIOR TO PROCEEDING WITH WORK.

CIRCUITING NOTE:
NUMBERS NEXT TO ELECTRICAL DEVICES AND LIGHT FIXTURES INDICATE CIRCUIT THAT EQUIPMENT OR FIXTURE IS CONNECTED TO IN ITS UNIT'S RESPECTIVE LOAD CENTER. REFER TO UNIT ELECTRICAL PANEL SCHEDULES ON SHEET E-702 (TYPICAL FOR ALL DWELLING UNITS)

2 ELEVATOR TOP OF HOISTWAY ELECTRICAL PLAN
E-203 1/4" = 1'-0"

NOTE:
THE ELECTRICAL CONTRACTOR MUST VERIFY THE ELECTRICAL REQUIREMENTS & ROUGH-IN LOCATIONS OF THE ELEVATOR EQUIPMENT WITH THE ELEVATOR SUPPLIER PRIOR TO ROUGH-IN.

1 ELEVATOR PIT/LOBBY ELECTRICAL PLAN
E-201 1/4" = 1'-0"

NOTE:
THE ELECTRICAL CONTRACTOR MUST VERIFY THE ELECTRICAL REQUIREMENTS & ROUGH-IN LOCATIONS OF THE ELEVATOR EQUIPMENT WITH THE ELEVATOR SUPPLIER PRIOR TO ROUGH-IN.

MECHANICAL CIRCUIT SCHEDULE

MARK		VOLTS	PH	KVA	FAN (IF APPLICABLE) HP	FAN (IF APPLICABLE) FLA	PANEL-CIRCUIT	OCP AMPS	OCP POLES	OCP TYPE	DISC. BY	CONNECTION	FEEDER SIZE	COMMENTS
P	1.1	115 V	1	1.33	1/2				1					

ELEVATOR SWITCH GENERAL NOTE:
VERIFY AND COORDINATE RATINGS OF ELEVATOR AND REQUIRED INTERFACES OF SYSTEM PRIOR TO FURNISHING AND INSTALLING ELEVATOR SWITCHES. THE ABOVE INFORMATION IS FOR BIDDING PURPOSES ONLY. SWITCHES TO BE FURNISHED WITH REQUIRED RATINGS AND ACCESSORIES FOR ELEVATORS AND EQUIPMENT BEING FURNISHED.

ELEVATOR CONTROL SWITCH DIAGRAM
N.T.S.

ELEVATOR SCHEDULE

ELEVATOR DESIGNATION	ELEVATOR HP	VOLTAGE	SWITCH SPECIFICATION	FUSE SIZE	FEEDER SIZE	PANEL DESIGNATION
ELEVATOR #1	25 HP	208V /3Ø	PER DETAIL	PER DETAIL	(4) #1 & (1) #6 GND. IN 2"C.	SEE PLAN & PANEL SCHEDULES

NOTES:
- ELEVATOR DISCONNECT SWITCH CONTACTOR COIL VOLTAGE SHOULD MATCH RELAY OUTPUT OF THE FIRE ALARM PANEL. ELECTRICAL CONTRACTOR SHALL COORDINATE WITH FIRE ALARM VENDOR PRIOR TO ORDERING.
- THE ELECTRICAL CONTRACTOR MUST VERIFY THE ELECTRICAL REQUIREMENTS & ROUGH-IN LOCATIONS OF THE ELEVATOR EQUIPMENT WITH THE ELEVATOR SUPPLIER PRIOR TO ROUGH-IN.
- COORDINATE TECHNOLOGY CABLING REQUIREMENTS WITHIN ELEVATOR TRAVELER CABLE WITH GC, OWNER, AND TECHNOLOGY ENGINEER / VENDOR.
- CONTRACTORS TO FURNISH AND INSTALL TEMPORARY POWER AND LIGHTING PER ELEVATOR MANUFACTURER'S REQUIREMENTS

AREA OF RESCUE ASSISTANCE NOTES:
1. THE CONTRACTOR SHALL BE RESPONSIBLE TO FURNISH AND INSTALL A COMPLETE TWO-WAY COMMUNICATION SYSTEM BETWEEN EACH ELEVATOR LANDING (OTHER THAN THE LEVEL OF EXIT DISCHARGE AND ONE PER ELEVATOR LOBBY) AND THE CENTRAL CONTROL POINT MASTER STATION. IN ADDITION, THE CONTRACTOR MUST FURNISH AND INSTALL A COMPLETE TWO-WAY COMMUNICATION SYSTEM BETWEEN EACH AREA OF REFUGE AND THE CONTROL POINT MASTER SYSTEM. REFER TO ARCHITECTURAL PLANS FOR LOCATIONS OF AREAS OF REFUGE.
2. THE CONTRACTOR MUST COORDINATE THE LOCATION OF THE CENTRAL CONTROL POINT MASTER STATION WITH THE LOCAL FIRE DEPARTMENT PRIOR TO ROUGH-IN.
3. THE CONTRACTOR MUST SUBMIT SYSTEM SHOP DRAWINGS INCLUDING FLOOR PLANS AND WIRING DIAGRAMS SIMULTANEOUSLY WITH THE FIRE ALARM SHOP DRAWINGS.
4. THE TWO-WAY COMMUNICATION SYSTEM MUST INCLUDE BOTH AUDIBLE AND VISUAL SIGNALS.
5. THE TWO-WAY COMMUNICATION SYSTEM MUST BE CAPABLE OF TWO-WAY OFF-SITE PERSON TO PERSON VOICE COMMUNICATION VIA LANDLINE **AND** CELLULAR DEVICE OR IP. CONFIRM FINAL CONNECTION REQUIREMENTS WITH OWNER. CONTRACTOR SHALL PROVIDE ADDITIONAL COMPONENTS AS REQUIRED.
6. EACH SYSTEM DEVICE MUST BE RATED FOR THE ENVIRONMENT WHICH IT IS INSTALLED. (I.E. COMPONENTS LOCATED IN UNHEATED AREAS MUST BE RATED ACCORDINGLY.) FURNISH AND INSTALL CONDUIT SEALS WHERE RACEWAYS PASS BETWEEN CONDITIONED AND UNCONDITIONED SPACES.
7. THIS DETAIL IS BASED ON THE USE OF RATH AS THE SYSTEM MANUFACTURER. SYSTEMS MANUFACTURED BY CORNELL OR JERON ARE ALSO ACCEPTABLE PROVIDED THEY MEET OR EXCEED THE REQUIREMENTS OF THIS DETAIL AND THE PERFORMANCE & QUALITY OF THE RATH SYSTEM IDENTIFIED AS THE BASIS OF DESIGN. THE CONTRACTOR SHALL BE RESPONSIBLE TO CONFIRM ALL ROUGH-IN AND CABLING REQUIREMENTS WITH THE MANUFACTURER THEY INTEND TO USE PRIOR TO BIDDING AND INCLUDE ALL COSTS FOR A COMPLETE SYSTEM IN THEIR BASE BID.
8. THIS PLAN IS FOR REFERENCE ONLY AND IS NOT INTENDED TO SHOW EXACT QUANTITIES. VERIFY EXACT LOCATIONS AND QUANTITIES WITH PLAN DRAWINGS AND/OR ARCHITECT PRIOR TO BID.
9. THE CONTRACTOR SHALL CONFIRM AND PROVIDE ALL SIGNAGE AS REQUIRED BY AUTHORITY HAVING JURISDICTION. INCLUDE A MINIMUM OF (1) 120/277V ILLUMINATED SIGN AND ASSOCIATED POWER FROM NEAREST EXIT SIGN FOR EACH STATION IN THE BASE BID.

AREA OF RESCUE ASSISTANCE (TWO-WAY COMMUNICATION) SYSTEM DIAGRAM
N.T.S.

ELEVATOR ELECTRICAL REQUIREMENTS

GENERAL REQUIREMENTS
THE ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL ALL LABOR & MATERIALS REQUIRED FOR THE COMPLETE ELECTRICAL INSTALLATION OF THE ELEVATOR(S) ELECTRICAL EQUIPMENT PER NEC ARTICLE 620, ASME A17.1 ELEVATOR CODE, NFPA 72, & ALL APPLICABLE FEDERAL, STATE, & LOCAL CODES. ELECTRICAL DEVICE & EQUIPMENT LOCATIONS & REQUIREMENTS SHALL BE VERIFIED WITH THE ELEVATOR EQUIPMENT MANUFACTURER'S SHOP DRAWINGS PRIOR TO ROUGHING IN OR PLACING FINAL PURCHASE ORDERS FOR ANY ELECTRICAL DEVICES, EQUIPMENT, ETC.

1. PROVIDE A SEPARATE BRANCH CIRCUIT FOR CAR LIGHTS, RECEPTACLE(S), AUXILIARY LIGHTING POWER SOURCE, & VENTILATION FOR EACH ELEVATOR CAR, VIA A 30A-2P LOCKABLE DISCONNECT SWITCH WITH (1) 20A FUSE. MOUNT THE DISCONNECT SWITCH(ES) IN THE ELEVATOR MACHINE ROOM/MACHINERY SPACE PER NEC & MANUFACTURER'S REQUIREMENTS, & SHALL BE LOCATED WHERE IT IS READILY ACCESSIBLE TO QUALIFIED PERSONS, NEAR THE JAMB SIDE OF THE MACHINE ROOM/MACHINERY SPACE DOOR. PROVIDE A MINIMUM OF ONE (1) 120VAC, 20A, 1Ø GFI TYPE DUPLEX RECEPTACLE FOR THE TOP OF EACH ELEVATOR CAR, UNLESS PROVIDED WITH THE ELEVATOR.
2. PROVIDE A SEPARATE BRANCH CIRCUIT FOR THE AIR CONDITIONING & HEAT UNITS ON EACH ELEVATOR CAR AS APPLICABLE. VERIFY THE DISCONNECT & FUSE SIZES PER THE ELEVATOR SHOP DRAWINGS & MOUNT THE DISCONNECT SWITCH(ES) IN THE ELEVATOR MACHINE ROOM/MACHINERY SPACE PER NEC & MANUFACTURER'S REQUIREMENTS.
3. PROVIDE A SEPARATE BRANCH CIRCUIT FOR THE MACHINE ROOM/MACHINERY SPACE LIGHTING. PROVIDE A WALL MOUNTED TOGGLE STYLE 120VAC, 20A WALL SWITCH TO CONTROL THE LIGHTING AT THE POINT OF ENTRY TO THE MACHINE ROOM/MACHINERY SPACE.
4. PROVIDE A SEPARATE BRANCH CIRCUIT FOR THE MACHINE ROOM/MACHINERY SPACE RECEPTACLES. PROVIDE A MINIMUM OF ONE (1) 120VAC, 20A, 1Ø GFI TYPE DUPLEX RECEPTACLE IN EACH MACHINE ROOM/MACHINERY SPACE.
5. PROVIDE A SEPARATE BRANCH CIRCUIT TO SUPPLY THE HOISTWAY PIT LIGHTING. PROVIDE A WALL MOUNTED 120VAC, 20A WALL SWITCH LOCATED SO AS TO BE READILY ACCESSIBLE FROM THE PIT ACCESS DOOR ADJACENT TO THE PIT LADDER FOR HOISTWAY PIT LIGHTING. PROVIDE (2) LED WALL MOUNTED VAPORTITE FIXTURE WITH 6000 LUMENS, 3500K, MEDIUM DISTRIBUTION, 15% DR INTERNAL PRISMATIC LENS, ENCLOSED AND GASKETED HOUSING, WET LOCATION LISTED AND 0-10V DIMMING DRIVER, METALUX #4VT2-LD4-6-DR-UNV-L835-CD1-WL OR EQUAL. REQUIRED LIGHTING SHALL NOT BE CONNECTED TO THE LOAD SIDE OF THE GROUND FAULT INTERRUPTER. EXACT LOCATIONS OF LIGHT FIXTURES SHALL BE COORDINATED WITH THE ELEVATOR MANUFACTURER AS TO NOT INTERFERE WITH EQUIPMENT, ETC., CLEARANCES.
6. PROVIDE A SEPARATE BRANCH CIRCUIT TO SUPPLY THE HOISTWAY PIT RECEPTACLE. PROVIDE A MINIMUM OF ONE (1) 120VAC, 20A, 1Ø GFI TYPE DUPLEX RECEPTACLE IN THE HOISTWAY PIT.
7. PROVIDE A SEPARATE BRANCH CIRCUIT TO SUPPLY THE TOP HOISTWAY LIGHTING. PROVIDE A WALL MOUNTED 120VAC, 20A WALL SWITCH LOCATED SO AS TO BE READILY ACCESSIBLE FROM THE ACCESS DOOR ADJACENT TO THE LADDER FOR HOISTWAY LIGHTING. PROVIDE LED WALL MOUNTED VAPORTITE FIXTURE WITH 6000 LUMENS, 3500K, MEDIUM DISTRIBUTION, 15% DR INTERNAL PRISMATIC LENS, ENCLOSED AND GASKETED HOUSING, WET LOCATION LISTED AND 0-10V DIMMING DRIVER, METALUX #4VT2-LD4-6-DR-UNV-L835-CD1-WL OR EQUAL. REQUIRED LIGHTING SHALL NOT BE CONNECTED TO THE LOAD SIDE OF THE GROUND FAULT INTERRUPTER. EXACT LOCATIONS OF LIGHT FIXTURES SHALL BE COORDINATED WITH THE ELEVATOR MANUFACTURER AS TO NOT INTERFERE WITH EQUIPMENT, ETC., CLEARANCES.
8. HOISTWAY LIGHTING: WHEN FIREFIGHTERS' EMERGENCY OPERATION IS ACTIVE, THE ENTIRE HEIGHT OF THE HOISTWAY SHALL BE ILLUMINATED AT NOT LESS THAN 1 FOOT-CANDLE (11 LUX) AS MEASURED FROM THE TOP OF THE CAR OF EACH FIRE SERVICE ACCESS ELEVATOR. FOR ELEVATORS SERVING THREE STORIES OR MORE, PROVIDE INTERMEDIATE HOISTWAY LIGHTING AT EVERY OTHER FLOOR.
9. PROVIDE A SEPARATE BRANCH CIRCUIT FOR A HYDRAULIC FLUID TANK STRIP HEATER AND/OR OIL COOLER. VERIFY THE DISCONNECT & FUSE SIZES PER THE ELEVATOR SHOP DRAWINGS & MOUNT THE DISCONNECT SWITCH(ES) IN THE ELEVATOR MACHINE ROOM/MACHINERY SPACE PER NEC & MANUFACTURER'S REQUIREMENTS.
10. PROVIDE A LOCKABLE MEANS OF DISCONNECT IN THE MACHINE ROOM/ MACHINERY SPACE FOR THE MAIN POWER SUPPLY TO THE ELEVATOR CONTROLLER. THE MEANS OF DISCONNECT SHALL BE SIZED PER THE ELEVATOR MANUFACTURER'S REQUIREMENTS, & SHALL BE LOCATED WHERE IT IS READILY ACCESSIBLE TO QUALIFIED PERSONS, NEAR THE JAMB SIDE OF THE MACHINE ROOM/MACHINERY SPACE DOOR.
11. PROVIDE A DOUBLE-GANG DEEP JUNCTION BOX WITH SINGLE GANG PLASTER RING MOUNTED AT 48" AFF WITH A 3/4"C. CONDUIT WITH PULLWIRE STUBBED INTO THE NEAREST ACCESSIBLE CEILING SPACE FOR A TELEPHONE CONNECTION BY OTHERS. FIELD LOCATE THE EXACT ROUGH-IN LOCATION WITHIN THE MACHINE ROOM/MACHINERY SPACE & COORDINATE WITH OTHER EQUIPMENT LOCATIONS.
12. PROVIDE FIRE ALARM SYSTEM SMOKE DETECTORS DEDICATED FOR ELEVATOR RECALL PER NFPA 72 PART 3-8.14, PROPERLY LOCATED IN THE FOLLOWING AREAS:
    A. ELEVATOR LOBBY (EACH FLOOR)
    B. ELEVATOR MACHINE ROOM/MACHINERY SPACE
    C. EACH SMOKE DETECTOR DEDICATED FOR ELEVATOR RECALL SHALL BE CONNECTED TO THE BUILDING FIRE ALARM SYSTEM OR DEDICATED SUPERVISORY ALARM SYSTEM CONTROL PANEL. SMOKE DETECTORS SHALL NOT BE INSTALLED WITHIN 3' OF HVAC SUPPLY OR RETURN DIFFUSERS.
13. PROVIDE FIRE ADDRESSABLE RELAYS AT THE ELEVATOR CONTROLLER FOR EACH ELEVATOR.
14. PROVIDE ONE ADDRESSABLE RELAY NEAR THE TOP OF THE ELEVATOR SHAFT TO CONTROL MOTORIZED DAMPER.

CITY OF CLEVELAND FIRE DEPARTMENT ELEVATOR REQUIREMENTS (AMENDMENTS):

1. SPRINKLERS SHALL NOT BE INSTALLED IN THE ELEVATOR SHAFTS.
2. THE ELEVATOR BELTS SHALL ALL BE NFPA FIRE RATED. THE ELEVATOR INSPECTOR WILL NOT BE LOOKING FOR THE SHAFT TO BE SPRINKLED.
3. SMOKE DETECTORS ONLY SHOULD BE INSTALLED IN THE ELEVATOR SHAFT. NO SHUNT TRIP BREAKERS/SWITCHES OR HEAT DETECTORS CAN BE USED.

GENERAL NOTES:

1. MOUNTING HEIGHT SHOWN ON THIS DETAIL ARE TYPICAL UNLESS OTHERWISE NOTED ON THE PLANS.
2. SEE ARCHITECTURAL ELEVATIONS FOR SPECIAL CONDITIONS. NOTIFY ARCHITECT/ENGINEER IMMEDIATELY OF ANY CONFLICTS.
3. ALL INSTALLATIONS SHALL COMPLY WITH ADA GUIDELINES.
4. IF POSSIBLE; WHEN DEVICES ARE STACKED, ALIGN DEVICES VERTICALLY ON WALL FOR THE AESTHETICS OF FINISHING. IF CMU OR TILE WALL, ALIGN DEVICES WITH GROUT LINES.
5. SEE ELECTRICAL SYMBOL LEGEND FOR ADDITIONAL INFORMATION.
6. ALL DEVICES MAY NOT APPLY TO THIS PROJECT.

