

This document describes the Housing Finance Agency (HFA) Hardest-Hit Fund (HHF) data that state HFAs are required to provide to the U.S. Department of the Treasury. It includes quarterly borrower characteristic data and program specific performance data. All HFA HHF data submitted to the U.S. Department of the Treasury must be accurate, complete, and in agreement with retained HFA records. Data should be reported by each state HFA by the 45th day following the quarter.

Data requested in the "Borrower Characteristic" worksheet should be reported in aggregate for all HHF programs run by the state HFA. Program specific data is separated into reporting tabs for each individual program. State HFAs should report program performance data on an individual program basis. A data dictionary has been provided to assist in the definition of each data point.

Line 3, 6, 9 Program Intake / Evaluation. Number of Unique Borrowers Denied Assistance or Withdrawn from Program will not balance cumulatively as a result of homeowners moving within program states (to approval, for example).

Line 8 Program Expenditures. There is a cumulative difference of \$5,694,773.43 between the QFR and QPR as a result of all HSA monies including unearned being accounted for on the QFR.

Line 3, 6, 9 Program Intake / Evaluation. Number of borrowers approved, denied and withdrawn will not balance cumulative QoQ as a result of homeowners moving between outcomes.

Line 20 Median first lien housing payment after assistance was incorrectly reported in Q2. This report correctly reports \$0 for both the QTD and cumulative fields.

Line 50 Program Outcomes. The cumulative Borrowers No Longer in the HHF Program will not sum in a quarter-over-quarter fashion. 16 borrowers who exited the program in a previous quarter, but were not counted due to the timeframe for processing final records, are included in the cumulative for this quarter.

Line 3, 6, 9 Program Intake / Evaluation. Number of borrowers approved, denied and withdrawn cumulative will not balance cumulative QoQ as a result of issues identified with validation tool previously identified by third party auditor and corrected.