CODED NOTES: #

1. VISUAL FIRE ALARM NOTIFICATION DEVICES - LOCATE DEVICE SO THE BOTTOM OF DEVICE IS BETWEEN 80" AFF AND 96" AFF (NFPA) OR 6" BELOW FINISHED CEILING, WHICHEVER IS LOWER. (ADA)
2. AUDIBLE FIRE ALARM NOTIFICATION DEVICES - LOCATE DEVICE SO THE BOTTOM OF DEVICE IS AT 80" AFF OR NOT LESS THAN 6" BELOW FINISHED CEILING. (NFPA)
3. MANUAL ACTIVATION DEVICE (PULL STATION) - LOCATE SO THE TOP OF DEVICE IS NOT MORE THAN 48" AFF (ADA) AND NOT LESS THAN 42" AFF (NFPA)
4. POWER, DATA, TELEPHONE, COMMUNICATION DEVICES - OUTLETS SHALL BE 18" AFF TO TOP OF BOX. ABOVE COUNTER DEVICES TO BE MOUNTED 6" ABOVE TOP OF COUNTER/BACKSPLASH TO THE TOP OF BOX. VERIFY WITH ARCHITECTURAL DETAILS AND ELEVATIONS.
5. WALL MOUNTED OPERABLE DEVICES - OPERABLE DEVICES SHALL BE LOCATED NOT GREATER THAN 48" AFF TO TOP OF BOX. WALL MOUNTED OPERABLE DEVICES INCLUDE, BUT ARE NOT LIMITED TO THE FOLLOWING:
   - LIGHT SWITCH, DIMMERS, CONTROLS, ETC.
   - PUSH BUTTONS
   - OTHER CONTROL OR "CALL" DEVICES
   - CARD READER
   - ADA PUSH BUTTONS
6. FURNITURE SYSTEM DEVICE - MOUNT DEVICE 12" AFF TO TOP OF BOX. VERIFY WITH MANUFACTURER.
7. CEILING MOUNTED DEVICE - DO NOT INSTALL SENSORS WITHIN 36" OF ANY SUPPLY OR RETURN GRILLE.
8. DISCONNECTS/BREAKERS - DISCONNECTS AND CIRCUIT BREAKERS SHALL NOT BE HIGHER THAN 6 7" AFF TO CENTER OF HANDLE/BREAKER IN THE TOP MOST POSITION. THE SAME APPLIES TO COMMERCIAL PANELBOARDS/DISTRIBUTION CENTERS. FOR DWELLING OCCUPANCIES, ADA REQUIRES 48" AFF MAX.

TYPICAL DEVICE MOUNTING & PLACEMENT DETAIL

N.T.S.

WIRE SIZE GUIDELINES FOR 20A/1Ø CIRCUITS

THE FOLLOWING ARE WIRE SIZE GUIDELINES FOR 20A/1Ø, 120V CIRCUITS. THE FOLLOWING SCHEDULE ASSUMES COPPER CONDUCTORS WITH 75° RATING USED AND 20A BRANCH CIRCUITS ARE LOADED TO 80% OF THE OVER-CURRENT PROTECTIVE DEVICE RATING. THE ELECTRICAL CONTRACTOR MAY, AT HIS OPTION, CALCULATE THE WIRE SIZE REQUIRED TO MAINTAIN VOLTAGE DROP TO 3% OR LESS FOR EACH 20A/1P BRANCH CIRCUIT BASED ON THE ACTUAL/NEC LOAD CONNECTED PLUS 25% SPARE CAPACITY ON A SPECIFIC CIRCUIT OR 10 AMPS MINIMUM, WHICHEVER LOADING IS MORE STRINGENT.

120 VOLT:

A. #12 AWG FOR BRANCH CIRCUITS UP TO 55 FEET.
B. #10 AWG FOR BRANCH CIRCUITS OVER 55 FEET AND UP TO 90 FEET.
C. #8 AWG FOR BRANCH CIRCUITS OVER 90 FEET AND UP TO 145 FEET.
D. #6 AWG FOR BRANCH CIRCUITS OVER 145 FEET AND UP TO 230 FEET.
E. #4 AWG FOR BRANCH CIRCUITS OVER 230 FEET AND UP TO 375 FEET.
F. #3 AWG FOR BRANCH CIRCUITS OVER 375 FEET AND UP TO 460 FEET.
G. #2 AWG FOR BRANCH CIRCUITS OVER 460 FEET AND UP TO 580 FEET.

SHOULD A BRANCH CIRCUIT LENGTH EXCEED 500 FEET, THE BRANCH CIRCUIT WIRING SHALL BE SIZED TO LIMIT THE VOLTAGE DROP TO 3%.

ELECTRICAL SYMBOL LEGEND

SYMBOL	DESCRIPTION
$M	MANUAL MOTOR STARTER TOGGLE SWITCH WITH THERMAL OVERLOAD PROTECTION - TYPE AND RATING PER EQUIPMENT BEING SERVED. PROVIDE ENCLOSURE WITH LOCK-OUT ACCESSORY. THERMAL OVERLOADS SIZED PER EQUIPMENT NAMEPLATE RATING.
U	DISCONNECT SWITCH - TYPE AND RATING AS INDICATED ON PLANS
U	COMBINATION MAGNETIC STARTER/FUSED DISCONNECT SWITCH WITH HAND-OFF-AUTO SWITCH, (2) NO & (2) NC CONTACTS - TYPE AND RATING AS REQUIRED FOR EQUIPMENT BEING SERVED.
C	CONTACTOR - TYPE AND RATING AS INDICATED ON PLANS. REFER TO CONTACTOR SCHEDULE.
	MOTOR - TYPE AND RATING AS INDICATED ON PLANS
MOD	MOTOR OPERATED DAMPER - FURNISHED AND INSTALLED BY MECHANICAL CONTRACTOR AND WIRED BY ELECTRICAL CONTACTOR. TYPE AND RATING AS INDICATED ON PLANS. SEE MECHANICAL PLANS FOR CONTROL REQUIREMENTS. E.C. SHALL PROVIDE 120V/1P CIRCUIT.
T	THERMOSTAT - COORDINATE INSTALLATION REQUIREMENTS WITH MECHANICAL CONTRACTOR AT THE START OF PROJECT. PROVIDE ROUGH-IN OF J-BOX WITH CONDUIT STUBBED UP TO ABOVE ACCESSIBLE CEILING. LOW VOLTAGE CABLING BY MECHANICAL CONTRACTOR. IF THERMOSTAT IS LINE VOLTAGE CONTROLLED, FURNISH AND INSTALL WIRING FROM THERMOSTAT TO EQUIPMENT BEING SERVED. REFERENCE MECHANICAL PLANS, SCHEDULES AND NOTES.
FACP	FIRE ALARM CONTROL PANEL - RECESSED MOUNTED IN WALL
FAAP	FIRE ALARM ANNUNCIATOR PANEL - RECESSED MOUNTED IN WALL
NAC	FIRE ALARM NOTIFICATION APPLIANCE CIRCUIT (NAC) EXTENDER PANEL - SURFACE MOUNTED ON WALL
F	FIRE ALARM MANUAL PULL STATION MOUNTED 48" AFF TO TOP.
V	FIRE ALARM VISUAL (STROBE) NOTIFICATION APPLIANCE MOUNTED FLUSH IN FINISHED WALL AT THE LESSOR OF 80" AFF TO BOTTOM OR 6" BELOW FINISHED CEILING.
S	FIRE ALARM AUDIO (HORN) NOTIFICATION APPLIANCE MOUNTED FLUSH IN FINISHED WALL AT THE LESSOR OF 80" AFF TO BOTTOM OR 6" BELOW FINISHED CEILING.
F	FIRE ALARM AUDIO/VISUAL (HORN/STROBE) NOTIFICATION APPLIANCE MOUNTED FLUSH IN FINISHED WALL AT THE LESSOR OF 80" AFF TO BOTTOM OR 6" BELOW FINISHED CEILING.
SD	SMOKE DETECTOR - SURFACE MOUNTED ON CEILING.
SD E	SMOKE DETECTOR - SURFACE MOUNTED ON CEILING. PROGRAM FIRE ALARM SYSTEM, AS REQUIRED, TO ACTUATE FIRE ALARM RELAY MODULE LOCATED AT ELEVATOR CONTROL PANEL FOR ELEVATOR RECALL.
SD S	SINGLE STATION COMBINATION SMOKE AND CO DETECTOR WITH SOUNDER BASE. WIRE DEVICES WITHIN EACH DWELLING UNIT SUCH THAT ACTIVATION OF ONE DEVICE WILL ACTUATE ALL DEVICES WITHIN DWELLING UNIT. SMOKE DETECTOR SHALL BE WIRED FOR 120V OPERATION AND BE BATTERY BACKED-UP. WHERE LOCATED WITHIN A HANDICAP ACCESSIBLE DWELLING UNIT, DETECTOR SHALL BE FURNISHED WITH VISUAL ALARM NOTIFICATION IN ADDITION TO SPECIFIED FEATURES. DEVICE SHALL BE UL 217 LISTED AND MARKED FOR LOW FREQUENCY NOTIFICATION.
RA	DUCT-TYPE SMOKE DETECTOR WITH REMOTE TEST STATION AND AUXILIARY RELAY FURNISHED AND WIRED BY ELECTRICAL CONTRACTOR; INSTALLED IN DUCTWORK BY MECHANICAL CONTRACTOR PER CODE. COORDINATE EXACT LOCATION WITH MECHANICAL CONTRACTOR AND MANUFACTURER. PROVIDE CONDUIT AND WIRING NECESSARY TO SHUT DOWN HVAC UNIT UPON ACTIVATION OF SMOKE DETECTOR.
MD	MULTI-CRITERIA DETECTOR (SMOKE, HEAT, CARBON MONOXIDE) WITH AUXILIARY RELAY AND WHERE REQUIRED, SOUNDER BASE. DETECTOR CEILING MOUNTED AND UL 268 AND UL 2075 LISTED. FURNISHED AND INSTALLED PER CODE. COORDINATE LOCATION WITH MECHANICAL CONTRACTOR AND FIRE ALARM VENDOR. IN GENERAL, LOCATE IN ROOMS OR AREAS CONTAINING EQUIPMENT OR APPLIANCES SUPPLIED BY GASEOUS FUELS. LOCATE ADJACENT TO FIRST SUPPLY DIFFUSER OFF OF EQUIPMENTS' MAIN DUCT RUN. PROVIDE CONDUIT,WIRING, FIRE ALARM MODULES, AND SYSTEM PROGRAMMING NECESSARY TO SHUT DOWN HVAC UNITS UPON ALARM SIGNAL FROM DETECTOR.
MSTAT	TWO-WAY COMMUNICATION / AREA OF RESCUE ASSISTANCE MASTER STATION. MOUNT ADJACENT TO MAIN ENTRY OR AS REQUIRED BY LOCAL AUTHORITY HAVING JURISDICTION.
CSTAT	TWO-WAY COMMUNICATION / AREA OF RESCUE ASSISTANCE CALL STATION. MOUNT AT EACH LOBBY AND/OR AREA OF RESCUE ASSISTANCE ABOVE OR BELOW GRADE OF ADA EGRESS, OR AS REQUIRED BY LOCAL AUTHORITY HAVING JURISDICTION.
$EF	20A - 120V/277V SINGLE POLE "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE, FOR CONTROL OF ASSOCIATED EXHAUST FAN ONLY.
$x	20A - 120V/277V SINGLE POLE "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. IF APPLICABLE, LOWER CASE SUBSCRIPT "x" - KEYS SWITCH TO FIXTURES BEING CONTROLLED (TYPICAL OF ALL SWITCH SYMBOLS)
$3	20A - 120V/277V THREE WAY "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE.
$4	20A - 120V/277V FOUR WAY "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE.
$D	DESIGNER GRADE PRESET DIMMER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. SWITCH SHALL BE RATED PER LOAD BEING SERVED. INSTALL PER MANUFACTURER'S INSTRUCTIONS. ADJUST SETTINGS AND COMMISSION PER OWNER REQUIREMENTS. BASIS OF DESIGN IS LUTRON "DIVA" OR "MAESTRO" SERIES. DE-RATING SHALL BE PER MANUFACTURER'S REQUIREMENTS.
$OC	LINE VOLTAGE PASSIVE INFRARED WALL SWITCH OCCUPANCY SENSOR MOUNTED 48"AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE (OC2 = DUAL RELAY). MANUFACTURER SHALL BE WATTSTOPPER, HUBBELL, SENSOR SWITCH, COOPER CONTROLS, OR LUTRON.
OC x	LOW VOLTAGE CEILING MOUNTED OCCUPANCY SENSOR. LOCATE AS DIRECTED PER MANUFACTURER AND PROVIDE STANDARD VS. EXTENDED COVERAGE RANGE AS DIRECTED BY MANUFACTURER. REFER TO TYPICAL LOW VOLTAGE LIGHTING CONTROL DETAILS ON SHEETS E-502 & E-503 FOR MORE INFORMATION.
$x $Kx	LOW VOLTAGE SWITCH FOR LIGHTING CONTROL SYSTEM MOUNTED 48" AFF TO TOP OF BOX, NUMBER OF BUTTONS PER GANG AND NUMBER OF GANGS AS REQUIRED FOR SWITCHES (X) INDICATED. REFER TO TYPICAL LOW VOLTAGE LIGHTING CONTROL DETAILS ON SHEETS E-502 & E-503 FOR MORE INFORMATION. (x = AREA CONTROLLED, Kx = KEYSWITCH STYLE)
B	BELL ASSEMBLY. MOUNTING, TYPE, RATINGS AS INDICATED ON PLANS. MAKE CONNECTIONS PER MANUFACTURER'S INSTRUCTIONS.
	OPEN/CLOSE/STOP SWITCH ASSEMBLY MOUNTED AT 48" AFF TO TOP OF BOX. TYPE AND RATINGS PER LOAD BEING SERVED. MAKE CONNECTIONS TO EQUIPMENT PER MANUFACTURER'S INSTRUCTIONS.
	EPO (EMERGENCY POWER OFF) BUTTON MOUNTED AT 48" AFF TO TOP OF BOX. TYPE AND RATINGS PER LOAD BEING SERVED. INTERCONNECT DEVICE WIRING TO DEACTIVATE POWER TO EQUIPMENT BEING SERVED. MAKE CONNECTIONS TO EQUIPMENT PER MANUFACTURER'S INSTRUCTIONS. PROVIDE WITH HAND GUARD OR COVER.
T	LOW VOLTAGE TRANSFORMER MOUNTED IN J-BOX SIZED PER NEC. TYPE AND RATINGS PER LOAD BEING SERVED.
TC	TIME CLOCK WITH ENCLOSURE RATED FOR APPLICATION. PROVIDE 120V CIRCUIT TO POWER EQUIPMENT. INSTALL AND WIRE PER MANUFACTURER'S INSTRUCTIONS. TYPE AND RATINGS AS INDICATED ON PLANS. ADJUST SETTINGS PER OWNER'S REQUIREMENTS.
PC	PHOTOCELL MOUNTED ON ROOF OF BUILDING AND RATED FOR APPLICATION. INSTALL AND WIRE PER MANUFACTURER'S INSTRUCTIONS. TYPE AND RATINGS AS INDICATED ON PLANS. ADJUST SETTINGS PER OWNER'S REQUIREMENTS.

ELECTRICAL SYMBOL LEGEND

SYMBOL	DESCRIPTION
	SWITCHBOARD FLOOR MOUNTED ON 4" HIGH CONCRETE HOUSING KEEPING PAD. SEE SPECIFICATIONS, PANEL SCHEDULES AND ONE-LINE DIAGRAM FOR ADDITIONAL INFORMATION.
	PANELBOARD RECESSED MOUNTED 6'-6" TO TOP. SEE PANEL SPECIFICATIONS, PANEL SCHEDULES AND ONE-LINE DIAGRAM FOR ADDITIONAL INFORMATION.
	PANELBOARD SURFACE MOUNTED 6'-6" TO TOP. SEE SPECIFICATIONS, PANEL SCHEDULES AND ONE-LINE DIAGRAM FOR ADDITIONAL INFORMATION.
	CONDUIT WITH WIRING RUN CONCEALED IN OR ABOVE CEILING OR WALL, OR RUN EXPOSED IN UNFINISHED AREAS. CROSS HATCHING INDICATES NUMBER OF CONDUCTORS (#12 AWG - MINIMUM). PROVIDE A CODE-SIZED GROUND WIRE IN ALL CONDUITS IN ADDITION TO THE CONDUCTORS SHOWN.
	CONDUIT WITH WIRING RUN CONCEALED BELOW FLOOR. CROSS HATCHING INDICATES NUMBER OF CONDUCTORS (#12 AWG - MINUMUM). PROVIDE A CODE-SIZED GROUND WIRE IN ALL CONDUITS IN ADDITION TO THE CONDUCTORS SHOWN.
	20A - 125V GROUNDING TYPE SIMPLEX RECEPTACLE MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
	20A - 125V GROUNDING TYPE DUPLEX RECEPTACLE MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
	20A - 125V GROUNDING TYPE QUADRAPLEX RECEPTACLE MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
GFIWP	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE, WEATHER RESISTANT LISTED WITH DIE-CAST ALUMINUM "WHILE IN-USE COVER" AND MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
GFI	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE MOUNTED 6" ABOVE TOP OF COUNTER/BACKSPLASH TO TOP OF BOX, UNLESS NOTED OTHERWISE. COORDINATE LOCATION WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
	20A - 125V GROUNDING TYPE DUPLEX RECEPTACLE MOUNTED 6" ABOVE TOP OF COUNTER/BACKSPLASH TO TOP OF BOX, UNLESS NOTED OTHERWISE. COORDINATE LOCATION WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
USB	20A - 125V GROUNDING TYPE DUPLEX RECEPTACLE WITH (2) USB PORTS MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. VERIFY TYPE & QUANTITY OF USB PORTS WITH OWNER PRIOR TO ORDERING.
	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE FOR MICROWAVE. MOUNT RECEPTACLE RECESSED IN REAR WALL OF ABOVE CABINET AND PROVIDE EXTENSION RING AS REQUIRED. COORDINATE LOCATION WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
	30A - 250V GROUNDING TYPE SIMPLEX RECEPTACLE FOR DRYER MOUNTED 36" AFF TO TOP OF BOX, UNLESS OTHERWISE NOTED. VERIFY EXACT MOUNTING HEIGHT AND LOCATION OF DEVICE WITH DRYER MANUFACTURER'S INSTALLATION INSTRUCTIONS PRIOR TO ROUGH-IN. FURNISH AND INSTALL MATCHING CORD AND PLUG.
	50A - 250V GROUNDING TYPE SIMPLEX RECEPTACLE FOR RANGE MOUNTED 30" AFF TO TOP OF BOX, UNLESS OTHERWISE NOTED. VERIFY EXACT MOUNTING HEIGHT AND LOCATION OF DEVICE WITH RANGE MANUFACTURER'S INSTALLATION INSTRUCTIONS PRIOR TO ROUGH-IN. FURNISH AND INSTALL MATCHING CORD AND PLUG.
	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE FOR DISHWASHER MOUNTED 18" AFF TO TOP OF BOX, UNLESS OTHERWISE NOTED. VERIFY EXACT MOUNTING HEIGHT AND LOCATION OF DEVICE WITH DISHWASHER MANUFACTURER'S INSTALLATION INSTRUCTIONS PRIOR TO ROUGH-IN. FURNISH AND INSTALL MATCHING CORD AND PLUG.
$	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE FOR DISPOSAL WITH DISPOSAL SWITCH LOCATED 6" ABOVE THE TOP OF THE COUNTER/BACKSPLASH TO TOP OF DEVICE. FURNISH AND INSTALL MATCHING CORD AND PLUG. COORDINATE LOCATIONS OF DEVICES WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
	SPECIAL PURPOSE RECEPTACLE - RATING AND NEMA CONFIGURATION AS REQUIRED FOR EQUIPMENT BEING PROVIDED. MOUNT 18" AFF, UNLESS OTHERWISE NOTED.
	BACKBOX FOR TELEPHONE AND DATA DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
W	BACKBOX FOR TELEPHONE DEVICE MOUNTED 54" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
	BACKBOX FOR DATA DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
TV	BACKBOX FOR TV DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. REFERENCE AUDIO/VISUAL VENDOR DRAWINGS FOR EXACT ROUGH-IN REQUIREMENTS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
AV	BACKBOX FOR AV DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. REFERENCE AUDIO/VISUAL VENDOR DRAWINGS FOR EXACT ROUGH-IN REQUIREMENTS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
J	J-BOX - TYPE AND SIZE AS REQUIRED BY NEC
	FURNISH AND INSTALL A COMPLETE FLOOR BOX SYSTEM WHICH INCLUDES, BUT IS NOT LIMITED TO THE FOLLOWING: 2-GANG, CAST IRON, FULLY ADJUSTABLE FLOOR BOX RECESSED IN CONCRETE FLOOR SLAB WITH (2) 20A DUPLEX RECEPTACLES AND FLUSH ALUMINUM FINISHED CARPET FLANGE AND COVERS. FOR TILE FLOOR INSTALLATION, PROVIDE APPROPRIATE FLANGE SO THAT TOP COVER OF FLOOR BOX IS FLUSH WITH TILE. COORDINATE EXACT LOCATION WITH ARCHITECT PRIOR TO INSTALLATION. FLOOR BOX IS CAPABLE OF ACCEPTING MULTIPLE 1"CONDUITS. FURNISH AND INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS. WIREMOLD #880CS2-1, #828TCAL, #828R-TCAL.

GENERAL NOTES

1. FINAL CONNECTIONS TO LIGHT FIXTURES SHALL BE MADE WITH GREENFIELD FLEXIBLE CONDUIT. MAXIMUM LENGTH OF FLEXIBLE CONDUIT SHALL BE 6'-0".
2. REFER TO ARCHITECTURAL REFLECTED CEILING PLANS FOR EXACT LOCATION OF LIGHT FIXTURES. CONTRACTORS TO COORDINATE LOCATIONS OF LIGHTING, SPEAKERS, AIR DIFFUSERS, GRILLES, SPRINKLER HEADS, ETC., WITH REFLECTED CEILING LAY-OUTS AS REQUIRED & DIRECTED BY THE ARCHITECT.
3. ALL DEVICES, EQUIPMENT, FIXTURES, ETC. MUST BE GROUNDED BY USE OF A PROPERLY SIZED GROUNDING CONDUCTOR. MECHANICAL/ELECTRICAL BONDS OF THE METALLIC RACEWAY SYSTEM SHALL ALSO BE MAINTAINED.
4. REFER TO MECHANICAL, PLUMBING, AND FIRE PROTECTION PLANS FOR EXACT LOCATION OF MECHANICAL AND PLUMBING EQUIPMENT. COORDINATE LOCATION OF DISCONNECT SWITCH ASSOCIATED WITH EACH PIECE OF EQUIPMENT WITH RESPECTIVE CONTRACTOR AND INSTALL IN ACCORDANCE WITH THE NEC.
5. REFER TO DIVISION 21, 22 & 23 SPECIFICATIONS, HVAC, PLUMBING & FIRE PROTECTION PLANS FOR ADDITIONAL ELECTRICAL WORK REQUIREMENTS & COORDINATION.
6. ALL RECEPTACLES SHOWN BACK-TO-BACK IN WALLS SHALL BE SEPARATED HORIZONTALLY BY 8" MINIMUM.
7. WHERE OPEN WIRING METHODS FOR LOW VOLTAGE SYSTEMS ARE PERMITTED BY THE CONTRACT DOCUMENTS, OWNER AND LOCAL AUTHORITY, THE CABLE/CONDUCTOR INSULATION SHALL BE RATED PER NEC FOR ENVIRONMENT (I.E. PLENUM RATED, ETC.) BEING INSTALLED.
8. BRANCH CIRCUIT CONDUCTOR SIZES (& CONDUITS) SHALL BE INCREASED FROM THOSE INDICATED ON THE PLANS TO PREVENT EXCESSIVE VOLTAGE DROP. BRANCH CIRCUITS SHALL BE INSTALLED WITH WIRES OF SUFFICIENT SIZE SO THAT VOLTAGE DROP BETWEEN THE PANEL & THE LOADS DO NOT EXCEED A LIMIT OF 3%.
9. REGARDLESS OF THE TEMPERATURE RATING OF THE CONDUCTOR INSULATION, ALL CONDUCTOR AMPACITY RATINGS FOR THIS PROJECT SHALL BE DETERMINED FROM THE 75°C CONDUCTOR TEMPERATURE RATINGS INDICATED IN THE NEC TABLES. WHERE EQUIPMENT OR DEVICES ARE PROVIDED WITH TERMINALS/LUGS RATED FOR 90°C, THE AMPACITY RATING OF THE 75°C CONDUCTOR SHALL BE LIMITED TO ITS ASSOCIATED 60°C RATING AS INDICATED IN THE NEC TABLES. THE ELECTRICAL CONTRACTOR SHALL BE RESPONSIBLE TO INCREASE THE CONDUCTORS AND CONDUIT SIZE AS REQUIRED.
10. ALL 120V BRANCH CIRCUITS SHALL BE PROVIDED WITH SEPARATE NEUTRAL CONDUCTORS. SHARED NEUTRALS WILL NOT BE PERMITTED FOR MULTI-CIRCUIT INSTALLATIONS. WHERE MULTIPLE CIRCUITS ARE RUN IN A COMMON RACEWAY, THE AMPACITY OF THE CONDUCTORS SHALL BE PROPERLY DERATED & CONDUIT SHALL BE SIZED PER CODE. UNDER NO CIRCUMSTANCES SHALL MORE THAN SIX (6) CURRENT CARRYING CONDUCTORS BE RUN IN A SINGLE CONDUIT. REFERENCE NEC ARTICLE AND TABLE 310.15(B)(3)(a).
11. ALL CONDUITS SHALL CONTAIN A GROUND CONDUCTOR SIZED PER NEC TABLE #250.122. IN ADDITION, WHERE AN ISOLATED, INSULATED GROUND IS REQUIRED, A SEPARATE GROUND CONDUCTOR WITH GREEN INSULATION SHALL BE RUN FROM THE PANEL GROUND BUS TO THE ISOLATED GROUND CONNECTION OF THE DEVICE. IN NO CASE SHALL THE SYSTEM GROUND (CONDUCTOR & ASSOCIATED OUTLET BOXES, CONDUIT & BUILDING STEEL) BE ALLOWED TO CONTACT THE ISOLATED GROUND (CONDUCTOR & DEVICE). WHERE CIRCUIT CONDUCTORS ARE INCREASED IN SIZE FOR ANY REASON (I.E. VOLTAGE DROP, DERATING, ETC.), THE GROUND CONDUCTOR SIZE SHALL BE INCREASED PROPORTIONATELY (ACCORDING TO CIRCULAR MIL AREA) FROM THE SIZE REQUIRED BY NEC TABLE #250.122.
12. ELECTRICAL INSTALLATION REQUIREMENTS FOR ALL HVAC, PLUMBING, FIRE PROTECTION, SPECIAL SYSTEMS AND OWNER EQUIPMENT BEING FURNISHED BY OTHERS SHALL BE REVIEWED AND COORDINATED WITH OTHER TRADES PRIOR TO ROUGH-IN. OBTAIN EQUIPMENT SHOP DRAWINGS FROM INSTALLER/SUPPLIER/CONTRACTOR/OWNER FURNISHING EQUIPMENT, AS REQUIRED, FOR REVIEW AND COORDINATION. CONTACT ARCHITECT/ENGINEER WITH ANY DISCREPANCIES FOUND BETWEEN CONSTRUCTION DRAWINGS AND EQUIPMENT BEING FURNISHED PRIOR TO ROUGH-IN.
13. THE ELECTRICAL CONTRACTOR SHALL FURNISH ALL ACCESS PANELS, AS REQUIRED FOR SERVICING AND TESTING, FOR EQUIPMENT AND/OR DEVICES FURNISHED UNDER HIS CONTRACT. THE GENERAL CONTRACTOR SHALL INSTALL ACCESS PANELS. THE ELECTRICAL CONTRACTOR SHALL COORDINATE THE SIZE AND LOCATION OF EACH ACCESS PANEL WITH THE ARCHITECT AND GENERAL CONTRACTOR PRIOR TO ROUGH-IN.
14. ELECTRICAL CONTRACTOR SHALL INCLUDE IN HIS BID ALL CUTTING, TRENCHING AND PATCHING ASSOCIATED WITH THE ELECTRICAL INSTALLATION.
15. ALL PENETRATIONS IN OR THROUGH FIRE RATED ASSEMBLIES ASSOCIATED WITH THE ELECTRICAL INSTALLATION SHALL BE FIRE-STOPPED USING A UL APPROVED METHOD. FURNISH AND INSTALL UL LISTED FIRE RATED MATERIALS AND EQUIPMENT SUCH AS BOXES, PUDDY PADS, ENDOTHERMIC MAT, LIGHT FIXTURES WITH RATED ENCLOSURES, ETC... TO COMPLY WITH CODE FOR PROJECT CONDITIONS. FURNISH AND INSTALL SLEEVES, WHERE REQUIRED. UL APPROVED METHOD FOR FIRE STOPPING SHALL MEET OR EXCEED FIRE RATING OF STRUCTURE BEING PENETRATED. REFERENCE ARCHITECTURAL PLANS FOR FIRE RATED STRUCTURES.
16. NO CONDUIT, BOXES, WIRING, OR CABLES SHALL BE INSTALLED WITHIN 1 1/2" OF THE LOWEST POINT OF THE UNDERSIDE OF THE ROOF DECKING, NOR SHALL THEY BE INSTALLED CONCEALED WITHIN METAL-CORRUGATED ROOF DECKING. FOR EXISTING INSTALLATIONS, THE ELECTRICAL CONTRACTOR SHALL BE RESPONSIBLE TO REPLACE AND/OR REWORK EXISTING CONDUIT, BOXES, WIRING, AND CABLING THAT IS NOT IN COMPLIANCE WITH THIS REQUIREMENT.
17. ALL ELECTRICAL EQUIPMENT AND DEVICES FOR THIS PROJECT MUST BE UL LISTED. DEVICES, EQUIPMENT, SYSTEMS SHALL BE INSTALLED PER N.E.C. REQUIREMENTS AND MANUFACTURER'S INSTRUCTIONS.
18. THE DESIGN INTENT IS ALL DEVICES SHALL BE RECESSED MOUNTED, UNLESS OTHERWISE NOTED. THE DEVICE BACK-BOX AND RACEWAY BEING FURNISHED SHALL BE RATED TO COMPLY WITH NEC PER THE APPLICATION. WHERE MOUNTED WITHIN A FIRE RATED WALL OR STRUCTURE, FURNISH AND INSTALL UL APPROVED FIRE STOPPING ASSEMBLIES AND MATERIALS TO MAINTAIN RATING OF WALL OR STRUCTURE. WHEN THERE IS NO AVAILABLE OPTION BUT TO INSTALL A SURFACE MOUNTED DEVICE, CONSULT ARCHITECT/ENGINEER FOR AP

LIGHTING CONTROL SYSTEM GENERAL NOTES

1. BASIS-OF-DESIGN: ACUITY BRANDS nLIGHT CONTROLS. ALTERNATE LIGHTING CONTROLS PACKAGE MAY BE SUBMITTED PROVIDED THAT THE LIGHTING CONTROLS SUBMITTED MEET OR EXCEED THE QUALITY, PERFORMANCE, AND AESTHETICS OF THE BASIS-OF-DESIGN LIGHTING CONTROLS. LIGHTING CONTROLS MUST BE REVIEWED & APPROVED BY THE ENGINEER, ARCHITECT, & OWNER PRIOR TO ACCEPTANCE. DEVICE PLACEMENT / LAYOUT DRAWINGS MAY BE REQUIRED TO CONFIRM PERFORMANCE OF ALTERNATE LIGHTING CONTROLS. IF AN ALTERNATE LIGHTING CONTROLS PACKAGE IS USED, THEIR EXACT REQUIREMENTS, COMPONENTS, AND WIRING WILL LIKELY DIFFER AND THE CONTRACTOR IS RESPONSIBLE TO PROVIDE A COMPLETE & OPERATIONAL SYSTEM EQUIVALENT TO THAT SHOWN.
2. LIGHTING CONTROL DIAGRAMS SHOW GENERAL INTENT ONLY. E.C. SHALL PROVIDE QUANTITY & TYPES OF DEVICES AS REQUIRED TO ACCOMMODATE FUNCTIONALITY & NUMBER OF ZONES SHOWN ON PLANS. REFER TO MANUFACTURER'S WIRING DIAGRAMS FOR ALL REQUIRED COMPONENTS AND WIRING.
3. FURNISH AND INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS. OBTAIN THE SERVICES OF THE MANUFACTURER'S REPRESENTATIVE TO PROGRAM, COMMISSION, TEST SYSTEM AND TRAIN OWNER'S PERSONNEL.
4. LOW VOLTAGE WIRING IS NOT SHOWN ON PLANS AND NOT ALL LINE VOLTAGE WIRING IS SHOWN ON PLANS. PROVIDE ALL REQUIRED LINE AND LOW VOLTAGE WIRING FOR A COMPLETE, FUNCTIONAL SYSTEM.
5. EXIT LIGHTING, EMERGENCY LIGHTING UNITS, AND NIGHT LIGHTS SHALL NOT BE CONTROLLED BY THE LOW VOLTAGE LIGHTING CONTROL SYSTEM. PROVIDE UNSWITCHED HOT LEG AND WIRE AHEAD OF ALL CONTROLS.
6. AFTER HOURS, TIMECLOCK SHALL REPEATEDLY SWEEP OFF LIGHTING EVERY TWO HOURS.
7. DURATION OF TIME BETWEEN FLICK WARN AND OFF SWEEP BY TIMECLOCK SHALL BE AS DESIGNATED BY OWNER. OVERRIDE SWITCHES TO BE LOCATED IN COMMON AREA AT SECURED LOCATION.
8. LIGHTING CONTROL SYSTEM SHALL INCLUDE, BUT NOT LIMITED TO POWER PACKS, DIMMING AND NON-DIMMING RELAY MODULES, WALL STATIONS, SENSORS, TIME CONTROLLER, INTERFACES, BRIDGES, PROGRAMMING AND ALL REQUIRED COMPONENTS AND WIRING TO ACCOMMODATE DESIGN INTENT OF LIGHTING CONTROL SYSTEM.

A
E-502
LIGHTING CONTROL NETWORK BACKBONE DIAGRAM (ACUITY BRANDS nLIGHT CONTROLS)

NOTE:
DIAGRAM SHOWS GENERAL INTENT ONLY. E.C. SHALL PROVIDE QUANTITY & TYPES OF DEVICES AND NETWORK BRIDGES AS REQUIRED TO ACCOMODATE FUNCTIONALITY & NUMBER OF ZONES SHOWN ON PLANS.

LIGHTING FIXTURE SCHEDULE NOTES

1. REFER TO ARCHITECTURAL REFLECTED CEILING PLAN AND/OR ROOM FINISH SCHEDULE TO DETERMINE PROPER TYPE OF LIGHT FIXTURE REQUIRED FOR THE CEILING CONSTRUCTION PRIOR TO ORDERING THE FIXTURES & PROVIDE FIXTURES THAT ARE COMPATIBLE WITH THE CEILING SYSTEM.
2. REFER TO ARCHITECTURAL INTERIOR AND EXTERIOR ELEVATIONS FOR EXACT LOCATIONS AND MOUNTING HEIGHTS OF LIGHT FIXTURES.
3. PROJECT-SPECIFIC PHOTOMETRIC CALCULATIONS MAY BE REQUIRED FOR SOME FIXTURE TYPES AS PART OF SHOP DRAWING SUBMITTALS AS DETERMINED BY THE ENGINEER.
4. BASIS-OF-DESIGN LIGHT FIXTURE PACKAGE IS INDICATED IN LIGHTING FIXTURE SCHEDULE. UNLESS OTHERWISE NOTED, AN ALTERNATE LIGHT FIXTURE PACKAGE MAY BE SUBMITTED PROVIDED THAT THE LIGHT FIXTURES SUBMITTED MEET OR EXCEED THE QUALITY, PERFORMANCE, AND AESTHETICS OF THE BASIS-OF-DESIGN LIGHT FIXTURES AS DETERMINED BY ENGINEER AND ARCHITECT. LIGHT FIXTURES MUST BE REVIEWED AND APPROVED BY THE ENGINEER, ARCHITECT, AND OWNER PRIOR TO ACCEPTANCE. PROJECT-SPECIFIC PHOTOMETRIC CALCULATIONS PLANS MAY BE REQUIRED TO CONFIRM PERFORMANCE OF ALTERNATE LIGHT FIXTURE PACKAGE.
5. WHERE LIGHT FIXTURES ARE NOTED TO HAVE EMERGENCY BACKUP, THE EMERGENCY BACKUP SHALL PROVIDE A MINIMUM OF NINETY (90) MINUTES OF CODE REQUIRED EMERGENCY LIGHTING. EACH EMERGENCY BACKUP PROVIDED SHALL PRODUCE THE MAXIMUM LUMEN OUTPUT AVAILABLE FOR THE FIXTURE.
6. WHERE APPLICABLE, ALL EMERGENCY BACKUP CONFIGURATIONS SHALL INCLUDE AN INDEPENDENT SECONDARY DRIVER WITH AN INTEGRAL RELAY TO IMMEDIATELY DETECT AC POWER LOSS, MEETING INTERPRETATIONS OF NEC - 700.16.
7. VERIFY VOLTAGE REQUIREMENTS WITH RESPECT TO PLAN CIRCUITING, PANEL SCHEDULES, REMOTE POWER SUPPLIES, AND CONTROLS.
8. COORDINATE DIMMING DRIVER TYPE WITH LIGHTING CONTROLS PRIOR TO ORDERING. DIMMING DRIVERS SHALL BE CAPABLE OF DIMMING DOWN TO 1% UNLESS OTHERWISE NOTED.
9. ALL FIXTURE FINISHES ARE TO BE SELECTED BY ARCHITECT.
10. ALL LIGHTING FIXTURES ARE TO BE PROVIDED WITH REQUIRED HARDWARE FOR MOUNTING AND ANY AUXILIARY DRIVERS/DEVICES/ACCESSORIES FOR A FULLY FUNCTIONING LIGHT FIXTURE.
11. ALL PENETRATIONS IN OR THROUGH FIRE RATED ASSEMBLIES ASSOCIATED WITH THE ELECTRICAL INSTALLATION (INCLUDING LIGHT FIXTURES) SHALL BE FIRE-STOPPED USING A UL LISTED APPROVED METHOD (MEETING OR EXCEEDING RATING OF STRUCTURE PENETRATED AS INDICATED ON ARCHITECTURAL PLANS) TO COMPLY WITH CODE FOR PROJECT CONDITIONS.

SCOPE NOTE:
CONTRACTOR SHALL FURNISH, INSTALL, AND WIRE ADDITIONAL EXIT SIGNS TYPE "EX" AND EMERGENCY LIGHTING FIXTURE TYPES "EMH" FOR ADDITIONAL FIXTURES THAT MAY BE REQUIRED BY THE AUTHORITY HAVING JURISDICTION. TURNOVER ANY UNUSED FIXTURES TO THE OWNER. QUANTITY OF ADDITIONAL FIXTURES SHALL BE 5% OF EACH TYPE, MINIMUM OF ONE (1) OF EACH TYPE.

LIGHTING FIXTURE SCHEDULE

TYPE	APPARENT LOAD	VOLTAGE	LAMP(S) NO.	LAMP(S) LAMP	COLOR TEMP (K)	LUMENS	DIMMING	TBA CRI	MANUFACTURER	CATALOG NUMBER	DESCRIPTION
	0 VA	120 V	3

TYPICAL FIRE ALARM DEVICE WIRING DIAGRAM

N.T.S.

NOTE:
NOT ALL SYMBOLS AND NOTES MAY APPLY TO THIS PROJECT.

TYPICAL FIRE ALARM DEVICES FOR DISTRIBUTED ANTENNA SYSTEM / EMERGENCY RESPONDER RADIO COVERAGE SYSTEM MONITORING

N.T.S.

FURNISH AND INSTALL AN EMERGENCY RESPONDER RADIO COVERAGE SYSTEM FOR THIS PROJECT PER OBC 916.1 AND OFC 510.THE SYSTEM SHALL BE DESIGNED, INSTALLED, TESTED AND COMMISSIONED BY A COMPANY THAT SPECIALIZES IN SUCH SYSTEMS TO COMPLY WITH CODE REQUIREMENTS. THE QUALIFIED/CERTIFIED COMPANY SHALL PREPARE AND SUBMIT SYSTEM INSTALLATION/SHOP DRAWINGS INCLUDING REQUIRED CALCULATIONS TO THE AUTHORITY HAVING JURISDICTION FOR REVIEW AND APPROVAL OF SYSTEM PRIOR TO START OF WORK.

FIRE ALARM RISER DIAGRAM

N.T.S.

CODED NOTES:

1. FURNISH AND INSTALL A 20A, 120V CIRCUIT.
2. FURNISH AND INSTALL ANCILLARY EQUIPMENT AS REQUIRED FOR COMPLETE AND CODE COMPLIANT SYSTEM.

FIRE ALARM RISER DIAGRAM GENERAL NOTES:

1. REFERENCE FIRE ALARM SYSTEM NOTES, ON THIS SHEET.
2. PROVIDE ALL REQUIRED WIRING. INITIATING DEVICE CIRCUIT CARDS, RELAYS, PROGRAMMING, POWER EXTENDERS, POWER SUPPLIES, ANCILLARY DEVICES, ETC. PER MANUFACTURER'S DIRECTION FOR A COMPLETE FUNCTIONING SYSTEM.
3. ALL WIRING SHALL BE INSTALLED IN EMT CONDUIT, 3/4" MINIMUM, UNLESS OTHERWISE NOTED.
4. ALL FIRE ALARM A/V DEVICES SHALL BE WHITE IN COLOR, UNLESS DIRECTED OTHERWISE BY LOCAL AUTHORITY HAVING JURISDICTION. WHERE SUBJECT TO EXTERIOR ENVIRONMENT, A/V DEVICES SHALL BE RATED AND BE CONTAINED WITHIN RATED WEATHERPROOF ENCLOSURES. PROVIDE ANY AND ALL ANCILLARY DEVICES REQUIRED DUE TO ENVIRONMENTAL CONDITIONS.
5. LICENSED FIRE ALARM DESIGNER/CONTRACTOR SHALL COORDINATE AND SELECT FINAL DEVICE LOCATIONS AND QUANTITIES PER BEST DESIGN PRACTICES AND PERFORMANCE DATA OF SYSTEM EQUIPMENT BEING PROVIDED CONSTRUCTION DRAWINGS SHOW EQUIPMENT AND DEVICES FOR DESIGN INTENT ONLY.

ELECTRICAL SYMBOL LEGEND

SYMBOL	DESCRIPTION
FACP	FIRE ALARM CONTROL PANEL - RECESSED MOUNTED ON WALL
FAAP	FIRE ALARM ANNUNCIATOR PANEL - RECESSED MOUNTED IN WALL
FATP	FIRE ALARM TRANSPONDER PANEL WITH POWER SUPPLIES, NACs, FATCs - SURFACE MOUNTED ON WALL
NAC	FIRE ALARM NOTIFICATION APPLIANCE CIRCUIT (NAC) EXTENDER PANEL - SURFACE MOUNTED ON WALL
FATC	FIRE ALARM TERMINAL CABINET - SURFACE MOUNTED ON WALL

FIRE ALARM SYSTEM NOTES:

1. THE FIRE ALARM SYSTEM MUST BE INSTALLED IN ACCORDANCE WITH PLANS AND SPECIFICATIONS AND MUST MEET ALL STATE & LOCAL CODE REQUIREMENTS. THE ELECTRICAL CONTRACTOR SHALL BE RESPONSIBLE TO PROVIDE ALL CODE REQUIRED DOCUMENTS INCLUDING, BUT NOT LIMITED TO THE FOLLOWING:
   A. A FLOOR PLAN WHICH INDICATES THE USE OF ALL ROOMS.
   B. LOCATIONS OF ALARM-INITIATING AND NOTIFICATION APPLIANCES.
   C. ALARM CONTROL AND TROUBLE SIGNALING EQUIPMENT.
   D. ANNUNCIATION.
   E. POWER CONNECTION.
   F. BATTERY CALCULATIONS.
   G. CONDUCTOR TYPE AND SIZES.
   H. VOLTAGE DROP CALCULATIONS.
   I. MANUFACTURERS, MODEL NUMBERS AND LISTING INFORMATION FOR EQUIPMENT, DEVICES AND MATERIALS.
   J. DETAILS OF CEILING HEIGHT AND CONSTRUCTION.
   K. THE INTERFACE OF FIRE SAFETY CONTROL FUNCTIONS.
   - THESE DOCUMENTS MUST BE PREPARED BY A CERTIFIED FIRE ALARM DESIGNER AND MUST BE SUBMITTED TO THE LOCAL AUTHORITIES FOR REVIEW AND APPROVAL PRIOR TO START OF WORK.
2. A STAMPED SET OF APPROVED FIRE ALARM DRAWINGS SHALL BE AT THE JOB SITE AND SHALL BE USED FOR INSTALLATION.
3. UPDATE AN AS-BUILT DRAWING SET DAILY WITH JOB PROGRESS. PROVIDE AN AS-BUILT DRAWING SET TO OWNER NO LATER THAN 7 DAYS AFTER FINAL TEST.
4. EQUIPMENT: WHERE THE PROJECT REQUIRES NON-ALARM AUDIO SYSTEMS (MUSIC, PAGING OR THE LIKE) TO BE INTERCONNECTED TO THE FIRE ALARM SYSTEM, FURNISH AND INSTALL ALL REQUIRED STANDARD AND OPTIONAL FIRE ALARM SYSTEM EQUIPMENT AND PROGRAMMING TO SUPPORT AND FUNCTION WITH SUCH SYSTEMS. PROVIDE THE REQUIRED CONSTANT SUPERVISION MODULES, INTERFACES AND SYSTEM WIRING AND INTERCONNECTIONS AS REQUIRED. COORDINATE INTEGRATION OF SUCH SYSTEMS WITH RESPECTIVE SYSTEM INSTALLERS AND VENDORS PRIOR TO START OF WORK.
5. EQUIPMENT: ZONING OF THE AUDIO NOTIFICATION APPLIANCES SHALL COMPLY WITH CODE AND LOCAL AUTHORITY REQUIREMENTS. CONFIRM ZONING OF SYSTEM WITH OWNER'S PROJECT REQUIREMENTS FOR NON-ALARM AUDIO SYSTEMS, IF APPLICABLE, AND WITH AUTHORITY HAVING JURISDICTION PRIOR TO DRAWING SUBMISSION TO LOCAL AUTHORITY AND START OF WORK.
6. EQUIPMENT: WHERE THE PROJECT INCLUDES BUT IS NOT LIMITED TO THE FOLLOWING: HOIST-WAY PRESSURIZATION, STAIRWELL PRESSURIZATION, CONTROL AND MONITORING OF HVAC DAMPERS, MONITORING OF GENERATOR, MONITORING OF FIRE PUMP, CONTROL OF HVAC DAMPERS, CONTROL OF ACCESS CONTROL AND SECURITY SYSTEMS, AND SMOKE CONTROL SYSTEMS TO BE INTEGRATED INTO THE FIRE ALARM SYSTEM, FURNISH AND INSTALL ALL REQUIRED STANDARD AND OPTIONAL FIRE ALARM SYSTEM EQUIPMENT AND PROGRAMMING TO SUPPORT AND FUNCTION WITH SUCH SYSTEMS.
7. EQUIPMENT: WHERE THE PROJECT INCLUDES BUT IS NOT LIMITED TO THE FOLLOWING: CONTROL AND MONITORING OF DISTRIBUTED ANTENNA SYSTEM / EMERGENCY RESPONDER RADIO COVERAGE SYSTEM, CONTROL AND MONITORING OF FIRE FIGHTERS WIRED 2-WAY COMMUNICATIONS TO BE INTEGRATED INTO THE FIRE ALARM SYSTEM, FURNISH AND INSTALL ALL REQUIRED STANDARD AND OPTIONAL FIRE ALARM SYSTEM EQUIPMENT AND PROGRAMMING TO SUPPORT AND FUNCTION WITH SUCH SYSTEMS.
8. EQUIPMENT: ALL DEVICES, COMBINATIONS OF DEVICES, APPLIANCES AND EQUIPMENT SHALL BE LISTED FOR THE PURPOSE FOR WHICH THEY ARE USED AND SHALL BE INSTALLED IN COMPLIANCE WITH APPLICABLE CODES, STANDARDS AND MANUFACTURER'S INSTRUCTIONS.
9. SYSTEM DEVICES, BACK-BOXES, AND ENCLOSURES MUST BE RATED FOR THE ENVIRONMENT WHICH IT IS INSTALLED. FURNISH AND INSTALL CONDUIT SEALS WHERE RACEWAYS PASS BETWEEN CONDITIONED AND UNCONDITIONED SPACES.
10. NOTIFICATION DEVICE COVERS SHALL BE WHITE WITH RED LETTERING, UNLESS OTHERWISE REQUIRED.
11. ALL WIRING SHALL BE IN CONDUIT, UNLESS DIRECTED OTHERWISE. DO NOT RUN ANY OTHER WIRING IN THE SAME CONDUIT WITH ALARM WIRING. DO NOT RUN 120VAC WIRING WITH ALARM WIRING. ALL WIRE TO BE SHIELDED CABLE. ALL J-BOXES ASSOCIATED WITH THE FIRE ALARM SYSTEM SHALL BE SPRAY PAINTED "FIRE ENGINE" RED.
12. OPEN WIRING METHODS ARE ACCEPTABLE FOR FIRE ALARM SYSTEM WIRING WHERE PERMITTED BY CODE, AHJ, OWNER, AND PROJECT. OPEN WIRING METHODS MAY BE USED WHERE WIRING IS ACCESSIBLE, NOT SUBJECT TO PHYSICAL DAMAGE OR VISIBLE TO SIGHT. THE CONDUCTOR INSULATION FOR OPEN WIRING SHALL BE RATED PER APPLICATION & ENVIRONMENT BEING INSTALLED. PROVIDE BACK-BOXES AND CONDUIT STUB-UPS TO NEAR UNDERSIDE OF STRUCTURE, ABOVE ACCESSIBLE CEILINGS, FOR ALL WALL MOUNTED DEVICES. FIRE ALARM WIRING SHALL BE INSTALLED IN CONDUIT WHERE ROUTED UNDERGROUND, THROUGH FLOOR SLABS, AND FROM FINISHED FLOOR TO A HEIGHT OF 10'-0" ABOVE FINISHED FLOOR.
13. FIRE ALARM SYSTEM WIRING SHALL BE INSTALLED IN CONDUIT WHERE OPEN WIRING IS NOT ACCESSIBLE, OR IS SUBJECT TO PHYSICAL DAMAGE, OR IS VISIBLE TO SIGHT. IF LOCATED IN FINISHED AREAS, CONDUIT SHALL BE PAINTED TO MATCH FINISHED AREA. DO NOT RUN ANY OTHER WIRING IN THE SAME CONDUIT WITH FIRE ALARM WIRING. DO NOT RUN 120VAC WIRING WITH FIRE ALARM WIRING. ALL WIRE TO BE SHIELDED CABLE. ALL J-BOXES ASSOCIATED WITH THE FIRE ALARM SYSTEM SHALL BE SPRAY PAINTED "FIRE ENGINE" RED.
14. ALL WIRE & CABLE MUST BE RATED PER THE LATEST REVISION OF THE NATIONAL ELECTRIC CODE SECTION 760.
15. CONFIRM ALL WIRING REQUIREMENTS WITH THE MANUFACTURER OF THE PROPOSED FIRE ALARM EQUIPMENT BEING FURNISHED PRIOR TO BID AND PROVIDE IN ACCORDANCE THEREWITH. WIRING SHOWN ON THIS DIAGRAM REPRESENTS THE MINIMUM SIZE REQUIRED. WIRE SIZES SHALL BE INCREASED AS REQUIRED FOR VOLTAGE DROP.
16. FIRE ALARM CIRCUITS SHALL BE IDENTIFIED IN ACCORDANCE WITH APPROPRIATE SECTION OF NEC 760. MARK ALL FIRE ALARM WIRES IN ACCORDANCE WITH NEC 760 SECTIONS FOR POWER LIMITED AND NON-POWER LIMITED WIRE.
17. WIRING SHALL BE CONTINUOUS FROM ONE DEVICE TO THE NEXT. SPLICING IS PROHIBITED.
18. THE TYPICAL WIRING DIAGRAM IS NOT INTENDED TO SHOW QUANTITIES OF DEVICES. REFER TO PLANS FOR QUANTITIES.
19. WHERE PROPOSED ROUTING OF SYSTEM CONDUIT AND WIRING IS INDICATED ON PLANS, DETAILS AND DIAGRAMS, SAID ROUTING IS DIAGRAMMATIC. EXACT ROUTING OF CONDUITS AND WIRING TO BE DETERMINED IN THE FIELD BY THE INSTALLING CONTRACTOR TO SUIT CONDITIONS. INSTALLATION SHALL COMPLY WITH CODE AND PROJECT REQUIREMENTS. ALL MODIFICATIONS SHALL BE CLEARLY INDICATED ON THE RECORD DRAWINGS.
20. PROTECTION OF SYSTEM WIRING AND CABLING: VERTICAL RISER WIRING AND CABLING SHALL BE PROTECTED BY CONSTRUCTION HAVING A MINIMUM 2-HOUR FIRE-RESISTANCE RATING OR SHALL BE UL LISTED CABLING HAVING A MINIMUM 2-HOUR FIRE-RESISTANCE RATING..

FIRE ALARM SYSTEM NOTES CONTINUED:

21. ALL CONDUCTORS INCLUDING SHIELDS MUST TEST FREE OF OPENS, SHORTS & GROUNDS BEFORE MAKING CONNECTIONS TO THE FIRE ALARM CONTROL PANEL.
22. EACH FIRE ALARM PANEL AND ANCILLARY EQUIPMENT REQUIRES A DEDICATED 120VAC CIRCUIT. RUN 3-#12 (INCLUDES THE GREEN GROUND WIRE) FROM A 20 AMP CIRCUIT BREAKER. PROVIDE A LOCK-ON CLIP & RED MARKING ON THE BREAKER AND IDENTIFY AS "FIRE ALARM CIRCUIT CONTROL." THE LOCATION OF THE CIRCUIT DISCONNECTING MEANS (CIRCUIT BREAKER) SHALL BE PERMANENTLY IDENTIFIED AT THE FIRE ALARM CONTROL PANEL AND ANCILLARY EQUIPMENT.
23. DO NOT APPLY POWER TO SYSTEM EXCEPT IN THE PRESENCE OF A FACTORY TRAINED TECHNICAL REPRESENTATIVE.
24. INSTALLATION OF SYSTEM DEVICES SHALL BE IN ACCORDANCE WITH MANUFACTURER'S INSTRUCTIONS. POWER LIMITED AND NON-POWER LIMITED FIELD WIRING MUST BE INSTALLED WITHIN EQUIPMENT ENCLOSURES IN ACCORDANCE WITH MANUFACTURER'S INSTRUCTIONS AND NEC
25. SMOKE DETECTOR SOUNDER BASES AND HORN/STROBES FOR SLEEPING AREAS SHALL UTILIZE A LOW FREQUENCY SOUNDER WITH A 520HZ(+/-10%) SQUARE WAVE IN COMPLIANCE WITH NFPA 72 SECTION 18.4.5.
26. IN GROUP R-2 OCCUPANCIES REQUIRED TO HAVE A FIRE ALARM SYSTEM, ALL DWELLING UNITS AND SLEEPING UNITS SHALL BE PROVIDED WITH THE CAPABILITY TO SUPPORT VISIBLE ALARM NOTIFICATION APPLIANCES, IN ACCORDANCE WITH APPLICABLE CODE. SUCH CAPABILITY SHALL BE PERMITTED TO INCLUDE THE POTENTIAL FOR FUTURE INTERCONNECTION OF THE BUILDING FIRE ALARM SYSTEM WITH THE UNIT SMOKE ALARMS, REPLACEMENT OF AUDIBLE APPLIANCES WITH COMBINATION AUDIBLE/VISIBLE APPLIANCES, OR FUTURE EXTENSION OF THE EXISTING WIRING FROM THE UNIT SMOKE ALARM LOCATIONS TO REQUIRED LOCATIONS FOR VISIBLE APPLIANCES.
27. STROBES SHALL BE WIRED SEPARATELY FOR SYNCHRONOUS OPERATION. PROVIDE SYNCHRONIZATION MODULES AS REQUIRED TO COMPLY WITH CODE.
28. SMOKE DETECTOR HEADS MUST BE INSTALLED FREE OF DUST OR ANY OTHER CONTAMINATION. SMOKE DETECTORS SHALL NOT BE MOUNTED WITHIN 3'-0" OF A SUPPLY OR RETURN AIR GRILLE. COORDINATE SMOKE DETECTOR LOCATIONS WITH MECHANICAL CONTRACTOR PRIOR TO INSTALLATION.
29. IN ALL ROOMS REQUIRING SMOKE DETECTION, IF THERE IS NOT A SMOOTH, FLAT CEILING, THEN DETECTION SHALL BE SPACED PER NFPA 72. IF THERE ARE BEAM DEPTHS LESS THAN 10% OF THE CEILING HEIGHT (0.1 X H), SMOOTH CEILING SPACES SHALL BE PERMITTED. IF THERE ARE BEAM DEPTHS EQUAL OR GREATER THAN 10% OF THE CEILING HEIGHT (0.1 X H), AND THE BEAM SPACING IS EQUAL TO OR GREATER THAN 40% OF THE CEILING HEIGHT (0.4 X H), SPOT SMOKE DETECTORS SHALL BE LOCATED ON THE CEILING IN EACH BEAM POCKET PER NFPA 72 2007, 5.7.3.2.4.
30. DUCT DETECTORS SHALL HAVE REMOTE TEST STATIONS INSTALLED IN AN ACCESSIBLE LOCATION AND BE CLEARLY LABELED TO INDICATE THEIR FUNCTION AND THE MECHANICAL UNIT ASSOCIATED WITH EACH DETECTOR. DUCT DETECTOR TEST STATIONS SHALL BE LOCATED AS CLOSE TO THE APPLIANCES AS POSSIBLE FOR EASE IN LOCATING AND UNLESS ASSOCIATED WITH ROOF TOP MECHANICAL UNITS
    A. IF THERE IS A DROP CEILING, THE REMOTE TEST STATIONS SHALL BE MOUNTED IN CEILING TILES BELOW THE DUCT DETECTORS.
    B. IF THERE IS A HARD CEILING, THE REMOTE TEST STATIONS SHALL BE LOCATED IN THE CEILING NEXT TO A MINIMUM OF A 2'x4' OR 3'x3' ACCESS PANEL LOCATED BELOW THE DUCT DETECTOR.
    C. IF THERE IS NO CEILING, THE REMOTE TEST STATIONS SHALL BE MOUNTED ON A PILLAR OR WALL AS CLOSE TO THE DEVICE AS POSSIBLE.
31. THE LOCATION OF ALL DETECTORS IN AIR DUCT SYSTEMS SHALL BE PERMANENTLY AND CLEARLY IDENTIFIED AND RECORDED.
32. ALL DETECTORS NOT ACCESSIBLE STANDING AT FINISHED FLOOR SHALL BE PROVIDED WITH A REMOTE TEST SWITCH WITH INDICATOR LIGHT. LOCATIONS OF ALL FIRE ALARM REMOTE TEST STATIONS SHALL BE LABELED PER LOCAL LOCAL AUTHORITY REQUIREMENTS. TEST STATION LOCATIONS SHALL BE FIELD VERIFIED WITH LOCAL AUTHORITY PRIOR TO ROUGH-IN.
33. DUCT DETECTORS SHALL BE INSTALLED AND POSITIONED TO ALLOW EASY ACCESS FOR PERIODIC INSPECTION AND TESTING.
34. FURNISH AND INSTALL A KNOX BOX AS REQUIRED BY LOCAL FIRE DEPARTMENT. EXACT QUANTITIES AND LOCATIONS AS DETERMINED BY LOCAL AUTHORITY. KNOX BOX MANUFACTURER SHALL BE AS REQUIRED BY LOCAL AUTHORITY. PROVIDE AN ADDRESSABLE MONITOR MODULE WHEN REQUIRED.
35. THE FIRE ALARM SUPPLIER SHALL PROVIDE A COPY OF THE PROGRAMMING CODES AND OPERATION MANUALS IN A SLEEVED BINDER ATTACHED TO THE FIRE ALARM CONTROL PANEL.
36. PROVIDE CONNECTION TO REMOTE SUPERVISION AS DIRECTED FOR SUPERVISION OF SYSTEM IN COMPLIANCE WITH LOCAL AUTHORITY & OWNER. PROVIDE ALL INTERFACE REQUIRED TO INITIATE REMOTE SUPERVISION.
37. PROVIDE & INSTALL A CEILING MOUNTED SMOKE DETECTOR IN FRONT OF FIRE ALARM CONTROL PANEL AND EACH REMOTE MOUNTED AUXILIARY PANEL IN ADDITION TO THE DEVICES SHOWN ON THE FLOOR PLANS.
38. PROVIDE & INSTALL MANUAL STATIONS WHERE REQUIRED BY LOCAL AUTHORITIES TO MEET THE REQUIREMENTS OF NFPA-72 SECTION 3-8.1.2 IN ADDITION TO THE DEVICES SHOWN ON THE PLANS. VERIFY WITH LOCAL AUTHORITY PRIOR TO BIDDING & INDICATE COST IN BID PRICE.
39. INCLUDE ON-SITE SERVICES OF A CERTIFIED TECHNICIAN TO PROVIDE TECHNICAL INSTALLATION SUPPORT FOR EQUIPMENT START UP, PROGRAM EDITING, TROUBLESHOOTING OF THE SYSTEM, AND ASSISTANCE TO THE INSTALLER FOR ONE COMPLETE FINAL SYSTEM CHECKOUT.
40. THE COMPLETED FIRE ALARM SYSTEM SHALL BE FULLY TESTED IN ACCORDANCE WITH NFPA-72, AND LOCAL AND STATE CODE REQUIREMENTS, BY THE INSTALLER, IN THE PRESENCE OF THE G.C., OWNER'S REPRESENTATIVE AND AUTHORITY HAVING JURISDICTION. UPON COMPLETION OF A SUCCESSFUL TEST, THE INSTALLER SHALL SO CERTIFY, IN WRITING, TO THE OWNER AND GENERAL CONTRACTOR.

TYPICAL DATA/TELEPHONE/TV/OUTLET DETAIL

N.T.S.

COMMUNICATIONS AND TV ROUGH-IN ONE-LINE DIAGRAM

N.T.S.

REFER TO TECHNOLOGY DRAWINGS FOR ADDITIONAL INFORMATION.

CODED NOTES: (#)

1. FIRE RETARDANT PLYWOOD BACKBOARD FROM FINISHED FLOOR TO 8'-0" AFF BY E.C. REFERENCE PLANS FOR LOCATIONS.
2. (2) 2" CONDUIT SLEEVES FOR COMMUNICATION AND TV CABLING. SLEEVE LENGTH TO BE FROM BACKBOARD AND STUBBED UP TO ABOVE ACCESSIBLE CEILING. PROVIDE PLASTIC BUSHINGS ON ENDS OF SLEEVES.
3. (4) 2" CONDUIT SLEEVES FROM UTILITY ROOM TO CORRIDOR. PROVIDE PLASTIC BUSHINGS ON ENDS OF SLEEVES. FIRESTOP PENETRATION THRU PARTITION WALL.
4. PROVIDE A 120V DUPLEX RECEPTACLE AT 18" AFF IN UNIT HALL CLOSET.
5. (1) 1"C. FROM UNIT HALL CLOSET TO ABOVE ACCESSIBLE COMMON PUBLIC CORRIDOR CEILING.
6. QUANTITY & LOCATIONS SHALL BE VERIFIED WITH OWNER PRIOR TO INSTALLATION. PROVIDE PATHWAYS FROM DEVICES TO UNIT HALL CLOSET. COORDINATE WITH TECHNOLOGY CONTRACTOR.

GENERAL NOTES - TECHNOLOGY SYSTEMS ROUGH-IN:

1. PROVIDE SLEEVES, J-HOOKS, PATHWAYS, BASKET TRAY FOR LOW VOLTAGE CABLING AND SYSTEMS FROM DEVICE TO SOURCE, UNLESS NOTED OR DIRECTED OTHERWISE. COORDINATE ROUTING AND PATHWAY SYSTEM WITH OWNER / OWNER'S VENDOR / TECHNOLOGY INSTALLER AND OTHER TRADES PRIOR TO ROUGH-IN. QUALIFY EXTENT OF PATHWAY SYSTEM BEING PROVIDED IN BID PROPOSAL.
2. WHERE CEILINGS DO NOT EXIST TO STUB CONDUITS ABOVE, CONDUITS SHALL BE STUBBED UP TO ABOVE STRUCTURE. IN FINISHED AREAS, PROVIDE COMPLETE CONDUIT PATHWAYS, INCLUDING PULL-BOXES, UNLESS OTHERWISE DIRECTED. CONDUIT, J-BOXES AND THE LIKE SHALL BE PAINTED TO MATCH AREA FINISHES.
3. WHERE HARD INACCESSIBLE CEILINGS EXIST, PROVIDE COMPLETE CONTINUOUS CONDUIT PATHWAYS, INCLUDING PULL-BOXES, ACCESS PANELS, UNLESS OTHERWISE DIRECTED. PROVIDE CONDUIT SLEEVES TRAVERSING OVER INACCESSIBLE CEILINGS BETWEEN AREAS WITH ACCESSIBLE CEILINGS, AS REQUIRED.
4. MAXIMUM SPACING OF J-HOOKS SHALL BE 5'-0" SPACING. SLEEVES AND ASSOCIATED FIRE STOPPING SHALL BE PROVIDED FROM ROOM TO ROOM TO ACCOMMODATE PATHWAYS FROM DEVICES TO SOURCE. SLEEVE SIZES SHALL EITHER BE 2" OR 4" DEPENDING ON THE CONCENTRATION OF CABLING IN THE AREA. ALLOW FOR AT LEAST (1) SPARE SLEEVE FOR FUTURE USE AT EACH LOCATION OF PENETRATION. FIRE STOP AND PROVIDE TEMPORARY SEAL FOR SPARE SLEEVES.

ELECTRICAL NOTES FOR TECHNOLOGY SYSTEMS

1. THE TERM "TECHNOLOGY" IMPLIES TELEPHONE/DATA SYSTEMS, AUDIO/VISUAL SYSTEM, CCTV SYSTEM, SECURITY/ACCESS CONTROL SYSTEM, PA SYSTEM, MUSAK/NOISECANCELING SYSTEM, EMERGENCY COMMUNICATION SYSTEMS, INTERCOM SYSTEM, ENTRY CALL SYSTEM, NURSE CALL SYSTEM AND THE LIKE.
2. COORDINATE SCOPE OF WORK WITH OWNER AND OWNER'S TECHNOLOGY SYSTEMS VENDORS. REFERENCE TECHNOLOGY DRAWINGS AND SPECIFICATIONS FOR INSTALLATION AND ROUGH-IN REQUIREMENTS OF SYSTEMS. THE TECHNOLOGY DRAWINGS AND SPECIFICATIONS SHALL BE CONSIDERED PART OF THE ELECTRICAL CONSTRUCTION DOCUMENTS.
3. E.C. TO PROVIDE TECHNOLOGY GROUNDING SYSTEM INCLUDING, BUT NOT LIMITED TO, GROUND CONDUCTORS, COPPER BUS BARS AND ALL ASSOCIATED HARDWARE REQUIRED FOR A COMPLETE GROUNDING SYSTEM.
4. E.C. TO PROVIDE BONDING OF ENTIRE CABLE TRAY & LADDER RACK SYSTEMS TO THE BUILDING ELECTRICAL GROUNDING SYSTEM, INCLUDING BUT NOT LIMITED TO, BONDING JUMPERS BETWEEN CABLE TRAY & LADDER RACK SECTIONS NECESSARY TO PROVIDE ELECTRICAL CONTINUITY.
5. E.C. TO PROVIDE BONDING OF ALL TECHNOLOGY RACKS & EQUIPMENT INCLUDING, BUT NOT LIMITED TO, BONDING JUMPERS AND ASSOCIATED HARDWARE.
6. E.C. TO FURNISH AND INSTALL CABLE TRAY, LADDER RACK AND J-HOOK SYSTEM THROUGH-OUT PROJECT AREA FOR TECHNOLOGY SYSTEMS.
7. E.C. TO PROVIDE SLEEVES AND CONDUIT PATHWAYS. WHETHER OR NOT INDICATED ON THE DOCUMENTS, CONDUIT SLEEVES MUST BE PROVIDED FOR EACH ROOM CONTAINING TECHNOLOGY DEVICES OR OUTLETS. THE SLEEVES SHALL EXTEND FROM THE ROOM SERVED TO THE CABLE TRAY, SLEEVES CROSSING HARD INACCESSIBLE CEILINGS OR ABOVE THE CORRIDOR ACCESSIBLE CEILING SPACE. COORDINATE SLEEVE REQUIREMENT AND LOCATIONS WITH TECHNOLOGY CONTRACTOR(S) PRIOR TO ROUGH-IN.
8. E.C. SHALL PROVIDE COMPLETE CONDUIT PATHWAY SYSTEM FROM BUILDING DMARK TO SERVER ROOM, AND FLOOR TO FLOOR PATHWAYS.
9. PATHWAY SYSTEM SHALL INCLUDE, BUT NOT BE LIMITED TO, CONDUIT, PULL BOXES, J-BOXES, OUTLET BOXES, PLASTER RINGS, BUSHINGS, PULL WIRES, ETC.
10. E.C. SHALL PROVIDE FIRE-RATED PLYWOOD BACKBOARDS FOR TECHNOLOGY USE.
11. E.C. SHALL PROVIDE BLANK FACEPLATES FOR TECHNOLOGY OUTLETS IDENTIFIED AS "FUTURE USE", "ROUGH-IN ONLY", OR SIMILAR NOTATION.
12. E.C. SHALL PROVIDE FLOOR BOXES AND ASSOCIATED FLOOR BOX MOUNTING HARDWARE FOR TECHNOLOGY DEVICES. COORDINATE TECHNOLOGY DEVICE QUANTITIES AND CONFIGURATIONS WITH TECHNOLOGY CONTRACTORS PRIOR TO ORDERING MATERIALS.
13. ALL CORING FOR INSTALLATION OF TECHNOLOGY PATHWAYS AND FLOOR BOXES TO BE COMPLETED BY E.C.
14. ALL POWER DEVICES, AND ASSOCIATED BRANCH CIRCUITS SERVING TECHNOLOGY EQUIPMENT SHALL BE FURNISHED AND INSTALLED BY E.C.
15. PROVIDE SLEEVES, J-HOOKS, PATHWAYS, BASKET TRAY FOR LOW VOLTAGE CABLING AND SYSTEMS FROM DEVICE TO SOURCE, UNLESS NOTED OR DIRECTED OTHERWISE. COORDINATE ROUTING AND PATHWAY SYSTEM WITH OWNER / OWNER'S VENDOR / TECHNOLOGY INSTALLER AND OTHER TRADES PRIOR TO ROUGH-IN. QUALIFY EXTENT OF PATHWAY SYSTEM BEING PROVIDED IN BID PROPOSAL.
16. WHERE CEILINGS DO NOT EXIST TO STUB CONDUITS ABOVE, CONDUITS SHALL BE STUBBED UP TO ABOVE STRUCTURE. IN FINISHED AREAS, PROVIDE COMPLETE CONDUIT PATHWAYS, INCLUDING PULL-BOXES, UNLESS OTHERWISE DIRECTED. CONDUIT, J-BOXES AND THE LIKE SHALL BE PAINTED TO MATCH AREA FINISHES.
17. WHERE HARD INACCESSIBLE CEILINGS EXIST, PROVIDE COMPLETE CONTINUOUS CONDUIT PATHWAYS, INCLUDING PULL-BOXES, ACCESS PANELS, UNLESS OTHERWISE DIRECTED. PROVIDE CONDUIT SLEEVES TRAVERSING OVER INACCESSIBLE CEILINGS BETWEEN AREAS WITH ACCESSIBLE CEILINGS, AS REQUIRED.
18. MAXIMUM SPACING OF J-HOOKS SHALL BE 5'-0" SPACING. SLEEVES AND ASSOCIATED FIRE STOPPING SHALL BE PROVIDED FROM ROOM TO ROOM TO ACCOMMODATE PATHWAYS FROM DEVICES TO SOURCE. SLEEVE SIZES SHALL EITHER BE 2" OR 4" DEPENDING ON THE CONCENTRATION OF CABLING IN THE AREA. ALLOW FOR AT LEAST (1) SPARE SLEEVE FOR FUTURE USE AT EACH LOCATION OF PENETRATION. FIRE STOP AND PROVIDE TEMPORARY SEAL FOR SPARE SLEEVES.

CODED NOTES: #

1. GYPSUM WALL ASSEMBLY (UL/ULC CLASSIFIED U300 OR U400 SERIES) (1-HR. OR 2-HR. FIRE-RATING, 2-HR. SHOWN).
2. (NOT SHOWN). WOOD STUDS TO CONSIST OF NOMINAL 2" x 4" LUMBER. STEEL STUDS TO BE MINIMUM 2-1/2" WIDE.
3. PENETRATING ITEM TO BE ONE OF THE FOLLOWING :
   a. MAXIMUM 30" DIAMETER STEEL PIPE (SCHEDULE 10 OR HEAVIER).
   b. MAXIMUM 30" DIAMETER CAST IRON PIPE.
   c. MAXIMUM 6" NOMINAL DIAMETER COPPER PIPE.
   d. MAXIMUM 6" NOMINAL DIAMETER STEEL CONDUIT.
   e. MAXIMUM 4" NOMINAL DIAMETER EMT.
4. HILTI FS-ONE HIGH PERFORMANCE INTUMESCENT FIRESTOP SEALANT :
   a. MINIMUM 5/8", FOR A 1-HR. FIRE-RATING.
   b. MINIMUM 1-1/4" DEPTH, FOR A 2-HR. FIRE-RATING.
5. MINIMUM 1/2" BEAD HILTI FS-ONE HIGH PERFORMANCE INTUMESCENT FIRESTOP SEALANT AT POINT OF CONTACT.

GENERAL NOTES:

1. MAXIMUM DIAMETER OF OPENING :
   a. 32-1/4" FOR STEEL STUD WALLS.
   b. 14-1/2" FOR WOOD STUD WALLS.
2. ANNULAR SPACE = MINIMUM 0", MAXIMUM 2-1/2".

UL/cUL SYSTEM NO. W-L-1054

F-RATING = 1-HR. OR 2-HR.
T-RATING = 0-HR.
L-RATING AT AMBIENT = LESS THAN 1 CFM/SQ.
FT. L-RATING AT 400°F = 4 CFM/SQ. FT.

METAL PIPE THROUGH GYPSUM WALL ASSEMBLY

N.T.S.

CODED NOTES: #

1. GYPSUM WALL ASSEMBLY (UL/ULC CLASSIFIED U300 OR U400 SERIES) (1-HR. OR 2-HR. FIRE-RATING) (2-HR. SHOWN).
2. (NOT SHOWN). WOOD STUDS TO CONSIST OF NOMINAL 2" x 4" LUMBER. STEEL STUDS TO BE MINIMUM 2-1/2" WIDE.
3. OPEN LADDER CABLE TRAY (MAXIMUM 18" x 6", STEEL OR ALUMINUM).
4. ANY OF THE FOLLOWING CABLES MAY BE USED WITH MAXIMUM 30% FILL OF CABLE TRAY :
   a. MAXIMUM 350 KCMIL SINGLE CONDUCTOR POWER CABLE.
   b. MAXIMUM 7/C NO. 12 AWG COPPER CONDUCTOR CABLE.
   c. MAXIMUM 100 PAIR NO. 24 AWG TELEPHONE CABLE.
5. MAX. 3" NOMINAL DIAMETER PVC PLASTIC PIPE (SCHEDULE 40) (CLOSED OR VENTED PIPING SYSTEM) (SEE NOTE NO. 1 BELOW).
6. MAXIMUM 1-1/2" DIAMETER CABLE BUNDLE TO CONSIST OF ANY OF THE FOLLOWING :
   a. FIBER-OPTIC CABLE (24 FIBER).
   b. RG 59 COAXIAL CABLE.
   c. MAX. 25 PAIR NO. 24 AWG TELEPHONE CABLE
   d. MAX. 7/C NO. 12 AWG COPPER CONDUCTOR.
7. HILTI FS 657 FIRE BLOCKS (2" THICK x 8" WIDE x 5" DEEP, REFERENCE : FRONT VIEW).

GENEAL NOTES:

1. (NOT SHOWN). PENETRATING ITEMS MAY ALSO INCLUDE A MAX. 6" NOM. DIA. STEEL PIPE, MAX. 6" NOM. DIA. STEEL CONDUIT; MAX. 4" NOM. DIA. COPPER PIPE, OR MAX. 4" NOM. DIA. EMT.
2. (NOT SHOWN): MAX. 1-1/2" GLASS-FIBER INSULATION MAY BE USED ON ANY OR ALL METALLIC PIPES.
3. ANNULAR SPACE = MINIMUM 1", MAXIMUM 9-1/4".
4. APPLY HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT IN ANY VOID THAT MAY EXIST (AROUND PENETRANTS, INTO INTERSTICES OF CABLES, BETWEEN CABLES AND CABLE TRAY, OR BETWEEN FIRE BLOCKS) TO MAXIMUM EXTENT POSSIBLE.

UL/cUL SYSTEM NO. W-L-8013

L-RATING AT AMBIENT = 5 CFM/SQ. FT.
2-HR. L-RATING AT 400°F = 2 CFM/SQ. FT.
F-RATING = 1-HR. OR T-RATING = 0-HR.

MULTIPLE PENETRATIONS THROUGH 1-HOUR OR 2-HOUR GYPSUM WALL ASSEMBLY

N.T.S.

CODED NOTES: #

1. GYPSUM WALL ASSEMBLY (U.L. CLASSIFIED U300 OR U400 SERIES) (1-HR OR 2-HR FIRE-RATING, 2-HR SHOWN).
2. OPTIONAL: MAXIMUM 4" NOMINAL DIAMETER STEEL PIPE SLEEVE (SCHEDULE 40 OR THINNER).
3. MAXIMUM 2" NOMINAL DIAMETER ENT.
4. HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT:
   a. MINIMUM 5/8" DEPTH, FOR A 1-HR FIRE-RATING.
   b. MINIMUM 1-1/4" DEPTH, FOR A 2-HR FIRE-RATING.

GENERAL NOTES:

1. MAXIMUM DIAMETER OF OPENING = 4".
2. ANNULAR SPACE = 3/4".

U.L. SYSTEM NO. WL2075

F-RATING = 1-HR. AND 2-HR.
T-RATING = 0-HR. AND 2-HR. (FOR 1-HR. AND 2-HR. WALLS,
RESPECTIVELY) L RATING AT AMBIENT = LESS THAN 1 CFM/SQ. FT.
L RATING AT 400°F = 4 CFM/SQ. FT.

ENT THROUGH GYPSUM WALL ASSEMBLY

N.T.S.

CODED NOTES: #

1. CONCRETE FLOOR OR WALL ASSEMBLY (3-HR FIRE-RATING):
   a. LIGHTWEIGHT OR NORMAL WEIGHT CONCRETE FLOOR OR WALL (MIN. 4-1/2" THICK).
   b. ANY UL/ULC CLASSIFIED CONCRETE BLOCK WALL.
2. OPTIONAL: MAXIMUM 32" NOMINAL DIAMETER STEEL PIPE SLEEVE (SCHEDULE 40 OR HEAVIER).
3. PENETRATING ITEM TO BE ONE OF THE FOLLOWING:
   a. MAXIMUM 30" NOMINAL DIAMETER STEEL PIPE (SCHEDULE 10 OR HEAVIER).
   b. MAXIMUM 30" NOMINAL DIAMETER CAST IRON PIPE.
   c. MAXIMUM 6" NOMINAL DIAMETER COPPER PIPE.
   d. MAXIMUM 6" NOMINAL DIAMETER STEEL CONDUIT.
   e. MAXIMUM 4" NOMINAL DIAMETER EMT.
4. MINIMUM 4" THICKNESS MINERAL WOOL (MIN. 4 PCF DENSITY) TIGHTLY PACKED.
5. MINIMUM 1/4" DEPTH HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT.
6. MINIMUM 1/4" CROWN HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT APPLIED AT POINT OF CONTACT.

GENERAL NOTES:

1. MAXIMUM DIAMETER OF OPENING = 32".
2. ANNULAR SPACE = MINIMUM 0", MAXIMUM 1-7/8".
3. MINIMUM 1/4" DEPTH HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT IS REQUIRED ON BOTH SIDES OF A WALL ASSEMBLY.

UL/cUL SYSTEM NO. CAJ1226

F-RATING = 3-HR.
T-RATING = 0-HR.
L-RATING AT AMBIENT = LESS THAN 1 CFM/SQ. FT.
L-RATING AT 400° F = 4 CFM/SQ. FT.

METAL PIPE THROUGH SLEEVE IN CONCRETE FLOOR/WALL OR BLOCK WALL

N.T.S.

CODED NOTES: #

1. CONCRETE FLOOR OR WALL ASSEMBLY (3-HR FIRE-RATING):
   a. LIGHTWEIGHT OR NORMAL WEIGHT CONCRETE FLOOR OR WALL (MIN. 4-1/2" THICK).
   b. ANY UL/ULC CLASSIFIED CONCRETE BLOCK WALL.
2. MAXIMUM 18" x 6" ALUMINUM OR STEEL OPEN LADDER CABLE TRAY.
3. ANY COMBINATION OF THE FOLLOWING CABLES MAY BE USED WITHIN THE CABLE TRAY (SEE NOTE NO. 4 BELOW):
   a. 7/C NO. 12 AWG COPPER CONDUCTOR CABLE.
   b. MAX. 500 KCMIL SINGLE CONDUCTOR CABLE.
   c. MAX. 300 PAIR NO. 24 AWG TELEPHONE CABLE.
   d. 24 FIBER-OPTIC CABLE (MAX. 1/2" DIAMETER).
4. PENETRATING ITEMS TO BE ANY OF THE FOLLOWING: MAXIMUM 6" NOMINAL DIAMETER STEEL PIPE OR STEEL CONDUIT; MAXIMUM 6" NOMINAL DIAMETER CAST IRON PIPE; OR MAXIMUM 4" NOMINAL DIAMETER COPPER PIPE OR EMT.
5. MAXIMUM 1-1/2" GLASS FIBER INSULATION.
6. MAXIMUM 2" CABLE BUNDLE TO BE A COMBINATION OF ANY OF THE FOLLOWING:
   a. 7/C NO. 12 AWG CABLE.
   b. 25 PAIR NO. 24 AWG TELEPHONE CABLE.
   c. ROMEX (2/C NO. 10 +GND).
   d. 3/C NO. 8 ALUMINUM CLAD CABLE.
   e. RG 62A COAXIAL CABLE.
   f. 24 FIBER-OPTIC CABLE (MAX. 1/2" DIA.).
7. HILTI FS 657 FIRE BLOCK (2" THICK x 5" WIDE x 8" DEEP, REF. TOP VIEW).

GENERAL NOTES:

1. MAXIMUM AREA OF OPENING = 1296 SQUARE INCHES, WITH MAXIMUM DIMENSION OF 36 INCHES
2. ANNULAR SPACE FOR CABLE TRAY = MINIMUM 1-1/2", MAXIMUM 4-1/2".
3. ANNULAR SPACE FOR PIPE AND CABLE PENETRATIONS = MINIMUM 1", MAXIMUM 4-1/2".
4. MAXIMUM AREA OF CABLES EQUALS 30% OF CROSS-SECTIONAL AREA OF CABLE TRAY.
5. APPLY HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT INTO INTERSTICES OF CABLES, BETWEEN CABLES AND CABLE TRAY, AND ANY VOIDS TO MAXIMUM EXTENT POSSIBLE.
6. WIRE MESH (NOT SHOWN), WHEN THE ANNULAR SPACE EXCEEDS 4-1/2", A NOMINAL 2 IN. SQ., NO. 16 SWG WIRE MESH SHALL BE USED TO KEEP THE HILTI FS 657 FIRE BLOCKS IN PLACE.

UL/cUL SYSTEM NO. CAJ8056

F-RATING = 3-HR. L-RATING AT AMBIENT = 5 CFM/SQ. FT.
T-RATING = 0-HR. L-RATING AT 400°F = 2 CFM/SQ. FT.

GROUNDING DETAIL
N.T.S.

GROUNDING DETAIL REFERENCED NOTES:

1. MGB (MAIN GROUND BAR) SHALL BE ERICO #EGBA14412- - (INCLUDES MOUNTING BRACKET AND INSULATORS; HOLE PATTERN AS REQUIRED FOR INSTALLATION, INCLUDING SPARE HOLES FOR FUTURE USE.) OR EQUAL BY HARGER. USE COMPRESSION CONNECTORS (LISTED FOR GROUNDING) TO CONNECT COPPER WIRE TO MGB.
2. TMGB (TELECOMMUNICATION MAIN GROUND BAR) SHALL BE ERICO #TMGBA12L15PT (INCLUDES MOUNTING BRACKET AND INSULATORS) OR EQUAL BY HARGER. USE COMPRESSION CONNECTORS (LISTED FOR GROUNDING) TO CONNECT COPPER WIRE TO TMGB.
3. TGB (TELECOMMUNICATION GROUND BAR) SHALL BE ERICO #TGBA12L06PT (INCLUDES MOUNTING BRACKET AND INSULATORS) OR EQUAL BY HARGER. USE PRESSURE CONNECTORS (LISTED FOR GROUNDING) TO CONNECT COPPER WIRE TO TGB.
4. METAL BUILDING FRAME MUST BE USED AS A GROUNDING ELECTRODE WHERE IT IS EFFECTIVELY GROUNDED PER NEC SECTION 250.52. PROVIDE #3/0 BONDING JUMPERS AS REQUIRED TO PROVIDE CONTINUOUS CONDUCTIVITY WHERE BUILDING FRAME IS SEPARATED INTO ELECTRICALLY ISOLATED SECTIONS AS MAY OCCUR FROM EXPANSION JOINTS, BUILDING ADDITIONS, BUILDING ELEVATION CHANGES, AND THE LIKE.
5. WHERE A WATER METER OR FILTERING EQUIPMENT IS IN THIS METAL WATER PIPING SYSTEM, IT MUST BE BONDED AROUND TO MAINTAIN CONTINUITY EVEN IF THE WATER METER OR FILTER IS REMOVED PER NEC SECTION 250.52.
6. THE REBAR MUST NOT BE LESS THAN 20 FEET IN LENGTH AND 1/2" IN DIAMETER OR 20 FEET OR MORE OF BARE COPPER CONDUCTOR NOT SMALLER THAN NO. 4 IN THE BOTTOM OF THE FOOTER PER NEC SECTION 250.52.
7. GROUND RING SHALL BE A BARE COPPER CONDUCTOR, NOT SMALLER THAN NO. 2 AND AT LEAST 20 FEET LONG. THE CONDUCTOR MUST "ENCIRCLE" THE BUILDING OR STRUCTURE AND BE BURIED NOT LESS THAN 2-1/2 FEET DEEP PER NEC SECTION 250.52.
8. IF INSTALLED IN OR ATTACHED TO A BUILDING OR STRUCTURE, METAL PIPING SYSTEM(S), INCLUDING GAS PIPING, THAT IS LIKELY TO BECOME ENERGIZED SHALL BE BONDED PER NEC 250.104 (B). THE BONDING CONDUCTOR(S) OR JUMPER(S) SHALL BE SIZED IN ACCORDANCE WITH TABLE 250.122, AND EQUIPMENT GROUNDING CONDUCTORS SHALL BE SIZED IN ACCORDANCE WITH TABLE 250.122 USING THE RATING OF THE CIRCUIT THAT IS LIKELY TO ENERGIZE THE PIPING SYSTEM(S). THE POINTS OF ATTACHMENT OF THE BONDING JUMPER(S) SHALL BE ACCESSIBLE.
9. THE METAL FRAME OF THE BUILDING SHALL BE USED AS A COMMON GROUNDING ELECTRODE CONDUCTOR. IF BUILDING DOES NOT HAVE A METAL FRAME, A #3/0 COMMON GROUNDING ELECTRODE CONDUCTOR SHALL BE RUN FROM THE MAIN GROUND BAR FOR ALL SEPARATELY DERIVED SYSTEMS. MULTIPLE SEPARATELY DERIVED SYSTEMS MAY BE CONNECTED TO THE GROUNDING ELECTRODE SYSTEM BY INDIVIDUAL CONDUCTORS OR A COMMON CONDUCTOR WITH TAPS. THE GROUNDING ELECTRODE TAP CONDUCTOR FOR EACH SYSTEM SHALL BE CONNECTED TO THE COMMON GROUNDING ELECTRODE CONDUCTOR WITH THE CONNECTION IN AN ACCESSIBLE LOCATION.
10. IF INCLUDED AS PART OF THE PROJECT, THE LIGHTNING PROTECTION SYSTEM SHALL BE BONDED TO THE GROUNDING ELECTRODE SYSTEM AT THE MAIN GROUND BAR. INTERCONNECTIONS AND SIZING OF THE BONDING CONDUCTOR(S) SHALL BE INSTALLED PER NFPA 780 AND AS REQUIRED BY THE DELEGATED DESIGN FOR THE UL MASTER LABELED LIGHTNING PROTECTION SYSTEM.
11. GROUNDING CONDUCTORS TO ADDITIONAL EQUIPMENT AS REQUIRED BY NEC 250 AND SPECIFICATIONS.

GROUNDING DETAIL GENERAL NOTES:

1. ALL GROUNDING WORK AND MATERIALS SHALL BE FURNISHED AND INSTALLED IN ACCORDANCE WITH REQUIREMENTS IN NEC 250.
2. ALL GROUNDING CONDUCTORS SHALL BE COPPER. PROVIDE INSULATED CONDUCTORS FOR INTERIOR INSTALLATIONS AND BARE COPPER FOR EXTERIOR INSTALLATIONS.
3. ALL UNDERGROUND CONNECTIONS TO ELECTRODES AND CONDUCTORS SHALL BE MADE BY EXOTHERMIC WELDING.
4. CONDUCTOR CONNECTIONS TO MAIN GROUND BAR SHALL BE MADE WITH COMPRESSION CONNECTORS LISTED FOR GROUNDING.
5. GROUNDING ELECTRODE AND BONDING JUMPERS SHALL BE INSTALLED SO THAT THEY ARE NOT ANY LONGER THAN NECESSARY AND ANY UNNECESSARY BENDS AND LOOPS ARE AVOIDED.
6. REFERENCE ONE-LINE DIAGRAM FOR CONDUCTOR SIZE OF THE SUPPLY SIDE BONDING JUMPER AND GROUNDING ELECTRODE TAP CONDUCTOR SERVING SEPARATELY DERIVED SYSTEM(S).
7. REFERENCE ONE-LINE DIAGRAM FOR CONDUCTOR SIZE OF THE EQUIPMENT GROUNDING CONDUCTOR SERVING ELECTRICAL DISTRIBUTION EQUIPMENT.
8. INSTALL SLEEVES. SLEEVE SEALS, FIRE STOPPING, RACEWAYS TO PROTECT AGAINST PHYSICAL DAMAGE AND ENVIRONMENTAL CONDITIONS WHERE REQUIRED. FURNISH AND INSTALL BONDING BUSHINGS WHERE FERROUS METALLIC RACEWAYS ARE UTILIZED.
9. GROUND ELECTRODE CONDUCTORS (GECS) AND BONDING JUMPERS ARE PERMITTED TO BE SIZED BASED ON THE ELECTRODES TO WHICH THEY CONNECT, AS SPECIFIED IN NEC 250.66(A), (B), OR (C). HOWEVER, IF THE GEC OR BONDING JUMPER EXTENDS FROM THIS CONNECTION TO AN ELECTRODE THAT IS NOT SPECIFIED IN NEC 250.66(A), (B), OR (C), IT MUST BE SIZED PER NEC TABLE 250.66. THE USE OF BONDING JUMPERS OR GECS LARGER THAN REQUIRED BY NEC 250.66 IS NOT PROHIBITED.

ELECTRICAL DISTRIBUTION EQUIPMENT SURGE SUPPRESSION GUIDELINES

- 320KA FOR SERVICE ENTRANCE EQUIPMENT (SWITCHGEAR);
- 240KA OR 250KA FOR SERVICE ENTRANCE EQUIPMENT (SWITCHBOARDS)
- 140KA OR 150KA FOR DISTRIBUTION PANELS;
- 80KA FOR BRANCH / SUB-PANELS.

PROVIDE A DISCONNECTING MEANS FOR EACH SURGE SUPPRESSION DEVICE FOR MAINTENANCE.

REFERENCE SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

FAULT CURRENT NOTE:
THE AVAILABLE FAULT CURRENT RATINGS ARE UNKNOWN AT THIS TIME AS THE POWER COMPANY IS IN THE PROCESS OF DESIGNING THE ELECTRICAL DISTRIBUTION SYSTEM FOR THE PROJECT AREA. THE ELECTRICAL CONTRACTOR SHALL OBTAIN THE AVAILABLE FAULT CURRENT FROM THE POWER COMPANY. THE ELECTRICAL CONTRACTOR SHALL UTILIZE THE EQUIPMENT MANUFACTURER TO PERFORM A FAULT CURRENT STUDY BASED ON THE AVAILABLE FAULT CURRENT PROVIDED BY THE UTILITY COMPANY, ACTUAL FEEDER SIZES, ACTUAL FEEDER LENGTHS, AND ACTUAL EQUIPMENT PROVIDED. SUBMIT FAULT CURRENT STUDY WITH SHOP DRAWING SUBMITTAL. THE ELECTRICAL CONTRACTOR SHALL PROVIDE EQUIPMENT RATED TO MEET OR EXCEED THE LEVELS INDICATED IN THE FAULT CURRENT STUDY. **NO ELECTRICAL DISTRIBUTION SHALL BE PURCHASED UNTIL AVAILABLE FAULT CURRENT IS CONFIRMED.**

ONE-LINE DIAGRAM NOTES

1. THE ELECTRICAL CONTRACTOR SHALL VERIFY ALL POWER COMPANY REQUIREMENTS PRIOR TO BIDDING & INCLUDE THE COST OF ALL ASSOCIATED LABOR, MATERIALS, & CHARGES IN HIS BID.
2. THE ELECTRICAL CONTRACTOR SHALL VERIFY THE AVAILABLE FAULT CURRENT WITH THE UTILITY COMPANY PRIOR TO BIDDING AND PROVIDE EQUIPMENT RATED ACCORDINGLY. SUBMIT FAULT CURRENT CALCULATIONS WITH SHOP DRAWING SUBMITTAL.
3. ALL BUSSING SHALL BE COPPER.
4. PROVIDE FULL LENGTH VERTICAL BUSSING IN ALL SWITCHBOARDS, DISTRIBUTION PANELS, & PANELBOARDS.
5. PROVIDE FULL SIZE HORIZONTAL BUSSING IN ALL SWITCHBOARDS.
6. ALL CIRCUIT BREAKERS SHALL BE BOLT-ON TYPE.
7. ALL WALL-MOUNTED EQUIPMENT SHALL BE MOUNTED ON 3/4" FIRE RATED BACKBOARD.
8. ALL FLOOR-MOUNTED EQUIPMENT SHALL BE MOUNTED ON 4" HIGH CONCRETE HOUSEKEEPING PAD.
9. PROVIDE NAMEPLATES PER NAMEPLATE DETAIL ON THIS SHEET.
10. COORDINATE SPACE WITH ALL OTHER TRADES TO MAINTAIN ALL CODE- REQUIRED CLEARANCES.
11. REFER TO ELECTRICAL SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
12. THE ELECTRICAL CONTRACTOR SHALL PROVIDE FINAL SETTINGS REQUIRED FOR ALL ADJUSTABLE/ELECTRONIC TYPE CIRCUIT BREAKERS WITH LONGTIME, SHORT TIME, GF, INSTANTANEOUS, ETC. THE ELECTRICAL CONTRACTOR SHALL PROVIDE FINAL COORDINATION STUDY.
13. PROVIDE ARC ENERGY REDUCTION AS APPLICABLE:
    - WHERE BREAKERS ARE UTILIZED WITHIN ELECTRICAL DISTRIBUTION EQUIPMENT, THE ELECTRICAL CONTRACTOR SHALL PROVIDE BREAKERS EQUIPPED WITH ADJUSTABLE INSTANTANEOUS TRIP SETTING TO COMPLY WITH NEC 240.87 ARC ENERGY REDUCTION. THE ADJUSTABLE INSTANTANEOUS TRIP SETTING OPTION SHALL BE PROVIDED WHERE THE HIGHEST CONTINUOUS TRIP SETTING FOR WHICH THE ACTUAL OVERCURRENT DEVICE INSTALLED IN A CIRCUIT BREAKER IS RATED OR CAN BE ADJUSTED IS 1200A OR HIGHER.
    - WHERE FUSES ARE UTILIZED WITHIN ELECTRICAL DISTRIBUTION EQUIPMENT, THE ELECTRICAL CONTRACTOR SHALL PROVIDE FUSES EQUIPPED WITH CLEARING TIME OF 0.07 SECONDS OR LESS AT AVAILABLE ARCING CURRENT TO COMPLY WITH NEC 240.67 ARC ENERGY REDUCTION. THIS SHALL BE PROVIDED WHERE THE FUSE IS RATED AT 1200A OR HIGHER.
    - PROVIDE PERFORMANCE TESTING PER NEC FOR ARC ENERGY REDUCTION SYSTEM. ENGAGE A FACTORY AUTHORIZED SERVICE REPRESENTATIVE TO PERFORM TESTING AND PROVIDE REQUIRED DOCUMENTATION. PROVIDE COPY OF TESTING AND DOCUMENTATION TO EOR AND LOCAL AHJ.
14. THE ELECTRICAL CONTRACTOR SHALL COMPLY WITH NEC ARTICLE 110.16 FOR LABELING OF PANELS FOR ARC FLASH HAZARD WARNING AS WELL AS FOLLOWING REQUIRED SAFETY PRECAUTIONS WHEN SERVICING OR MAINTAINING ELECTRICAL EQUIPMENT.
15. HVAC CIRCUIT BREAKERS TO BE "HACR" TYPE WHERE REQUIRED BY EQUIPMENT NAMEPLATE PER NEC.
16. ELECTRICAL CONTRACTOR SHALL BALANCE PANELS AND ELECTRICAL EQUIPMENT TO ±10% BETWEEN PHASES: A/B, B/C, A/C REGARDLESS OF CIRCUITING INDICATED.
17. PROPER CLEARANCE MUST BE MAINTAINED ABOUT ELECTRICAL EQUIPMENT PER NEC. FIELD VERIFY EXACT MOUNTING SPACE AVAILABLE IN ELECTRICAL ROOM / AREA PRIOR TO INSTALLATION OF ELECTRICAL EQUIPMENT.
18. ELECTRICAL CONTRACTOR SHALL MAKE FINAL ELECTRICAL CONNECTIONS FOR A COMPLETE ELECTRICAL DISTRIBUTION SYSTEM.
19. EXTERIOR MOUNTED ELECTRICAL EQUIPMENT SHALL BE NEMA 3R RATED AND BE FURNISHED WITH HEATERS, THERMOSTAT AND DISCONNECTING MEANS INTEGRAL TO EQUIPMENT.
20. GROUNDING ELECTRODE SYSTEM CONDUCTORS SHALL BE COPPER.
21. CONDUCTORS SHALL BE COPPER, UNLESS NOTED OTHERWISE.
22. FEEDER ROUTING IS DIAGRAMMATIC ONLY. ACTUAL ROUTING OF FEEDERS (OVERHEAD OR UNDERGROUND) IS THE RESPONSIBILITY OF THE ELECTRICAL CONTRACTOR.

NOTE:
NAMEPLATES ARE REQUIRED ON ALL SWITCHBOARDS, DISTRIBUTION PANELS, PANELBOARDS, ENCLOSURES AND ELECTRICAL CABINETS, ACCESS DOORS/PANELS FOR CONCEALED ELECTRICAL EQUIPMENT, EMERGENCY SYSTEMS/BOXES, MOTOR CONTROL CENTERS, ENCLOSED SWITCHES/CIRCUIT BREAKERS/CONTROLLERS, POWER-TRANSFER DEVICES, PUSH-BUTTONS, CONTACTORS, LIGHTING CONTROL SYSTEMS, INVERTERS, GENERATORS, UPS, MONITORING EQUIPMENT, STARTERS, DISCONNECT SWITCHES, METER SOCKETS, RELAYS, TRANSFORMERS, AND JUNCTION BOXES GREATER THAN 4 11/16" SQUARE. ALSO PROVIDE NAMEPLATES ON BRANCH SWITCHES/BREAKERS OF SWITCHBOARDS AND DISTRIBUTION PANELS.

STANDARD COLORS:
1. NORMAL POWER - WHITE BACKGROUND, BLACK LETTERS
2. EMERGENCY POWER - RED BACKGROUND, WHITE LETTERING
3. IN ADDITION TO THE FUNCTION NAMEPLATE, PROVIDE NAMEPLATES IDENTIFYING ALL "MAIN SERVICE NAMEPLATE DISCONNECTS" - RED BACKGROUND - WHITE LETTERING

NAMEPLATE DETAIL
N.T.S.

FEEDER NOTES

1. ALL FEEDER AND BRANCH CIRCUIT CONDUCTORS INDICATED ON THE PLANS AND ONE-LINE DIAGRAM(S) ARE BASED UPON THE USE OF COPPER CONDUCTORS, UNLESS NOTED OTHERWISE. "(AL)" - WITHIN THE FEEDER SIZE INDICATES ALUMINUM CONDUCTORS SPECIFIED.
2. IF APPROVED FOR USE BY THE OWNER, LANDLORD, AUTHORITY HAVING JURISDICTION, AND POWER COMPANY, THE CONTRACTOR MAY FURNISH AND INSTALL ALUMINUM CONDUCTORS FOR THE FOLLOWING:
   a. SECONDARY ELECTRIC SERVICE LATERALS.
   b. FEEDERS RATED 100A AND LARGER.
3. ALUMINUM CONDUCTORS ARE PROHIBITED FROM BEING USED TO SERVE ANY EQUIPMENT THAT SPECIFICALLY CALLS FOR THE USE OF COPPER CONDUCTORS OR PROHIBITS THE USE OF ALUMINUM CONDUCTORS WITHIN THE EQUIPMENTS' RESPECTIVE WRITTEN INSTALLATION INSTRUCTIONS.
4. CONDUCTORS: ALUMINUM, COMPLYING WITH ASTM B800 AND ASTM B801.
5. CONDUCTOR INSULATION: TYPE THHN AND TYPE THWN-2: COMPLY WITH UL 83; TYPE XHHW-2: COMPLY WITH UL 44.
6. CONDUCTOR INSULATION, APPLICATIONS AND WIRING METHODS:
   a. SERVICE ENTRANCE: TYPE XHHW-2, SINGLE CONDUCTORS IN RACEWAY;
   b. FEEDERS: TYPE THHN/THWN-2, SINGLE CONDUCTORS IN RACEWAY.
7. CONNECTORS AND SPLICES: FACTORY-FABRICATED CONNECTORS, SPLICES, AND LUGS OF SIZE, AMPACITY RATING, MATERIAL, TYPE, AND CLASS FOR APPLICATION AND SERVICE INDICATED; LISTED AND LABELED AS DEFINED IN NFPA 70, BY A QUALIFIED TESTING AGENCY, AND MARKED FOR INTENDED LOCATION AND USE.
8. LUGS: ONE PIECE, SEAMLESS, DESIGNED TO TERMINATE CONDUCTORS BEING FURNISHED.
   a. APPLICATION: CONNECTIONS TO SERVICE ENTRANCE ELECTRICAL DISTRIBUTION EQUIPMENT AND DEVICES, VIBRATING EQUIPMENT, GENERATORS, BUS BARS.
   b. MATERIAL: COPPER/ALUMINUM.
   c. TYPE: ONE OR TWO HOLE WITH STANDARD OR LONG BARRELS, CONFIGURATION PER APPLICATION.
   d. TERMINATION: COMPRESSION.
9. LUGS: ONE PIECE, SEAMLESS, DESIGNED TO TERMINATE CONDUCTORS BEING FURNISHED.
   a. APPLICATION: CONNECTIONS OF FEEDERS TO ELECTRICAL DISTRIBUTION EQUIPMENT AND DEVICES THAT ARE NOT SERVICE ENTRANCE RATED.
   b. MATERIAL: COPPER/ALUMINUM.
   c. TYPE: SET SCREW.
   d. TERMINATION: MECHANICAL.
10. CONNECTIONS: TIGHTEN ELECTRICAL CONNECTORS AND TERMINALS ACCORDING TO MANUFACTURER'S PUBLISHED TORQUE-TIGHTENING VALUES. SUBMIT FIELD QUALITY REPORT SHOWING PUBLISHED TORQUE-TIGHTENING VALUES AND INSTALLED TORQUE VALUES.
11. CONNECTIONS: MAKE SPLICES, TERMINATIONS, AND TAPS THAT ARE COMPATIBLE WITH CONDUCTOR MATERIAL AND THAT POSSESS EQUIVALENT OR BETTER MECHANICAL STRENGTH AND INSULATION RATINGS THAN UNSPLICED CONDUCTORS.
    a. WHERE RECOMMENDED BY WIRE AND/OR TERMINATION MANUFACTURERS, FURNISH AND INSTALL OXIDE INHIBITOR AT TERMINATIONS, SPLICES, AND TAPS.
12. THE GROUNDING ELECTRODE SYSTEM SHALL UTILIZE COPPER CONDUCTORS.
13. IF ALUMINUM CONDUCTORS ARE UTILIZED, BASED ON THE ABOVE CRITERIA, THE ALUMINUM CONDUCTOR SIZES BEING FURNISHED SHALL BE INCREASED TO MEET OR EXCEED THE RATINGS OF THE SPECIFIED COPPER FEEDER CHARACTERISTICS, SUCH AS AMPERAGE AND VOLTAGE DROP. THE CONDUIT, ASSOCIATED WITH EACH OF THE FURNISHED ALUMINUM FEEDERS, SHALL ALSO BE INCREASED TO COMPLY WITH CODE FOR THE QUANTITY AND SIZE OF ALUMINUM CONDUCTORS BEING UTILIZED. E.C. SHALL VERIFY THE EQUIPMENT/DISTRIBUTION LUGS ARE ADEQUATELY SIZED AND RATED TO ACCEPT THE SPECIFIED ALUMINUM CONDUCTORS, AND THE SHORT CIRCUIT RATINGS OF THE ELECTRICAL DISTRIBUTION EQUIPMENT SHALL BE INCREASED, AS REQUIRED, TO ACCOMMODATE THE HIGHER AVAILABLE SHORT CIRCUIT RATING AT THE RESPECTIVE EQUIPMENT'S TERMINALS DUE TO ALUMINUM CONDUCTORS BEING UTILIZED. IF EQUIPMENT/DISTRIBUTION MUST INCREASE IN SIZE TO ACCOMMODATE THE SPECIFIED ALUMINUM CONDUCTORS, THE E.C. SHALL BE RESPONSIBLE TO VERIFY ALL CLEARANCES PER N.E.C. ARE MAINTAINED.

ELECTRICAL ONE-LINE DIAGRAM

N.T.S. 208/120V-3Ø-4W

GENERAL NOTES:

1. REFERENCE DETAILS, NOTES AND SCHEDULES, DRAWING E-601.

ELECTRONIC SUBMETERING SYSTEM:

1. E.C. SHALL FURNISH AND INSTALL A COMPLETE AND OPERATIONAL NETWORKED ELECTRONIC SUB-METERING SYSTEM. REFERENCE ONE-LINE DIAGRAMS AND SPECIFICATIONS. REFER TO SPECIFICATION SECTION 262713 "ELECTRICITY METERING" FOR ADDITIONAL INFORMATION.
2. SYSTEMS OR AREAS TO BE SUB-METERED: EACH DWELLING UNIT PANELBOARD
3. COORDINATE SUB-METERING SYSTEM WITH PLUMBING AND MECHANICAL CONTRACTORS. WHERE REQUIRED BY OWNER, WATER SUB-METERING SHALL BE INCORPORATED INTO THE SUB-METERING SYSTEM FURNISHED BY THE ELECTRICAL CONTRACTOR. THE MECHANICAL AND PLUMBING CONTRACTORS SHALL BE RESPONSIBLE TO FURNISH AND INSTALL THEIR RESPECTIVE WATER SUB-METERS FOR THE SYSTEM. WIRING/CABLE INTERCONNECTIONS FROM THE WATER SUB-METERS SHALL BE BY THE ELECTRICAL CONTRACTOR.
4. THE SUB-METERING SYSTEM SHALL BE PROVIDED WITH SOFTWARE TO ENABLE VIEWING OVER THE OWNER'S NETWORK. ALLOW FOR REMOTE READING CAPABILITY.
5. E.C. SHALL PROVIDE ALL SYSTEM EQUIPMENT, WIRING, ANCILLARY DEVICES AND REQUIREMENTS PER SYSTEM MANUFACTURER'S INSTALLATION REQUIREMENTS AND RECOMMENDATIONS
6. E.C. SHALL TEST/COMMISSION EACH METER IN THE PRESENCE OF THE OWNER'S REPRESENTATIVE. INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS.

SOLAR PV SYSTEM COORDINATION NOTE:

BUILDING WILL HAVE A SOLAR PV SYSTEM ON THE ROOF, TO BE DESIGNED AND INSTALLED BY OTHERS. E.C. TO PROVIDE PATHWAYS AND PULL BOX FROM ROOF TO MAIN ELECTRICAL ROOM AS SHOWN ON PLANS, FOR FUTURE CONNECTION. COORDINATE ALL REQUIREMENTS WITH SOLAR PV DRAWINGS AND SOLAR PV INSTALLER PRIOR TO ANY ROUGH-IN.

REMARKS:

1. AIC RATING OF OVERCURRENT DEVICE TO MEET OR EXCEED THE AVAILABLE FAULT CURRENT.
2. OVERCURRENT DEVICE TO BE LOCKABLE.
3. DEPTH OF SWITCHBOARD SECTION SHALL ACCOMMODATE TOP/BOTTOM EXIT WIRING.
4. SERVICE ENTRANCE RATED.
5. PROVIDE ADJUSTABLE ELECTONIC TRIP CIRCUIT BREAKER, RATINGS SHALL BE ADJUSTED PER COORDINATION STUDY
6. E.C. SHALL FURNISH AND INSTALL NAMEPLATES FOR EQUIPMENT AND EACH DEVICE

PANELBOARD SCHEDULE CIRCUIT BREAKER NOTES

- ALL BREAKERS SHALL BE "HACR" RATED.
- NOT ALL NOTES MAY APPLY TO THIS PROJECT.

GFI - 5mA "GFI" TYPE FOR PERSONNEL PROTECTION
GFE - 30mA "GFI" TYPE FOR EQUIPMENT PROTECTION
AF - "ARC-FAULT" TYPE
AFG - COMBINATION "ARC-FAULT / 5mA GFI" TYPE
ST - SHUNT-TRIP TYPE
ET - ELECTRONIC TRIP TYPE
L - BREAKER TO HAVE LOCK-ON CLIP
L/R - BREAKER TO HAVE LOCK-ON CLIP AND RED MARKING
HT - FURNISH AND INSTALL HANDLE TIES FOR MULTIPLEX CIRCUITS
EB - EXISTING BREAKER WITH NEW CIRCUIT. EXISTING BREAKER ASSUMED TO BE SPARE OR EXISTING CIRCUIT ASSUMED DEMOLISHED DURING SCOPE OF THIS PROJECT. FIELD VERIFY.
NB - FURNISH AND INSTALL NEW BREAKER. BREAKER SHALL MATCH EXISTING PANELBOARD MANUFACTURER, TYPE AND AIC RATING.
ETR - EXISTING CIRCUIT TO REMAIN. LOAD SHOWN BASED UPON EXISTING DRAWINGS OR 80% OF FULLY LOADED BREAKER AMPACITY.

WHERE ROOM NAME/NUMBER IS INDICATED FOR CIRCUIT DESCRIPTION, CONTRACTOR IS RESPONSIBLE FOR COORDINATING EXACT NAME/NUMBER WITH ARCHITECTURAL PLANS PRIOR TO INSTALLING CIRCUIT DIRECTORY.

PANELBOARD SCHEDULE CIRCUIT BREAKER NOTES

- ALL BREAKERS SHALL BE "HACR" RATED.
- NOT ALL NOTES MAY APPLY TO THIS PROJECT.

GFI - 5mA "GFI" TYPE FOR PERSONNEL PROTECTION
GFE - 30mA "GFI" TYPE FOR EQUIPMENT PROTECTION
AF - "ARC-FAULT" TYPE
AF/G - COMBINATION "ARC-FAULT / 5mA GFI" TYPE
ST - SHUNT-TRIP TYPE
ET - ELECTRONIC TRIP TYPE
L - BREAKER TO HAVE LOCK-ON CLIP
L/R - BREAKER TO HAVE LOCK-ON CLIP AND RED MARKING
HT - FURNISH AND INSTALL HANDLE TIES FOR MULTIPLEX CIRCUITS
EB - EXISTING BREAKER WITH NEW CIRCUIT. EXISTING BREAKER ASSUMED TO BE SPARE OR EXISTING CIRCUIT ASSUMED DEMOLISHED DURING SCOPE OF THIS PROJECT. FIELD VERIFY.
NB -FURNISH AND INSTALL NEW BREAKER. BREAKER SHALL MATCH EXISTING PANELBOARD MANUFACTURER, TYPE AND AIC RATING.
ETR - EXISTING CIRCUIT TO REMAIN. LOAD SHOWN BASED UPON EXISTING DRAWINGS OR 80% OF FULLY LOADED BREAKER AMPACITY.

WHERE ROOM NAME/NUMBER IS INDICATED FOR CIRCUIT DESCRIPTION, CONTRACTOR IS RESPONSIBLE FOR COORDINATING EXACT NAME/NUMBER WITH ARCHITECTURAL PLANS PRIOR TO INSTALLING CIRCUIT DIRECTORY.

TECHNOLOGY SITE PLAN

1" = 20'-0"

NOTES:

1. SPLICES SHALL BE AVOIDED WHERE POSSIBLE. WHERE REQUIRED, SPLICES SHALL BE MADE WITH WATERPROOF CONNECTORS.
2. CONCRETE ENCASEMENT TO BE 3,000 PSI MINIMUM.
3. DO NOT LOCATE BOXES IN HIGH VOLUME TRAFFIC APPLICATIONS.
4. COMPACT SOIL AROUND BOX TO MANUFACTURERS RECOMMENDATIONS.
5. THIS DETAIL IS INTENDED TO SHOW GENERAL DESIGN INTENT ONLY. THE ELECTRICAL CONTRACTOR MUST VERIFY ALL INSTALLATION REQUIREMENTS WITH THE MANUFACTURER PRIOR TO THE BIDDING AND INSTALL ALL BOXES ACCORDINGLY.

TECHNOLOGY GENERAL NOTES:

A. REFER TO ALL TECHNOLOGY DETAIL DRAWINGS AND TECHNOLOGY SPECIFICATION SECTIONS FOR ADDITIONAL INFORMATION.
B. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE TECHNOLOGY INSTALLATION. COORDINATE FLOOR BOX AND DEVICE LOCATIONS WITH SYSTEMS FURNITURE AND EQUIPMENT BEING PROVIDED BY OTHERS.
C. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER TECHNOLOGY DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATIONS WITH DIMENSIONS INDICATED ON ARCHITECTURAL DRAWINGS. REFERENCE ARCHITECTURAL ELEVATIONS AND TYPICAL DEVICE MOUNTING DETAILS AND NOTES.
D. REFERENCE MECHANICAL AND PLUMBING DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE SPEAKERS, SECURITY DEVICES, TECHNOLOGY OUTLETS, DISPLAYS, RACKS, CABLE, AND PATHWAYS WITH ELECTRICAL, MECHANICAL AND PLUMBING EQUIPMENT.
E. PRIOR TO ROUGH-IN COORDINATE EXACT POWER REQUIREMENTS AND LOW VOLTAGE ROUGH-IN REQUIREMENTS FOR ALL OWNER FURNISHED EQUIPMENT AND SYSTEMS.
F. E.C. TO FURNISH ROUGH-IN AND AC POWER TO EQUIPMENT PER TECHNOLOGY DRAWINGS.
G. E.C SHALL BE RESPONSIBLE TO FURNISH AND INSTALL RACEWAYS, SLEEVES, PATHWAYS, CORING AND FIRE STOPPING FOR LOW VOLTAGE SYSTEMS. REFERENCE TECHNOLOGY DRAWINGS FOR REQUIREMENTS.
H. COORDINATE ALL TECHNOLOGY OUTLETS WITH ADJACENT ELECTRICAL OUTLETS FOR ELEVATION AND SPACING BETWEEN BOXES. REFERENCE THE TECHNOLOGY DETAIL SHEETS.
I. TECHNOLOGY OUTLETS SHALL MATCH THE MATERIAL AND FINISH OF THE ADJACENT POWER OUTLETS. COLOR AND FINISH OF ALL OUTLETS SHALL BE DETERMINED BY THE ARCHITECT. REFER TO TECHNOLOGY DETAIL DRAWINGS FOR COLORS OF INDIVIDUAL JACKS BY FUNCTION.
J. POWER RECEPTACLES ARE SHOWN FOR COORDINATIOIN PURPOSES ONLY. NOT ALL POWER OUTLETS WILL APPEAR ON THIS SHEET. REFER TO THE ELECTRICAL DRAWINGS FOR DETAILED INFORMATION REGARDING POWER SYSTEMS
K. COORDINATE ACTUAL PATHWAY ROUTING, INCLUDING ALL CABLE TRAYS, SLEEVES, CONDUIT STUBS, AND J-HOOK PATHS WITH THE INSTALLING CONTRACTOR. MEASURE ACTUAL CABLE PATHWAY LENGTHS TO VERIFY THAT NO PERMANENT LINK WILL EXCEED TIA STANDARDS. ADVISE THE CM, ARCHITECT, AND DESIGNER SHOULD ANY PRELIMINARY MEASUREMENTS INDICATE INSTALLED CABLING MAY EXCEED PERMANENT LINK LENGTH LIMITS PRIOR TO THE CABLE INSTALLATION.

TECHNOLOGY CODED NOTES: (#)

1. SEE ENLARGED PLANS FOR MORE DETAILS REGARDING ROOM TECHNOLOGY.
2. LOCATION OF RESIDENT CENTRAL WIRING PANEL FOR CONNECTION OF TELEPHONE, DATA, AND CATV OUTLETS WITHIN THE RESIDENT UNIT. REFER TO TECHNOLOGY DETAIL DRAWINGS FOR MORE INFORMATION ON THE CENTRAL WIRING PANELS.
3. THREE (3) 4" EMT CONDUITS TO SECOND FLOOR
4. COORDINATE PLACEMENT OF ELEVATOR COMMUNICATIONS OUTLETS WITH THE ELEVATOR EQUIPMENT.
5. COORDINATE PLACEMENT OF FIRE ALARM COMMUNICATIONS OUTLETS WITH THE FACP. OUTLETS SHALL BE WITHIN THE CONTROL PANEL.
6. COORDINATE PLACEMENT OF LIGHTING CONTROL PANEL COMMUNICATIONS OUTLETS WITH THE LCP. OUTLETS SHALL BE WITHIN THE CONTROL PANEL.
7. TWO (2) 4" SCHEDULE 80 RNC CONDUITS FOR COMMUNICATIONS SERVICES INTO THE BUILDING. COORDINATE EXACT PLACEMENT AND PATH WITH SERVICE PROVIDERS PRIOR TO COMMENCING SITEWORK.

TECHNOLOGY OUTLET PLATE DETAILS

N.T.S.

TECHNOLOGY SYMBOL LEGEND

SYMBOL	DESCRIPTION
XX	TECHNOLOGY / SYSTEM CODED NOTE
RI	INDICATES THAT THE DEVICE IS TO BE ROUGHED-IN FOR FUTURE INSTALLATION. PROVIDE BLANK FACEPLATE.
▽	A DEVICE BY ITSELF IS A WALL MOUNTED DEVICE. THE DEVICE IS TO MOUNTED SO THAT THE CENTER OF THE DEVICE IS 18" AFF UNLESS OTHERWISE NOTED. REFER TO THE SECURITY, SOUND, AV, AND TECHNOLOGY DEVICE LEGENDS FOR OTHER SYMBOLS THAT MAY BE USED IN THIS PROJECT.
▽	A DEVICE WITHIN A CIRCLE IS A CEILING MOUNTED DEVICE. REFER TO THE SECURITY, SOUND, AV, AND TECHNOLOGY DEVICE LEGENDS FOR OTHER SYMBOLS THAT MAY APPEAR WITHIN A CIRCLE.
▽	A DEVICE WITHIN A SQUARE IS A FLOOR MOUNTED DEVICE. REFER TO THE SECURITY, SOUND, AV, AND TECHNOLOGY DEVICE LEGENDS FOR OTHER SYMBOLS THAT MAY APPEAR WITHIN A SQUARE.
	FURNITURE SYSTEM WALL DATA FEED. 4-11/16" BOX WITH 1-GANG RING. PROVIDE BLANK SS PLATE WITH GROMMET OR CHASE NIPPLE SIZED FOR THE QUANTITY OF CABLES. PROTECT CABLES USING SPLIT-LOOM OR SPIRAL WRAP, BLACK IN COLOR, FROM WALL PLATE TO SYSTEM. PROVIDE SUFFICIENT CABLE AT BOX TO REACH FARTHEST OUTLET IN FURNITURE SYSTEM.

CONDUIT & ROUGH-IN INSTALLATION NOTES:

A. CONDUIT & ROUGH-IN INSTALLATION IS THE RESPONSIBILITY OF THE ELECTRICAL CONTRACTOR.
B. ELECTRICAL CONTRACTOR SHALL PLACE PULL STRINGS IN ALL CONDUITS.
C. ALL CONDUITS SHALL HAVE BUSHINGS INSTALLED AT CONDUIT ENDS AND AT ALL BOX FITTINGS.
D. CONDUITS SHALL EXTEND TO ACCESSIBLE CEILING AREAS.
E. TYPICAL ELEVATIONS ARE SHOWN. VERIFY ACTUAL ELEVATIONS WITH PLAN DRAWINGS.
F. TECHNOLOGY OUTLETS ARE TO BE COORDINATED WITH ASSOCIATED POWER OUTLETS WHERE REQUIRED.

TECHNOLOGY BACKBOX AND CONDUIT DETAILS

N.T.S.

DETAIL NOTES:

1. EACH INDIVIDUAL EQUIPMENT RACK SHALL BE GROUNDED TO THE BUSBAR (PBB, SBB) VIA ITS OWN HOMERUN. NO DAISY CHAINING WILL BE ALLOWED!
2. ALL GROUNDING CONDUCTORS SHALL BE TAGGED AT THE PRIMARY BONDING BUSBAR (PBB).
3. USE PAINT PIERCING HARDWARE ON ALL RACKS, CABLE TRAY, LADDER RACK AND MOUNTING RAILS.
4. ALL CONNECTORS SHALL BE DOUBLE LUG COMPRESSION STYLE FITTINGS.
5. BUSBARS SHOWN ARE FOR ILLUSTRATION PURPOSES ONLY. ACTUAL SIZE IS DETERMINED BY THE SPECIFICATIONS AND INDIVIDUAL TECHNOLOGY ROOM REQUIREMENTS
6. ALL MATERIALS AND TERMINATIONS FROM THE GROUNDING BUSBARS TO THE TECHNOLOGY ROOM DEVICES ARE THE RESPONSIBILITY OF THE TECHNOLOGY CONTRACTOR

NOTE: WHERE DOOR IS INTEGRATED WITH AN ADA DOOR OPERATOR, VALID USE OF CARD READER OUTSIDE WILL ELECTRONICALLY RETRACT LATCH OF EXIT DEVICE. OUTSIDE ADA ACTUATOR SWITCH WILL NOT CYCLE AUTOMATIC OPERATOR UNLESS LATCH BOLT IS RETRACTED (MAY UTILIZE LATCH BOLT SENSOR SWITCH FOR THIS FUNCTION). INSIDE ADA ACTUATOR SWITCH PROVIDES A CONTACT CLOSURE TO ACCESS CONTROL BOARD TO RETRACT LATCHBOLT AND SHUNT ANY ALARM. ONCE LATCH OF EXIT DEVICE RETRACTS, AUTOMATIC OPERATOR CYCLES. **FREE EGRESS IS ALWAYS PERMITTED.**

SECURITY DEVICE LEGEND

SYMBOL	DESCRIPTION
CR	CARD READER - MOUNT TO 1-GANG BOX AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
CR K	CARD READER w. KEYPAD - MOUNT TO 1-GANG BOX AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
CR M	CARD READER MULLION MOUNT - MOUNT TO DOOR MULLION AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
DC	DOOR CONTACT - MOUNT IN DOOR FRAME AND STUB UP TO ACCESSIBLE CEILING
DC S	DOOR CONTACT, SURFACE MOUNT - MOUNT TO DOOR PANEL & TRACK, STUB UP TO ACCESSIBLE CEILING
DR	DOOR RELEASE - MOUNT TO 1-GANG BOX AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
EL	ELECTRIC LOCKSET - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
EP	ELECTRIC PANIC w. LATCH RETRACTION & REQUEST-TO-EXIT - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
ES	ELECTRIC STRIKE - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
KP	KEYPAD - INTRUSION DETECTION SYSTEM. MOUNT TO 3-GANG BOX AT 48" AFF.
KS	KEYSWITCH - MOUNT TO 1-GANG BOX AT 48" AFF. LOCK CORE SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS AND DIMENSIONS.
MS	MOTION SENSOR - MOUNTS TO 1-GANG BOX MOUNTED AT ELEVATION NOTED
PB	PANIC BUTTON - MOUNT UNDER COUNTER, WIRE TO 1-GANG BOX AT 18" AFF. STUB UP TO ACCESSIBLE CEILING
PT	ELECTRIC POWER TRANSFER - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
RX	REQUEST -TO-EXIT - MOUNT TO 1-GANG BOX, HORIZONTAL ABOVE DOOR AT AT 96" AFF UON.
MS	CEILING MOTION SENSOR - MOUNTS TO 3-1/2" OCTAGON BOX ON TILE SUPPORT
VM	VIDEO INTERCOM MASTER, DESK MOUNT - CONNECTS TO DEDICATED DATA OUTLET UNDER COUNTER AT 18" AFF.
VS	VIDEO INTERCOM SUBSTATION, FLUSH MOUNT - MOUNT WITH CALL BUTTON BELOW 48" AFF. IN PROVIDED BACKBOX. REQUIRES ONE (1) CAT6 CABLE HOME-RUN TO DATA RACK. PROVIDE DOOR RELEAZE CABLING FROM SUBSTATION TO ADJACENT CONTROLLED DOOR TO PERMIT DOOR RELEASE FROM IC MASTER.
MOUNT TYPE	CEILING MOUNTED IP CAMERA. REFER TO CAMERA SCHEDULE FOR MORE INFORMATION. CAMERAS REQUIRE ONE (1) CAT6 NETWORK CABLE. RECEIVE POWER OVER ETHERNET.
MOUNT TYPE ELEVATION	WALL MOUNTED CAMERA. REFER TO CAMERA SCHEDULE FOR MORE INFORMATION. CAMERAS REQUIRE ONE (1) CAT6 NETWORK CABLE. RECEIVE POWER OVER ETHERNET. EXTERIOR CAMERAS REQUIRE IN-LINE LIGHTNING/SURGE SUPPRESSION AT POINT OF ENTRY, GROUNDED TO BUILDING STEEL. SEE VIDEO SURVEILLANCE SPECIFICATIONS FOR MORE INFORMATION.

NOTE: USE OF INTERNAL AUXUILIARY CONTACTS WHICH ARE PART OF THE OVEHEAD DOOR OPERATOR ARE ACCEPTABLE FOR USE AS POSITION SENSORS IF INTENDED FOR THAT PURPOSE

NOTE: THIS DRAWING IS DIAGRAMMATIC IN NATURE AND IS INTENDED TO PROVIDE A GENERAL REFERENCE AS TO THE INTENDED SYSTEM CONFIGURATION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THAT ALL SIGNAL LEVELS ARE WITHIN THE TOLERANCES INDICATED IN SPECIFICATION SECTION 274133. TAP VALUES ARE ESTIMATED BASED UPON PREDICTED CABLE ROUTINGS, PATHWAYS, AND CABLE TYPES. ADJUST TAP VALUES, ATTENUATORS, AND AMPLIFIER GAIN AND SLOPES TO MATCH INSTALLATION CONDITIONS.

Determination of the Ohio Department of Development:

On the basis of the environmental assessment of the above project, I have made the following finding:

☐ Finding of No Significant Impact (FONSI) [24 CFR 58.40(g)(1); 40 CFR 1508.27]
The project will not result in a significant impact on the quality of the human environment.

☐ Finding of Significant Impact [24 CFR 58.40(g)(2); 40 CFR 1508.28]
The project may significantly affect the quality of the human environment.

CEO Name: Lydia L. Mihalik
Director, Ohio Department of Development

Address: 77 South High Street
Columbus, Ohio 43215
